PREFACE

The study on “Demand and Supply of Teachers at School Stage – 1999-2009” was Sponsored by the Education Division of the Planning Commission. The main objectives of the study were to :

- a) Estimate the requirements of school teachers for various States by stage and sex.
- b) Work out the demand and supply of teachers of different categories by level of training, stage, and sex, and
- c) State-wise imbalances between demand and supply of teachers by different levels of training.

The availability of data has been a bottleneck. In spite of constraints, the study team has managed to obtain as much data as was possible.

The study concludes that imbalances exist between demand and supply of teachers in almost all States and that there are a large number of untrained teachers across the States.

The Institute acknowledges with thanks the support extended by the then Principal Advisers Shri K.K. Bakshi and Mrs. Kiran Aggarwal, Dr. V.P. Garg, Joint Adviser, Smt. Kirti Saxena, Director and Smt. Meena Gautam, Deputy Adviser of the Education Division of Planning Commission for their support and cooperation in the conduct of the study to the Study Team.

The study has been conducted by a team consisting of Dr. Anil K. Yadav, Chief, Shri N.J. Waghmare, Principal Investigator and Senior Research Officer and Shri Bhoop Singh, Research Associate.

Thanks are due to Prof. Anil Sadgopal, Prof. Shyam Menon (Delhi University), Prof. J.B.G. Tilak (NIEPA) and Dr. S.K. Yadav (NCERT), New Delhi for their guidance and support from time to time. Dr. Lalit Latta, Research Officer, IAMR also made contribution to the study. Shri Y Raman and Shri Devendra P. Kohad typed the draft of the report and Shri Suresh Chandra did the tabulation work.

(H. RAMACHANDRAN)

CHAPTER I

INTRODUCTION

INTRODUCTION

A periodical assessment of demand and supply of manpower of any specific category is one of the important steps of manpower planning. It provides signals to educational planners/policy makers to ensure a proper balance between availability and requirement of manpower by taking timely corrective measures for minimising the wastage of human and economic resources of the country. This exercise is more important when it pertains to school-teachers. Infact, the teacher is the most important element in any educational programme, and/or educational planning at the school level. It is he who is mainly responsible for implementing the educational programmes to bring about the desired educational development of the students and provides such education which gives higher economic returns to the national economy as compared to higher level of education. No amount of investment in improving the physical and educational facilities can improve education, unless there is adequate number of well qualified teachers. After independence, to meet the directive principles contained in Article 45 of the Constitution of India, which says that the state would strive to provide free and compulsory education for all children upto the age of 14 years. Many new schools were established and so there was a substantial increase in the number of pupils enrolled as well as the teachers. More than five decades have gone in planning still there are some primary schools which are without teachers and buildings. It is, therefore, necessary to have a periodical assessment of demand and supply of school teachers. Keeping this in view, the present study has been undertaken.

In this study an attempt has been made to work out the estimates of demand and supply of teachers at different stages of school education for the period 1999-2009. To meet the objective an exercise has been undertaken to build-up estimates of teachers by stages of education such as primary, middle, secondary and higher secondary.

OBJECTIVES

The study has been conducted with the following objectives:

- 1- To work out the requirement for school teachers for different states by stage and sex for the period 1999-2009.
- 2- To work out the supply of teachers of different categories by training level, stage and sex during the period under reference.
- 3- To work out state-wise imbalances, if any, between supply and demand of teachers of different levels of training.
- 4- To suggest appropriate remedial measures.

SCOPE & COVERAGE

The scope of the study is confined to the exercise on estimation of supply and demand for different categories of teachers at state level of recognized schools imparting formal education. This is due to the fact that the Department of Education, Ministry of Human Resource

Development compiles information only in respect of recognized schools/institutions. The supply will be worked out in respect of persons possessing B.Ed., M.Ed., JBT/ETE etc., and the demand will be worked out for primary, middle, secondary and senior secondary stages of education. The teachers of unrecognized and non-formal institutions have been excluded. It also excludes teachers of 'special education' and 'adult education' at school level since such courses are usually meant for educational advancement of individuals involved in other whole time activities. The study is based on the information compiled by the Department of Education, Ministry of Human Resource Development, Government of India.

