## FOREWORD

The usefulness of education statistics, not only for educational planning and administration, but also for manpower planning and administration, requires no reiteration. It is now well recognised that such education statistics, to be meaningful, will have to include not only all levels of education and training, but the formal as well as non-formal facilities. The Ministry of Education and Social Welfare, therefore, extended the scope of the Third All-India Educational Survey to cover educational and training facilities, formal and non-formal, at all levels and assigned the responsibilities for survey of the various aspects to a number of agencies. The IAMR was assigned the survey of technical and vocational education and training facilities at the school level outside the university system.

2. This publication, one of a series of Statewise publications, relates to technical and vocational education and training facilities at the school level in the State of Uttar Pradesh. It is hoped that this will be found useful by planners and administrators particularly in the State of Uttar Pradesh.

3. The Institute of Applied Manpower Research Survey was initiated by Dr. L.S. Chandrakant, the then Director of the Institute, and coordinated, during the initial stages, by Prof. M. Muthukrishnudu, Chief Coordinator, who has since returned to the College of Engineering, Kakinada (Andhra Pradesh).

4. We are grateful to the members of the Advisory Committee formed for the Third All-India Educational Survey for their very useful suggestions on various aspects of the IAMR Survey. To the Director of Technical Education, Uttar Pradesh, who coordinated the investigations and the various departments and institutions who so willingly supplied the required data, goes the credit for the exhaustive and complete coverage of data. All the institutions identified and addressed for information have provided the necessary data; as such the response in the State is 100 per cent.

5. The research team for this study was composed of S/Shri O.U. Khan (Head of Research Division), M.C. Goel, R.P. Tripathi, N.K. Soni, Smt. Santosh Agarwalla and Shri K.C. Veoli. In this task, they were ably assisted by a team of Research Investigators.

## Section I

### INTRODUCTION

This Report presents the survey data regarding technical and vocational education facilities at the school level outside the university system in the State of Uttar Pradesh. These data are part of the Third All-India Educational Survey undertaken by the IAMR at the request of the Ministry of Education and Social Welfare. It is pertinent to note that it is for the first time that a survey of all technical and vocational education and training institutions including all formal and informal institutions imparting technical and vocational education and training at the school level has been made.

2. The First All-India Educational Survey conducted in 1957 by the Ministry of Education in collaboration with all States and Union Territories and the Second All-India Educational Survey conducted in 1965 by the Ministry of Education and Social Welfare and the Planning Commission through the National Council of Educational Research and Training covered only the school education. Keeping in view the extended scope and coverage of the survey, it was decided to involve a number of agencies in the survey to look after different aspects of education. Specifically, the following agencies were involved:

- |   |  |
|---|--|
| 1. National Council of Educational Research and Training              | School Education                           |
| 2. Institute of Applied Manpower Research                             | Technical and Vocational Education         |
| 3. University Grants Commission                                       | Higher Education                           |
| 4. National Staff College for Educational Planners and Administrators | Educational Administration and Supervision |
| 5. Department of Culture, Ministry of Education and Social Welfare    | Cultural Statistics                        |

3. The IAMR Survey of technical and vocational education at school level is in two parts:

Part I is an inventory of the educational and training facilities in technical and vocational education as on 31st December, 1973. The various items of this inventory are:

- (a) number of institutions with characteristics such as their location, type of management, availability of hostel residence, etc. ;
- (b) courses of study with information about their level, admission requirements, duration, selection procedure and number of reserved seats\*;
- (c) teaching and instructional staff and other staff--- male and female, sanctioned and in position, etc. ;
- (d) student population by courses of study and the number passing out; and
- (e) recurring expenditure.

Part II is an indepth study of the organisational structure of this system of education with a view to prepare its profile in terms of the agencies responsible and their respective roles; their staffing pattern, methods of recruitment and promotional channels; finance, control and supervision of institutions; responsibility for development of adequate facilities; maintenance of quality and standard of education; scope and content of various regulations governing vocational education and training.

While the inventory of facilities is attempted on Census basis, the indepth studies of the system are planned on a sample basis.

4. The All-India Report is being brought out as a separate document. The present report relates to Part I of the Survey of the State of Uttar Pradesh.

---

\* All-India Directory of Technical and Vocational Education and Training Institutions, published separately, provides information on courses of study along with their duration, admission requirements, selection procedure etc. for individual institutions.

