

# GOVERNMENT OF MAHARASHTRA

A REPORT ON  
'EMPLOYMENT AND UNEMPLOYMENT SITUATION'  
BASED ON DATA COLLECTED IN STATE SAMPLE OF  
66<sup>TH</sup> ROUND OF NATIONAL SAMPLE SURVEY  
(JULY, 2009 – JUNE, 2010)

VOLUME I

## PREFACE

The Directorate of Economics and Statistics has prepared a report on 'Employment and Unemployment situation' based on the data of state sample collected in the 66<sup>th</sup> round (July, 2009 – June, 2010) of National Sample Survey.

2. Volume I of the report contains important findings of the survey in 'Executive Summary' while important results are given in 'Survey Findings'. Estimation procedure, concepts and definitions and some statistical tables are given in Volume II, which is available on the website <http://mahades.maharashtra.gov.in> along with detailed tables.

3. I hope results of this survey will be useful to senior officers of the Government involved in policy framing, researchers, economists and academicians. Suggestions and comments on the report are welcome and may be sent to the e-mail address [nss.des@hotmail.com](mailto:nss.des@hotmail.com).

# Chapter 1

## Executive Summary

*The results of the survey on 'Employment and Unemployment' conducted in the 66<sup>th</sup> round of N.S.S. (July, 2009 - June, 2010) show that the worker population ratio for the state is 40.8 percent as per the usual principal status of activity and is 56.5 percent for males and 23.6 percent for females.*

### Important Findings of the Survey

- 1) The average household size was 4.5 persons in rural and 4.2 persons in urban areas; as against 4.7 and 4.4 persons in 1999-2000.
- 2) The sex ratio, which was 959 in 1977-78 shows steady decline to 952 in rural and from 904 to 858 in urban areas, though some improvement has been observed during the last ten years in the rural areas of the state.
- 3) The households depending on agricultural activities for livelihood (i.e. agriculture labour and self employment in agricultural) in rural areas have reduced from 75.1 percent to 65.7 percent in last ten years, while those depending on self employment in non-agriculture and other labour have increased. In urban area, proportion of persons doing regular wage/salaried jobs has decreased while that engaged in self-employment has increased.
- 4) About 61.9 percent rural and 67.8 percent urban population belonged to the 'working population' age group of 15-59 years.
- 5) About 12 percent rural and 9.3 per cent urban households were female headed, in which 19.2 percent and 25.2 percent rural and urban households respectively had no usually employed member, as against 4.4 per cent (rural) and 6.4 per cent (urban) households with no usually employed member in totality.
- 6) According to the usual principal status of activity, the worker population ratio (also called the workforce participation rate) was 44.1 percent in rural and 36.4 percent in urban areas. The gender gap in WPR was wider in urban than rural areas.
- 7) The worker population ratio is observed to be steadily decreasing in rural area but is more or less stable in urban area over the last two decades in the Usual Principal Activity Status; as per the quinquennial survey estimates.
- 8) Study of sectorwise distribution of usually employed persons indicates that higher proportions of females are engaged in primary sector. In urban areas, significant shift from primary sector to tertiary sector is observed over last two decades for both males and females, which is more pronounced in case of females.
- 9) The unemployment rate in rural areas is found to be 1.1 for males and 0.6 for females. This is 2.2 for males and 5.3 for females in urban areas.

## Chapter 2

### Survey Findings

#### Introduction

2.1 The NSSO has conducted a number of surveys to assess the volume and structure of employment and unemployment, starting with the 9th round (May-September, 1955) on the subject. Based on concepts and definitions recommended by the Dantwala Committee, quinquennial surveys on employment and unemployment have been conducted since the 27th round (July, 1972 – June, 1973) of NSS. The 66<sup>th</sup> round (July 2009 - June 2010) of NSS is the 8<sup>th</sup> quinquennial survey in the series.

#### About the Survey

2.2 The survey was conducted from 1st July, 2009 to 30th June, 2010. The survey period was divided into four sub-rounds, each of three months duration and was conducted in 501 villages in rural areas and 753 blocks in urban areas of Maharashtra in which 10,023 households with 44,667 persons were covered.

2.3 The concepts and definitions followed for the survey are discussed in the volume II of this report. The same may be referred for better understanding of the results of the survey. In order to study the changes in the population characteristics the results of the present survey are compared with earlier quinquennial survey results. For that, the 32<sup>nd</sup>, 38<sup>th</sup>, 43<sup>rd</sup>, 50<sup>th</sup>, 55<sup>th</sup> and 61<sup>st</sup> round surveys conducted during 1977-78, 1983, 1987-88, 1993-94, 1999-2000 and 2004-05 respectively have been considered. However, wherever the year is not specifically mentioned, the data pertains to the current round (i.e. 66<sup>th</sup> round (2009-10)).

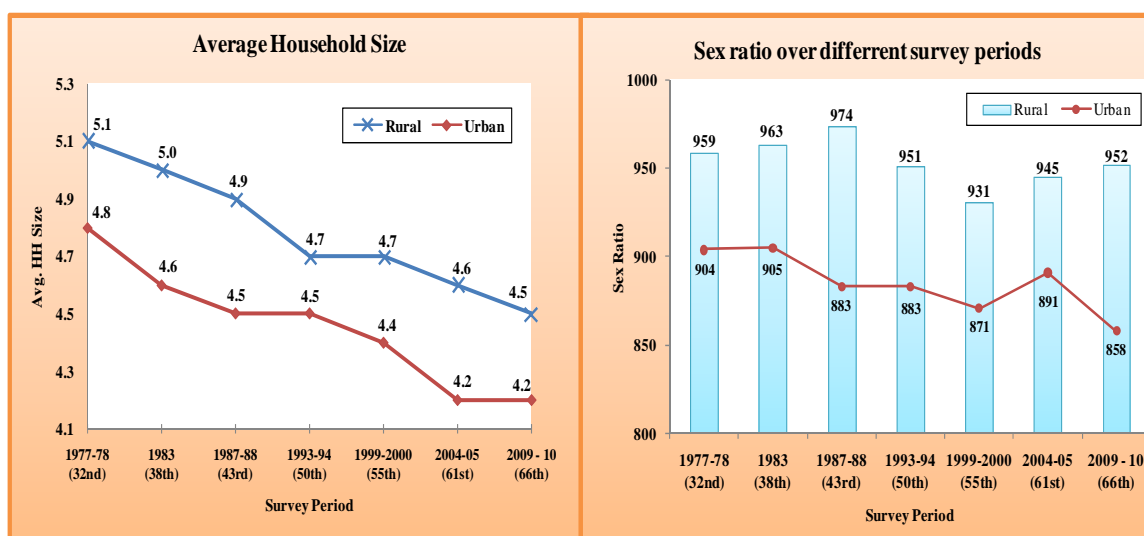

#### Findings of the survey

##### (i) General Observations

2.4 The average household size in the state is found to be 4.5 in rural and 4.2 in urban areas during 2009-10. A steady decline in the household size from 5.1 in rural and 4.8 in urban areas in 1977-78 to the current level is also observed. The sex ratio is estimated to be 952 in rural and 858 in urban area during 2009-10. The details are given in table 1.

Table 1  
Average household size and sex ratio

Survey period	Average household size		Sex ratio	
	Rural	Urban	Rural	Urban
1977 - 78	5.1	4.8	959	904
1983	5.0	4.6	963	905
1987 - 88	4.9	4.5	974	883
1993 - 94	4.7	4.5	951	883
1999 - 2000	4.7	4.4	931	871
2004 - 05	4.6	4.2	945	891
2009 - 10	4.5	4.2	952	858

2.5 The composition of households is given in table 2. The decreasing household size shown in table 1 is well reflected in the decreased proportion of boys and girls in the households over the period from 1999-2000 to 2009-10 in both rural and urban areas.

Table 2  
Composition of household

Category	2009-10		2004-05		1999-2000	
	Rural	Urban	Rural	Urban	Rural	Urban
Adult males	1.66	1.67	1.64	1.63	1.63	1.65
Adult females	1.60	1.47	1.57	1.46	1.53	1.45
Boys	0.65	0.57	0.73	0.58	0.80	0.71
Girls	0.60	0.45	0.67	0.51	0.74	0.60
All	4.51	4.16	4.61	4.18	4.70	4.41

2.6 Table 3 gives the percentage distribution of households as well as of persons by household type for three quinquennial rounds including the current one. It is observed that in the rural area, there is a steady increase in the proportion of households/ persons engaged in 'self employed in non-agriculture', resulting in increase in the 'total self employed'. Also, a decreasing trend in the 'agricultural labour' category is observed. In the urban area, an increase in the 'Self-employed' persons is observed in the last decade (i.e. from 1999-2000 to 2009-10).

Table 3  
Percentage distribution of households and persons by household type

Household type	Households			Persons		
	2009-10	2004-05	1999-2000	2009-10	2004-05	1999-2000
<b>Rural</b>						
<b>Self-employed in:</b>						
Agriculture	32.6	32.1	34.2	36.0	35.8	38.1
Non-agriculture	12.4	10.4	7.8	13.0	11.9	8.3
<b>All self-employed</b>	<b>45.0</b>	<b>42.5</b>	<b>42.0</b>	<b>49.0</b>	<b>47.7</b>	<b>46.4</b>
Agricultural labour	33.1	36.7	40.9	31.6	35.5	38.5
Other labour	8.9	5.5	4.5	8.9	5.2	4.2
<b>All Rural labour</b>	<b>42.0</b>	<b>42.2</b>	<b>45.4</b>	<b>40.5</b>	<b>40.7</b>	<b>42.7</b>
Others	13.0	15.3	12.6	10.5	11.6	10.9
<b>All</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

Household type	Households			Persons		
	2009-10	2004-05	1999-2000	2009-10	2004-05	1999-2000
<b>Urban</b>						
Self-employed	33.0	33.1	26.6	38.6	38.3	29.9
Regular wage/salaried	50.0	49.4	52.7	46.5	48.2	50.6
Casual labour	8.9	8.6	14.5	9.4	8.9	15.5
Others	8.1	8.9	6.2	5.5	4.6	4.0
<b>All</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

2.7 Table 4 gives the percentage distribution of households and population by decile classes on Monthly Per Capita Expenditure (MPCE). The decile classes have been formed such that approximately 10 percent of population lies in each class. The corresponding percentage of households indicate that higher the MPCE decile class, lower is the household size.

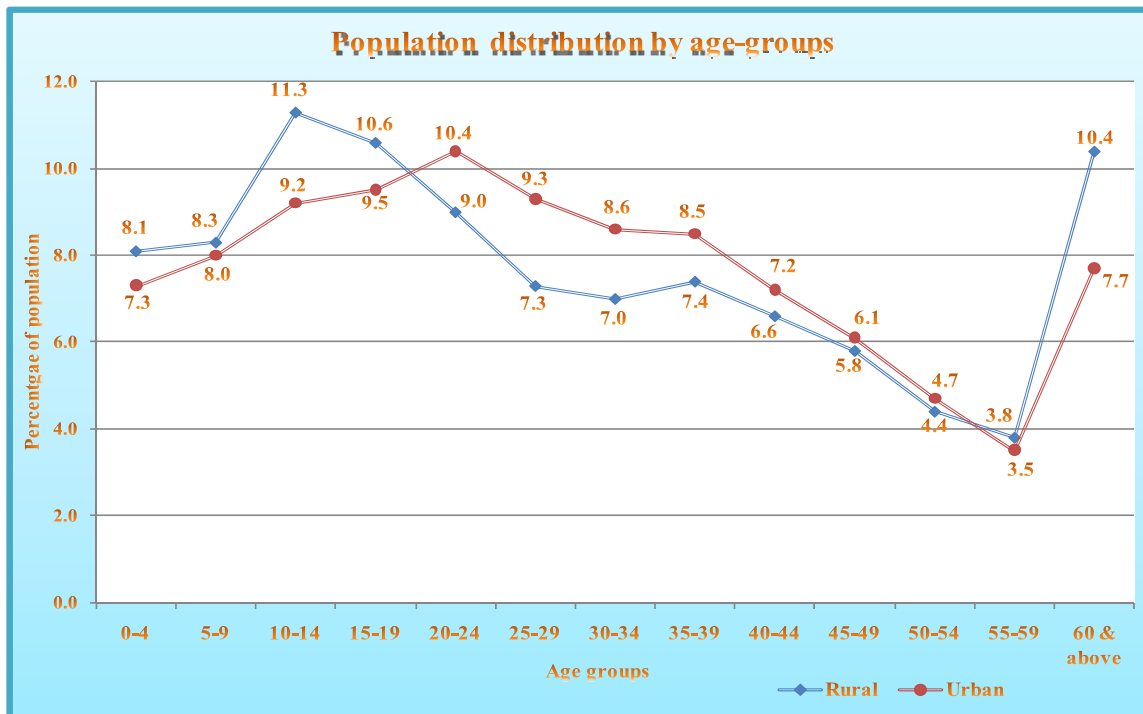

Table 4  
Percentage distribution of households and population by decile classes on MPCE

Decile classes on MPCE	Rural		Urban	
	Households	Population	Households	Population
0 – 10	7.8	9.9	7.1	10.0
10 – 20	8.6	10.1	7.8	10.0
20 – 30	8.2	9.9	8.3	10.0
30 – 40	9.3	10.0	8.9	10.0
40 – 50	9.7	9.8	8.8	10.0
50 – 60	10.0	10.2	9.4	10.0
60 – 70	10.7	10.0	10.9	10.0
70 – 80	10.5	10.0	11.1	10.0
80 – 90	11.5	10.0	14.5	10.0
90 – 100	13.8	10.1	13.1	10.0
All classes	100.0	100.0	100.0	100.0

2.8 Table 5 gives the percentage distribution of population by five year age-groups. It may be observed that the percentage of population in the age-groups 0 to 19 years and also that aged 60 years and above in the rural areas is much higher than that in the urban area and consequently more population belonging to working class age-groups live in urban area (67.8 percent) as compared to the rural areas (61.9 percent), may be due to availability of more employment avenues/ opportunities.

Table 5  
Percentage distribution of population by five-year age-groups

Age-Group	Rural			Urban		
	Male	Female	Person	Male	Female	Person
0-4	8.9	7.3	8.1	7.6	7.1	7.3
5-9	8.4	8.3	8.3	7.9	8.1	8.0
10-14	10.9	11.8	11.3	9.8	8.5	9.2
15-19	11.5	9.6	10.6	9.9	8.9	9.5
20-24	9.5	8.4	9.0	10.4	10.5	10.4
25-29	7.5	7.1	7.3	9.7	8.9	9.3
30-34	6.4	7.7	7.0	7.6	9.6	8.6
35-39	6.6	8.2	7.4	8.3	8.8	8.5
40-44	6.5	6.6	6.6	7.3	7.2	7.2
45-49	6.2	5.5	5.8	6.0	6.3	6.1
50-54	4.9	3.9	4.4	4.8	4.4	4.7
55-59	3.5	4.1	3.8	3.7	3.2	3.5
60 & above	9.2	11.5	10.4	7.0	8.5	7.7
All	100.0	100.0	100.0	100.0	100.0	100.0

2.9 Table 6 gives the percentage distribution of persons over a period of more than 20 years based on five consecutive quinquennial survey results in the rural and urban area in the state. It may be observed that in both the rural and urban areas, the proportion of the population belonging to the lower two age-groups (i.e. 0-4 and 5-14) is decreasing while that in the working age-group of 15-59 years and higher age-group (i.e. 60 & above) is increasing, showing increased longevity coupled with reducing birth rate.

Table 6  
Percentage distribution of persons by age groups

Sector	Age groups (in years)	Male					Female				
		1987- 88	1993- 94	1999- 2000	2004- 05	2009- 10	1987- 88	1993- 94	1999- 2000	2004- 05	2009- 10
Rural	0-4	11.9	11.5	9.9	9.4	8.9	12.4	10.6	8.7	7.6	7.3
	5-14	26.5	24.3	24.8	21.6	19.3	24.0	22.7	22.7	22.3	20.1
	15-59	54.9	56.7	58.5	60.8	62.6	55.9	59.0	60.4	60.4	61.1
	60 & above	6.7	7.5	6.8	8.2	9.2	7.7	7.7	8.2	9.7	11.5
	All	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Urban	0-4	10.2	9.3	8.4	7.4	7.6	10.7	10.1	8.7	7.2	7.1
	5-14	22.5	22.3	21.5	18.7	17.7	22.6	21.1	20.5	18.7	16.6
	15-59	62.2	63.1	64.5	67.3	67.7	60.5	62.3	64.2	65.7	67.8
	60 & above	5.1	5.3	5.6	6.6	7.0	6.2	6.5	6.6	8.4	8.5
	All	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

2.10 Table 7 gives the percentage distribution of persons by general education level. The percentage of literates in 2009-10 has increased in both rural and urban areas (for males as well as females) as compared to 2004-05. Also, it may be observed that the gender gap in literacy in rural areas which was 20.1 percentage points in 2004-05 has decreased to 18.3 percentage points in 2009-10, while in urban areas it has decreased from 10.3 percentage points to 8.9 percentage points.

Table 7

Percentage distribution of persons of age 5 years and above by general educational level

Category	Survey Period	General educational level				
		Not literate	Literate			
			All	<i>up to primary</i>	<i>Middle school</i>	<i>Secondary &amp; above</i>
Rural Male	2009-10	14.7 (16.1)	85.3 (83.9)	33.4 (22.1)	22.2 (24.3)	29.7 (37.5)
	2004-05	18.5 (19.7)	81.5 (80.3)	36.3 (25.7)	22.9 (25.5)	22.3 (29.1)
Female	2009-10	33.0 (39.9)	67.0 (60.1)	31.2 (20.1)	19.4 (19.5)	16.4 (20.5)
	2004-05	38.6 (45.2)	61.4 (54.8)	33.4 (23.0)	17.5 (18.3)	10.5 (13.5)
Urban Male	2009-10	7.0 (6.8)	93.0 (93.2)	24.3 (12.3)	21.6 (22.7)	47.1 (58.2)
	2004-05	8.0 (6.4)	92.0 (93.6)	26.7 (16.0)	21.5 (22.8)	43.8 (54.8)
Female	2009-10	15.9 (18.0)	84.1 (82.0)	25.0 (14.3)	19.7 (19.8)	39.4 (47.9)
	2004-05	18.3 (19.1)	81.7 (80.9)	27.9 (18.4)	20.4 (20.9)	33.4 (41.6)

2.11 The information on female headed households was also collected and compiled in the survey, which is given in table 7. The percentage of female headed households as well as the average household size has increased in both rural and urban areas compared to 2004-05.

Table 8

Number of female headed households, household size and sex-ratio for female headed households during 2004-05 and 2009-10

Characteristics of the female headed household	Rural		Urban	
	2004-05	2009-10	2004-05	2009-10
No. of female headed household per 100 household	10.7	12.0	8.8	9.3
Average Household size (0.0)	2.7	3.0	3.1	3.2
Sex ratio	2161	2181	1743	1727

2.12 The percentage distribution of households in the rural areas according to the land owned is given in table 9. It may be observed that maximum 28.1 percent of the rural households own land between 0.005 to 0.040 hectares; while about 5.1 percent own more than four hectares of land. About 31.7 percent of households belonging to 'Self-employed in agriculture' type own land between 2.01 hectares to 4.00 hectares.

Table 9

Percentage distribution of rural households by size class of land owned for each household type

Size of land owned (hectares)	Household type						Total	Households Estd. (00)	
	Self-employed in		Sub-total (col.2+ col.3)	Agricultural labour	Other labour	Sub-total (col.5+ col.6)			Others
	Agriculture	Non-Agriculture							
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)
0.000	0.6	9.6	3.1	4.3	8.6	5.2	14.6	5.4	6800
0.001-.004	1.8	23.9	7.9	36.2	31.1	35.1	26.7	21.8	27210
0.005-.040	7.5	31.1	14.1	40.7	44.9	41.6	33.2	28.1	35173
0.041-1.00	19.1	10.3	16.7	12.5	9.5	11.9	10.8	13.9	17347
1.01-2.00	26.0	13.3	22.5	5.8	4.5	5.5	6.3	13.2	16542
2.01-4.00	31.7	9.8	25.7	0.6	1.3	0.7	4.6	12.4	15556
>=4.01	13.3	1.8	10.2	0.0	0.2	0.1	3.8	5.1	6372
All	100	100	100	100	100	100	100	100	125000

2.13 Enquiry was made about the employment of persons of age 15 years and above. Table 10 depicts the percentage distribution of households of which atleast one member was aged 15 years and above by number of usually employed persons. The table shows that in the rural areas about 4.4 percent and in urban area, about 6.4 percent households had no employed member (of age 15 years and above). Maximum 51.7 percent households in the urban areas had only one male employed member (aged 15 years and above).

Table 10

Percentage distribution of households having at least one member of age 15 years & above by number of usually employed (ps+ss)\* persons of age 15 years & above in those households.

number of usually employed(ps+ss) persons	Rural				Urban			
	All households		Female headed households		All households		Female headed households	
	2004-05	2009-10	2004-05	2009-10	2004-05	2009-10	2004-05	2009-10

\* ps+ss - Principal status + Subsidiary status

## (ii) Employment

2.14 Labour force, or in others words, the 'economically active' population, refers to the population which supplies or seeks to supply labour for production and therefore, includes both 'employed' and 'unemployed' persons. The labour-force participation rate (LFPR) is defined as the proportion of persons in the labour-force to total population. Similarly, the ratio of number of persons employed to total population is referred to as work-force participation rate (WFPR) or worker-population ratio (WPR). For measuring LFPR or WPR, all the three approaches, viz. usual status, current weekly status and current daily status, were adopted for collection of data in the survey. The Worker Population Ratio (WPR), Proportion of Unemployed population (PU) and Labour Force Participation Rate (LFPR) are given in Table 11. It may be observed that LFPR is higher in rural area compared to urban area. Significant gender gap is observed in the WPR and LFPR, which is more prominent in the urban area.

Table 11

*ups – usual principal status, ups+ss – usual principal + subsidiary status, cws – current weekly status, cds – current daily status*

2.15 Table 12 gives the estimates of WPR according to different approaches for various rounds of NSS. The highlighted data corresponds to quinquennial surveys. It may be observed that the WPR according to the Usual Principal Status (UPS) is steadily decreasing over the period in rural while it is more or less stable in urban areas as per the quinquennial survey estimates.

Table 12  
WPR according to different approaches

2.16 The age-specific WPR according to different approaches for rural area is given table 13R, while that for urban area is given in table 13U. A significant difference in the WPR for the age-group of 60 & above is seen in rural and urban areas with rural WPR being much higher than the urban. Overall, according to all the different approaches, the WPR in rural area is higher than that in the urban area.

**Table 13R**

2.17 The education level specific WPR is given in table 14 for rural and urban areas. The WPR is, in general, higher in rural areas compared to urban areas for all the education levels. The rural-urban difference in female WPR is remarkably higher compared to that for male.

2.18 Tables 15R and 15U give the round wise percentage distribution of usually employed for rural and urban areas respectively, separately for males and females. In rural areas, a generally declining trend is observed for both males and females in self-employed category (principal status), while in urban areas a prominent increasing trend is observed in 'self-employed' for males. For females in urban areas, there is an increasing trend in 'regular wage/salaried' category for both principal and principal + subsidiary status.

Table 15R

\* *Quinquennial surveys*

**Trends in the proportion of self-employed (SE), regular wage / salaried (RWS) and casual labours (CL) in rural areas (PS + SS)**

**Trends in the proportion of self-employed (SE), regular wage / salaried (RWS) and casual labours (CL) in urban areas (PS + SS)**

2.19 Table 16 gives the percentage distribution of usually employed persons by broad group of industry for various NSS rounds. It may be observed that the participation in primary sector is reducing over the period for all except females in rural area. The participation of females in the secondary sector is reducing in both rural and urban areas. However, there is an increasing trend of female as well as male participation in the tertiary sector.

### (iii) Unemployment

2.20 Table 17R and 17U give the unemployment rates in rural and urban areas respectively. Unemployment rate is the percentage of unemployed persons with respect to the labour force. The unemployment rate for the usual principal status has increased for females belonging to both rural and urban areas. The unemployment rate has decreased for males in urban areas.

Table 17R  
Unemployment rates (proportion of persons (or person-days) unemployed in labour force)

## List of Tables

Table No.	Title
(1)	(2)
3	Estimated number of households and persons by age and sex
7	Per 1000 distribution of households by household type for each decile class on household monthly per capita expenditure
8	Per 1000 distribution of households by household type for each size class of land owned (rural areas only)
15	Per 1000 distribution of household by number of usual status workers (ps+ss) of age 15 years and above for each household per capita expenditure class
16	Per 1000 Distribution of persons by Age group for each household MPCE class.
18	Per 1000 distribution of persons of age 5 years & above by general education for each age-group
19	Per 1000 distribution of persons by principal usual activity category for each age group
20	Per 1000 distribution of persons by age group for each principal usual activity category.
21	Per 1000 distribution of persons by usual activity category taking also into consideration subsidiary economic status of persons categorized 'not working' in the principal status for each age group.
22	Per 1000 distribution of persons by age group for each usual activity category also taking into consideration the subsidiary economic status of persons categorized 'not working' in the principal status.
23	Per 1000 distribution of persons by principal usual activity category for each general education level.
24	Per 1000 distribution of persons by general education level for principal usual activity category.
25	Per 1000 distribution of persons by usual activity category taking also into consideration the subsidiary economic status of persons categorized 'not working' in the principal status for each general education level.
26	Per 1000 distribution of persons by general education level for each usual activity category taking also into consideration the subsidiary economic status of persons categorized 'not working' in the principal status.
28	Per 1000 distribution of persons by usual activity category taking also into consideration the subsidiary economic status of persons categorized 'not working' in the principal status for each household type
34	Per 1000 distribution of persons by current weekly activity for each age-group.
35	Per 1000 distribution of persons by age group for each current weekly activity
36	Per 1000 distribution of persons-days by current daily activity for each age group.
37	Per 1000 distribution of persons-days by age group for each current daily activity
76	Per 1000 distribution of usual principal status workers of age 15 years and above who have changed industry or occupation during last 2 years by reason for such change of job for each broad education and age group

# Chapter – Two

## CONCEPTS AND DEFINITIONS

### Concepts and Definitions

2.0 The concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

2.1 **Household:** A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb 'normally' means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-aways (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer's/host's household. 'Living together' was given more importance than 'sharing food from a common kitchen' in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person's family members was taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., was considered to be a single-member household except that a family living in a hotel (say) was considered one household only. The same principle was applicable for the residential staff of such establishments. The size of a household is the total number of persons in the household.

2.2 **Age (years):** The age in completed years, as on the date of survey, of the household members were recorded.

2.3 **Land owned by the household as on date of survey:** A piece of land was considered as 'owned by the household' if permanent heritable possession with or without the right to transfer the title was vested in a member or members of the household. Land held in owner-like possession say, under perpetual lease, hereditary tenure, long-term lease for 30 years or more, etc., was also considered as land owned.

2.4 **Land possessed by the household as on date of survey:** The area of land possessed included land 'owned', 'leased in' and 'land neither owned nor leased in' (i.e. encroached) by the household but excluded land 'leased out'. For a piece of land under the possession of the household, if the household did not have the title of ownership and also did not have lease agreement for the use of land transacted, either orally or in writing, such land was considered as 'neither owned nor leased in'. In collecting information regarding land possessed, the actual position as obtained on the date of survey was considered. The 'area of land possessed' did not include the area of land owned, leased-in, etc. by the servants/paying guests who were considered as normal members of the household, as per the definition of household taken up for the survey.

2.5 **Land cultivated (including orchard and plantation) during July 2008-June 2009:**

Land cultivated (including orchard and plantation) during the agricultural year 2008-2009, i.e., July 2008 to June 2009 was recorded considering cultivation of land from the land 'owned', 'land leased-in' or from 'land neither owned nor leased-in'. Area with field crops and area under orchards and plantations was counted only once in the same year/ season. It may be noted that information on land owned, possessed or cultivated as described above was collected in hectares upto 3 places of decimals.

**2.6 General educational level:** A person was considered as literate if he/she could both read and write a simple message with understanding in at least one language. For all the individuals who were found to be literate, the general level of education was collected in terms of highest level of education successfully completed. Highest level of education successfully completed by each member of the household was decided by considering his/ her all general/ technical/ vocational educational level and was recorded in terms of 12 categories viz. (i) not literate, (ii) literate without formal schooling: (a) Education Guarantee Scheme (EGS)/Non-formal Education Courses (NFEC)/ Adult Literacy Centres (AEC), (b) Total Literacy Campaign (TLC), (c) others; (iii) literate but below primary, (iv) primary (v) middle, (vi) secondary, (vii) higher secondary, (viii) diploma/certificate course, (ix) graduate, and (x) postgraduate and above. The criterion for deciding primary, middle, secondary, etc. levels were the same as that has been followed in the concerned states/union territories. The category 'diploma or certificate course' meant diploma or certificate courses in general education, technical education or vocational education, which is below graduation level. Diploma or certificate courses in general education, technical education or vocational education, which is equivalent to graduation level, was considered under the category 'graduate'. Similarly, diploma or certificate courses in general education, technical education or vocational education, which is equivalent to post-graduation level and above were considered under the category 'post-graduate and above'.

**2.7 Technical educational level:** The highest level of technical education successfully completed by each member of the household was recorded in terms of 12 categories viz. (i) no technical education, (ii) technical degree in agriculture / engineering / technology / medicine etc. (iii) diploma or certificate below graduate level in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subjects, and (iv) diploma or certificate equivalent to graduate and above level in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subjects. Technical diploma or certificate in 'other subjects' included diploma or certificate in management, applied arts, etc.

**2.8 Status of current attendance in educational institution:** Particulars of current attendance in educational institution were recorded for persons of age below 30 years. It was first ascertained whether the person was currently attending any educational institutions (government or private) or not. For persons who were not currently attending any educational institutions, reason for not attending viz. (i) school too far, (ii) to supplement household income, (iii) education not considered necessary, (iv) to attend domestic chores, and (v) others, was recorded. For those who were currently attending any educational institution, the course of study pursued by them was recorded in terms of 23 categories viz. (i) EGS/NFEC/AEC, (ii) TLC, (iii) pre-primary (nursery/Kinder garten, etc.), (iv) primary (class I to IV/V), (v) middle, (vi) secondary, (vii) higher secondary, (viii) graduate in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) other subjects; (ix) post graduate and above, (x) diploma or certificate (below graduate level) in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subjects, (xi) diploma or certificate (graduate level) in: (a) agriculture, (b) engineering/technology, (c) medicine, (d) crafts, (e) other subject; (xii) diploma or certificate in post graduate and above level. Persons who were registered for any regular correspondence courses or distance education courses for a stipulated period at the end of which, were allowed to appear in the examination for the course, was also considered as 'currently attending'. Persons who were awaiting results were also considered as 'currently attending'.

**2.9 Type of institution:** The type of institution referred to the type of management by which the institution was run. For those who were currently attending any educational institution, the type of institution was recorded in terms of 5 categories viz. (i) Government, (ii) Local body, (iii) Private and aided, (iv) Private and unaided, and (v) not known. All schools/ institutions run by the State, Central Government, Public Sector Undertakings or Autonomous Organisations, which are completely financed by the Government were treated as government institutions. Schools/ institutions where there was some intervention of government in the management and were mainly financed by the government, were also treated as government institutions. All institutions run by municipal corporations, municipal committees, notified area committees, zilla parishads, Panchayat samitis, cantonment boards, etc. were treated as local body institutions. Institutions that were run by an individual or a private organisation and received maintenance grant partly or fully from the

Government or local body were considered as private aided institution. Institutions that were managed by an individual or a private organisation and not receiving maintenance grant either from a Government or local bodies were considered as private unaided institution.

**2.10 Vocational training:** The main objective of vocational education and training is to prepare persons, especially the youth, for the world of work and make them employable for a broad range of occupations in various industries and other economic sectors. A vocational training was broadly defined as a training, which prepared an individual for a specific vocation or occupation. It aims at imparting training to persons in very specific fields through providing significant hands-on experience in acquiring necessary skill in the specific vocation or trade, which make them employable or create for them opportunities of self-employment.

**2.10.1 Formal vocational training:** The vocational training that took place in education and training institutions which followed a structured training programme and led to certificates, diplomas or degrees, recognised by State/Central Government, Public Sector and other reputed concerns was considered as formal vocational training. By structured training programme, it was meant that (i) the training programme had a definite title with prescribed syllabus and curriculum and a specified duration of the training, and (ii) the training had some entry level eligibility in terms of education and age.

**2.10.2 Non-formal vocational training:**

(a) *Hereditary:* The expertise in a vocation or trade is sometimes acquired by the succeeding generations from other members of the households, generally the ancestors, through gradual exposures to such works as are involved in carrying out the profession by their ancestors. The expertise gained through significant hands-on experience enables the individual to take up activities in self-employment capacity or makes him employable. These were considered as non-formal vocational training acquired through hereditary sources.

(b) *Self-learning:* The expertise in a vocation or trade when acquired by a person through his/her own effort, without any training under any person or organisation, was considered non-formal vocational training acquired through self-learning.

(c) *Learning on the job:* The expertise acquired by a person while in employment (current and/or past), either through informal training by the employer or organisation or through the exposure to the type of job that he/she was performing, was considered non-formal vocational training through learning on the job.

(d) *Other:* Other sources included cases where the expertise for a vocation or trade was developed even from the household members or ancestors, provided they said vocation or trade was different from the one relating to their ancestors.

**2.11 Economic activity:** The entire spectrum of human activity falls into two categories of economic activities and non-economic activities. Any activity resulting in production of goods and services that add value to national product was considered as an economic activity for the employment and unemployment survey. Such activities included production of all goods and services for market (i.e. for pay or profit) including those of government services, and, the production of primary commodities for own consumption and own account production of fixed assets.

**2.11.1** The full spectrum of economic activities as defined in the UN system of National Accounts was not covered in the definition adopted for the NSS 66th round survey of Employment and Unemployment. Production of any good for own consumption is considered as economic activity by UN System of National Accounts but production of only primary goods for own consumption was considered as economic activity by NSSO. While the former considers activities like own account processing of primary products as economic activities, in the NSS surveys, processing of primary products for own consumption was not considered as economic activity.

2.11.2 The term 'economic activity' as defined in the employment and unemployment survey of NSS 66<sup>th</sup> round, therefore, included:

(i) all the market activities performed for pay or profit which result in production of goods and services for exchange.

(ii) of the non-market activities,

(a) all the activities relating to the primary sector (i.e. industry Divisions 01 to 14 of NIC-2004) which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption and

(b) activities relating to the own-account production of fixed assets, which include production of fixed assets including construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor. As per the practice followed in earlier rounds, certain activities like prostitution, begging, etc., which though fetched earnings, were not considered as economic activities. Activity status of a person was judged irrespective of the situation whether such activity was carried out illegally in the form of smuggling or not.

2.12 **Activity status:** It is the activity situation in which a person was found participated in economic and non-economic activities during the reference period. According to this, a person could be in one or a combination of the following three broad activity statuses during a reference period:

(i) working or being engaged in economic activity (work) as defined above,

(ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if 'work' is available and

(iii) being not engaged in any economic activity (work) and also not available for 'work'.

Broad activity statuses mentioned in (i) and (ii) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, broad activity status (i) and (ii) were associated with 'employment' and 'unemployment' respectively.

2.12.1 Identification of each individual in terms of a unique activity status could pose a problem when more than one of the three broad activity statuses listed above were concurrently obtained in a person. In such an eventuality, the identification uniquely under any one of the three broad activity statuses was done by adopting either *the major time or priority criterion*. The former was used for classification of persons according to the 'usual activity status' approach and the latter for classification of persons according to the 'current activity status' approach. Each of the three broad activity statuses was further sub-divided into several detailed activity categories. If a person categorised as engaged in economic activity by adopting one of the two criteria mentioned above was found to be pursuing more than one economic activity during the reference period, the appropriate detailed activity status code was connected to that activity in which relatively long time had been spent. A similar procedure was adopted for assigning detailed activity code for persons categorised as engaged in non-economic activity and pursuing more than one non economic activity.

2.12.2 The detailed activity statuses under each of the three broad activity statuses (viz. *employed*, *unemployed* and *not in labour force*) and the corresponding codes used in the survey are given below:

### **code description**

#### **working (or employed)**

##### ***self-employed***

- 11 worked in household enterprises (self-employed) as own-account worker
- 12 worked in household enterprises (self-employed) as an employer
- 21 worked in household enterprises (self-employed) as helper

##### ***regular wage/ salaried employee***

- 31 worked as regular wage/salaried employee

##### ***casual labour***

- 41 worked as casual wage labour in public works other than Mahatma Gandhi NREG public works
- 42 worked as casual wage labour in Mahatma Gandhi NREG public works
- 51 worked as casual wage labour in other types of works
- 61 did not work owing to sickness though there was work in household enterprise
- 62 did not work owing to other reasons though there was work in household enterprise
- 71 did not work owing to sickness but had regular salaried/wage employment
- 72 did not work owing to other reasons but had regular salaried/wage employment

#### **not working but seeking/available for work (or unemployed)**

- 81 sought work or did not seek but was available for work (for usual status approach)
- 81 sought work (for current weekly status approach)
- 82 did not seek but was available for work (for current weekly status approach)

#### **neither working nor available for work (or not in labour force)**

- 91 attended educational institutions
- 92 attended to domestic duties only
- 93 attended to domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use
- 94 rentiers, pensioners, remittance, recipients, etc.
- 95 not able to work owing to disability
- 97 others (including beggars, prostitutes, etc.)
- 98 did not work owing to sickness (for casual workers only)
- 99 children of age 0-4 years

It may be noted that codes 61, 62, 71, 72, 82 and 98 were applicable for current weekly status and current daily status approaches only. Moreover, activity status code 41 in the usual status is used for casual wage labour in all types of *public works*, whereas in the current activity status, code 41 is for casual wage labour in *public works* other than MGNREG public works and code 42 is for casual wage labour in MGNREG public works.

2.13 ***Workers (or employed)***: Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained themselves from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers. Unpaid helpers who assisted in the operation of an economic activity in the household farm or non-farm activities were also considered as workers. Relevant activity status codes 11 to 72 were assigned for workers. Workers were further categorized as *self employed*

(relevant activity status codes: 11, 12, 21, 61, 62), *regular salaried/wage employee* (relevant activity status codes: 31, 71, 72), and *casual wage labour* (relevant activity status codes: 41, 42 and 51).

2.14 ***Seeking or available for work (or unemployed)***: Persons who, owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those 'seeking or available for work' (or unemployed). Activity status codes 81 or 82 were assigned for unemployed. 2.15 ***Labour force***: Persons who were either 'working' (or employed) or 'seeking or available for work' (or unemployed) constituted the labour force. Persons with activity status codes 11 ó 82 constituted the labour force.

2.16 ***Not in labour force***: Persons who were neither 'working' nor 'seeking or available for work' for various reasons during the reference period were considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labourers not working due to sickness. Activity status codes 91-95, 97 and 98 were assigned for persons belonging to category 'not in labour force'. For the purpose of this report, status code 99 was assigned to children of age 0-4 years.

2.17 ***Self-employed***: Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were treated as self-employed in household enterprises. The essential feature of the self-employed is that they have *autonomy* (decide how, where and when to produce) and *economic independence* (in respect of choice of market, scale of operation and finance) for carrying out their operation. The remuneration of the self-employed consists of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is wholly determined by the revenue from sales after netting out value of purchased inputs used in production.

2.17.1 ***Categories of self-employed persons***: Self-employed persons were categorised as follows:

(i) ***own-account workers***: those self-employed persons who operated their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, ran their enterprise without hiring any labour. They could, however, have had unpaid helpers to assist them in the activity of the enterprise;

(ii) ***employers***: those self-employed persons who worked on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour; and

(iii) ***helpers in household enterprise***: those self-employed persons (mostly family members) who were engaged in their household enterprises, working full or part time and did not receive any regular salary or wages in return for the work performed. They did not run the household enterprise on their own but assisted the related person living in the same household in running the household enterprise.

2.18 ***Regular wage/salaried employee***: These were persons who worked in others' farm or non-farm enterprises (both household and non-household) and, in return, received salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category included not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

2.19 ***Casual wage labourer***: A person, who was casually engaged in others' farm or nonfarm enterprises (both household and non-household) and, in return, received wages according to the terms of the daily or periodic work contract, was a casual wage labourer.

**2.20 Public works:** Public works were those activities which were sponsored by Government or Local Bodies, and which covered local area development works like construction of roads, dams, bunds, digging of ponds, etc., as relief measures, or as an outcome of employment generation schemes under the poverty alleviation programme such as *Mahatma Gandhi National Rural Employment Guarantee* (MGNREG) public works, Sampoorna Grameen Rozgar Yojana (SGRY), National Food for Work Programme (NFFWP), etc. The coverage of schemes under public works was restricted to those schemes through which the Government generated wage employment under poverty alleviation programme, or relief measures. The types of works that were generally undertaken through these schemes, were watershed development, drought proofing, land leveling, flood control, laying pipes or cables, sanitation, water harvesting, irrigation canal, development of orchard, road construction, building construction / repair, running crèche, etc. To distinguish between 'public works' and works not classifiable as 'public works', some broad characteristics of 'public work' were identified, viz. the primary objective is generation of wage employment and poverty alleviation, and creation of community asset as an outcome in achieving those main objectives. It is to be noted that the existing activity status code 41 (casual wage labour in public works) was split into two codes for assigning activity status codes as per current daily activity status and current weekly activity status, as follows:

(i) worked as casual wage labour in public works other than Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works ó 41

(ii) worked as casual wage labour in Mahatma Gandhi National Rural Employment Guarantee (MGNREG) public works ó 42

*However, in the usual activity status, code 41 was used for casual wage labour in public works, which included all types of public works and code 42 was not applicable in the usual activity status.*

**2.21 Different approaches followed to determine activity status:** The persons surveyed were classified into various activity categories on the basis of the activities pursued by them during certain specified reference periods. There were three reference periods for this survey. These are: (i) one year (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. These are termed respectively as usual status, current weekly status and current daily status. The procedures adopted to arrive at the usual status, current weekly status and current daily status are elucidated below.