SOURCES OF DATA

On the basis of the secondary information available with the various agencies such as the Department of Education, Ministry of Human Resource development (MHRD), National Council of Educational Research & Training (NCERT), National Council of Teacher Education, (NCTE), Directorate General of Employment and Training (DGE&T), UNIVERSITY Grant Commission(UGC) and Registrar General of India etc., the analysis has been made

[*The recognized institutions are those in which the courses of study followed are prescribed or recognized by the Government or by a Board of Secondary and Intermediate Education constituted by law and which satisfy one or more of these authorities, as they may be, so that they attain a reasonable standard of efficiency. They are open to inspection and their pupils are ordinarily eligible for admission to public examinations and results are by the Government or University or the Board or any authorized agency.]

OUTLINE OF THE REPORT

This report consists of five chapters. Chapter I presents the objectives, scope & coverage of this report. Chapter II presents methodological details of estimates of teachers at different stages of education for the period 1999-2009. The results are presented in Chapter III. The imbalances between demand and supply of teachers & suggestions are presented in Chapter IV and findings & conclusions are presented in Chapter V.

CHAPTER II

METHODOLOGICAL DETAILS OF ESTIMATION OF DEMAND AND SUPPLY OF TEACHERS AT DIFFERENT SCHOOL STAGES

Estimation of demand for Teachers (based on existing enrolment in recognized schools):

The scope of this study is confined to the exercise on estimation of demand and supply for teachers in recognised schools at different stages of education, i.e., primary, middle, high and higher secondary levels (including 10+2 and Junior Colleges). To meet the objective, the state-wise time series data are required about the number of schools, student's enrolment and number of teachers and also the teacher-pupil-ratio (TPR) in the recognised schools for each stage of education. After examining the various sources, it was found that there were only two main sources which collect, compile and publish such data. These are i) National Council of Educational Research and Training (NCERT) and ii) The Department of Education, Ministry of Human Resource Development (MHRD). The first collects data through its All India Educational Surveys, and the latter publishes data annually in the publication entitled, Selected Educational Statistics . The details of the type of data collected by these sources are given in Annexure I.

An examination of the data available with these sources revealed that the Department of Education, Ministry of Human Resource Development (MHRD) is the only source which

provides state-wise comprehensive and detailed information annually for recognised schools. Hence, the data available with the Department of Education in respects of number of schools, students enrolment, number of teachers and teacher-pupil-ratios etc., have been collected for the years 1984,1986,1988 to 1998 and used for the purpose of estimation of demand for teachers for the period, 1999-2009 at each stage of education i.e. primary, middle, high and higher secondary levels (see table nos. 2.1 to 2.24).

After examining the available data it was observed that the data on students enrolment and teachers were inconsistent with wide fluctuations. Further, the value for some years was either missing or repeated from the previous years' data in some states. In order to have a smooth time series, the series of enrolment has been interpolated/extrapolated by applying compound growth rate observed between the two points of time for which the figures were evidently consistent in states. The projection of the enrolment of the students was made for the period 1999 - 2009 by applying average teacher-pupil-ratio(TPR) of the latest 4-5 years. Similarly, on the basis of the projected enrolment estimations, we estimated the demand for teachers for the same period at each stage of school education (presented in chapter III through table Nos. 3.1 to 3.8).

Projection of School going age Population

The data on single age projected population for 5 to 18 age group of fifteen major states and India are available for the years, 1996, 2001, 2006, 2011 and 2016 in the publication entitled "Population Projection for India and states 1996-2016", published by the Registrar General of India. Similarly, projected population for the age groups 6-11 and 11-14 are published by the Department of Education in its publication entitled "selected educational statistics, 1998-99" for all states and India for the years 1996, 2001, 2006 & 2011. Therefore, using the available projected population of school going age groups 6-11 and 11-14 and by applying again the compound growth rate (as in the case of enrolment) during interval period interpolated the population for the remaining years for all states as well as India. This age group is relevant for the primary and middle stages. Similarly, we have interpolated the population for the age groups 14-15 and 16-17, i.e., High / Higher Secondary for India and fifteen major states viz., Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamilnadu, Uttar Pradesh and West Bengal.

