PREFACE

Distance Education in the form of correspondence courses was started in India in the early sixties to be followed by home studies and the open education system but no attempt was made to survey these facilities and to assess their contribution to the cause of education. An attempt for the first time has been made in this volume to present detailed information about the actual position of the various courses under distance education mode. We were somewhat handicapped by the fact that many institutions did not respond to our questionnaire as we would have liked them to but I am happy that a modest beginning has been made and our efforts to improve this publication shall continue in this direction.

I am grateful to all the universities who have supplied us information and that too within the shortest possible time and hope that the remaining institutions shall also supply it for our next publication. I am thankful to the dedicated staff under Dr. R.S. Thakur, Joint Director (Planning) who have worked tirelessly in bringing out this publication.

DISTANCE EDUCATION IN INDIA

1. During the preceding half-a-century, higher education in India has witnessed a remarkable transformation from a system meant for an elite group having colonial roots to a system of mass education attempting to meet the demands of vibrant democratic polity. Since independence, there has been large-scale expansion of higher education. The number of Universities increased from 20 in 1947 to 228 during 1996-97 i.e. registering around eleven-fold increase during the last five decades. New Institutions "Deemed Universities" have been established under Section 3 of UGC Act. There were around 900 Colleges in 1950-51 which have now increased to more than 8 thousand colleges thereby registering nine-fold increase in the Colleges. The number of scholars has increased from 0.42 million in 1950-51 to more than five million during 1996-97 registering more than eleven times increase in enrolment during this period.

2. There was a time when a student at the undergraduate level must either be admitted on a full time basis or go without education altogether. This would have created tremendous demand for full time regular seats in colleges but because the resources to accommodate the ever-increasing demand were not available, this might have lead to the deterioration of standards of education. This unwanted situation, to some extent, has been averted by the start of evening colleges, Correspondence Courses/Home Studies and recently by the system of Open Education in the country. A multiple entry system has come into being not only at school level but at higher education level also which has been a very important milestone in the lives of our people. Delhi University was the premier institution to start correspondence courses in the year 1962 on a pilot project basis. Slowly many Universities followed suite. During 1996-97, there were 7 Open Universities and as many as 51 other Universities running Correspondence Courses and/or Open Education programmes. Year-wise/State-wise break-up of these 58 Universities is given below:-

3. In India, the University of Delhi initiated Distance Education in 1962 in

the form of correspondence courses. The first Open University was established in Andhra Pradesh in 19[illegible], and the Indira Gandhi National Open University was established in 19[illegible]. The distance education system has grown substantially since then and during the year 1996-97 there were 7 Open Universities and 51 Correspondence Courses Directorates/Institutes attached to different Universities. Correspondence courses initially provided largely correspondence programmes with occasional contact programmes. However, with the establishment of Open Universities, the methodologies of instructions and evaluation have undergone sea changes. The open universities are following rigorous instructional designs in the development of instructional materials and in imparting of instructions. The universities provide regular counseling services through networks of study centers and make substantial use of electronic media. The Indira Gandhi National Open University has devised a large media networking and teleconferencing system to electronically link all distance-teaching institutions in the country. Open education network is poised to facilitate voice, image and data transmission through two ways audio and video-conferencing. There is optimism that Open Universities can also offer effective programmes in management and technology. Out of total enrolment of 11.14 lakhs, 8.53 lakhs i.e. more than 3/4th are studying in Humanities Group while the remaining less than 1/4th are studying in professional vocational, technical education and management courses. The Open Universities have taken note of the fact that the model of lifelong learning for all is slowly replacing the earlier model of higher education requiring selective learning. State-wise distribution of Universities and their enrolment is as follows:
