FOREWORD

I am glad that the **Basic Statistics of North Eastern Region 2015** is now brought out after the last handbook was published in 2006. The handbook presents a comprehensive picture of progress made in various sectors of the economy in the Region. It was compiled with the data and information supplied by various Central and State Government Organisations and other Institutions.

The indicators of change in the economy of the Region as brought out in this publication have by and large encapsulated various aspects of the major changes in the economy of the region. I am sure that this publication will be of use to the policy planners, academicians and researchers in particular and to the general public at large.

With the new policy initiatives undertaken for the development of the economy of the Region and the prospects of economically integrating it with the neighbouring countries through the Look East Policy, the region can look forward with renewed hope for higher growth and prosperity for its people.

PREFACE

The **Basic Statistics of North Eastern Region 2015** is the fourteenth in the series brought out by the North Eastern Council Secretariat in the category of *Statistical Handbook*. This handbook provides a wide range of data on diverse sectors of the economy of the North Eastern Region such as demography, GSDP, plans & finances, banking, agriculture & allied, power & energy, industry & mining, tourism, employment, education, health, forest & environment, transport & communication etc. which will be useful for economists, policy makers, researchers and the public at large.

While efforts have been made to maintain uniformity with earlier editions of the publication, some changes have been made in the presentation of data in this publication wherever it was deemed necessary. Efforts were also made to present the latest and most accurate data. Nevertheless, getting latest data pertaining to the region was not an easy task at all.

Suggestions to improve the contents and any other aspects of this publication will be most welcome. A soft copy of this publication has also been uploaded in the NEC [website www.necouncil.gov.in](http://www.necouncil.gov.in) for wider dissemination of information

An Introductory Note and Acknowledgement

The **Basic Statistics of North Eastern Region 2015** is the outcome of the relentless efforts of dedicated officers and staff of Evaluation and Monitoring Sector of North Eastern Council Secretariat. However, Shri Moirangthem Prakash, Consultant (Managerial Economist) deserves special mention in this regard. The handbook is being brought out after a long gap of almost eight years due to lack of manpower and various other reasons.

The current volume has 596 Tables in 25 Chapters covering almost all the sectors of the economy of the region such as demography, GSDP, plans & finances, banking & insurance, agriculture & allied, power & energy, industry & mining, tourism, labour & employment, education, health & family welfare, crime & police, motor vehicles & road accidents, forest & environment, transport & communication, exports & imports of the region, etc. The Data presented are the latest available and efforts were made to provide as much detail as possible. It was also attempted to present the data in time series wherever possible in order to fill the gap of publication between the present edition and the last one.

Efforts have also been made to maintain uniformity with the earlier editions. All chapters and tables presented in the last edition i.e. Basic Statistics of NER 2006 are more or less retained in the current edition. Nevertheless, some unavoidable changes have been made in the new publication. Some tables have been deleted as the data were for the country as a whole, since this publication mainly focuses on data pertaining to the North Eastern Region. Chapters like Electoral Statistics, Food & Civil Supplies, Co-operatives, Economic Census, Physical & Financial Achievements of NERCORMP and NERLP, and Exports and Imports of NER are the new additions, besides many other tables in various chapters, made in the current publication considering the relevance of these chapters and tables to depict the changing scenario of the region. The publication also has sections on abbreviations, concepts and definitions used in this compilation and references besides the NER at a Glance, which is a kind of executive summary of the publication.

Various publications and reports of different Ministries, Central and State Government Organizations and other Institutions have been referred to while preparing this publication. The detailed list is provided in the reference section of the publication, as it's not possible to list out everything here. Finally, I would like to once again place on record my gratitude to those various Ministries, Departments, Organisations and Institutions for providing those inputs, without whose supports it would not have been possible at all to publish this handbook.

1. The premium data pertains only to the individual business of life insurers.
2. It doesn't cover any renewal premium life and also non-life insurance business.
3. State-wise data on Gross Domestic Product (Current Prices) has been taken from Ministry of Statistics and Programme implementation, GOI.
4. State-wise population figure has been taken from Census 2001 and Census 2011 and simple interpolations have been used for intermediate years
5. Insurance Penetration and Insurance Density have been computed based on the above approaches.

*. Surplus

#. As the entire State is included under Hill Area Development Programme, the total rural population of the State is taken as in the Tribal / Hilly / Desert areas
\$. The two districts in Assam, namely North Cachar and Karbi Anglong are included in the list of districts under Hill Area Development Programme. However, as these two districts are having more than 50% tribal population, no change is made in the rural population under Tribal / Hilly / Desert Areas