Estimation of Demand for Teachers at Different Stages of Education in Schools:

The demand for teachers at primary, middle, secondary and senior secondary stages of education has been estimated by assuming that 70, 80, 90 and 100 percent of the total school going age population would be enrolled at the above stages of education in schools in India and

in different states, also estimated assuming 50 percent for Bihar and 60 percent for Arunachal Pradesh, Bihar, Jammu & Kashmir and Uttar Pradesh. However given the enrolment as calculated above, the demand for teachers has been estimated by applying available national teacher-pupil-ratios (TPR), i.e., for primary 1:42, middle 1:37, secondary 1:28 and senior secondary 1:34 respectively to the assumed enrolment. These estimations have been made for India as well as for different states, that too for each stage separately. The demand for women teachers has also been worked out by applying available proportion of women teachers at each stage for India and states to total estimated teachers (see Table Nos.3.9 to 3.74 for primary, Table Nos. 3.108 to 3.173 for middle, Table Nos. 3.207 to 3.238 for secondary and Table Nos. 3.255 to 3.286 for senior secondary stages placed in chapter III). Apart from this exercise, an effort has also been made to provide quality education in schools. Therefore, to look into the aspect of quality the demand for teachers has also been estimated by applying 1:30 teacher-pupil-ratio at each stage of education (see Table Nos.3.75 to 3.107 for primary, Table Nos. 3.174 to 3.206 for middle, Table Nos.3.239 to 3.254 for secondary and Table Nos. 3.287 to 3.302 for senior secondary stages). The demand for teachers has also been estimated for all the States and UTs covering ten small States and seven UTs for which projected population was not available by applying available dropout rates in classes I-V, I-VIII and I-X to total enrolment at primary stage (see Table Nos. 3.303 to 3.335 for middle, Table Nos. 3.336 to 3.368 for secondary and Table Nos. 3.369 to 3.401 for senior secondary stages). The statewise dropout rates can be seen in Annexure II.

Estimation of Demand for Women Teachers

The role of women teachers in the overall development of the schools particularly in students development can not be ignored. Hence, the demand for women teachers has been estimated at each stage of education in India & respective states by applying available proportion of women teachers to total estimated teachers (see Table Nos.3.42 to 3.74 for primary, Table Nos. 3.141 to 3.173 for middle, Table Nos. 3.223 to 3.238 for secondary and Table Nos. 3.271 to 3.286 for senior secondary stage).

Estimation of Supply of Different Category of Teachers:

The time series data are required for the purpose of estimating the state-wise supply of different categories of teachers such as B.Ed., M.Ed., JBT, ETE, etc., about the stock of teachers, number of job seekers on live register of employment exchanges and the pass-outs from the teacher training institutions which imparts training to teachers. We have examined the data sources such as the Registrar General of India, the Department of Education, Ministry of Human Resource Development, University Grant Commission and National Council of Teacher Education (NCTE). The NCTE provides the data which contains only approved intake capacity of the teacher training institutions. The UGC had stopped publishing the examination results. However, UGC has provided the unpublished data at all India level on the number of teacher training colleges and total enrolment therein for the years 1950-51,1960-61,1965-66,1970-71,1975-76,1980-81,1985-86,1990-91,1991-92,1992-93,1993-94,1994-95,1995-96,1997-98 and 1998-99 (not state-wise). It has also provided unpublished data on the number of students appeared and passed B.Ed./M.Ed. examinations in year 1995 only.

Supply of BED/MED Teachers:

By using the available enrolment data of the UGC we projected the enrolment by applying growth rate during 1992-93 to 1999-2000, for the reference period of this study, and distributed among the states, using proportion of enrolment available for 1995. This has been projected for B.Ed. & M.Ed. pass-outs and distributed in different states by using the proportion of enrolment. While taking the total teachers at high/higher secondary levels of 1998-99 as the base and by applying 3 percent attrition rate to teachers (adding job seekers & pass-outs to teachers) we worked out the stock of teachers for high/higher secondary stages (see Table Nos. 3.402 to 3.407).

