DISTRICT PLANS

INTRODUCTORY NOTE

According to the direction of the Planning Commission, a State Plan has to be presented in two different ways, namely, according to different sectors of development represented in it and according to regions or districts. We have already prepared and published our Plan according to sectors of development and now break up the Plan district-wise. This is necessary in order to educate public opinion, encourage local initiative and obtain public Co-operation in the execution of the Plan.

The National Plan and the State Plan are being prepared on annual basis within the framework of the Five-Year Plan in order to make necessary modifications and adjustments in the course of execution. Consequently the appropriate period for District Plans would also be a year. We accordingly began preparing our District Plans with particular reference to the first year against the background of the Five Year Plan. Originally the intention was that such District Plans would be prepared every year. But from our experience in the works so far, it seems that the preparation of annual District Plans every year may not be possible under the present circumstances. We have, therefore given in the following pages the district-wise break up of the Plan as a whole as far as available.

In breaking up the Plan district-wise we have to face certain difficulties. Some schemes are clearly meant for the benefit of particular districts and they can't be included in the Plans of those districts. But some schemes are for the benefit of the State as a whole and some are for the benefit of several districts taken together. The location of these schemes in a particular district cannot be taken to mean that it is for that district only. The amount of benefit that will accrue to each district cannot also be ascertained exactly. It is also not possible in all cases to work out the amount of money to be spent in each district because accounts are kept project-wise and not district-wise. In such cases the allocation of expenditure amongst several districts can only be approximate. Again, the execution of these projects depends on the availability of suitable land, raw materials and other facilities. It cannot be said definitely in advance in what places these projects will be actually located.

Nevertheless, as district is the most important unit of the State administration, we have tried to show, even in a rough way, the developments which are proposed to be made in each district. Those schemes which we could not break up district-wise have been shown in a separate list.

The following pages contain a brief description of the development plan of each district separately. The number of schemes are so large that it is impossible in a narrative to mention all schemes and to indicate the expenditure to be incurred on them and the physical targets to be achieved.

BURDWAN DISTRICT

Forests : Three schemes relating to the development of forests are to be taken up in Burdwan district during the Second Five-Year Plan. It is proposed to cover 595 acres of waste lands with matchwood, bamboo, grass and other plantations of which 450 acres will be covered in 1956-57. This will help develop industries, specially the paper industry which will throw open additional employment opportunities at the local level. In order to increase the efficiency of the forest staff, construction of buildings (for office, residence and rest houses) will also be undertaken. On the whole, a sum of Rs. 15·73 lakhs is proposed to be spent in Burdwan district under the head "Forests" of which Rs. 1·78 lakhs will be spent in 1956-57.

Fisheries : Under this head, seven schemes will be undertaken in the district during the Second Plan. The principal objects of these schemes are to grant financial assistance to needy fisherman in the form of loans, to demonstrate improved methods of pisciculture and to encourage the production of carp fry. The total expenditure involved in these schemes to be undertaken in Burdwan will be Rs. 3·37 lakhs during the five-year period 1956-61, of which Rs. 0·36 lakh is proposed to be spent in 1956-57.

Co-operation : The schemes under "Co-operation" to be undertaken in Burdwan district envisage reorganisation and formation of new co-operative farming societies, improvement of land mortgage banks, formation of large-sized co-operative societies by amalgamating a number of primary credit societies and reorganisation of central co-operative banks. In most of the schemes, the State Government will extend help by participating in the share capital of the societies and giving subsidies towards managerial expenditure or expenditure for maintenance of efficient supervisory staff. The total cost of the schemes in Burdwan district during the five-year period 1956-61 will be Rs. 9·32 lakhs, of which Rs. 0·61 lakh is proposed to be spent in 1956-57.

Power : Baidyapur in the district of Burdwan is to be electrified and bulk supply of power is to be given to seven collieries and two places, namely, Ukhra and Domohani. These schemes will involve a total expenditure of Rs. 37·71 lakhs of which Rs. 4·22 lakhs will be spent in 1956-57.

Industry : The district of Burdwan will derive benefit from ten schemes for the development of cottage industries. Two co-operative societies will be set up for development of hand pounding of rice and training centres will be opened for improvement of palm gur industry. A demonstration party will be set up for giving technical assistance to the makers of cane gur and khandsari and a peripartistic training centre for leather industry will also be started. To remove the difficulty of procuring raw materials and to provide marketing facilities to small producers, a wholesale depot will be opened in Burdwan. Several other cottage industry schemes are also to be undertaken. The amount of expenditure in Burdwan district under "Cottage Industry" will be about Rs. 10·12 lakhs during the Plan period, of which about Rs. 2·53 lakhs will be spent in 1956-57.

Roads : Eleven schemes of road development commenced in the First Plan period in Burdwan district have been taken over into the Second Plan. The total mileage covered by these schemes is 183·5. The number of road projects proposed in the Second Plan in the district is 18 and the mileage covered is 202·5. The total mileage of the roads developed in the district during the Second Plan period will, therefore, be 386. The total expenditure involved will be Rs. 209·50 lakhs, of which Rs. 27·00 lakhs will be spent in 1956-57.

Health : The district of Burdwan will derive benefit from about 15 health schemes undertaken during the Second Five-Year Plan. The principal items of work envisaged are the taking over by Government of the sanitary staff maintained

by the district board, improvement of the Pharmacy Training Centre at Burdwan, establishment of more health centres, construction of buildings for nurses' hostels, providing thana and subdivisional health centres with ambulances, expansion and improvement of hospitals, establishment of T. B., Leprosy and V. D. Clinics, providing more water-supply sources, etc. The total expenditure involved in these schemes in Burdwan during the five-year period will be Rs. 118.99 lakhs of which Rs. 14.70 lakhs will be spent during 1956-57.

Housing : For housing industrial workers, it is proposed to construct, 1,700 tenements at a total cost of Rs. 59.30 lakhs during the Second Plan period. Of these 400 tenements at a cost of Rs. 13.04 lakhs are to be constructed in 1956-57.

Under the Low Income Group Housing Scheme loans totalling Rs. 25.13 lakhs will be sanctioned to applicants from Burdwan district to enable them to build their own houses.

Welfare of backward Classes : Various measures have been taken in the Second Plan for the welfare of Scheduled Tribes and Scheduled Castes in Burdwan district. These include exemption of poor students from payment of tuition fees and other charges, grants for purchase of books, grants to dispensaries, sinking of wells, distribution of seeds, poultry birds, stud bulls at subsidised rates, improvement of village roads, etc. The total amount to be spent on these measures in Burdwan during 1956-61 will be Rs. 12.24 lakhs of which of Rs. 1.41 lakhs will be spent in 1956-57.

Social Welfare : Four Welfare Extension Projects (with 20 work centres) are to be undertaken in Burdwan district during the Second Plan period. Of these two projects are to be executed in 1956-57 at a cost of Rs. 50,000. These are intended to provide maternity and child welfare services, adult and social education for women, training in tailoring and other crafts, etc.

Another important scheme under this head is the scheme of reorganisation and evening Mining Class at Sitarampur in the district of Burdwan. Under this scheme it is proposed to provide a higher type of training in mining practices. The total plan provision for this scheme is Rs. 1.90 lakhs.

Agriculture : The different measures of agricultural development include, among others establishment of 15 thana Seed Farms for raising and multiplying improved seeds and distribution of 67,000 maunds of paddy, wheat, mustard and pulse seeds, 1.32 lakh tons of different kinds of fertilisers and 50 pumping plants amongst the peasants. About 368 demonstration centres for showing improved methods of cultivation will be laid out in the district. Small irrigation schemes numbering about 65 will be executed in the different parts. About 7,500 acres of waste land will be reclaimed and the Plant Protection measures will treat 1.02 lakh maunds of seeds and cover up 94,500 acres of paddy fields for control of agricultural weeds.

Animal Husbandry and Veterinary : Fourteen Artificial Insemination centres and sub-centres, 21 Key Village centres and sub-centres, 223 demonstration centres for fodder cultivation and silage, a Duck Multiplication unit at the Burdwan farm and 2 Poultry Extension centres are proposed to be set up during the Plan period. Subsidised maintenance of 180 graded calves, distribution of 4,725 maunds of fodder seeds and 16,400 poultry birds are also envisaged. District and State cattle shows are also to be organised.

In the field of Veterinary services, one Veterinary Aid Centre will be opened and maintained in each and every N.E.S. block in the district. Construction of veterinary dispensaries will be undertaken in the N. E. S. block and 5 improved "A" and "B" class veterinary hospitals will also be established. The supervisory staff entrusted with the execution of the veterinary development schemes will be strengthened and building construction for range and circle offices will be undertaken.

Education : Much stress has been laid on the development of elementary, secondary and technical education in the district. The measures contemplate expansion of twenty-five institutions catering to elementary education including basic type, improvement of the service conditions of 6207 teachers, provision for expanded facilities of accommodation for about 82 thousand primary teachers and students. Seven new and converted Senior Basic Schools will be functioning and thirty multipurpose schools would be imparting reoriented secondary education to about 8,500 pupils. Twelve high schools would be upgraded to the multipurpose status. Increased amenities of improved libraries, reading rooms and accommodation would be provided to the students and teachers.

BURDWAN DISTRICT

Name of scheme.	Plan outlay, 1956-61. (Rs. lakhs.)	Unit.	Target of work, 1956-61.
1	2	3	4
FORESTS			
1. Afforestation of waste lands including industrial plantations for match and paper industries—			
(i) Matchwood Plantations ..	7.08	Acre	2,392
(ii) Bamboo and grass plantations for the paper industry.	4.31	Acre	1,869
(iii) Other plantations ..	2.62	Acre	1,334
2. Construction of offices and quarters	1.21	Building (No.)	28
3. Construction of Rest Houses ..	0.51	Building (No.)	9
	15.73		
FISHERIES			
1. Short-term loan scheme for augmenting fish production in culturable tanks of West Bengal.	0.25	Fish (tons)	150
		Water areas (acres)	129
2. Medium term loan for fish production in the semi-derelict tanks of West Bengal.	0.50	Fish (tons)	65
		Water area (acres)	90
3. Development of derelict fisheries in the State of West Bengal.	2.00	Fish (tons)	168
		Water area (acres)	400
4. Popularising the use of fish pond manure for increasing the production of pond fisheries.	0.13	Fish (tons)	481
		Manures (tons)	411
5. Demonstration fish farm on private parties' tanks in every thana of the State of West Bengal.	0.14	Fish fry (lakh)	144
		Fish farms (No.)	10
6. Assisting the needy fishermen of the State by granting loan for augmenting fish supply.	0.30	Fish (tons)	200
		Boats (No.)	37
7. Intensifying production of carp fry by granting loans to the culturists.	0.05	Yarns (bales)	27
		Fish fry (lakh)	25
	3.37		

BURDWAN DISTRICT—contd.

BIRBHUM DISTRICT

Forests : The Schemes aim at the development of forest resources in the district. It is programmed to bring a total area of 2,736 acres under matchwood, bamboo, grass and other plantations. The first year's target is 350 acres. This will help increase the scope of local industries through the provision of supply of raw materials to them. The construction of office and staff quarters and rest houses will also be undertaken with a view to coping with the increased volume of work in connection with the execution of the development schemes.

The five-year allocation under this head for this district works at Rs. 7.69 lakhs of which Rs. 1.68 lakhs will be spent in the first year.

Fisheries : Six schemes relating to the development of fisheries will be taken up during the Plan period. These will help raise the production of fish through the adoption of improved methods of pisciculture to be demonstrated at different points and by granting financial assistance in the form of loan to needy fishermen for undertaking capital improvement works.

The total five-year expenditure for the schemes is Rs. 0.79 lakh of which Rs. 0.21 lakh is proposed to be spent in 1956-57.

Co-operation : The purpose of the schemes under this head is to institute 80 Co-operative Farming Societies, to set up one organisation to supply long-term credit, and to reorganise 80 Primary Credit Societies and two Central Banks with a view to providing an integrated co-operative structure in the district. In almost all the schemes State help will be in the form of participation in the share capital of the societies and giving subsidies to managerial and supervisory staff for the sake of efficient administration.

The cost involved during the Plan period is Rs. 5.48 lakhs of which the first year's expenditure is Rs. 0.33 lakh.

Irrigation : The district will have irrigation and power facilities during the Second Plan period as a result of the execution of the Mayurakshi Reservoir Project.

Power : Hetampur will have power-supply from the Mayurakshi grid. This will cost Rs. 8 lakhs in five years and Rs. 0.61 lakh in the first year.

Industry : Under Sericulture three Silk-reelers' Co-operatives will be expanded during the Plan period of which the work of two co-operatives will be taken up in the first year. They will provide finance when required, arrange for the marketing of products, ensure minimum wage to artisans. Besides 0.4 lakh silk worm layings will be reared and 0.15 lakh *kahans* of seed cocoons will be produced ; existing nurseries will be reorganised and mulberry gardens will be established for the improvement of sericulture industry. The total cost for the schemes is Rs. 4.45 lakhs of which Rs. 0.95 lakh will be spent during 1956-57.