**2.21.1 Usual principal activity status:** The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively long time (i.e. major time criterion) during the 365 days preceding the date of survey is considered as the *usual principal activity status* of the person. To decide the usual principal activity of a person, first a two stage dichotomous classification was followed for determining the broad usual principal activity status (employed or unemployed or not in labour force) of the person. At the first stage, persons were first categorised as those in the *labour force* (either employed or unemployed) and those *not in the labour force* depending on the major time spent during the 365 days preceding the date of survey. Persons thus adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work' (*not in the labour force*). At the second stage, for persons belonging to the labour force, the broad activity status of either 'working' (*employed*) or 'not working but seeking and/or available for work' (*unemployed*) was ascertained based on the same criterion viz. relatively long time spent in accordance with either of the two broad statuses within the labour force during the 365 days preceding the date of survey. Within the broad activity status so determined, the detailed activity status of a person pursuing more than one such activity was determined once again on the basis of the relatively long time spent on such activities. In terms of activity status codes, codes 11-51 were assigned to persons classified as workers and codes 91-97 to those not in the labour force. In the usual status approach, a single code 81 was assigned to persons seeking or available for work (unemployed persons) while two separate codes 81 (sought work) and

82 (did not seek but was available for work) were assigned to unemployed persons according to current weekly status and current daily status approach.

**2.21.2 Usual subsidiary economic activity status:** A person whose usual principal status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference year of 365 days preceding the date of survey or for a minor period, which is not less than 30 days, during the reference year. The status in which such economic activity was pursued was the subsidiary economic activity status of that person. Activity status codes 11 to 51 only were used for the subsidiary economic activity performed by a person. It may be noted that engagement in work in subsidiary capacity may arise out of the two following situations:

(i) a person may be engaged in a relatively long period during the last 365 days in some economic (non-economic) activity and for a relatively minor period, which is not less than 30 days (not necessarily for a continuous period), in another economic activity (any economic activity). The economic activity, which was pursued for a relatively minor period *but not simultaneously with principal activity*, was considered as his/her subsidiary economic activity.

(ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for a relatively short time in a subsidiary capacity. The economic activity, which was pursued for a relatively short time, was considered as his/her subsidiary economic activity.

**2.21.3 Usual activity status considering principal and subsidiary status taken together:**

The usual status, determined on the basis of the usual principal activity and usual subsidiary economic activity of a person taken together, is considered as the usual activity status of the person and is written as usual status (ps+ss). According to the usual status (ps+ss), workers are those who perform some work activity either in the principal status or in the subsidiary status. Thus, a person who is not a worker in the usual principal status is considered as worker according to the usual status (ps+ss), if the person pursues some subsidiary economic activity for 30 days or more during 365 days preceding the date of survey.

**2.21.4 Current weekly activity status:** The current weekly activity status of a person is the activity status obtaining for a person during a reference period of 7 days preceding the date of survey. It is decided *on the basis of a certain priority cum major time criterion*.

2.21.4.1 According to the *priority criterion*, the status  $\neg$ working $\emptyset$  gets priority over the status  $\neg$ not working but seeking or available for work $\emptyset$  that, in turn, gets priority over the status  $\neg$ neither working nor available for work $\emptyset$ . A person was considered working (or employed) if he/she, while pursuing any economic activity, had worked for at least one hour on at least one day during the 7 days preceding the date of survey. A person was considered  $\neg$ seeking or available for work (or unemployed) $\emptyset$  if, during the reference week, no economic activity was pursued by the person but he/she made efforts to get work or had been available for work any time during the reference week though not actively seeking work in the belief that no work was available. A person who had neither worked nor was available for work any time during the reference week was considered as engaged in noneconomic activities (or not in labour force).

2.21.4.2 After deciding the *broad current weekly activity status* of a person on the *basis of 'priority' criterion*, the *detailed current activity status* was then decided *on the basis of 'major time' criterion if that person pursued multiple economic activities*. The current weekly activity status of a person could be any of the valid codes within 11 to 98. Of these codes, 11 to 72 pertained to workers, 81 to 82 for unemployed and 91 to 98 for persons not in the labour force.

**2.21.5 Current daily activity status:** The activity pattern of the population, particularly in the informal sector, is such that during a week, and sometimes, even during a day, a person could pursue more than one activity. Moreover, many people could even undertake both economic and non-economic activities on the same day of a reference week. The current daily activity status for a person was determined on the basis of his/her activity status on each day of the reference week *using a priority-cum-major time criterion* (day to day labour time disposition). Time disposition was recorded for every member of the sample households. This involved recording of different activities pursued by the members along with the time intensity in quantitative terms for each day of the reference week. The different activities were identified and recorded in terms of 'activity status' and 'industry' codes for persons in urban areas and 'activity status', 'industry' and 'operation' codes for persons in rural areas. The description (and codes used) of current daily activity statuses is the same as those of current weekly activity status. The terms 'industry' and 'operation' are explained later. The following points were considered for assigning the time intensity and determining the current daily status of a person:

- i) Each day of the reference week was looked upon as comprising either two 'half days' or a 'full day' for assigning the activity status. For recording time disposition for activities pursued by a person in a day, an intensity of 1.0 was given against an activity that was done for 'full day' and an intensity of 0.5 against the activity which was done for 'half day'
- ii) A person was considered 'working' (employed) for the full day if he/she had worked for 4 hours or more during the day.
- iii) If a person was engaged in more than one of the economic activities for 4 hours or more on a day, he/she was assigned two out of the various economic activities on which he/she devoted relatively long time on the reference day. In such cases, an intensity of 0.5 was given for each of these two economic activities.
- iv) If the person had worked for 1 hour or more but less than 4 hours, he/she was considered 'working' (employed) for half-day and 'seeking or available for work' (unemployed) or 'neither seeking nor available for work' (not in labour force) for the other half of the day depending on whether he was seeking/available for work or not.
- v) If a person was not engaged in any 'work' even for 1 hour on a day but was seeking/available for work for 4 hours or more, he was considered 'unemployed' for the entire day. But if he was 'seeking/available for work' for more than 1 hour and less than 4 hours only, he was considered 'unemployed' for half day and 'not in labour force' for the other half of the day.
- vi) A person who neither had any 'work' to do nor was available for 'work' even for half a day was considered 'not in labour force' for the entire day and was assigned one or two of the detailed non-economic activity statuses depending upon the activities pursued during the reference day.

2.21.5.1 The current weekly status of a person is derived from the intensities assigned for the daily activities performed by a person during the 7 days of the reference week.

**2.22 Industry and occupation of the work activity:** For the employed persons, to record the industry of work, 5-digit classification of NIC-2004 was used and to record the type of occupation, 3-digit classification of NCO-2004 was used. To identify certain category of workers under Division 95 (Private households with employed persons) of NIC-2004, eight additional codes were used in the survey viz., housemaid /servant (95001), cook (95002), gardener (95003), gatekeeper/chowkidar/watchman (95004), governess/babysitter (95005), tutor (95006), driver (95007) and 'others' (95009). Industry Divisions 96 (except the activities covered in other Industry Divisions) and 97 of NIC-2004 were not used for the purpose of collection of information on industry of activity. The entire activities described under Division 97 are not under the

production boundary of Indian System of National Accounts (ISNA) and are not also considered as economic activities in the NSS survey. A part of the activities under Division 96 (viz., hunting and gathering, farming and the production of shelter), which is within the production boundary of ISNA, is also considered as economic activities in NSS surveys and the industry of these undifferentiated activities were judged in the usual manner as done now, by considering the industry in which major time was spent. Thus, this part of activities got classified against the respective industries under divisions 01-14 relating to the primary sector or 45 relating to construction. The rest of Division 96 is outside the production boundary of ISNA and was not considered as economic activity for the NSS survey.

**2.23 Operation:** This was the type of work performed by a person during a reference period. It could be manual or non-manual and could pertain to activities in agricultural or non-agricultural sector. Operation was combined with activity status and industry corresponding to the work performed. Information regarding the type of operation was collected *only for rural areas* and related to *current status only*. The different types of operations came under four categories. Ploughing, sowing, transplanting, weeding, harvesting and other cultivation activities fell under the category *manual work in cultivation*. Against the category *manual work in other agricultural activities* were the following types: forestry, plantation, animal husbandry, fisheries and other agricultural activities. *Manual work in non-agricultural activities* constituted the third category. The last category viz. *non-manual work* comprised two broad types ó (i) in 'cultivation' and (ii) in 'other than cultivation'. It may be noted that for 'regular salaried/wage employees' on leave or on holiday, the 'operation' related to their respective function in the work or job from which he/she was temporarily off. Similarly, for persons categorized as 'self-employed' but not working on a particular day in spite of having work on that day, the operation related to the work that he/she would have done if he/she had not enjoyed leisure on that day.