Supply of Elementary Teachers:

The state-wise unpublished data on teacher training institutions such as DIETs(464) , CTEs(85) and IASEs(37) have been collected from the Ministry of Human Resource Development (MHRD). By taking 40 as the average enrolment, we worked out the total enrolment and by applying 2 percent dropout/failure rate to total enrolment worked out the number of pass-outs in states and assumed that pass-outs would remain the same during the reference period of the study. Taking total teachers at primary and middle stage of year 1998-99 as base and by applying 3 percent attrition rate to total teachers worked out the stock of elementary teachers for the reference period. (see Table Nos. 3.408 to 3.410).

CHAPTER III

RESULTS

Estimated Demand and Supply of Teachers

Demand for Teachers:

The demand for teachers has been estimated for all the stages, viz., primary, middle, secondary and senior secondary, separately for each state. For states whose projected population was not available, hence we have estimated the demand of teachers for all the states including small states/uts by applying available dropout rates in classes I-V, I-VIII and I-X to enrolment at primary stage (see table nos.3.303 to 3.401). The states for which the projected population was not available are Arunachal Pradesh, Goa, Himachal Pradesh, Jammu & Kashmir, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim and Tripura. The Union Territories in this list are A&N Islands, Chandigarh, Dadra and Nagar Haveli, Daman and Diu, Delhi, Lakshadweep and Pondicherry.

Primary Stage

Table 2.11 shows that there were 1903.5 thousand teachers in India in the year 1998-99. This figure would go up to 1796.9, 2053, 2310.3 and 2567 thousand respectively in 2008-09 if the enrolment would be 70, 80, 90 and 100 percent of the total population in the age group 6-11 with the teacher-pupil-ratio of 1:42 (see table 3.9). The same demand for teachers would go up to 2515.7, 2875.1, 3234.5 and 3593.8 thousand when the teacher-pupil-ratio is maintained at 1:30 (see table 3.75) in order to provide quality education at primary stage. Therefore, in order to maintain the quality we require more teachers. Similarly, the demand for women teachers

would be 619.9, 708.5, 797.1 and 885.6 thousand and in the later case i.e, for quality purposes, the requirement would be 867.9, 991.9, 1115.9 and 1239.9 thousands respectively.

Middle Stage

Table 2.12 reveals that the number of teachers were 1277.9 thousand in India in 1998-99. The demand for teachers in 2008-09 would be 1258.9, 1438.7, 1618.6 and 1798.4 thousand respectively, if the student enrolment is 70, 80, 90 and 100 percent of the total population in the age group 11-14 and also if the teacher-pupil-ratio stands at 1:37. However, the demand for teachers would be 1552.6, 1774.5, 1996.3 and 2218.1 thousand respectively, when the aspect of quality is taken into consideration by assuming the teacher-pupil-ratio as 1:30. The demand for teachers is worked out by using the dropout rate (39.74 % in classes I-V) which is 1229.1, 1404.7, 1580.3 and 1755.9 thousand respectively at middle stage of education.

Secondary Stage

Table 2.13 indicates that there were 1016.9 thousand teachers in India in the year 1998-99. The demand for teachers by following a similar methodology as above would be 1160.5, 1326.3, 1492.1 and 1657.9 thousands respectively in the year 2008-09, when the students enrolled are 70, 80, 90 and 100 percent of the total population in the age group 15-16. The demand for women teachers would be 381.8, 436.4, 490.9 and 545.4 thousand respectively with teacher-pupil-ratio as 1:28. Looking at the same problem from quality dimension, we find that the demand for teachers would be 1083.2, 1237.9, 1392.6 and 1547.4 thousands respectively, if the teacher-pupil-ratio is 1:30. The demand has also been worked out by using the dropout rate (56.82 in classes I-VIII). In this case the demand of teachers would be 1163.9, 1330.1, 1496.4 and 1662.7 thousands respectively in the year 2008-09.