A wholesale depot will be started to remove the difficulty of procuring raw materials and supply thereof to small producers. Of the 20 training-*cum*-production centres to be set up for the development of palm gur industry during the Plan period, four will be taken up in the first year. The existing district weaving school will be reorganised to impart training to 180 students.

The total cost is Rs. 3.27 lakhs of which Rs. 1.17 lakhs will be spent in the first year.

Roads : Ten schemes of road development started in the First Plan period have been included in the Second Plan. The total mileage to be covered by them is 121. During the Second Plan period 15 road projects with a coverage of 131 miles are proposed to be taken up. The over-all target of road development for the Plan period works at 252 miles.

The total cost involved is Rs. 155.92 lakhs and Rs. 13.52 lakhs is allocated for the first year.

Health : Under this head 15 schemes in all will be taken up during the Plan period. The main items of work contemplated under them are : creation of a unified health service by provincialisation of public health services, training of dais, establishment of public health centres, setting up of district and subdivisional health centres with ambulance services, establishment of T. B., Leprosy and V. D. Clinics, starting of a unit for the control of malaria-*cum*-filaria and making arrangement for better water-supply.

The total cost under this sector is Rs. 99.47 lakhs of which Rs. 15.69 lakhs will be spent during 1956-57.

Housing : Loans amounting to Rs. 12.23 lakhs will be given to applicants from this district to enable them to build their own houses under the Low Income Group Housing Scheme.

Welfare of Backward Classes : Schemes like provision of free tuition, sanction of examination fees, book grants including boarding charges, grants to dispensaries and health centres, sinking of wells, subsidised distribution of seeds and poultry, extension of irrigational facilities, setting up of training-*cum*-production centres, improvement of village roads, etc., will be taken up for the comprehensive development of Scheduled Tribes and Scheduled Castes in this district.

The cost involved for the execution of these schemes during the Plan period is Rs. 9.67 lakhs of which Rs. 1.45 lakhs is proposed to be spent in the first year.

Social Welfare : Twenty work centres and four welfare extension projects are proposed to be taken up during the Plan period. Maternity and Child Welfare Services, adult and social education for women, and imparting training in tailoring and other various crafts are the main features of these schemes.

Rs. 0.50 lakh will be spent in the first year.

Agriculture : Under the agricultural development programme 8 seed farms for raising and multiplying improved stock will be set up. About 49,250 maunds of paddy, wheat, mustard and pulse seeds and 64,000 tons of different kinds of fertilisers will be distributed among the peasants. The plant protection measures envisage treatment of 50,392 maunds of seeds and control 40,714 maunds of Alegal weeds in the paddy fields. Specific attention will be paid towards development of Jute and Sugarcane cultivation as cash crops. Four hundred demonstration centres and plots for propagating improved methods of farming will be set up throughout the district. Funds have also been provided for 70 small irrigation schemes, reclamation of 1,500 acres of waste land and also for holding crop competition amongst the villagers. There is also a specific scheme for multiplication of Dhaincha for green manuring purposes.

Animal Husbandry : Establishment of 157 demonstration centres for fodder cultivation and silage and one Poultry Extension centre, subsidised distribution of 5,500 fodder seed cuttings and 15,500 poultry birds and holding of district and State cattle shows are the important features of the Animal Husbandry development programme.

All the N. E. S. blocks functioning in the district will be provided with one modern Veterinary Aid Centre, Veterinary dispensaries will be constructed in 4 N. E. S. Blocks. Two improved Veterinary "A" and "B" class hospitals will be set up and the Veterinary field staff would be strengthened.

Education : The different measures under education seek to develop elementary and secondary education in the district. There is provision for setting up and expanding 220 primary and basic schools, providing additional and improved accommodation for Primary Schools and effecting improvement in the service conditions of 3,922 teachers. The Secondary education programme includes establishment of 3 Senior Basic Schools, setting up of 20 multipurpose schools, measures for improving teaching, library and reading room facilities, expansion and upgrading of five high schools and housing accommodation to students and teachers.

BANKURA DISTRICT

Forests : Three schemes relating to the development of forest will be taken up during the Second Plan period. A fairly large area will be covered by matchwood, bamboo, sabai grass and other plantations. This will help develop industries specially paper which would open up additional avenues of employment in the district. Staff quarters and rest houses will be constructed to increase the efficiency of the staff.

The five-year cost for these schemes is Rs. 9·48 lakhs of which Rs. 2·34 lakhs will be spent in 1956-57.

Fisheries : With a view to augmenting the production of fish in the district six schemes will be operated during the Plan period. Loans in various forms will be given to needy fishermen. Schemes for popularising the use of fish pond manures and demonstration farms showing the benefits that will result from the adoption of improved methods of pisciculture will be set up. Loans will be granted to pisciculturists for intensifying production of carp fry.

The total expenditure involved in the execution of these schemes is Rs. 0·79 lakh of which Rs. 0·20 lakh will be required in the first year.

Co-operation : Thirty-five co-operative farming societies will be formed in this district during the five years of the Plan. Of these, five will be set up in the first year. There will be a Land Mortgage Bank to provide long term credit. Besides, 80 Primary Credit Societies and one Central Bank will also be reorganised.

The total expenditure under "Co-operation" will be Rs. 4·76 lakhs of which the first year's cost is Rs. 0·32 lakh.

Irrigation : Two irrigation schemes will be undertaken in the district during the Second Plan. These schemes are likely to benefit an area of about 3·6 lakh acres. Production is expected to increase appreciably.

The total cost is Rs. 476·19 lakhs of which Rs. 53·81 lakhs will be spent in the first year.

Industry : There is scope for more intensive development of silk industry on a cottage and co-operative basis. Besides natural resources a high level of local skill is available there, the proper utilisation of which will make for wider employment in the rural areas.

Three silk-reelers' co-operatives in this district will be expanded. Production and marketing will be organised so as to ensure fair price to producers. Besides, there are schemes that will provide irrigation and manuring of mulberry lands, production and supply of improved types of seed cocoons and mulberry grafts.

Under other schemes Kharidumri will get a china clay washery and Shaspur will have a centre for the manufacture of surgical instruments. Centre will be opened for training or production of cane gur and palm gur industry. Co-operatives in hand-pounding of rice industry will also be set up. There will also be depots for marketing products of cottage industries.

The total expenditure for these schemes in the district during the Plan is Rs. 16·86 lakhs. The expenditure during the first year is Rs. 4·72 lakhs.

Roads : About 259 miles of roads will be constructed in the district during the Second Plan period at a cost of Rs. 150·50 lakhs. The expenditure expected in first year is Rs. 5·85 lakhs.

Health : There will be 15 health schemes in the district during the Plan period. These schemes envisage the opening of training centres for dais and nurses, increase in the number of rural dispensaries, control of malaria-cum-filaria, expansion of V. D. clinics and maternity and child welfare. There will be a 400-bedded leprosy colony and leprosy clinics will be established in the district.

The total expenditure on health schemes in the district during the Plan period will be Rs. 111.42 lakhs of which Rs. 16.78 lakhs will be spent in 1956-57.

Housing : Under the Low Income Group Housing Scheme, the amount to be sanctioned as long term loan to applicants in the district for building residential houses of their own is Rs. 15.12 lakhs.

Welfare of Backward Classes : A large number of development schemes for the welfare of Backward Classes will be taken up during the Second Five-Year Plan. These schemes provide for book grants to deserving students, free tuition fees and other charges, grant to dispensaries, construction of hostel buildings, sinking of tube-wells, improvement of village roads and live stocks, etc.

The total expenditure on these measures during 1956-61 will be Rs. 17.33 lakhs of which Rs. 2.76 lakhs will be spent in the first year.

Social Welfare : Four welfare extension projects with twenty work centres are proposed to be started in the district during the Second Plan period. Of these one welfare extension project with five work centres will be started in 1956-57. The objective of these projects is to provide for maternity and child welfare, adult social education for women, training in tailoring, etc.

Rs. 0.34 lakh has been proposed to be spent in the first year.

Agriculture : The agricultural development programme over the Five-Year period envisages—distribution of about 51,000 maunds of improved paddy, wheat, mustard and pulse seeds, supply of 2,500 tons of sludge, 26,500 tons of ammonium sulphate, 3,500 tons of superphosphate, 9,800 tons of fertiliser mixture, 2,500 tons of bonemeal and 9,000 tons of compost and establishment of 18 thana seed farms for raising improved seeds. Ninety small irrigation schemes will be implemented in the district. Three hundred and four demonstration centres for showing improved methods and techniques of cultivation will be laid out. There are also other specific schemes for development of jute, arecanut, cocoanut, cashewnut, sugarcane and lac cultivation by way of distributing improved seeds, seedlings and necessary plants as well as establishing model centres. Financial assistance will be reduced for development of horticulture in 100 acres of land. About 22,780 acres of land will be covered by plant protection measures.

Animal Husbandry : Establishment of 7 artificial insemination centres and sub-centres, 28 key village extension centres and sub-centres and establishment of 206 fodder cultivation and silage cultivation centres, distribution of 5,500 maunds of fodder seeds and 14,500 poultry birds, and poultry extension centres are the main items of work contemplated.

Forty-two livestock shows will be held in the district during the plan period.

Education : Since Bankura is a backward district, special attention has been paid towards formulating a suitable educational plan for the district. The measures contemplate establishment of 150 Basic and Primary Schools covering 12,584 students, improvement of the service conditions of 5,286 teachers, improved accommodation for 87 primary schools in rural areas as well as for women teachers of 8 institutions. Under the programme for expansion and upgrading of Secondary Education 4 senior basic schools and 20 multipurpose schools would be set up. Improved teaching, library and reading room and housing facilities would be provided to the students. Nine institutions would come within the purview of the expansion and upgrading of high schools programmes.

MIDNAPORE DISTRICT

Forests : Four schemes aiming at the development of forest resources will be undertaken in this district during the Second Plan period. A fairly large area will be covered by bamboo and grass plantations for the development of paper industry. Construction of buildings and rest houses will also be taken up for the benefit of the forest personnel.

The total plan expenditure is Rs. 20·37 lakhs of which Rs. 5·26 lakhs will be spent in the first year.

Fisheries : In order to increase production of fish, seven schemes will be executed in the district during the Second Plan period. The main objects of these schemes are to grant short term loan to needy fishermen, to popularise the use of fish pond manure and to intensify the production of carp fry.

The total cost of these schemes during the Plan period is Rs. 5·70 lakhs and that of the first year is Rs. 0·77 lakh.

Co-operation : Eighty Co-operative Farming Societies will be set up and 160 primary Credit Societies will be reorganised during the Second Plan period. Besides, one Land Mortgage Bank will be started during the first year of the Plan for supply of long term credit, and four Central Banks will be reorganised.

A sum of Rs. 10·24 lakhs is proposed to be spent under the head "Co-operation" of which Rs. 0·61 lakh will be spent in 1956-57.

Irrigation : Thirteen irrigation schemes will operate in the district during the Second Plan. They will benefit an area of about 1·7 lakh acres and raise the production by about 27·5 thousand additional tons. Besides 4·1 lakh acres will derive irrigational benefits from the Kangsabati Reservoir Project.

Power : Panskura will be electrified and there will be a Diesel Electric Pool at Ghatal. Bulk supply of power is to be given to Midnapore town and to Indian Institute of Technology, Kharagpur.

These schemes will involve a total expenditure of Rs. 63·08 lakhs of which Rs. 7·53 lakhs is likely to be spent in the first year of the Plan.

Industry : Six schemes in all will be operated in the district during the Plan period. One Silk-reelers' Co-operative will be set up during the first year of the Plan. Schemes for improved method of silk-worm rearing and for production of multivoltine mother stock will also be taken up to have better type of silk worm layings and seed cocoons. Besides, loan will be granted to mulberry cultivators for manure and irrigation, existing nurseries will be reorganised and three mulberry gardens will be established.

The plan expenditure on these schemes is Rs. 2·38 lakhs. Rs. 0·27 lakh will be spent in the first year.

Cottage Industries : Under this head, training units, demonstration parties and Co-operative Societies will be started in the district for the development of mat industry, coir industry, cane gur and khandsari, ropes and twines, hand-pounding of rice, leather industry, etc. The implementation of these schemes will provide employment to the rural people.

The total expenditure to be incurred for these schemes is Rs. 6·60 lakhs of which Rs. 2·57 lakhs is proposed to be spent in the first year.

Roads : Thirteen schemes of road development started in the First Plan period in this district have been taken over in the Second Plan. The total mileage covered by these schemes is 202. The number of road projects proposed in the Second Plan in the district is 21 and the mileage to be covered is 208·50. Thus the total mileage of road development in the district is 410·50.

The total cost for these schemes will be Rs. 273·95 lakhs of which Rs. 13·99 lakhs will be spent in 1956-57.