5. Uttar Pradesh covers an area of approximately 294,413 Sq. Kms., which accounts for about 8.97 per cent of the total area of the Indian Union. In terms of population it is the largest State and according to 1971 Census 88.34 million persons of whom only 21.64 per cent were literate. It is primarily an agricultural State but recently a number of big public undertakings have been set up. These include the Bharat Heavy Electricals Ltd. at Hardwar, the Indian Drugs and Pharmaceuticals at Rishikesh, the Diesel Locomotive factory at Varanasi, Fertilizer factory at Gorakhpur, the Triveni Structural at Naini and Deep Freeze Meat Plant at Tundla, the Hindustan Aeronautics at Lucknow and two cement factories at Churk and Dalla. The State also has a number of other industrial plants producing sugar, textile, glass and glasswares, paper, chemicals, leather and foot-wear, etc. There are also a large number of traditional village and cottage industries.

#### Advisory Committee

6. An advisory Committee consisting of representatives from various ministries and other organisations was formed to guide the Institute in carrying out the Survey. The Committee has been meeting from time to time and has taken a keen interest in the Survey work. The composition of the Advisory Committee is given at Appendix I.

#### General Comments

7. Before comments on individual tables are made, it will be worth while here to list a few points of general nature.

(i) Reference Date: The reference date for most of the data, except where it is explicitly mentioned, is 31st December, 1973. This reference date has been adhered to on the advice of the Union Education Minister and the Advisory Committee on Third All-India Educational Survey. This was also the reference date in the earlier two All-India Educational Surveys. Further, this date is considered to be more convenient and useful for planning purposes. As far as enrolment and staff position are concerned, the information is with reference to this date, but the statistics on intake capacity, out-turn and expenditure relate to the academic year 1972-73.

(ii) Location of Institutions: The rural/urban classification of institutions has been attempted on the basis of the 1971 Census classification of villages and towns. The category of "semi-urban" was found to be redundant.

(iii) Co-educational Institutions: The category of co-educational institutions has been merged with the category of "institutions for boys".

(iv) Sanctioned Intake: The sanctioned intake for all the courses and institutions pertains to the seating capacity for the first year of the course except for the Industrial Training Institutes, where it is for the entire course.

(v) Education and Training Facilities: Some of the institutions exclusively provided in-service training facilities, while a few others did so along with some educational and training courses. Both of them have been covered by the Survey. However, the in-service training institutions with courses of less than one month's duration have been excluded. Similarly, all courses of less than one month's duration have also not been taken into account, while giving the statistics on intake, enrolment and out-turn.

(vi) Classification of Institutions: The institutions have been categorised into the following 20 groups:

1. Polytechnics
2. Industrial Training Institutes
3. Junior Technical Schools
4. Crafts and Handicrafts Schools
5. Industrial and Technical Schools
6. Agricultural Schools
7. Forestry Schools
8. Veterinary and Animal Husbandry Schools
9. Nursing, A. N. M. and Health Visitors' Schools
10. Pharmacy Schools
11. Other Para-Medical Schools
12. Schools for Training in Co-operation
13. Commercial Training Schools
14. Schools for Village Level Officials
15. Mining Schools

16. Fishery Schools
17. Schools for Music, Dance, Drama, etc.
18. Schools for Drawing and Painting
19. Special Schools
20. Other Schools

The above classification has been followed to enable an easy comparison with the statistics made available by different agencies. For example, only those institutions have been taken as polytechnics, industrial training institutes, junior technical schools, nursing, auxiliary nurse midwifery and health visitors' schools, etc., which are so recognised by their respective managing organisations like the Ministry of Education, the Directorate General of Employment and Training, the Nursing Council of India, etc. The nomenclature of some institutions did not very clearly indicate the nature of the education and training offered by them. These institutions have, therefore, been classified after taking into account the content and level of their courses.