Senior Secondary Stage

It may be noted from Table 2.14 that for the year 1998-99 there were 730.9 thousand teachers in India at senior secondary stage. The demand for teachers has been worked out as 988.0, 1129.2, 1270.3 and 1411.4 thousands respectively, assuming the enrolment to be 70, 80, 90 and 100 percent of the total population of age group 16-17. The demand for teachers would be 119.7, 1279.7, 1439.7 and 1599.6 with the teacher-pupil-ratio as 1:30. The demand has also been worked out by applying the dropout rate (76.44 % in classes I-X) to enrolment at primary stage as 722.7, 826.0, 929.2 and 1032.5 thousands respectively.

Supply of Teacher:

The supply of trained teachers comes from the teacher training institutions such as teacher training colleges and DIETs etc., but the time series data on examination results are not published by these institutions. However, these data are required to estimate the supply of trained teachers for future periods. Hence, the results are based on the limited unpublished data. This has been collected from the University Grant Commission and the Ministry of Human Resource Development.

B.Ed. & M.Ed Teachers

Table 3.407 denotes that there were 1747.9 thousand teachers at high and higher secondary stages in India in 1998-99. The estimation of passouts have been worked out by using the compound growth rate and their number comes to 116.5 thousand in the year 2008-09 (see table 3.403). The stock of high and higher secondary teachers would be 2921.0 thousand in the

year 2008-09 (see table 3.406). The stock has been worked out by taking the total teachers in high & higher secondary stages in the year 1998-99 as the base.

JBT/ETE Teachers

It has been shown in tables 3.408 & 3.409 that there were 3181.4 thousand teachers at primary and middle stages. The estimation of passouts from DIETs has been worked out as 18189 in India for the year 2008-09. By taking into account the other institutions like CTEs and IASEs the passouts would be 22971 in India in 2008-09. Similarly, the stock of teachers would be 2448303 and 2547127 respectively in 2008-09 (see table nos. 3.408 & 3.410).

CHAPTER IV

STATEWISE IMBALANCES BETWEEN DEMAND AND SUPPLY

Statewise Imbalances Between Demand & Supply and Level of Training:

The estimated demand for teachers at elementary level has been worked out as 3055.8, 3492.3, 3928.9 and 4365.4 thousands while assuming the enrolment as 70, 80, 90 and 100 percent of total population in the age groups 6-11 & 11-14 for India in 2008-09. The estimated stock of teachers worked out as 2448.1 thousand in India for the year 2008-09. Hence, a shortage of teachers has been noted at the elementary level. As far as the high and higher secondary levels are concerned, the estimated demand for teachers worked out to be 2148.5, 2455.5, 2762.4 and 3069.3 thousands, assuming the enrolment to be 70, 80, 90 and 100 percent of the total population in the age groups 14-15 and 16-17. The estimated stock of teachers worked out as 2921.0 thousand in India for the year 2008-09. It means that there would not be a shortage of teachers at the high and higher secondary levels as well in the year 2008-09 in India. After examining the available state-wise distribution of teacher training schools/colleges and percentages of trained teachers in different states, we have got certain results which are given below (see table nos. 4.1 to 4.6).

I. Teacher Training Schools/Colleges

It may be observed from Table 4.1 that out of 32 states/UTs, 4 states, namely, Arunachal Pradesh, Dadra Nagar Haveli and Lakshadweep had no teacher training school, 7 states, namely, Assam, Goa, Manipur, Sikkim, Andaman & Nicobar Islands, Chandigarh and Pondicherry had only one, and 3 states, namely, Mizoram, Nagaland and Tripura had two teacher training schools

respectively. However Table 4.2 reveals that out of 32 states/UTs 3 states, Arunachal Pradesh, Dadra Nagar Haveli had no teacher training college. Moreover, 6 states comprising Himachal Pradesh, Meghalaya, Nagaland, Sikkim, Andaman&Nicobar Islands and Daman & Diu had only one and 6 other states namely, Goa, Manipur, Mizoram, Tripura Chandigarh and Pondicherry had two teacher training colleges respectively in the year 1998.

Proportion of Trained Teachers in different schools

Primary School:

It may be observed from Table 4.3 that out of 32 states/UTs ,6 states Arunachal Pradesh, Manipur, Meghalaya, Nagaland, Sikkim and Tripura had 50 or less percentages of trained teachers, 4 states -Assam, Madhya Pradesh, Jammu & Kashmir, and West Bengal had 50-70% of trained teachers and remaining states had more than 70% of trained teachers in primary schools in the year 1998.

Middle School:

So far as the middle schools are concerned, we found that out of 32 states/UTs ,7 states, viz.,Arunachal Pradesh, Assam, Manipur, Meghalaya, Nagaland, Sikkim and Tripura had 50 or less percentages of trained teachers, 2 states, namely, Jammu & Kashmir and Madhya Pradesh had 50-70% trained teachers and the remaining states/UTs had more than 70% trained teachers in middle schools in 1998 (see table 4.4).

High School:

Table 4.5 reveals that out of 32 states/UTs, 7 states-Arunachal Pradesh, Assam, Manipur, Meghalaya, Nagaland, Sikkim and Tripura had 50 or less percent of trained teachers. Three states, Jammu & Kashmir, Madhya Pradesh and Mizoram had 50-70% of trained teachers and rest states had more than 70% of trained teachers in the year 1998-99.

Higher Secondary:

It may be noted from Table 4.6 that out of 32 states/UTs, 5 states Assam, Manipur Nagaland and Tripura had 50 or less percent of trained teachers. 2 states, Arunachal Pradesh and Sikkim had 50-70% of trained teachers and the remaining states/UTs have more than 70% of trained teachers in 1998-99.

Suggestions Regarding Existing Training Facilities / Procedures for Appointing Teachers at Different Stages:

To understand the existing training facilities and procedures for appointing teachers in different states, we had requested all the state directorates of education (school) to send the information on policies/ procedures and norms for recruitment of teachers at different stages of education existing in the concerned state, but no response was received in spite of our repeated requests except from Meghalaya and Tripura . It may be observed from the information that the procedures and policies vary from state to state. The teachers are recruited through state services commissions at high and higher secondary stages.

CHAPTER V

FINDINGS AND CONCLUSIONS

In the previous chapters we have tried to project the number of teachers required and available. These projections have been made upto 2009. We have made certain assumptions on which projections have been done. One such important assumption is that we have taken four scenarios i.e., 70, 80, 90 and 100 percent of the enrolment of the related age group of population in a particular stage i.e. primary, middle, high and senior secondary etc. while, in order to calculate the number of teachers required we have taken teacher-pupil-ratio as 1:42 for Primary, 1:37 for Middle, 1:28 for High & 1:34 for Sr. Sec. and from quality of education point of view 1:30.

Although the demand projections have been made for most of the state. But because of paucity of the data on projected population, we have estimated the demand by applying available dropout rates in the classes I-V, I-VIII and I-X for all the states including small states namely, Arunachal Pradesh, Goa, Himachal Pradesh, Jammu & Kashmir, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim and Tripura. The Union Territories in this list are Andaman & Nicobar Islands, Chandigarh, Dadra and Nagar Haveli, Daman and Diu, Delhi, Lakshadweep and Pondicherry etc.(see table nos.3.303 to 3.335 middle, 3.336 to 3.368 secondary and 3.369 to 3.401 sr. secondary stage).

On the other hand, the supply of teachers is determined through the outcome of the teachers training institutions i.e., teachers training colleges (B.Ed. & M.Ed) and District Institute for Educational Training (DIETs).

After ensuring demand and supply of teachers upto 2009, we have compared them. It has been observed that at each stage the imbalance between demand and supply exists. Mostly, the demand had been more than the supply of teachers. These imbalances between demand and supply of teachers have been shown in tables 5.1 to 5.4. Yet another sharp observation is that some states have 50 percent or less trained teachers at each stage. In some other state only 50-70 percent are trained and in most cases more than 70 percent are trained as has been discussed in chapter IV. This follows that a large number of teachers are still untrained.

Remedial Measures

1. Since a large number of teachers are untrained at each stage, it is proposed that their training be arranged and at an appropriate place which would be near to their station.
2. To correct the imbalances, we may have to enhance the training facilities in the coming years. .