Health : The district of Midnapore will have the benefit from the operation of 17 health schemes to be undertaken during the Second Five-Year Plan. These include provincialisation of Public Health services, training of dais, establishment of rural nursing service, health centres and chest and leprosy clinics, etc. Besides, this district will have a 50-bedded T.B. hospital in 1956-57.

The total expenditure involved in these schemes during the five-year period is Rs. 249·48 lakhs of which Rs. 30·76 lakhs will be spent in the first year of the Plan.

Housing : Under the Low Income Group Housing Scheme loans amounting to Rs. 38·51 lakhs will be sanctioned to applicants from Midnapore district to enable them to build their own houses.

Welfare of Backward Classes : Various measures will be taken in the Second Plan for the welfare of Scheduled Tribes, Scheduled Castes and ex-criminal Tribes in the district. The principal items of work envisaged are the provision of free tuition, grant for purchase of books, payment of examination fees and boarding charges, grant to dispensaries, sinking of tube-wells, subsidised distribution of seeds and poultry birds, improvement of village roads, establishment of welfare centres, financial assistance to people trained in various trades and crafts, rehabilitation of ex-criminal tribes, etc.

These schemes will involve a total expenditure of Rs. 26·01 lakhs of which Rs. 5·47 lakhs will be spent in 1956-57.

Social Welfare : Midnapore will have four welfare extension projects with 20 work centres during the Second Plan period. Of these, one project is to be executed in 1956-57 at a cost of Rs. 0·34 lakh. Emphasis is laid on all extension projects according to the needs and population of the locality which it is intended to serve. These projects are intended to provide maternity and child welfare including pre and post-natal services, adult and social education for women, milk distribution, promotion of cultural activities, etc.

Miscellaneous : Digha will be developed into a sea-side health resort with metalled roads, community buildings, shopping centre, rented tenements, market place, etc.

The cost involved is Rs. 13·00 lakhs.

Agriculture : The five-year agricultural development programme of the district envisages work on distribution of 1·06 lakh maunds of paddy, wheat, mustard and pulse seeds, 0·86 tons of different kinds of fertilisers, establishment of 640 demonstration centres to show improved methods of cultivation and reclamation of 10,000 acres of waste land. Small irrigation schemes numbering 152 will be executed in the different parts of the district and special measures will be taken up for development of jute, arecanut, cocoanut, sugarcane and cashewnut cultivation. Thirty-three Thana seed farms will be set up for raising and multiplying improved seeds and the Plant Protection Unit will treat seeds of 3,100 acres of land and crop competition will be held.

Animal Husbandry : The Animal Husbandry and Veterinary Services Extension programme aims at establishment of 187 demonstration centres for fodder cultivation and silage, 2 poultry extension centres, development of the existing poultry multiplication centre, and subsidised distribution of 3,750 maunds of seed cuttings and 14,500 poultry birds. District and State cattle shows will be organised.

One Veterinary Aid centre will be opened in each N.E.S. block. Construction of 15 Veterinary dispensaries will be undertaken in N.E.S. areas and three improved "A" and "B" class Veterinary hospitals will be functioning.

Education : The education plan for the district concentrates efforts upon the expansion and improvement of Primary, Basic and Secondary education including technical education. The measures under Primary and Basic education seek to establish 187 Basic and Primary schools involving a coverage of 19,219 students and to effect improvement in the service conditions of 11,292 teachers. Improved accommodation for 2,540 primary schools in rural areas has also been provided for. Nineteen institutions would be given financial assistance for offering accommodation to their women teachers. The programme under Secondary education envisages establishment of 9 senior basic schools, new and converted, 43 multipurpose schools covering 12,360 students and improvement of libraries and reading rooms of 68 institutions. The expansion and upgrading of 16 high schools to the multipurpose type would be undertaken. Increased housing accommodation would also be offered to students and teachers.

MIDNAPORE DISTRICT

Name of scheme.	Plan outlay, 1956-61. (Rs. lakhs.)	Unit.	Target of work, 1956-61.
1	2	3	4
FOREST.			
1. Afforestation of waste lands including industrial plantations for match and paper industries—			
(i) Bamboo and grass plantations for the paper industry.	6.60	Acre	2,862
(ii) Other plantations ..	4.02	Acre	2,047
2. Afforestation for creation of a Coastal Shelter Belt.	7.12	Acre	2,400
3. Construction of offices and quarters	1.85	Building (No.)	43
4. Construction of Rest Houses ..	0.78	Building (No.)	14
	20.37		
FISHERIES.			
1. Short-term loan scheme for augmenting fish production in culturable tanks of West Bengal.	0.20	Fish (tons)	100
		Water area (acres)	109
2. Medium term loan for fish production in the semi-derelict tanks of West Bengal.	0.40	Fish (tons)	55
		Water area (acres)	70
3. Popularising the use of fish pond manure for increasing the production of pond fisheries.	0.15	Fish (tons)	555
		Manures (tons)	500
4. Demonstration fish farm on private parties' tanks in every thana of the State of West Bengal.	0.24	Fish fry (lakh)	240
		Fish farm (No.)	18
5. Assisting the needy fishermen of the State by granting loan for augmenting fish supply.	0.18	Fish (tons)	100
		Boat (No.)	23
		Yarn (bales)	16

HOOGLY DISTRICT

Forests : Under this head 20 building units will be constructed in the district at a cost of Rs. 0·88 lakh for the accommodation of offices and the staff who are to be deployed for the management of private forest taken over by the Government.

Fisheries : Six schemes in all will operate in the district during the Second Plan period. The schemes envisage development of small culturable tanks by advancing short-term loans, provision for financial assistance in the form of medium-term loans to owners of semi-derelict tanks, popularisation of fish pond manures, demonstration of improved methods of pisciculture to the indigenous fish farmers and assistance to needy fishermen for augmenting fish-supply and production of carp fry.

The Plan provision for the execution of these schemes is Rs. 1·28 lakhs of which Rs. 0·40 lakh will be spent in the first year.

Co-operation : It is recognised on all hands that Farming Co-operatives will play a vital role in the future scheme of land reforms. With this end in view as many as 25 Farming Co-operatives are expected to be set up in the district during the Plan period of which three units will be formed in 1956-57. Besides, a Land Mortgage Bank will be set up to meet the expected increased demand for long-term loans and the existing Central Banks will be reorganised for comprehensive development of rural credit.

The total cost involved is Rs. 1·36 lakhs of which Rs. 0·07 lakh will be spent in 1956-57.

Irrigation : The district will have four irrigation schemes during the Plan period. As a result of the execution of these schemes about 32,000 acres in Serampur, Arambagh, Haripal, Singur and Chanditala will have irrigational facilities with an expected additional food production of about 3,000 tons.

The five-year expenditure for these schemes is Rs. 4·21 lakhs of which Rs. 1·49 lakhs is likely to be spent in 1956-57.

Power : Chanditala will have electrification at a cost of about Rs. 7·00 lakhs.

Industries : The Bengal Textile Institute in this district imparts training in diploma course (three years), Artisans' course (one year), Women Artisans' course (two years) and co-operatives' training course (six months). With a view to raising the standard of teaching of the existing diploma course, it is proposed to appoint additional and better qualified staff and to instal additional spinning and other machinery and equipment during the Plan period at a total cost of Rs. 5·71 lakhs of which Rs. 1·50 lakhs will be spent in 1956-57.

Cottage Industries : To enlarge the scope of cottage industries in this district, training and production units in respect of toy-making, cottage match, palm gur, etc., will be started at a total cost of Rs. 6·91 lakhs of which the first year's cost is Rs. 3·21 lakhs.

Roads : Eleven schemes for the development of road commenced in the First Five-Year Plan have been taken over to the Second Plan. The mileage covered by them is 98·50. During the Second Plan 17 schemes will work for the development of road in the district. They will cover a mileage of 170·75. Thus the total mileage works at 269·25.

The total cost is Rs. 160·40 lakhs of which Rs. 21·65 lakhs is proposed to be spent in 1956-57.

Health : As many as 16 health schemes will operate in the district during the Second Plan period. The principal items of work envisaged in these schemes are provincialisation of Public Health Service, training of Dais and Lady Health Visitors, increase in the number of rural dispensaries, establishment of rural nursing service, expansion of health centres and chest clinics, control and prevention of venereal diseases, etc.

The total cost for these schemes will be Rs. 93·77 lakhs and the first year's expenditure is Rs. 17·07 lakhs.

Housing : Under the head "Subsidised Industrial Housing Scheme" 1,867 tenements will be constructed in the district at a cost of Rs. 63·70 lakhs during the Plan period. In the first year of the Plan 528 tenements are proposed to be constructed the expenditure for which is estimated at Rs. 5·85 lakhs.

Under the Low Income Group Housing scheme, a sum of Rs. 18·39 lakhs will be sanctioned to applicants from Hooghly district to enable them to build their own houses.

Welfare of Backward Classes : A fairly large number of schemes relating to the welfare of Scheduled Tribes and Scheduled Castes in the district will be undertaken during the Second Plan. Provision of free tuition, grants for purchase of books, payment of examination fees, expansion of hostels, grant to dispensaries, sinking of tube-wells, subsidised distribution of seeds and poultry birds are some of the main features of these schemes.

These schemes will involve a total expenditure of Rs. 5·25 lakhs of which Rs. 0·78 lakh will be spent in 1956-57.

Social Welfare : Four welfare extension projects with 20 work centres will operate in the district during the Second Five-Year Plan. Of these, one will be taken up in 1956-57 at a cost of Rs. 0·34 lakh. These projects will provide maternity and child welfare, adult and social education for women, promotion of cultural activities, etc.

Agriculture : The development programme to be executed in the sphere of agriculture includes different correlated measures for securing its all-round development. Eleven seed farms for raising and multiplication of improved seeds will be established. About 28,000 maunds of improved varieties of paddy, wheat, mustard and pulse seeds and 58,000 tons of different kinds of fertilisers will be distributed amongst the cultivators. It is proposed to execute 125 small irrigation schemes including irrigation through pumping plants. Demonstration plots and centres numbering 288 for propagating improved methods of farming will be set up throughout the district. An area of 1,500 acres of waste land will be reclaimed through mechanised methods. About 1·1 lakh maunds of seeds will be treated with fungicide and insecticides and approximately 60,000 acres of lands will be treated with plant protection measures. Special steps will be taken for development of jute, arecanut, coconut, and sugarcane cultivation by way of demonstration of better methods and techniques of production.

Animal Husbandry and Veterinary : Key Village Schemes aim at improvement of live stock resources by setting up 16 artificial insemination centres and sub-centres and also 21 K. V. extension centres. The other developmental measures envisage work on subsidised maintenance of 220 graded calves and development of fodder resources by way of demonstration and cultivation of better seeds through 158 centres. About 14,400 poultry birds will be distributed at a subsidised rate. Forty-eight district and State cattle shows will be arranged in order to create enthusiasm among the cattle breeders and to educate the masses in scientific breeding, feeding and management of livestock resources.

In the sphere of veterinary services, one aid centre will be opened and maintained within each N.E.S. Block. Additional supply of medicine will be made to 4 such aid centres outside the N.E.S. sector. Four veterinary dispensaries will also be constructed in N.E.S. Blocks. One "B" class veterinary hospital will be established. To cope with the increased volume of work consequent on the execution of the different development schemes, the existing veterinary personnel will be strengthened and 1 Range Office will be constructed.

Education : Expansion of basic and primary education by instituting 168 Basic and Primary Schools with a coverage of 21,456 pupils, improvement of the service conditions of 4,528 primary teachers and provision for improved accommodation for 216 primary schools and women teachers in rural areas are envisaged under the elementary education development programme. So far as expansion of Secondary education is concerned, it is contemplated to set up 7 Senior Basic Schools, new and converted, and 35 Multipurpose Schools having provision for teaching technical studies along with the general curriculum. Facilities of improved teaching, library and reading room service and housing accommodation will be offered. Nine existing high schools would be upgraded to the Secondary Multipurpose standard.

HOWRAH DISTRICT

Fisheries : During the Plan period five schemes in all will operate in the district to augment the production of fish. These schemes envisage popularisation of fish pond manures, demonstration of improved methods of pisciculture so as to be adopted subsequently by the fishermen and assistance to needy fishermen by granting loans.

The five-year cost and the first-year expenditure are Rs. 0·95 lakh and Rs. 0·20 lakh respectively.

Co-operation : Ten Co-operative Farming Societies will work in the district during the Plan period. One Land Mortgage Bank will be started to meet the demand for long-term credit. Besides, 80 Primary Credit Societies and one Central Bank will be reorganised to afford extension of co-operative credit facilities to the people.

The cost involved in the execution of these schemes in the district will be Rs. 4·41 lakhs of which Rs. 0·25 lakh will be spent in 1956-57.

Irrigation : One scheme will be executed in the district during the Plan period. This will benefit an area of about 29,000 acres calculated to yield an additional food production of 9,600 tons.

The Plan provision for this scheme is Rs. 43·27 lakhs.

Power : There will be one scheme in the district under this head during the Second Plan period. Under this scheme Durgapur Colony, Ballynishchanda Colony, Makhla, Nabagram, Raghunath, Dankuni, Garalgacha and Bargachia will be electrified.

The total expenditure during the Plan period is Rs. 7·00 lakhs of which Rs. 4·80 lakhs is proposed to be spent in the first year.

Industries : During the Second Plan as many as 588 small scale engineering industries will be started in the district of which 98 will be taken up in the first year. These engineering industries in Howrah will be brought together under a central organisation with a well-equipped central workshop, a marketing organisation and a technical development section.

The total expenditure in the Plan of this district will be Rs. 72·34 lakhs. The expenditure during the first year will be Rs. 12·06 lakhs.

Cottage Industries : Under this head altogether seven schemes will be undertaken in the district during the Second Plan period. One centre for giving training in fabricating better designs and effecting other improvements of the handloom industry will be opened. Twelve training units will be started for the development of palm gur industry. One Co-operative Society will be formed for encouraging paddy husking. A branch research institute will also be started for the development of coir industry. Besides, one wholesale depot will be established for procurement and supply of raw materials.

The total Plan provision is Rs. 6·75 lakhs. The first year's expenditure is Rs. 2·77 lakhs.

Roads : Six schemes started in the First Plan for the development of roads have been taken over to the Second Plan period. The total mileage covered by them is about 85 of which State Highways include 15 miles. The mileage to be covered during the Second Plan is 86. Thus the total mileage of road development comes up to 171.

The total expenditure is Rs. 91·50 lakhs of which Rs. 18·10 lakhs is likely to be spent in 1956-57.

Health : The district board health staff is proposed to be taken over by Government. Training of dais and nurses, expansion of hospitals, establishment of chest and V. D. clinics, providing health centres with ambulances, expansion of maternity and child welfare, etc., are some of the schemes to be implemented during the Second Plan period.

The total expenditure on health schemes in the district during the Plan will be Rs. 89.20 lakhs and the expenditure during the first year will be Rs. 9.71 lakhs.

Housing : The Industrial Housing Scheme envisages the construction of 2,85 tenements during the Second Plan period at a cost of Rs. 97 lakhs. 832 tenement will be constructed in the first year at a cost of Rs. 38.96 lakhs.

Under Low Income Group Housing a sum of Rs. 18.47 lakhs will be sanctioned to applicants from this district as long-term loan for building residential houses of their own.

Welfare of Backward Classes : Various measures relating to welfare of backward classes will be undertaken in the district during the Second Plan period. The items of work as envisaged in these schemes relate to provision for free tuition to large number of deserving students, payment of examination fees and other charges, expansion of hostel facilities, grants to dispensaries, sinking of tube-wells, subsidised distribution of seeds, provision for training facilities to the Scheduled Tribes in vocational trades and crafts, etc.

The total cost of these schemes in the district will be Rs. 1.56 lakhs of which Rs. 0.19 lakh will be required in 1956-57.

Social Welfare : Four Welfare Extension Projects with 20 work centres will be started in the district during the Second Plan period. Of these, two Extension Projects with ten work centres will be taken up in the first year. The object of these schemes is to provide for maternity and child welfare, adult social education for women, training in cultural activities, etc.

The sum proposed to be spent in 1956-57 is Rs. 0.50 lakh.

Miscellaneous : The development of Howrah city will be effected during the Plan period through the agency of Howrah Improvement Trust formed on 1st June 1955 at a cost of Rs. 47.50 lakhs.

Agriculture : The development programmes under agriculture contemplate work on establishment of 10 thana seed farms to raise and multiply improved seeds, distribution of about 38,000 tons of fertilisers including town compost, Ammonium Sulphate etc., and about 2100 maunds of improved paddy, mustard and pulse seeds. Sixty five small irrigation schemes will be executed in the district. For showing improved methods and techniques of cultivation about 260 demonstration centres will be set up. Specific programmes have been chalked out for the development of Sugarcane, Arecanut, Coconut, Cashewnut and lac cultivation. For implementation of the above programme improved seeds and seedlings will be distributed and Demonstration Centres set up. With a view to extending horticulture long term loans will be granted to land owners and it is expected that 190 acres of orchard will be put up. About 1,000 acres of waste lands will be reclaimed and about 33,000 acres of land will be treated with insecticides.

Animal Husbandry : To demonstrate better cultivation and preservation of fodder about 120 plots with Silo pits will be started in the district. The plan also provides for subsidised distribution of 1,150 maunds of fodder seeds and about 14,000 poultry birds. The cattle shows to be organised will encourage stock owners in rearing improved livestock. Forty such shows will be held during the Plan period.

One veterinary aid centre will be opened and maintained in each N. E. S. Block functioning in the district. Construction of veterinary dispensaries will be undertaken in 4 N. E. S. blocks. The veterinary field personnel will be strengthened in the district and construction of range offices will be undertaken.

Education : Expansion of Basic and Primary education by setting up 155 basic and primary schools covering 14,242 pupils, improvement of the service conditions of 4,172 primary teachers and provision of improved accommodation for 160 Primary Schools in rural areas and also for women teachers are the important features of the elementary education development programme. For improvement and expansion of Secondary education, 4 Senior Basic Schools, new and converted and 29 multipurpose Schools providing technical education at the Secondary level and covering 7,920 pupils would be set up. Improved teaching, Library and Reading room facilities will be offered. Sixteen high Schools will be upgraded to the multipurpose standard and extended housing accommodation will also be provided for students as well as teachers.

N.A.=Not available.

24-PARGANAS DISTRICT

Forests : Under the head "Forest" two schemes will be undertaken in the district during the Plan period at a cost of Rs. 5·84 lakhs. Two existing game sanctuaries will be improved to provide better living conditions for wild life and 59 building units will be constructed for the accommodation of officers and the staff stationed for the management of private forests recently vested in the Government.

Fisheries : Six schemes in all will be taken up for the development of fisheries in the district during the Plan period. These will help raise the potential of fish production. The programme envisaged in the schemes relate to granting short-term and medium-term loans to needy fishermen and starting demonstration farms to acquaint the indigenous fishermen with the improved methods of pisciculture. There is in view also a scheme for encouraging the use of fish pond manure for increasing the production of fish.

The total Plan expenditure for these schemes in the district will be Rs. 7·59 lakhs of which Rs. 0·83 lakh will be spent in 1956-57.

Co-operation : As many as 40 Farming Co-operatives will be started as they will play a vital role in relation to land reforms in the district. A Central Land Mortgage Bank will be started to meet the expected increased demand for long-term loans. Besides, 160 Primary Credit Societies and four Central Banks will be reorganised for extension of rural credit facilities in the district.

The five-year cost for these schemes in the district is Rs. 12·00 lakhs and the first year's expenditure is Rs. 0·57 lakh.

Irrigation : Six irrigation schemes will operate in the district during the Second Plan period at a cost of Rs. 50 lakhs. These schemes will benefit a total area of about 82,000 acres and thereby an increase of production by about 2,627 additional tons is expected.

Power : Supply of electricity to Diamond Harbour, Amtala, Bishnupur, New Barrackpore, Arabindanagar and Bansdroni will be taken up in the district during the Plan period.

The total expenditure for these schemes is Rs. 31·74 lakhs of which Rs. 5·33 lakhs will be expended in the first year.

Industries : It is proposed to develop the Bengal Tanning Institute by modernising the demonstration tannery and by constructing buildings for the workshop, laboratory, etc., at a cost of Rs. 3·47 lakhs. Additional machinery, apparatus and furniture are also proposed to be purchased for the Institute. Besides, ten silk-reelers' co-operatives will be started at a cost of Rs. 2·20 lakhs. They will provide finance when required, arrange for the marketing of products, ensure that artisans get a minimum wage and that quality and standards are maintained.

Cottage Industries : Seven schemes in all will be undertaken in the district during the Second Plan period with a view to enlarging the scope of cottage industries. A production unit at Baruipur for manufacturing surgical instruments will be established. This unit, though it will be run by Government at the initial stage, will ultimately be handed over to a co-operative of local workers. Besides, several production and training centres and co-operative societies will be started for the development of coir industry, hand pounding of rice, village ghani oil industry, khadi industry and palm gur industry.

The five-year expenditure is Rs. 12·06 lakhs of which Rs. 4·48 lakhs will be spent in 1956-57.

Roads : Sixteen different schemes for development of roads commenced during the First Five-Year Plan period will be continued in the Second Plan. The total mileage to be covered by them is 120·25. During the Second Plan 47 road projects with a coverage of 381·50 miles will be undertaken. The total mileage of road covered is thus 501·75 during the Second Plan.

The total cost involved is Rs. 319·15 lakhs of which Rs. 29·00 lakhs is allocated for the first year.

Health : Fifteen health schemes will be executed in the district during the Second Plan period. The principal items of work envisaged are creation of a unified health service by provincialisation of public health services, training of dais, increasing the number of rural dispensaries, establishment of subdivisional health centres with ambulance services, rehabilitation and improvement of existing hospitals, establishment of V. D. and Chest Clinics, etc.

The total cost under this section is Rs. 294·12 lakhs of which Rs. 32·95 lakhs is proposed to be spent in 1956-57.

Housing : Under the head "Industrial Housing Scheme" two projects will be executed in the district one at Shyamnagar and another at Dum Dum during the Plan period with a view to providing housing accommodation to industrial workers on payment of rent adjusted to their income. Under this scheme 50 per cent. of the cost is received as subsidy and 50 per cent. as loan from the Government of India. The number of tenements to be constructed is 7,522 at a cost of Rs. 255·00 lakhs. During the first year about 728 tenements will be constructed. Besides, a sum of Rs. 52·84 lakhs will be sanctioned to applicants from this district to enable them to build their own houses under the "Low Income Group Housing Scheme".

Welfare of Backward Classes : A good number of schemes relating to the welfare of Scheduled Tribes and Scheduled Castes will be executed in the district during the Second Plan period. These schemes will provide for free tuition, exemption from payment of examination and other charges, grants to dispensaries and health centres, sinking of tube-wells, improvement of livestock, subsidised distribution of seeds and poultry birds, improvement of village roads, setting up of training-cum-production centres, etc.

The Plan expenditure for the execution of these schemes is Rs. 10·20 lakhs of which Rs. 1·20 lakhs will be spent in the first year.

Social Welfare : Seven Welfare Extension Projects with 35 work centres will be set up during the Second Plan period. Maternity and child welfare services, adult and social education for women, training in tailoring and various other crafts are the main features of these schemes. The first year cost for these schemes is Rs. 1·36 lakhs.

Agriculture : The plan for agricultural development provides for setting up of 27 thana seed farms for raising and multiplying improved seeds, supplying of about 77,000 maunds of improved varieties of paddy, mustard and pulses seeds, distribution of about 80,000 tons of manures and fertilisers, viz., Sludge, town compost, bonemeal, Super phosphate, fertilisers mixtures, to the cultivators for intensive development of agriculture. It contemplates to take up 212 small irrigation schemes including distribution of pumping plants, measures for plant protection covering an area of 2·9 lakhs acres, steps for holding crop competitions and the work for destruction of about 1,500 wild animals to protect the crop from their ravages. Specific measures have also been envisaged for intensive development of arecanut, jute, cocoanut and sugar cane cultivation by way of distribution of improved seedlings and adoption of better techniques of production.

Animal Husbandry : For any significant development of the agricultural economy, due attention should be paid to the production of fodder, mixed farming and improvement of animal husbandry practices. The two primary requirements so far as animal husbandry development is concerned are the supply of good bulls for natural breeding or artificial insemination and production of fodder. With this end in view, 14 artificial insemination centres and sub-centres, and 28 Key Village extension centres will be set up and arrangements have been made for the maintenance of 120 calves at a subsidised rate. About 3,750 maunds of improved

seeds will be distributed and 167 demonstration centres for better cultivation of fodder seeds will be set up. About 16,500 improved varieties of poultry birds will be distributed. Fifty-two cattle shows will be organised for purposes of propagation of modern techniques and methods of animal husbandry practices. One veterinary aid centre will be opened and maintained within each NES Block. Additional supply of medicine will be made to 9 such Aid Centres outside the N. E. S. areas. Construction of 8 veterinary dispensaries in NES Blocks and 5 "A" and "B" class hospitals will be undertaken. For strengthening the supervisory staff Range and Circle offices will be set up.

Education : The five-year educational development programme of the district is highlighted by the stress it places on expansion and improvement of basic and secondary education. The schemes under basic and primary education envisage setting up of 195 basic and primary schools, improved service conditions for 9,596 primary and basic teachers, improved and expanded accommodation for 555 primary schools in rural areas and provision of essential housing accommodation to women teachers of 19 institutions. In the sphere of secondary education 7 senior basic schools (new and converted), 49 multipurpose schools with a bias for teaching of technical education at the secondary level and 15 expanded and upgraded high schools will be functioning. Improved teaching, housing, library and reading room facilities will be offered. As a result of the operation of the different development schemes in all about 17,000 students, 573 teachers and 165 other institutions of secondary education will be benefited.

CALCUTTA DISTRICT

Irrigation : Irrigation Department will be equipped with a Central Design Office library at a cost of Rs. 2·85 lakhs.

Power : There will be a central testing laboratory. The first year's cost will be Rs. 0·50 lakh.

Industry : Various schemes will be undertaken for the development of industry in Calcutta during the Second Plan period. With a view to supplying increased quantities of standardised processed materials to the cottage workers for the production of ceramic goods, the laboratory and workshop of the Bengal Ceramic Institute are proposed to be expanded and provided with modern machinery and equipment. The Calcutta Technical School will be upgraded by introducing the Plumbing and Sanitary Engineering course to impart some theoretical training to skilled factory workers. Various training courses will be introduced in the Chemical Polytechnic. There will be a State Industrial Research Board to encourage research and investigations on industrial problems and to render technical advice to industries of the small and medium scale groups. One Braiding factory and a model servicing tannery will be set up. Besides, training and production units will be started for sanitary wares, electrical goods, baby shoes, etc.

The total cost involved for the execution of these schemes is Rs. 78·09 lakhs of which Rs. 14·42 lakhs will be spent in 1956-57.

Road Transport : Two schemes, viz., State Transport Service and shifting of tram tracks from east, north and west of Dalhousie Square will operate in the city of Calcutta during the Second Plan period. The former scheme is a continuation of the State Transport Service executed in the First Five-Year Plan and provides for implementation of a phased programme of nationalisation and expansion of bus services in Calcutta. Four hundred and thirty-eight private buses operating in 23 routes in the city will be replaced by State buses in course of five years. Besides, the construction of bus station, passenger shelters and a fourth depot will be taken up after the completion of the third depot.

To reduce the severe pressure of traffic in the area around Dalhousie Square it has been decided to shift tram tracks from the east, north and west of Dalhousie Square. Besides, the construction of car park and State bus stand will also be taken up.

The total expenditure for these two schemes is Rs. 176·70 lakhs of which an amount of Rs. 48·00 lakhs will be required in the first year.

Health : Twenty-one health schemes will be undertaken in Calcutta during the Second Plan. The main provisions of these schemes are appointment of occupational therapists, medico-social workers, Dieticians, deputation of some West Bengal Medical and Health Service Officers for higher studies abroad, training for lady health visitors, establishment of a Post-graduate and Research training centre, an infectious diseases hospital, expansion of maternity and child welfare schemes—*cum*—family planning, etc.

The total cost involved for the execution of these schemes is Rs. 318·92 lakhs of which Rs. 49·74 lakhs will be spent in 1956-57.

Housing : Under "Low Income Group Housing" scheme Rs. 29·21 lakhs will be sanctioned to applicants in order to enable them to build the houses of their own during the Second Plan.

Miscellaneous : In order to cope with the acute housing problem for women employees serving in different establishments in Calcutta it is proposed to construct five dormitories in different parts of Calcutta to provide hostel accommodation to about 1,000 girls during the Second Plan. The Karaya Road Housing scheme

commenced in the First Five-Year Plan has been taken over to the Second Plan to complete the construction of remaining 56 flats out of a total of 160. Under "Gariahat Housing" scheme five blocks of five-storied buildings consisting of 50 residential flats will be constructed on 164 kattahs of land acquired by Government at Gariahat Road. Besides, with a view to providing housing accommodation to the poorer section of the people, six blocks of four-storied building comprising 192 tenements will be constructed under the "Bowali Mandal Road Housing" scheme.

The total cost is estimated at Rs. 78·00 lakhs of which Rs. 27·62 lakhs will be required in the first year.

Education : In Calcutta under the different educational development schemes touching primary and secondary phases, 25 primary institutions covering 2,025 pupils will be set up. Improvement in the conditions of service of 1,774 teachers will be effected. Three senior basic schools, 75 multipurpose schools and 16 expanded and upgraded high schools will be functioning. Forty-seven institutions will be given financial assistance for improvement of their libraries and reading rooms.

NADIA DISTRICT.

Forests : Two schemes relating to the development of forests will be taken up in the district during the Second Plan period. Six hundred and ninety three acres will be covered with other plantations at a cost of Rs. 1.36 lakhs. Besides, buildings will be constructed for the accommodation of offices and staff sanctioned for the management of forests at a cost of Rs. 0.63 lakh.

Fisheries : Eight schemes will be undertaken for the development of fisheries in the district during Second Plan period. The main objects of these schemes are to grant financial assistance to needy fishermen in the form of loans, to popularise the use of fish pond manure, to demonstrate improved method of pisciculture and to intensify the production of carp fry. Besides, there will be an experimental fish farm at Kalyani to carry out chemical, biological, bacteriological and meteorological studies on various aspects of fish and fisheries.

The total expenditure involved in these schemes is Rs. 16.76 lakhs of which Rs. 3.47 lakhs will be spent in 1956-57.

Co-operation : The schemes under this head to be undertaken in the district envisage formation of 35 co-operatives farming societies and re-organisation of 80 Primary Credit Societies and a Central Co-operative Bank. Of these, the credit societies will get subsidy for managerial cost. A Land Mortgage Bank will also be set up to meet the expected increased demand for long term loans.

The total cost of these schemes is Rs. 4.86 lakhs of which Rs. 0.25 lakhs is likely to be first year's expenditure.

Irrigation : As a result of the execution of irrigation schemes to be undertaken in the district during the Second Plan period at a cost of Rs. 6.99 lakhs a total area of about 12,000 acres will be benefited increasing production by about 4,000 tons.

Power : The schemes under 'Power' envisage supply of electricity to Muragacha and stringing of the second circuit of 66 K.V. line from Shyamnagar to Ranaghat at a total cost of Rs. 7.88 lakhs.

Industries : Three schemes for the development of Sericulture in the district will be undertaken during the Plan period. There will be two silk-reelers' co-operatives of which one will be set up in the first year of the plan. Schemes for production of multi-voltine mother stock to have quality seed cocoons and granting loans to mulberry cultivators for manure and irrigation will also be taken up. Besides, a cotton spinning mill will be set up at Kalyani to produce improved type of yarn for the development of handloom industry. There will be another scheme in the district, viz., "Industrial Estate at Kalyani". It envisages the establishment of an Industrial Estate in the factory belt of Kalyani township. Industries to be settled there will be so selected as to form an interdependent groups so that some may cater for the needs of others in respect of raw materials or auxiliary products.

The Plan provision for the schemes is Rs. 231.38 lakhs of which Rs. 20.76 lakhs will be spent in the first year.

Cottage Industries : Seven schemes will be taken up during the Second Plan period for the development of cottage industries in the district. Training and production units and Co-operative Societies will be started to encourage common clay, glazed pottery, mat industry, hand pounding of rice and palm gur industries. A central factory for toy-making and artistic pottery will also be taken up.

The amount of expenditure for these schemes during the Plan period is Rs. 34.39 lakhs of which the first year's cost is Rs. 8.50 lakhs.

Roads : Six schemes in progress during the First Plan period have been taken over to the Second Plan. The total mileage covered by them is 52.4. The number of road projects to be taken up in the Second Plan is 22 and the expected mileage is 155.5. Thus the total mileage to be covered during the Second Plan works at 207.90.

The total cost involved is Rs. 144.65 lakhs of which Rs. 8.07 lakhs will be the first year's expenditure.

Health : Eighteen health schemes will operate in the district during the Second Plan period. The main items of work are the taking over by Government of the sanitary staff maintained by the district board, training of dais, increasing the number of rural dispensaries, establishment of rural nursing service, rehabilitation and improvement of existing hospitals, establishment of health centres, establishment of T. B. hospitals at Kanchrapara, etc.

The Plan expenditure for these schemes is Rs. 324.19 lakhs of which Rs. 22.76 lakhs will be spent in 1956-57.

Housing : Under the Low Income Group Housing Scheme loans amounting to Rs. 13.13 lakhs will be sanctioned to applicants from this district to enable them to build their own houses.

Welfare of Backward Classes : Large number of schemes have been undertaken in the Second Plan for the welfare of Scheduled Tribes and Scheduled Castes in the district. These schemes envisage exemption of poor students from payment of tuition fees and other charges, grants for purchase of books, grants to dispensaries, sinking of tube-wells, subsidised distribution of poultry birds, financial assistance to Scheduled Tribe people trained in various trades and crafts, improvement of village roads, grants for adult education centres, night schools, etc.

The total amount to be spent in these measures during the plan, will be Rs. 1.85 lakhs of which Rs. 0.38 lakh is proposed to be spent in 1956-57.

Social Welfare : During the Plan period four Welfare Extension Projects with 20 work centres will be undertaken in the district. Of these two projects with 10 work centres will be executed in 1956-57 at a cost of Rs. 0.50 lakh. These are intended to provide maternity and child welfare services, adult and social education for women, training in various crafts, etc.

Miscellaneous : Under this head two schemes, viz., Kalyani Township and Kalyani Housing will work in the district during the Plan period at a cost of Rs. 29.45 lakhs, the first year's provision being Rs. 15.93 lakh. The first scheme commenced in the First Plan continues to make progress. Of the six blocks of the township development of one block covering an area of about 1,100 acres has almost been completed in all respects, namely, underground sewerage, drinking water-supply, electricity, etc., and that of another block of the industrial area is nearing completion. Out of 5,000 residential plots about 1,200 have actually been leased out to the public who have begun to build houses on their own plots. An administrative building has been set up for accommodating Government offices already shifted. Out of 19 industrial plots, eight have already been booked.

Under the Kalyani Housing Scheme an amount of Rs. 2.93 lakhs has been spent for the construction of washbasins and fencing to 500 houses at Kalyani.

Agriculture : The work to be executed in the sphere of agriculture envisages establishment of 8 thana farms for multiplication and distribution of about 47,000 maunds of improved paddy, wheat, mustard and pulse seeds and distribution of

about 30,000 tons of different kinds of fertilisers including Super Phosphate, Ammonium Sulphate, town compost, etc. For development of arecanut and coconut cultivation about 7,000 improved seedlings will be distributed. In all 45 small irrigation schemes will be executed in the district. Sikaries will be appointed to preserve the crops from the ravages of wild animals and about 5,000 wild animals will be killed. The cultivation of sugarcane will be enhanced by way of distribution of about 8,000 maunds of improved seeds and setting up of demonstration centres.

Animal Husbandry : The programme under live stock improvement provides for Castration of Scrub bulls and breeding operations conducted through 17 artificial insemination centres to be set up, rearing of 80 graded calves on subsidised basis, development and distribution of fodder resources. In order to control outbreak of contagious diseases and render veterinary aid to the ailing cattle, one veterinary aid centre in each NES Block, provision for additional supply of medicine to 8 such aid centres, outside the NES region, establishment of 8 veterinary dispensaries, and 2 "A" and "B" class veterinary hospitals have been envisaged.

Education : Concerted efforts at developing and improving elementary, basic and secondary education are being made in the district. The educational development programme envisages establishment of 168 basic and primary schools bringing 17,642 students within their purview; improvement of service conditions of 2,431 primary teachers and improvement of accommodation in respect of 339 primary schools in rural areas. Essential accommodation for women teachers of 8 rural schools will also be provided. So far as development of secondary education is concerned, there would be 3 senior basic schools (new and converted), 18 multipurpose schools having provision for imparting technical studies at secondary levels and 12 existing high schools upgraded to the multipurpose standard. Expanded housing accommodation will also be provided to teachers and students of secondary schools. About 8,000 students and 250 teachers will be benefited from different development schemes of secondary education. Improvement of libraries and reading rooms in respect of 28 institutions will also be undertaken.

N. A.=Not available.

MURSHIDABAD DISTRICT

Forests.—For the development of forest area in the district three schemes will be undertaken during the Plan period. One of the schemes will cover an area of 1,049 acres with plantations other than matchwood, bamboo and grass. Besides, twenty-two building units will be constructed for the accommodation of office and the staff placed for the management of private forests recently vested in the Government. Seven cottage type Rest Houses will also be constructed for the use of officers on inspection tour.

The estimated cost during the five-year period is Rs. 3.40 lakhs of which Rs. 0.32 lakh is proposed to be spent in 1956-57.

Fisheries.—In order to augment fish-supply in the district, seven schemes will be operating during the Second Plan. The objects of these schemes are to develop derelict fisheries, to popularise the use of fish pond manures, to demonstrate improved methods of pisciculture, to encourage the production of carp fry and to assist needy fishermen by granting short-term and medium-term loans.

The total expenditure involved in the operation of these schemes is Rs. 5.51 lakhs of which Rs. 0.30 lakh will be required in the first year.

Co-operation.—Under the head “Co-operation” four schemes will be taken up in the district during the Plan period. Forty Farming Societies are expected to be formed during the Plan period. In the first year seven such societies will be started. A Central Land Mortgage Bank to meet the expected demand for long-term loans will be functioning. Besides, 80 Primary Credit Societies and three Central Banks will be reorganised to lay the basis of a sound co-operative credit structure essential for the development of different sectors of the rural economy.

The Plan provision for these schemes in the district is Rs. 5.72 lakhs.