**2.24 Cultivation:** All activities relating to production of crops and related ancillary activities were considered as cultivation. Growing of trees, plants or crops as plantation or orchards (such as rubber, cashew, coconut, pepper, coffee, tea etc.) were not considered as cultivation activities for the purpose of this survey. In general, the activities covered under NIC-2004 sub-classes 01111, 01112, 01113, 01115, 01119, 01121, 01122 and 01135 (excepting plantation of pepper and cardamom) were considered as cultivation.

**2.25 Manual work:** A job essentially involving physical labour was considered manual work. However, jobs essentially involving physical labour but also requiring a certain level of general, professional, scientific or technical education were not termed as 'manual work'. On the other hand, jobs not involving much of physical labour and at the same time not requiring much educational (general, scientific, technical or otherwise) background were treated as 'manual work'. Thus, engineers, doctors, dentists, midwives, etc., were not considered manual workers even though their jobs involved some amount of physical labour. But, peons, chowkidars, watchman, etc. were considered manual workers even though their work might not involve much physical labour. A few examples of manual workers are cooks, waiters, building caretakers, sweepers, cleaners and related workers, launderers, dry cleaners and pressers, hair dressers, barbers, beauticians, watchmen, gate keepers, agricultural labourers, plantation labourers and related workers.

**2.26 Rural labour:** Manual labour working in agricultural and /or non-agricultural occupations *in return for wages* paid either in cash or in kind (excluding exchange labour) and *living in rural areas*, was taken as rural labour.

**2.27 Agricultural labour:** A person was considered as engaged as agricultural labour, if he/she followed one or more of the following agricultural occupations in the capacity of a wage paid manual labour, whether paid in cash or kind or both:

- (i) farming,
- (ii) dairy farming,
- (iii) production of any horticultural commodity,
- (iv) raising of livestock, bees or poultry,

(v) any practice performed on a farm as incidental to or in conjunction with farm operations (including forestry and timbering) and the preparation for market and delivery to storage or to market or to carriage for transportation to market of farm produce.

Working in fisheries was *excluded* from agricultural labour. Further, 'carriage for transportation' referred *only to the first stage of the transport* from farm to the first place of disposal.

**2.28 Wage paid-manual labour:** A person who did manual work in return for wages in cash or kind or partly in cash and partly in kind (excluding exchange labour) was considered as a wage paid manual labour. Salaries were also counted as wages. A person who was self-employed in manual work was *not treated* as a wage paid manual labour.

**2.29 Nominal work:** When a person worked for a total duration of 1 to 2 hours in a day, it was considered as a day with nominal work for the person. In the day-to-day labour time disposition of the reference week, such a day's work was considered as 'half-day' work. Therefore, for a person, number of days with nominal work is a sub-set of the number of days worked with 0.5 intensity.

**2.30 Wage and salary earnings:** Information on wage and salary earnings was collected separately for each of the wage/salaried work recorded for a person in a day. Here, earnings refer to the wage/salary income (and not total earnings taking into consideration of all other activities done) received/receivable for the wage/salaried work done during the reference week by a wage/salaried employee and casual labourer. The wage/ salary received or receivable may be in cash or kind or partly in cash and partly in kind. While recording the earnings following conventions were followed.

i) The wages in kind were evaluated at the current retail price.

ii) Bonus and perquisites such as free accommodation, reimbursement of expenditure for medical treatment, free telephones, etc. evaluated at the cost of the employer or at retail prices and duly apportioned for the reference week were also included in earnings.

iii) Amount receivable as 'over-time' for the additional work done beyond normal working time was excluded.

It may be noted that in the survey, at most two activities could be recorded for a person in a day. Therefore, it is possible that a person might have carried out two or more wage/salaried activities in a day, but only one activity or two activities at the most, depending upon the time spent on those activities, was recorded. In that case, the wage/salary income only from that activity(s) was collected and recorded separately, and not the total income of the person from all the activities done for the entire day.

**2.31 Earning from self-employment:** To have some idea about earnings from self-employment, perception of the self-employed persons (self-employed either in the usual principal status or usual subsidiary status) regarding their current earnings from self-employment was recorded. Earning of the self-employed person was judged considering all his/ her farm and non-farm businesses together in which he/ she was engaged in self-employment capacity during the last 365 days either in principal status or subsidiary status or in both the statuses. Information was collected on whether their current earnings from self-employment were regarded as remunerative or not. The current earnings from self-employment was regarded as remunerative if total earnings from self-employment was able to meet the desired level of income of the individual under the existing situation in respect of type of activity, scale of operation of the business(s), market condition, location of the business, etc. If the actual earnings from the self-employment activities fell short of the desired level, the employment was not regarded as remunerative. From all the self-employed members of the household, desired level of earnings in a month from all self-employment activities was also recorded in terms of codes.

**2.32 Present spell of unemployment:** The present spell of unemployment meant the continuous period for which a person remained unemployed starting from the day the person became unemployed to the survey date. For the new entrants into the labour force, the present spell meant the entire length of unemployment till the date of survey, starting from the day such person joined in the labour force. For those who had any previous employment, the present spell meant the period starting from the day they were seeking or available for work after losing their last employment to the survey date.

**2.33 Approximate number of months without work:** The months without work were not necessarily continuous. The approximate number of months without work included those months in which a person was either unemployed or was not in the labour force. For deciding the number of months without work, each of the 12 months was considered separately and if, in a month the period without work was reported to be 15 days or more, it was considered as a month without work.

**2.34 Existence of union/association in the activity:** Union/association meant any registered/recognised body whose membership is open to a section of those engaged in a specific activity or trade and whose main objective is to look into the interests of its members. Thus, besides the usual trade unions, union/association covered the association of owners, self-employed persons, etc.

**2.35 Household type:** On the basis of the sources of the household's income during the last 365 days preceding the date of survey, the household types were assigned. For this purpose, only the household's income from economic activities was considered. The income of servants and paying guests was not taken as the income of the household.

For the **rural** areas, household types were as follows:

Self-employed in non-agriculture; agricultural labour; other labour; Self-employed in agriculture; others.

For **urban** areas, the household types were as follows:

Self-employed; regular wage/salary earning; casual labour; others.

**2.36 Procedure for determining household industry and occupation:** To determine the household principal industry and occupation, the general procedure followed was to list all the occupations pertaining to economic activities pursued by the members of the household excluding those employed by the household and paying guests (who in view of their staying and taking food in the household were considered as its normal members) during the one year period preceding the date of survey, no matter whether such occupations were pursued by the members in their principal or subsidiary (on the basis of earnings) capacity. Out of the occupations listed that one that fetched the maximum earnings to the household during the last 365 days preceding the date of survey was considered as the principal household occupation. If one or more members of the household pursued the household occupation in different industries, the particular industry out of all the different industries corresponding to the principal occupation, which fetched the maximum earnings, was considered as the principal industry of the household.

**2.37 Procedure for collecting monthly per capita consumer expenditure (MPCE):** For collection of data on total expenditure of the household from employment and unemployment schedule (Schedule 10), a worksheet was used in the Schedule 10 of the 66<sup>th</sup> round. The approximate value of consumer expenditure obtained through the worksheet has been used for studying employment and unemployment characteristics by different levels of living of the household members. The worksheet contained 36 different components of household consumer expenditure. Depending upon the type of item, either of the two reference periods viz., 30 days and 365 days, was used to record consumption of different groups of items. The items of consumption were classified into four groups and three different approaches viz (a) consumption approach, (b) expenditure approach and (c) first-use approach, were followed for defining consumption of items. The different groups were (i) food (other than 'cooked meals'), pan, tobacco & intoxicants and fuel & light, (ii) cooked meals, miscellaneous goods and services including education, medical, rent, taxes and cess, (iii)

clothing and footwear and (iv) durable goods. The procedure followed for defining consumption of the four groups were (i) consumption approach, (ii) expenditure approach, (iii) first-use approach and (iv) expenditure approach, respectively.

The definition of household consumer expenditure and the procedure for evaluating that was the same for both Schedule 10 and Schedule 1.0 (Household Consumer Expenditure).

## 2.38 Conceptual Framework of Key Employment and Unemployment Indicators

2.38.1 **Labour force participation rate (LFPR):** LFPR is defined as the number of persons/ person-days in the labour force per 1000 persons /person-days

2.38.2 **Worker Population Ratio (WPR):** WPR defined as the number of persons/person-days employed per 1000 persons/person-days.

2.38.3 **Proportion Unemployed (PU):** It is defined as the number of persons/person-days unemployed per 1000 persons/person-days.