Details of the type of Data collected by different agencies

The time series data on enrolment by states/stages and teachers working in the schools are required to work out the estimates of demand for teachers at different stages/levels of education for the years 1999 to 2009. The main sources providing data on these parameters are: Department of Education, Ministry of HRD and National Council of Educational Research and Training (NCERT). These sources adopt varying concepts and reference periods and differ in coverage. A brief review of data available from these sources is presented below:

I Department of Education

The Department of Education collects and compiles data annually on enrolment and teachers relating to different types of recognized educational institutions located in various states/union territories of India. It is the only agency in the country which presents detailed information on school education in its annual publication 'Education in India' and 'Selected Educational Statistics'. The latest relate to the year 1992-93 and 1998-99 respectively. The items of information on which data are available on enrolment and teachers are given below:

Enrolment

[i] Sex-wise and state-wise enrolment by type of educational institutions, viz. pre-primary schools, primary schools, middle schools and high/higher secondary schools. The schools have been classified according to the highest stage of their teaching.

[ii] Sex-wise and state-wise enrolment by different classes of school stage i.e. right from pre-primary stage to XII classes.

[iii] Sex-wise and state-wise enrolment by different stages of general school education viz. pre-primary classes, classes I-V, classes VI-VIII and classes IX-XII.

[iv] Sex-wise and state-wise enrolment for post-secondary and above classes viz. enrolment in classes of Intermediate/Puc/10+2, under graduate [diploma/certificate] graduate, post graduate and research for general and professional stream of education.

[v] Sex-wise and state-wise enrolment for general courses are classified by arts, science and commerce, while professional courses comprises of engineering and technology, medicine, agriculture, veterinary science, education, law, oriental studies etc.

Teachers

[i] State-wise teachers for general school education classified by sex, state, qualification, training status.

[ii] Sex-wise and state-wise teachers by type of educational institutions viz. pre-primary schools, primary schools, middle schools and high/higher secondary schools. The school have been classified according to highest stage of their teaching.

[iii] Sex-wise and state-wise teachers in schools for general education are classified by training status [Trained/Untrained].

[iv] Sex-wise and state-wise teachers in secondary schools by type of education [general/vocational].

[v] Sex-wise and state-wise teachers for post-secondary and above classes viz., Intermediate/Puc/10+2, under-graduate [diploma/certificate], graduate, post-graduate and research for general and professional stream of education.

[vi] Sex-wise and state-wise teachers for general courses are classified by art, science and commerce and professional courses are distributed into engineering and technology, medicine, agriculture, veterinary science, education, law, oriental studies etc.

II National Council of Educational Research & Training (NCERT)

NCERT through its Educational Surveys play an important role in so far as planning of educational facilities in the country are concerned. So far six All India Surveys have been conducted relating to the year 1957, 1965, 1973, 1978, 1986 and 1993. Each Survey provides information on enrolment and teachers on census basis for general school education as.

Enrolment

[i] Sex-wise and state-wise enrolment by different classes of school stage education viz. right from class I to XII.

[ii] Sex-wise and state-wise enrolment by different stages of general school education viz. classes I-V, classes VI-VIII and classes IX-XII.

Teachers

As regards teachers, NCERT through its Survey provides detailed and additional information about teachers on various items such as: [i] Teachers for each state by sex, training status, and qualification at primary, middle, secondary and higher secondary stages of education. [ii] Teachers in schools for general education in each state by sex, management, of schools, age, location and experience etc.

Limitations

The information on enrolment and teachers provided by these Educational Surveys are very significant and useful for planning school education in the country. However, data provided has its own limitations: 1] There is no uniformity in the periodicity of these Survey and reference dates.

Other Sources

In addition to these sources, the office of the Registrar General of India , National Sample Survey Organization [NSSO] and Directorate General of Employment and Training [DGE&T] provides some data on teachers which are not consist and match with other sources as there is conceptual differences.

Conclusion

From the above it is clear that the Department of Education is the only source providing data on school education annually by type institutions. Hence the data as available from the Department of Education in respect of enrolment and teachers for school has been used as basic figures in the present exercise on estimation of teachers at school- stage.