Irrigation.—Seven irrigation schemes will be undertaken in the district during the Second Plan period. As a result of the operation of these schemes a total area of about 14,000 acres will have irrigation facilities and the additional production expected is 5,000 tons.

The total cost involved for these schemes will be Rs. 7.47 lakhs of which Rs. 1.67 lakhs will be spent in the first year.

Power.—Panchthupi and Aurangabad will have power supply during the Second Plan at a cost of Rs. 9.95 lakhs.

Industry.—As many as six schemes will be undertaken for the development of Sericulture in the district during the Second Plan period. These schemes envisage improved methods of silk-worm rearing, reorganisation of Sericulture training institute, production of multivoltine mother stock, grant of loans to mulberry cultivators, reorganisation of existing nurseries of Sericulture and establishment of grainages for supply of D. F. layings. The Berhampore Textile Institute will also be reorganised in respect of accommodation, additional staff and additional equipment.

Besides, training and production centres and co-operative societies will be established to promote mat industry, village pottery, hand pounding of rice, hand-made paper, village ghani oil industry and khadi industry.

The total expenditure under Industry in the Plan of the district will be Rs. 20.03 lakhs. The expenditure during the first year will be Rs. 5.40 lakhs.

Roads.—Thirty-four schemes for the development of roads in the district will be undertaken during the Second Plan. The total mileage to be covered including that of the spill-over schemes is 303 miles.

The Plan expenditure for these schemes is Rs. 188.85 lakhs of which Rs. 13.88 lakhs will be spent in 1956-57.

Health.—The District Board Health Units are proposed to be taken over by Government. The opening of training centres for dais, establishment of new health centres, expansion of hospitals, establishment of V. D. Clinics, providing health centres with ambulances, sinking of tube-wells, etc., are some of the main items of work envisaged under the schemes proposed to be implemented.

The total expenditure on health schemes in the district during the Plan period will be Rs. 159.44 lakhs of which the first year's expenditure is Rs. 14.95 lakhs.

Housing.—Under the "Low Income Group Housing" Scheme, an amount of Rs. 19.67 lakhs will be sanctioned to applicants from this district during the Plan period to enable them to build the residential houses of their own.

Welfare of backward classes.—Various measures relating to the welfare of Scheduled Tribes and Scheduled Castes will be undertaken in the district during the Plan period. These schemes will provide for free tuition, book grants, exemption from payment of examination fees and other charges, grants to dispensaries and health centres, sinking of wells, subsidised distribution of seeds and poultry birds, irrigation facilities, improvement of kancha village roads, etc.

The total cost involved is Rs. 2.72 lakhs of which Rs. 0.23 lakh will be spent in 1956-57.

Social Welfare.—During the Second Plan four welfare extension projects with 20 work centres are proposed to be started in the district. Of these two projects with ten work centres will be started in the first year. The object of these projects is to provide for maternity and child welfare, adult social education for women, training in tailoring and cultural activities, etc.

The amount to be spent on these projects in the district is Rs. 0.50 lakhs.

Agriculture.—The five-year agricultural development programme for Murshidabad envisages work on distribution of about 80,000 maunds of improved paddy, wheat, mustard, pulse and barley seeds and 56,000 tons of different varieties of fertilisers, e.g., sludge, bone, compost, Superphosphate, bonemeal, Ammonium Sulphate etc. Small irrigation schemes at a cost of Rs. 2.9 lakhs will be executed in the district and fifty pumping plants will be provided to the farmers for the lift irrigation purpose. It has also been contemplated to lay out 240 demonstration centres in various parts so as to show improved methods of agricultural farming to the peasants. Twenty thana seed farms are to be set up for raising and subsequent multiplication of improved seeds. Five thousand acres of waste lands will be reclaimed. Specific measures on modern scientific lines will be adopted for more intensive and extensive cultivation of arecanut, cocoanut, sugarcane, jute, cashew-nut, lac and horticulture.

Animal Husbandry.—In the sector of animal husbandry measures have been planned for establishment of 16 new Key Village centres and sub-centres and expansion of 28 other centres and sub-centres manned by additional technical personnel in order to upgrade the live stock resources of the district. One hundred and ninety demonstration centres for fodder cultivation and silage, subsidised maintenance of 200 graded calves, subsidised distribution of 3,750 maunds of fodder seeds, subsidised distribution of 17,000 poultry birds, establishment of 2 poultry extension centres and arrangements for holding district and State cattle shows are the other targets of the animal husbandry development programme. As regards veterinary development it has been decided to set up one veterinary aid centre for each and every NES Block, to construct 8 veterinary dispensaries in NES Block areas and to establish 2 improved "A" and "B" class veterinary hospitals. Provision has also been made for strengthening the veterinary personnel at the field and Head-quarter level and also for increased office accommodation.

Education : Expansion and improvement of primary, basic and secondary education is the outstanding feature so far as the five-year educational development programme of the district is concerned. In the field of basic and primary education 167 institutions covering 16,941 pupils will be set up. The conditions of service of 3,995 basic and primary teachers will be improved and increased accommodation facilities in respect of 266 primary schools in rural areas will be provided. Essential accommodation will be offered to women teachers of 7 rural schools. In the sphere of secondary education 3 senior and basic schools (new and converted), 15 multipurpose schools having provision for rendering technical teaching at the secondary level and 13 existing high schools upgraded to the multipurpose standard will be functioning. There are also schemes for improvement of teaching facilities, libraries, reading rooms as well as housing for different secondary schools.

MALDA DISTRICT

Forests: Three schemes will be undertaken for the development of forest in the district during the Second Plan. An area of 570 acres will be covered with plantations at a cost of Rs. 1·12 lakhs. Besides, 12 building units and four rest houses will be constructed for the accommodation of the additional forest staff and offices at a cost of Rs. 0·74 lakh.

Fisheries: With a view to increasing the production of fish in the district as many as six schemes will be taken up during the Second Plan period. The main items of work envisaged under these schemes are to grant short-term and medium-term loans to needy fishermen, to popularise the use of fish pond manures, to demonstrate improved methods of pisciculture and to intensify the production of carp fry.

The total expenditure involved is Rs. 0·75 lakh of which Rs. 0·19 lakh will be required in the first year.

Co-operation: Under the head "Co-operation" four schemes will be functioning in the district during the Second Plan period. Thirty-five Farming Co-operatives will be formed to expedite land reforms. Of them, three will be started in the first year. One Land Mortgage Bank will be started to meet the demand of long term loans. Besides, 40 Primary Credit Societies will be reorganised to strengthen the financial position of the credit societies. Reorganisation of a Central Bank will also be taken up for extension of rural credit facilities.

The total cost for the execution of these schemes is Rs. 2·98 lakhs of which Rs. 0·19 lakh will be spent in 1956-57.

Irrigation: Two irrigation schemes will be worked out in the district during the Second Plan as a result of which an area of about 12,000 acres will have the benefit of irrigation and the production is expected to increase by about 4,000 tons.

The total plan provision is Rs. 8·69 lakhs.

Power: A transmission line from Durgapur to Malda will be put up during the Plan period at a cost of Rs. 19·79 lakhs.

Industry: Seven schemes will be taken up for the development of Sericulture in the district during the Second Plan. These schemes envisage improved methods of silk worm rearing, production of multivoltine mother stocks, grant of loans to mulberry cultivators, establishment of a State filature, mulberry gardens and grainages and reorganisation of existing nurseries. Expansion of Silk-reelers' Co-operatives and allied organisation will also be taken up.

Besides, ten schemes will be undertaken to enlarge the scope of cottage industries.

There will be two sales depots for the distribution of raw materials and marketing of finished products. Training and production units will be set up for the development of village pottery, cane gur and khandesari, hand pounding of rice, palm gur and khadi industry. The existing District Weaving School will be reorganised and Malda Silpa Vidyapith will be converted into a full-fledged training-cum-production centre. And to train up the local "chamars" and tanners in the modern technology of proper utilisation of leather and carcasses, peripatetic parties of three different types will be set up.

The total cost is estimated at Rs. 50·88 lakhs of which Rs. 10·04 lakhs is expected to be spent in the first year.

Roads: Ten schemes for the development of roads started in the First Plan will be operating in the Second Plan. The mileage to be covered by them is 104·30 miles. Fifteen new road schemes will be undertaken in the district during the Second Plan. The mileage expected to be covered by these schemes is 109·00. Thus the total mileage of roads in the district comes to 213·30.

The total cost involved is Rs. 154·20 lakhs and the first year's cost is Rs. 17·37 lakhs.

Health: Fourteen health schemes will be started in the district during the Second Plan. The main features of these schemes are provincialisation of Public Health Services, training of dais, increase in the number of rural dispensaries, establishment of rural nursing service, health centres and chest clinics, rural water supply and sanitation, etc.

The total expenditure for the execution of these schemes is Rs. 77·07 lakhs of which Rs. 12·95 lakhs is proposed to be spent in the first year.

Housing: Under the Low Income Group Housing scheme a sum of Rs. 10·75 lakhs will be sanctioned to applicants from this district during the Second Plan.

Welfare of Backward Classes: Various measures relating to the welfare of Scheduled Tribes and Scheduled Castes will be adopted in the district during the Second Plan period. The principal items of work are provision of free tuition, book grants, exemption from payment of examination fees and other charges, grant to dispensaries, sinking of wells, subsidised distribution of seeds and poultry-birds, goat keeping and sheep rearing, improvement of village roads, etc.

The total cost is Rs. 11·25 lakhs of which Rs. 3·87 lakhs will be spent in the first year.

Social Welfare: During the Second Five-Year Plan four extension projects with 20 work centres will be undertaken in the district. Of them two projects with ten work centres will be taken up in the first year. Maternity and child welfare, training in tailoring, cultural activities, adult and social education for women, etc., are some of the important items of work envisaged under the Extension Projects.

The total Plan provision is Rs. 0·50 lakh .

Agriculture : Programmes of agricultural development have been given due priority in the plan of this district. It envisages work on establishment of 5 thana seed farms, distribution of 46,000 maunds of improved seeds of paddy, wheat, mustard and pulse and distribution of about 16,000 tons of different kinds of fertilisers. Sixty five small irrigation schemes will be undertaken in the districts for the propagation of improved methods of farming amongst the cultivators 160 demonstration centres and plots will be set up. It is contemplated to reclaim 5,000 acres of waste lands by mechanised means. For carrying out effective remedial measures to control pests and diseases of crops, the agricultural personnel will be equipped with sprayers and dusters to protect about 40,000 acres of land. In order to imbibe a spirit of healthy competition among the cultivators crop competitions will be held in the district. To protect the food crops from the ravages of wild animals, Sikaries will be appointed. It is expected that during the five-year period about 13,000 wild animals will be killed.

By introducing improved variety of seedlings, and improved methods of cultivation more areas will be brought under sugarcane, acrecanut, cocoanut and jute cultivation. To popularise lac cultivation one unit will be set up to give widespread demonstration. Long term interest free loans will be given to land owners for development of fruit production in the district. It is expected that about 500 acres of land will be utilised for orchards.

Animal Husbandry : Fourteen artificial insemination centres, 21 Key village extension centres and sub centres, and 140 demonstration centres for cultivation of fodder and silage will be set up for upgrading the cattle-stock resources of the district. About 3,015 maunds of fodder seeds and 14,159 poultry birds will be distributed. For the encouragement of stock owners 41 live stock shows will be organised. One veterinary aid centre will be opened and maintained within each NES Block. It is also contemplated to make additional supply of medicines to 6 such aid centres outside the N. E. S. areas. Four veterinary dispensaries, one "A" class hospital and one Range office will be constructed.

Education : Expansion of Primary, Basic and Secondary education is the most marked feature of the educational development schemes for the district. During the Plan period 115 Basic and Primary Schools covering 14,567 pupils would be set up. About 2,295 primary teachers would be benefited from their improved service conditions. Improved accommodation would be provided to 21 primary schools and women teachers of seven Institutions in rural areas. The Secondary education development programme envisages establishment of 2 Senior Basic Schools and eight multipurpose Schools benefiting about more than 2,000 pupils. Schemes for improvement of teaching facilities, Library, reading room service accommodation will be implemented. Four high schools would be upgraded to the multipurpose standard.

WEST DINAJPUR DISTRICT

Forest : For the development of forests in the district three schemes will be undertaken during the Second Plan period. Plantations other than match wood, bamboo and grass will cover an area of 438 acres. Besides, construction of twelve building units will be taken up for the accommodation of offices and staff sanctioned for the management of private forests recently vested in this Government.

The total Plan provision for these schemes is Rs. 1.43 lakhs.

Fisheries : Six schemes will be undertaken during the Second Plan period to augment fish supply in the district. The main items of work envisaged under these schemes are popularisation of fish pond manures, demonstration of improved method of pisciculture, grant of short-term and medium-term loans to needy fishermen.

The total expenditure for these schemes is Rs. 1.69 lakhs of which Rs. 0.54 lakh will be spent in 1956-57.