Out of the above listed 20 categories of technical and vocational education and training institutions, Uttar Pradesh had only the following sixteen types of institutions:

1. Polytechnics
2. Industrial Training Institutes
3. Junior Technical Schools
4. Crafts and Handicrafts Schools
5. Industrial and Technical Schools
6. Agricultural Schools
7. Forestry Schools
8. Veterinary and Animal Husbandry Schools
9. Nursing, A. N. M. and Health Visitors' Schools
10. Other Para-Medical Schools
11. Schools for Training in Co-operation
12. Schools for Village Level Officials
13. Fishery Schools
14. Schools for Music, Dance, Drama, etc.
15. Special Schools
16. Other Schools

(vii) Industrial and Technical Schools: The category of "Industrial and Technical Schools" is the residual category of technical institutions. Hence, all those institutions, which could not be covered by polytechnics, industrial training institutes, junior technical schools and crafts and handicrafts schools, have been shown under this category.

(viii) Staff: Information on staff was collected under four heads, viz., (i) teaching and instructional staff, (ii) workshop and laboratory staff, (iii) administrative staff, and (iv) class IV staff, by designation. However, on the advice of the Advisory Committee for the Survey of Technical and Vocational Education and Training, these have been re-grouped into two broad categories of (a) teaching and instructional staff and (b) other staff. The reclassified category of teaching and instructional staff also includes the technical staff of workshop and laboratories called upon to take practical classes.

(ix) Expenditure: The break-up of recurring expenditure was not available from a number of institutions. We have, therefore, given only the total recurring expenditure of institutions. Most of the institutions, specially in the public sector, have expressed their inability to provide information on the recurring expenditure on land and building because they are looked after by the State public works departments.

(x) Out-turn: In some training institutions there is no formal examination. The candidates undergoing a course of training are awarded a certificate after the completion of training. All such candidates are included in the out-turn.

## Section II

## STRUCTURE OF THE REPORT

8. The survey data presented in this report are broadly grouped in three parts. Part I-(A) covers inventory of all the recognised institutions imparting technical and vocational education and training in the State. This part presents information on the number of institutions, enrolment, out-turn, staff and recurring expenditure. These items have been further classified by certain characteristics such as rural and urban location, male and female break-up of student body, type of management of institutions, etc.

9. Part I-(B) of the report presents a districtwise analysis of technical and vocational education and training facilities by various characteristics. This analysis of the survey data at the district level will be of immense use for drawing up district education plans. The information on vocational education streams in the high/higher secondary schools is also presented. It will facilitate in determining the number and type of new institutions that could be set up in the future specially in view of the local requirements of the district and the introduction of the new system of school education, i. e., 10 + 2 + 3.

10. Part I-(C) of the report deals with the facilities of technical and vocational education which are provided in the general high/higher secondary schools as elective groups or streams. These data have been collected through the aegis of the National Council of Educational Research and Training, New Delhi. The information on vocational streams of the high/higher secondary schools is provided on number of institutions, enrolment and staff only.

11. In the end, a list of all the institutions which formed the inventory of technical and vocational education and training institutions in the State is provided at Appendix II.

**Brief Comments on Tables**

12. (i) Tables 1 to 5 present the information on institutions and their characteristics such as age, rural/urban location, type of hostel facility and type of management.

(ii) Tables 6 to 12 present the information on pupils. This information is provided on intake, enrolment and out-turn of various types of courses separately for boys and girls. Tables 11 and 12 present a standardised classification\* of the sanctioned capacity, enrolment and out-turn according to four stages of general school education, viz., primary, middle, high/higher secondary and post higher secondary. This standardisation of enrolment and out-turn is attempted to have a broad idea of the level of education and training imparted by the technical and vocational education and training institutions. This information read along with similar stagewise enrolment and out-turn of the general education system will enable the educational planners to have a better estimate, if not a precise one, of the pupils in different educational stages. The classification of enrolment and out-turn in these stages has been worked out on the basis of minimum educational qualifications required for admission into various courses and the duration of the course. For example, if a particular course required illiterate or Class III pass persons and had a duration of one or two years, its enrolment and out-turn have been shown under 'primary' stage. Similarly, courses requiring matriculation, SSLC or higher secondary as minimum educational qualifications for admission have been shown under 'post higher secondary' stage. The consolidated information for a particular course, irrespective of its location into a variety of institutions, can also be had from Table 12.

(iii) Tables 13 to 17 present data on the sanctioned and actual strength of staff of technical and vocational education and training institutions.

(iv) Table 18 presents the total recurring expenditure by type of institution and management. Table 19\*\* provides per institution and per student average recurring expenditure separately for institutions located in rural and urban areas. Similar information for institutions meant for girls is provided in Table 20\*\*.

(v) Table 21 is a summary table and presents the information on institutions, staff, enrolment and recurring expenditure by type of institution and management.

---

\* Stagewise classification of data has been attempted for only full-time courses having a duration of one full academic year.

\*\* In these tables only those institutions which supplied data both on enrolment and expenditure have been considered.

13. District Tables A, B, and C: These tables give the district-wise inventory of technical and vocational education and training facilities. There are three tables for each district providing information on (A) number of institutions, (B) intake capacity, enrolment and out-turn, and (C) sanctioned and actual strength of staff. It is considered that these data will be basic and sufficient for drawing up district level plans for technical and vocational education and training.

14. Vocational Streams Tables I to III: These last three tables provide data on the technical and vocational electives/streams offered by the high/higher secondary schools of the State.

## Section III

## SURVEY FINDINGS

15. On 31st December, 1973, the State of Uttar Pradesh, according to this Survey, had 298 institutions imparting technical and vocational education and training. Out of these, 263 were located in urban areas and 35 in rural areas. Complete hostel facilities were available in only 79 institutions out of which 62 were located in urban areas.

16. The number of institutions for girls was 90, out of which 49 were managed and financed by the State Government. As many as 47 of these girls' institutions were "Nursing, A.N.M. and Health Visitors' Schools" and 26 "Industrial and Technical Schools". There were two Polytechnics and one Industrial Training Institute also. All the girls' institutions were located in urban areas.

17. The districtwise break-up of the institutions, which is presented in Table 5, shows that all the districts of the State did not have a fair share of technical and vocational education and training institutions. The KAVAL towns namely Kanpur, Agra, Varanasi, Allahabad and Lucknow had 17, 9, 15, 19, and 34 institutions respectively. There was only one institution each in seven districts. The district of Unnao had no technical and vocational education and training institutions.

18. The total enrolment in the technical and vocational education and training institutions was 55,254 and its breakup among boys and girls was 48,292 and 6,962 respectively. In some courses the actual admissions have been more than their sanctioned capacity. While 45,573 students were enrolled in technical courses offered by polytechnics, industrial training institutes, junior technical schools, crafts and handicrafts schools and industrial and technical schools, only 9,681 students were enrolled in other vocational courses. During the year 1972-73, 20,290 students graduated from these courses.

19. As far as part-time training facilities are concerned, 15 institutions (polytechnics, crafts and handicrafts schools, industrial and technical schools, schools for village level officials, and schools for music, dance, drama, etc.) were running them in the State. The enrolment in the part-time courses was 1,441.

20. The proportion of scheduled caste and scheduled tribe students in the total enrolment by sex was as follows:

(a) Boys:	9 per cent
(b) Girls:	5 per cent
(c) Total:	9 per cent

21. Only 285 institutions reported information on staff. These reporting institutions were manned by 10,734 persons distributed between the "teaching and instructional staff" and "other staff" as 5,258 and 5,476 respectively. The sanctioned staff for these institutions was, however, 11,791 classified into "teaching and instructional staff" and "other staff" as 6,022 and 5,769 respectively. There were, however, 790 vacant posts for "teaching and instructional staff" and 309 for "other staff". Some institutions had more staff than sanctioned. The proportion of female staff in the total working staff in the two categories was 9 per cent and 7 per cent respectively (giving an overall proportion of 8 per cent).

22. The information on recurring expenditure was furnished by only 252 institutions. The total recurring expenditure of these reporting institutions during the year 1972-73 was Rs 53 million.

23. Besides these facilities of technical and vocational education and training, the high/higher secondary schools for general education in the State also had some technical and vocational electives. These schools offered vocational electives/streams in (a) Commerce, (b) Home Science, (c) Drawing and Painting, (d) Agriculture, (e) Technical Trades, and (f) Music, Dance and Drama. It is difficult to give the consolidated number of schools which offered these streams in view of the fact that a particular institutions might be offering more vocational streams than one. The total number of the staff exclusively meant for these electives cannot also be given as it is quite an usual practice for a teacher to teach more subjects than one. With these limitations, the number of institutions having individual elective streams and the teachers teaching these electives are given in Tables I to III. The total number of students offering these electives was 35,659.