List of courses offered by Teacher Training Institution's (NCTE)

1.Pre-primary:

PPTC -pre-primary teachers' certificate
 PPTTC -pre-primary teacher training course

2.Elementary:

BTC -basic training certificate
 BTC(C) - do- correspondance course
 CERT -certificate course
 DEd -diploma in education
 DEd(H) - do Hindi
 DEd(U) - do Urdu
 DPTTE -diploma in primary teacher training education
 DTE -diploma in teacher education
 ECCE -early childhood care and education
 ETE -elementary teacher education
 ETE(CC) - do correspondance
 ETT -elementary teacher training
 JBT -junior basic training
 JTTC -junior teacher training certificate
 NTT -nursery teacher training
 NTT(CC) - do- correspondance
 NURSERY(CC) -nursery correspondance
 PTET -pre-training entrance test
 PTC -primary teacher's certificate
 PTT -primary teacher's training
 PTTC - do course

3.Secondary:

TC -teacher's certificate
 TCH -teacher's certificate higher
 TTC -teacher' training certificate
 UGBT -under-graduate basic training
 BEd -batchlor of education
 BEd (C) - do correspondance
 BEd (E) - do English
 BEd (H) - do Hindi
 BEd(NUR) - do Nursery
 BEd(S) - do Sanskrit
 BEd(Sc) - do Science
 BEd (V) - do vocational
 BEd(Y) - do yoga
 B.El.Ed - do elementary education
 DBEd - diploma in basic education
 GBTC -graduate basic training course
 LT -licenciate in teaching
 STC -senior training certificate

4.Senior Secondary:

MEd -master of education
 MEd(CC) - do correspondance
 MEd(F) - do full time
 MEd(P) - do part time
 MEd(Sc) - do science

5.Physical Education:

PE BPEd -batchlor of physical education
 PE BPE - do
 PE CPEd -certificate course in physical education
 PE DPEd -diploma in physical education
 PE MPEd -master of physical education

6.Others:

DBHPS -dakshin bhartiya hindi prachar samiti
 DIP(SY) -diploma in psychology
 SARASW(CC) -saraswati shiksha visarad (correspondance)
 VIGYANACHA -vigyanacharya

List of courses offered by Teacher Training Institution's (NCTE)

1.Pre-primary:

PFTC -pre-primary teachers' certificate
 PPTTC -pre-primary teacher training course

2.Elementary:

BTC -basic training certificate
 BTC(C) - do- correspondance course
 CERT -certificate course
 DEd -diploma in education
 DEd(H) - do Hindi
 DEd(U) - do Urdu
 DPTTE -diploma in primary teacher training education
 DTE -diploma in teacher education
 ECCE -early childhood care and education
 ETE -elementary teacher education
 ETE(CC) - do correspondance
 ETT -elementary teacher training
 JBT -junior basic training
 JTTC -junior teacher training certificate
 NTT -nursery teacher training
 NTT(CC) - do- correspondance
 NURSERY(CC) -nursery correspondance
 PTET -pre-training entrance test
 PTC -primary teacher's certificate
 PTT -primary teacher's training
 PTTC - do course

3.Secondary:

TC -teacher's certificate
 TCH -teacher's certificate higher
 TTC -teacher' training certificate
 UGBT -under-graduate basic training
 BEd -batchlor of education
 BEd (C) - do correspondance
 BEd (E) - do English
 BEd (H) - do Hindi
 BEd(NUR) - do Nursery
 BEd(S) - do Sanskrit
 BEd(Sc) - do Science
 BEd (V) - do vocational
 BEd(Y) - do yoga
 B.El.Ed - do elementary education
 DBEd - diploma in basic education
 GBTC -graduate basic training course
 LT -licenciate in teaching
 STC -senior training certificate

4.Senior Secondary:

MEd -master of education
 MEd(CC) - do correspondance
 MED(F) - do full time
 MED(P) - do part time
 MEd(Sc) - do science

5.Physical Education:

PE BPEd -batchlor of physical education
 PE BPE - do
 PE CPEd -certificate course in physical education
 PE DPEd -diploma in physical education
 PE MPEd -master of physical education

6.Others:

DBHPS -dakshin bhartiya hindi prachar samiti
 DIP(Psy) -diploma in psychology
 SARASW(CC) -saraswati shiksha visarad (correspondance)
 VIGYANACHA -vigyanacharya