Co-operation : Under this head 25 Co-operative Farming Societies will be formed. A Land Mortgage Bank will also be started to meet the demand for long-term credit. Besides, 40 Primary Credit Societies and one Central Bank will be reorganised to extend co-operative credit facilities to the people.

The total cost of these schemes is Rs. 2.92 lakhs of which Rs. 0.20 lakh is proposed to be spent in the first year.

Irrigation : Seven irrigation schemes will operate in the district during the Second Plan. These schemes will benefit a total area of about 6,000 acres as a result of which additional production of about 1,600 tons is expected.

The Plan provision for these schemes is Rs. 3.67 lakhs.

Power : Under this head Raiganj and Kaliaganj will have power supply. Besides, a transmission line from Durgapur to Maldah will be drawn.

The total expenditure for power schemes is Rs. 19.39 lakhs of which the first year's expenditure is Rs. 4.62 lakhs.

Industry : Five schemes for the development of industry in the district will be taken up during the Second Plan. There will be a silk reeler's co-operative which would provide finance when required, arrange for the marketing of products, ensure that artisans get a minimum wage and that quality and standard are maintained. Besides, training and production units and co-operative societies will be started to enlarge the scope of cottage industries in the district, viz., cane gur, khandesari, handpounding of rice, development of palm gur.

The total cost of these schemes will be Rs. 2.66 lakhs of which Rs. 0.44 lakh will be spent in 1956-57.

Roads : Six schemes in progress during the First Plan period have been taken over to the Second Plan. The mileage covered by them is 105. The number of new road projects to be undertaken in the Second Plan is 15 and the expected mileage is 129. Thus the total mileage to be covered during the Second Plan works at 234.

The total cost involved is Rs. 128.45 lakhs of which Rs. 12.16 lakhs will be spent in the first year.

Health : Fourteen health schemes will operate in the district during the Second Plan period. The district board health staff is proposed to be taken over by Government. Training of dais, expansion of hospitals, establishment of chest and V. D. Clinics, providing health centres with ambulances are some of the schemes to be implemented during the Second Plan.

The total cost on health schemes in the district will be Rs. 64.81 lakhs and the expenditure during the first year is Rs. 11.86 lakhs.

Housing : Under Low Income Group Housing scheme a sum of Rs. 8·27 lakhs will be sanctioned to applicants from this district to enable them to build their own houses.

Welfare of Backward Classes : Various measures relating to welfare of Scheduled Tribes and Scheduled Castes in this district will be undertaken during the Second Plan period. The items of work as envisaged in these schemes are provision for free tuition to deserving students, exemption from payment of examination fees and other charges, expansion of hostel facilities, grants to dispensaries, subsidised distribution of seeds, provision for training facilities to the Scheduled Tribes in vocational trades and crafts, etc.

The total cost of these schemes in the district will be Rs. 9·42 lakhs of which Rs. 1·10 lakh will be required in 1956-57.

Social Welfare : During the Second Plan four welfare extension projects with 20 work centres will be started in the district. Of these one extension project with five work centres will be taken up in the first year. The object of these schemes is to provide for maternity and child welfare, adult social education for women, promotion in cultural activities, etc.

A sum of Rs. 0·34 lakh will be spent in 1956-57.

Agriculture : One of the fundamental requirements for the improvement of agriculture is the propagation of improved varieties of seeds. With this end in view 11 seed farms will be established and about 21,000 maunds of improved seeds of pulses, wheat, mustard, gram, maize, etc., will be multiplied and distributed amongst the cultivators. Extensive use of fertilisers is necessary for increasing the yields of the land. It is expected that during the plan period about 3,000 maunds of different kinds of fertilisers will be distributed to the cultivators to achieve better yields. The plant protection measures will be extended to about 16,000 acres of land and about 57,000 maunds of seeds will be treated with insecticide or fungicide. Special measures will be taken for development of jute and sugarcane cultivation by way of demonstrating improved methods of production. About 214 maunds of Dhaincha seeds in 68,000 packets will be distributed. A sum of Rs. 2·14 lakhs will be spent for reclaiming waste lands. The Japanese methods of cultivation will be adopted for better yields of food and cash crops.

Animal Husbandry : Demonstration of improved methods and techniques of fodder cultivation in 130 such centres, distribution of about 2,000 maunds of seeds, and 14,000 poultry birds and organisation of 39 State and district cattle shows are the main schemes featuring in the Animal Husbandry development programme. In the field of veterinary services, one Veterinary Aid Centre will be opened and maintained in each NES Block. Additional supply of medicines will be provided to 6 such aid centres outside the NES sector. Two "A" and "B" class veterinary hospitals and four veterinary dispensaries will be established. For strengthening the supervisory organisation one range office will be started.

Education : Under the different schemes for development of Basic, Primary and Secondary education together with technical courses at Secondary level, 94 Basic and Primary Schools covering 9,685 pupils, three Senior Basic Schools, new and converted, ten multipurpose schools benefiting 2,520 students and five high schools upgraded to the Multipurpose Standard would be functioning in the district. About 1,897 primary teachers would be benefited from their improved service conditions and 40 primary Schools would be provided with improved accommodation. Improvement of teaching, library and reading room service as well as housing accommodation for students and teachers of secondary schools has also been envisaged.

N.A.—Not available.

JALPAIGURI DISTRICT

Forest : Several schemes for forest development will be undertaken in Jalpaiguri district during the Second Five-Year Plan. These include bamboo and grass plantations for paper industry, extension of teak plantations, improvement of game sanctuary and development of Bholka forests in the Buxa Division. To provide better living conditions for forest labour huts with water supply arrangements will be constructed. School buildings with residential quarters for the children of forest villagers. Construction of offices and quarters for forest officers and rest houses for inspecting officers will also be undertaken. On the whole, a total sum of Rs. 13.50 lakhs will be spent on forest development in Jalpaiguri district during the Second Plan period, out of which approximately Rs. 1.66 lakhs is proposed to be spent during the year 1956-57.

Co-operation : During the five years of the Second Plan, 20 co-operative farming societies are proposed to be organised in this district. For supply of long-term credit, the existing primary land mortgage bank will be improved. Forty large sized co-operative credit societies are to be formed during the Plan period by reorganising small primary credit societies. The Jalpaiguri Central Co-operative Bank will also be taken up for reorganisation. The State will help the co-operative societies by participating in the share capital of the societies, granting subsidies towards managerial cost, etc. The total sum earmarked for the district under "Co-operation" during the Plan period is about Rs. 2.87 lakhs, of which Rs. 0.1 lakh is expected to be spent in 1956-57.

Irrigation : The Karatowa-Talma Irrigation Scheme which is included in the Second Five-Year Plan will benefit an area of 13.8 thousand acres and will yield an additional quantity of about 7.7 thousand tons of agricultural produce. The total cost of this irrigation scheme is Rs. 46.38 lakhs of which Rs. 1.10 lakhs is proposed to be spent in 1956-57.

Power : Under the Rural Electrification Scheme, the following places in Jalpaiguri district are proposed to be electrified, viz., Falakata, Dhupguri, Mazar bazar and Moynaguri. Under the Jaldhaka Hydro-electric Scheme, construction of roads and staff quarters will be undertaken. The total expenditure under "Power" in the district during the whole Plan period will be Rs. 195.31 lakhs of which Rs. 24.32 lakhs is expected to be spent in 1956-57.

Industry : A scheme for improved method of rearing silk worm on a co-operative basis will be undertaken in the district. With a view to developing the eri industry, an eri-seed production centre will be established in the district. Improved method of eri-rearing and spinning will be demonstrated at the centre. The total expenditure under "Industry" during the Plan period will be about Rs. 6.66 lakhs of which Rs. 1.05 lakhs is proposed to be spent in 1956-57.

Cottage Industries : Schemes to be undertaken in this district under this head include opening of demonstration centres for development of village pottery, setting up of production units for making ropes and twines with improved tools and implements, organisation of co-operative societies for development of hand-pounding of rice and propagation of khadi and the charka. The total cost involved in these schemes during the Plan period is Rs. 2.04 lakhs and the sum likely to be spent during 1956-57 is Rs. 1.08 lakhs.

Roads : Five road schemes commenced in the First Plan have been taken over to the Second Plan. The mileage expected to be covered by them is 51.75. Besides, 10 new road projects will be executed in the district during the Second Plan

The mileage to be covered by them is 112 miles. Thus the total mileage covered by road schemes in the district works at 163.75.

The total expenditure on road schemes in the district is Rs. 120.50 lakhs out of which Rs. 9.65 lakhs will be required in the first year.

Health : Fifteen health schemes will be undertaken in the district during the Second Plan period. These schemes envisage creation of a unified health service under State control by taking over the sanitary staff employed under the district boards, training of Dais, establishment of rural nursing service, chest clinics, increase in the number of rural dispensaries, etc.

The total cost of the health schemes is Rs. 67.63 lakhs and the first year's expenditure is Rs. 12.69 lakhs.

Housing : Under Low Income Group Housing Scheme Rs. 10.49 lakhs will be sanctioned to applicants from this district to enable them to build their own houses during the Second Plan period.

Welfare of Backward Classes : A fairly large number of schemes for the welfare of Scheduled Tribes and Scheduled Castes will be taken up in the district during the Second Plan period. The main provisions of these schemes are book grants and free tuition to tribal students, exemption from payment of examination fees and other charges, extension of existing hostels and construction of new hostels, grants to dispensaries, subsidised distribution of seeds and poultry birds, irrigation facilities, improvement of village roads, etc.

The total allotment of expenditure for these welfare schemes in the district is Rs. 19.11 lakhs of which Rs. 3.02 lakhs will be spent in 1956-57.

Social Welfare : During the Second Plan four welfare extension projects with 20 work centres will operate in the district. Of them one extension project with five work centres will be set up in 1956-57. These extension projects are designed to provide for maternity and child welfare, adult and social education for women, tailoring and training in indigenous crafts, child health and recreation, promotion of cultural activities, etc.

The first year's provision for the projects is Rs. 0.34 lakh.

Agriculture : The five-year agricultural development programme of the district envisages work on distribution of about 25 thousand maunds of paddy, wheat, mustard and pulse seeds, about 14 thousand tons of different kinds of fertilisers, establishment of 161 demonstration centres to show improved methods of cultivation and reclamation of 2,700 acres of waste lands. Small irrigation schemes numbering 105 will be executed in the different parts of the district and special measures will be taken up for development of jute, arecanut, cocoanut, sugarcane, cashewnut cultivation. Seven thana seed farms will be set up for raising and multiplying improved seeds and the plant protection unit will treat 15,000 maunds of seeds and control pests of paddy in about 7,000 acres of lands. Crop competitions will also be held.

Animal Husbandry : The Animal Husbandry and veterinary services extension programme aims at establishment of 133 demonstration centres for fodder cultivation and silage, expansion of the existing poultry multiplication centre, and establishment of one poultry extension centre and subsidised distribution of about 4,000 maunds of seed cutting and 14,450 poultry birds. Forty-four district and State cattle shows will be organised. One veterinary aid centre will be opened in each NES block. Construction of 4 veterinary dispensaries will be undertaken in NES

areas and 2 improved "A" and "B" class veterinary hospitals will be functioning. The veterinary field personnel will be strengthened in the district and construction of range offices will be undertaken.

Education : With a view to expanding and improving basic, primary, secondary and technical education in the district, 162 basic and primary schools covering 15,843 pupils, 5 senior basic schools (new and converted), 16 multipurpose schools and 4 expanded and upgraded high schools, will be set up. Improvement of the conditions of service of 1,930 primary teachers, accommodation for 24 primary schools in rural areas and provision of essential accommodation to women teachers of 15 institutions will be undertaken. Improved teaching, housing, library and reading room facilities will be offered to the students of the secondary schools. The general curriculum in the multipurpose schools contains provision for imparting technical education to the pupils at the secondary level.

DARJEELING DISTRICT

Forests : Development of forests occupies an important place in the Plan for Darjeeling district. A large area will be put under bamboo and grass plantations for paper industry. Teak plantations will be extended in order to reduce the shortage of good timber in this country. About 11 miles of road in the foot-hill forests will be constructed so that it may be easier to exploit the forest products. Arrangements will be made to provide better living conditions to forest labourers and to give free primary education to the children of these labourers. Improved facilities will also be provided to the students of the Dow Hill Forest School in the matter of general living and professional training. All these and other measures will in the aggregate cost Rs. 27.59 lakhs during the Plan period, of which Rs. 5.73 lakhs is expected to be spent during 1956-57.

Co-operation : Twenty Co-operative farming societies will be set up in the Darjeeling district during the five years of the Plan. Of this, one will be set up in 1956-57. Reorganisation of a central co-operative bank will also be undertaken during the Plan period. The total expenditure under "Co-operation" in Darjeeling district will be Rs. 0.76 lakh of which Rs. .007 lakh will be spent in 1956-57.

Irrigation : During the Second Plan two irrigation schemes will be operated in the district benefiting an area of about 200 acres and increasing production by 50 additional tons.

The Plan provision for these schemes is Rs. 0.83 lakh which is proposed to be spent in 1956-57.

Industry : Under this head a number of schemes relating to sericulture will be undertaken in the Darjeeling district. These schemes envisage the improvement of seed cocoons and the supply of mulberry grafts. The object of these schemes is to increase the production of better quality silk at lower cost. The total expenditure involved in these schemes during the Plan period is Rs. 36.24 lakhs, of which Rs. 6.56 lakhs is expected to be required during 1956-57.

Cottage Industry : Darjeeling will have the benefit of a shoe-making centre where technical guidance will be given in shoe-designing and manufacturing. A workshop for development of cutlery industry will be established at Ghoom. Wholesale depots will be opened to procure and supply raw materials for small industries and to provide marketing facilities. The expenditure during the whole of the Plan period will be about Rs. 5.32 lakhs and that during the first year of the Plan about Rs. 3.90 lakhs.

Roads : About 84 miles of roads are proposed to be constructed in Darjeeling district during the Second Plan period at a cost of Rs. 102.00 lakhs. During the first year of the Plan, about Rs. 1.70 lakhs is likely to be spent.

Health : The Health Plan of Darjeeling district includes, amongst others, schemes for taking over under Government the sanitary staff maintained by the district board, training of dais, establishment of health centres, hospital and chest and V. D. clinics and providing health centres with ambulances, etc. The total size of Health Plan of the district will be Rs. 40.11 lakhs and Rs. 10.08 lakhs will be spent in the first year of the Plan.

Housing : Under the Low Income Group Housing Scheme, a sum of Rs. 5.10 lakhs will be sanctioned during the Plan period to applicants in Darjeeling district as long-term loan for building residential houses of their own.

Welfare of Backward Classes : A large number of schemes will be taken up in Darjeeling district for the Welfare of Backward Classes. The main provisions of the schemes are : providing free tuition to a large number of students and exempting them from payment of boarding charges, improving the schools and hostels, giving grants to dispensaries and health centres, subsidised distribution of seeds, poultry birds, goats and sheep and pigs, providing training facilities and financial assistance to craftsmen, construction of cart tracks, wooden bridges and culverts, etc. The total cost of the schemes in the district will be about Rs. 11.66 lakhs and the amount proposed to be spent in 1956-57 is about Rs. 2.54 lakhs.

Social Welfare : Four Welfare Extension Projects (with 20 work centres) will be executed in the district during the Plan period. Of these one will be started in 1956-57. The expenditure expected in the first year is Rs. 0.34 lakh. The object of these projects is to provide for maternity and child welfare, adult and social education for women, training in tailoring, cultural activities, etc.

Agriculture : The five-year agricultural development programme for the district of Darjeeling aims at the establishment of 11 thana farms wherefrom improved varieties of seeds will be raised and multiplied for distribution amongst the farmers, distribution of 5,550 maunds of improved aman, wheat, pulses, mustard, gram and maize seeds, supplying 7,200 maunds of different kinds of fertilisers, e.g., bone meal, Super Phosphate, mixture and adoption of necessary plant protection measures with a view to securing higher yields. Special steps will be taken for improving jute, sugarcane, arecanut and cocoanut cultivation. It is also contemplated to lay out 500 demonstration centres and plots wherefrom improved and modern methods of agricultural practice will be disseminated amongst the cultivators. A horticultural substation will be established at Kalimpong and the administrative and field personnel belonging to the district agricultural organisation would be strengthened. Thirty-five small irrigation measures will be executed and waste lands as far as possible will be reclaimed.

Animal Husbandry and Veterinary Services : Establishment of 135 demonstration centres for fodder cultivation and silage, a Siri Cattle Farm, a poultry extension centre, organisation of District and State Cattle Shows and subsidised distribution of 1,018 maunds of improved fodder seeds and 12,843 poultry birds are the important targets of work in the animal husbandry field. In the sphere of veterinary services it has been contemplated to set up one Veterinary aid centre in each NES Block. Provision has also been made for increased grants for medicines, etc., to veterinary aid centres outside CDP and NES areas. Construction of 3 veterinary dispensaries in NES Blocks and four improved "A" and "B" class veterinary hospitals will also be undertaken.

Education : The five-year educational plan for the district lays much stress on the expansion and improvement of basic, primary and secondary education. One hundred and twenty-six primary and basic schools covering 10,641 pupils, 1 senior basic school and twelve multipurpose schools with provision for imparting technical education at the secondary level would be set up. Five existing high schools expanded and upgraded to the multipurpose standard would be functioning. Provision has also been made for improvement of service conditions of 848 primary teachers, increased and improved accommodation for 27 primary schools, essential accommodation for women teachers of 5 institutions, enhanced teaching facilities and also improvement of libraries and reading room facilities in the field of secondary education. There are also schemes providing housing accommodation for students and teachers of secondary schools.

COOCH BEHAR DISTRICT

Forests.—Several schemes of forest development will be undertaken in Cooch Behar district during the Second Plan period. Quite a large area will be covered by plantations, particularly by bamboo and grass plantations. This will help the paper industry. Teak plantations will also be extended in order to meet the demand for good timber. To protect the rapidly diminishing wild life in this country, creation of a National Park and improvement of existing game sanctuaries will be undertaken. Buildings will be constructed for offices and quarters for forest staff. The total expenditure on forests during the Second Plan period in the district will be Rs. 6·13 lakhs of which Rs. 1·69 lakhs is proposed to be spent in the first year.

Fisheries.—In order to increase the production of fish in the district, four schemes will be executed during the Plan period. The objects of these schemes are to popularise fish pond manures, to demonstrate improved methods of pisciculture to indigenous fishermen, to encourage the production of carp fry and to assist needy fishermen by granting loans. The total expenditure involved in the execution of these schemes will be Rs. 0·40 lakh of which Rs. 0·07 lakh will be required in the first year.

Co-operation.—Twenty co-operative farming societies will be formed in the district during the Plan period. One Central Land Mortgage Bank will also be established in the district to meet the demand for long term credit. The Plan provision for these schemes in the district is Rs. 0·47 lakh.

Industry.—One co-operative society of silk waste spinners will be established in Cooch Behar district. Production as well as marketing will be organised through this society. One eri-seed production will also be started in Cooch Behar with a view to developing the eri-industry in West Bengal. This centre will also demonstrate improved methods of eri-rearing and spinning.

Besides, training or production centres will be opened for food processing, cottage match industry, handpounding of rice, village ghani oil industry, etc. Depots will be established for marketing products of cottage industries and also for procurement and supply of raw materials. The total expenditure under Industry in the Plan of Cooch Behar district will be Rs. 10·32 lakhs. The expenditure during the first year will be about Rs. 3·30 lakhs.

Roads.—Nearly 138 miles of roads will be constructed in the district during the Second Plan period at a total cost of Rs. 127·55 lakhs. The expenditure expected during 1956-57 is Rs. 11·24 lakhs.

Health.—The health staff under the district board is proposed to be taken over by Government. Opening of training centres for dais and nurses, establishment of new health centres and expansion of hospitals, establishment of chest and V. D. clinics, providing health centres with ambulances, sinking more tube-wells, etc., are some of the schemes proposed to be implemented. The total expenditure on health schemes in Cooch Behar district during the Plan period will be Rs. 64·38 lakhs, of which Rs. 8·31 lakhs will be spent in 1956-57.

Housing.—Under the Low Income Group Housing Scheme, a sum of Rs. 7·69 lakhs will be sanctioned during the Plan period to applicants in Cooch Behar district as long term loan for building residential houses of their own.

Welfare of Backward Classes.—A large number of schemes for the welfare of backward classes will be undertaken in Cooch Behar district in the Second Five-Year Plan. The main provisions of the schemes are :—Providing free tuition to a

large number of students and exempting them from payment of boarding charges, improvement of schools and hostels, giving grants to dispensaries and health centres, subsidised distribution of seeds, poultry birds, encouragement of vegetable and fruit gardening, improvement of roads, etc. The total cost of the schemes in the district will be Rs. 3.66 lakhs of which Rs. 0.48 lakh will be spent in 1956-57.

Social Welfare.—During the Second Plan period, four Welfare Extension Projects (with 20 work centres) are proposed to be started in the Cooch Behar district. Of these, two will be started in the first year. The object of these projects is to provide for maternity and child welfare, adult social education for women, training in tailoring, cultural activities, etc. The sum to be spent in the district on these projects during 1956-57 is Rs. 0.50 lakhs.

Road Transport.—To provide improved and increased travelling facilities to the people of Cooch Behar which is not adequately served by railways, a scheme of State Transport Service has been undertaken in the district. During the Second Plan period, construction of stores and administrative buildings, depots and way-side sub-depots, etc., will be taken. The total provision for this scheme is Rs. 16.63 lakhs of which Rs. 2.92 lakhs is proposed to be spent in 1956-57.

Agriculture.—The five-year Agricultural Development plan for the district lays special stress upon intensive cultivation. For this purpose seven thana farms would be set up to raise and multiply improved varieties of seeds, 30,500 maunds of improved paddy, wheat, mustard and pulse seeds, 9,610 tons of different kinds of fertilisers, e.g., sludge, town compost, bone meal, super phosphate, ammonium sulphate, etc., would be distributed to the farmers. Eighty small irrigation schemes will be implemented in the different parts of the district. Special measures will be adopted for securing all round improvement in sugarcane, arecanut, coconut, cashewnut, lac and jute cultivation. A horticultural extension centre will be set up and long-term loans will be disbursed for establishment of orchards. About 2,500 acres of waste lands will be reclaimed and necessary plant protection measures will be taken up.

Animal Husbandry and Veterinary Services.—In this sphere 141 demonstration centres for fodder cultivation and silage and 1 poultry extension centre will be set up. There are provision for subsidised distribution of 3,573 maunds of fodder and 13,910 poultry birds. Besides, District and State cattle shows will be organised. One veterinary aid centre will be opened and maintained in each N E S Block. Increased grants have also been provided for aid centres outside the N E S areas. Four veterinary dispensaries and four improved "B" class veterinary hospitals will be set up. The supervisory staff in mufasil and head quarters will be strengthened.

Education.—Improvement and expansion of primary, basic and secondary education are the main features of the five-year educational plan of the district. At the secondary level, the general curriculum has been diluted with suitable technical courses. The different measures in the field of primary and basic education aim at establishment of 162 schools covering 20,359 pupils, providing improved accommodation to 35 primary schools, and also essential accommodation to women teachers of ten institutions and effecting improvement in the service conditions of 827 primary teachers. In regard to secondary education it is contemplated to set up 2 senior basic schools, new and converted, nine multipurpose schools covering 2,040 pupils and to finalise arrangements concerning conversion and upgrading of 5 existing high schools to the multipurpose standard. Increased housing accommodation to teachers and students of secondary schools is also in view.

PURULIA DISTRICT

Industry.—During the Second Plan two Tassar Weavers' Societies will be set up in the district. They would provide finance when required, arrange for the marketing of products and ensure that quality and standard are maintained.

The total cost involved is Rs. 0·50 lakh of which Rs. 0·20 lakh will be spent in 1956-57.

Health.—Two Leprosy Clinics will be started in the district during the Second Plan period at a cost of Rs. 3·76 lakhs.

Social Welfare.—Four Welfare Extension Projects with 20 work centres will be set up during the Second Plan. These projects will provide for maternity and child welfare, adult social education for women, tailoring and training in indigenous crafts, promotion of cultural activities, etc.

Agriculture.—The agricultural development programme for the district aims at distribution and multiplication of different kinds of paddy, wheat, mustard and pulse seeds, distribution of fertilisers like town compost, bonemeal, chemicals, etc., establishment of thana seed farms and demonstration centres for showing improved methods and techniques of cultivation. Small irrigation schemes will be executed and pumping plants will be distributed at a total cost of Rs. 8·50 lakhs for the development of irrigation potential in the district. About 0·48 lakh rupees will be spent for the development of sugarcane cultivation. A lakh of rupees will also be spent on plant protection measures in the district.

Animal Husbandry.—For the improvement and development of veterinary services 7 artificial insemination centres will be set up. Fodder is an important item for the improvement of cattle resources of the district. For this purpose about 117 centres will be set up for fodder cultivation and silage and about 1,024 maunds of fodder seeds will be distributed. About 13,428 poultry birds will be distributed. To encourage healthy competition between the live stock owners 38 cattle shows will be organised. For the development of veterinary services in the district one aid centre will be opened and maintained in each NES Block. One range office will be set up for strengthening the Supervisory Organisation.

Education.—The five-year educational plan for the district envisages expansion and improvement of primary, basic and secondary education. With these objectives in view 126 basic and primary schools bringing 11,640 pupils within their fold, 4 senior basic schools new and converted and 15 multipurpose schools of which 4 will be existing high schools expanded and converted to the multipurpose standard involving about 4,000 pupils, will be set up. Provision has also been made for improved accommodation to 25 primary schools for improvement of teaching, library and reading room facilities in respect of secondary schools. There are also schemes for providing essential accommodation for women teachers in rural areas and increased housing facilities to students and teachers of secondary schools.