2.38.4 **Unemployment Rate (UR):** UR is defined as the number of persons/person-days unemployed per 1000 persons/person-days in the labour force (which includes both the employed and unemployed).

2.38.5 **Usual status adjusted UR:** Unemployment rates for the reference period of 365 days, i.e., in usual *principal status (ps)* approximate an indicator of chronically unemployed. Some of the persons categorised as unemployed according to the *usual principal activity status* might be working in a subsidiary capacity. Therefore, another estimate of the unemployed excluding those employed in a subsidiary capacity during the reference period can be derived. The former is called the usually unemployed according to the *principal status (ps)* and the latter, the usually unemployed excluding employed in *subsidiary status* or *usual status adjusted* i.e., *us (adjusted)*, which would conceptually be lower than the former.

2.38.6 The architecture of key employment-unemployment indicators are given below in tabular form:

Activity profile*		Key indicators
Activity status (code)	Category of persons	
11, 12, 21, 31, 41, 42, 51, 61, 62, 71, 72	Workers	<b>1. Labour Force Participation Rate (LFPR):</b> $\frac{\text{no. of employed persons} + \text{no. of unemployed persons}}{\text{total population}} * 1000$
81, 82	Unemployed	<b>2. Worker Population Ratio (WPR):</b> $\frac{\text{no. of employed persons}}{\text{total population}} * 1000$
91, 92, 93, 94, 95, 97, 98	not in labour force	<b>3. Proportion Unemployed (PU):</b> $\frac{\text{no. of unemployed persons}}{\text{total population}} * 1000$
		<b>4. Unemployment Rate (UR):</b> $\frac{\text{no. of unemployed persons}}{\text{no. of employed persons} + \text{no. of unemployed persons}} * 1000$

# Chapter III

## Sample Design and Estimation Procedure

### 1. Introduction

1.1 The National Sample Survey (NSS), set up by the Government of India in 1950 to collect socio-economic data employing scientific sampling methods, conducted its sixty-sixth round from 1st July 2009 to 30th June 2010.

### 2. Outline of survey programme

2.1 **Subject coverage:** The 66th round (July 2009-June 2010) of NSS was for the survey on Household Consumer Expenditure and Employment and Unemployment and it was the eighth quinquennial survey in the series, the last one having been conducted in the 61<sup>st</sup> round (2004- 2005) of NSS.

2.2 **Geographical coverage:** The survey covered the whole of the state of Maharashtra.

2.3 **Period of survey and work programme:** The period of survey was of one year duration starting on 1st July 2009 and ending on 30th June 2010. The survey period of this round was divided into four sub-rounds of three months duration each as follows:

Sub-round 1: July - September 2009  
Sub-round 2: October - December 2009  
Sub-round 3: January - March 2010  
Sub-round 4: April - June 2010

In each of these four sub-rounds equal numbers of sample villages/blocks (FSUs) were allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period. Attempts were made to survey each of the FSUs during the sub-round to which it was allotted.

2.4 **Schedules of enquiry:** During this round, the following schedules of enquiry were canvassed:

Schedule 0.0: list of households  
Schedule 1.0: consumer expenditure  
Schedule 10: employment and unemployment

Two variants of Schedule 1.0, called Schedule Type 1 and Schedule Type 2, were canvassed in this round. Schedule Type 1 was similar to Schedule 1.0 of NSS 61<sup>st</sup> round. Compared to Schedule Type 1, Schedule Type 2 had a different reference period (7 days) for some items of food, pan, tobacco and intoxicants.

2.5 The State sample was one and half times in urban and equal in rural areas as that of central sample

### 3. Sample Design

**3.1 Outline of sample design:** A stratified multi-stage design was adopted for the 66<sup>th</sup> round survey. The first stage units (FSUs) were the 2001 Census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. In addition, two non-UFS towns of Leh and Kargil of Jammu & Kashmir were also treated as FSUs in the urban sector. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/sub-blocks (sbs) from each rural/urban FSU.

**3.2 Sampling frame for first stage units:** *For the rural sector*, the list of 2001 Census villages (henceforth the term 'village' will mean Panchayat wards for Kerala) constituted the sampling frame. *For the urban sector*, the list of latest available UFS blocks was considered as the sampling frame. For non-UFS towns, the frame consisted of the individual towns.

**3.3 Stratification:** Within each district of a State/UT, generally speaking, two basic strata were formed: i) rural stratum comprising all rural areas of the district and (ii) urban stratum comprising all urban areas of the district. However, within the urban areas of a district, wherever there were one or more towns with population 10 lakhs or more as per Census 2001 in a district, each of these formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.

**3.4 Sub-stratification:** Each rural stratum was divided into 2 sub-strata as follows:  
Sub-stratum 1: all villages with proportion of child workers (p) >2P (where P is the average Proportion of child workers for the State/UT as per Census 2001)  
Sub-stratum 2: remaining villages

**3.5 Total sample size (FSUs):** At all-India level, 1008 FSUs were allocated to the Central sample and 1260 FSUs to the State sample.

**3.6 Allocation of total sample to States and UTs:** The total number of sample FSUs was allocated to the States and UTs in proportion to population as per Census 2001 subject to a minimum sample allocation to each State/UT, and subject to resource availability in terms of field investigators.

**3.7 Allocation of State/UT level sample to rural and urban sectors:** State/UT level sample size was allocated between the two sectors in proportion to population as per Census 2001 with double weightage to urban sector, subject to the restriction that the urban sample size for bigger States like Maharashtra, Tamil Nadu, etc. should not exceed the rural sample size. A minimum of 16 FSUs (to the extent possible) was allocated to each State/UT separately for rural and urban areas. Further, the State-level allocations for both rural and urban sectors were adjusted marginally in a few cases to ensure that each stratum/sub-stratum got a minimum allocation of 4 FSUs.

**3.8 Allocation to strata/sub-strata:** Within each sector of a State/UT, the sample size was allocated to different strata/sub-strata in proportion to population as per Census 2001. Allocations at stratum/sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal-sized samples were allocated to the four sub-rounds.

**3.9 Selection of FSUs:** For the rural sector, from each stratum/sub-stratum, the required numbers of sample villages were selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For the urban sector, FSUs were selected from each stratum using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples.

### 3.10 Formation and selection of hamlet-groups/sub-blocks

**3.10.1 Criterion for hamlet-group/sub-block formation:** Selected FSUs with approximate population 1200 or more were divided into a suitable number of geographically compact hamlet-groups (having more or less equal population) in the rural sector and sub-blocks in the urban sector as shown below.

approximate present population of the sample FSU	no. of hg/sb formed
less than 1200 (no hg/ sb formation)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
í and so on	

**3.10.2 Selection of hamlet-groups/sub-blocks:** Hamlet-groups (hg)/sub-blocks (sb) were selected from FSUs where hamlet-groups/sub-blocks were formed, two in the following manner. The hg/sb with maximum percentage share of population was always selected and termed hg/sb 1; one more hg/sb was selected from the remaining hg/sb by simple random sampling (SRS) and termed hg/sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/sub-blocks.

### 3.11 Listing of households

Having determined the hamlet-groups/sub-blocks, i.e. area(s) to be considered for listing, the next step was to list all the households (including those found through local enquires to be temporarily locked). The hamlet-group/sub-block with sample hg/sb number 1 was considered for listing first, followed by sample hg/sb number 2.

### 3.12 Formation of second stage strata and allocation of sample households

**3.12.1** Two cut-off points A and B (in Rs.) were determined from NSS 61<sup>st</sup> round data for each NSS region for urban areas in such a way that the top 10% of the population had MPCE more than B and the bottom 30% of the population had MPCE less than A.

The values of cut-off point A & B (urban MPCE in Rs.) for each NSS state region

State	State-region code	description	A	B
Maharashtra	271	Coastal	844	2912
	272	Inland Western	608	2119
	273	Inland Northern	506	1998
	274	Inland Central	400	1414
	275	Inland Eastern	516	1816
	276	Eastern	588	1589

3.12.2: For Schedule 10, households listed in the selected FSU/hamlet-group/sub-block were stratified into three second stage strata (SSS). Composition of the SSS and number of households to be surveyed from different SSSs for each of the two schedule types was as follows:

SSS	Composition of SSS	number of households surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
<b>Rural</b>			
SSS 1	relatively affluent households	2	1
SSS 2	of the remaining, households having principal earning from non- agricultural activity	4	2
SSS 3	Other households	2	1
<b>Urban</b>			
SSS 1	households having MPCE of top 10% of urban population (MPCE > B)	2	1
SSS 2	households having MPCE of middle 60% of urban population (A ÖMPCE ÖB)	4	2
SSS 3	households having MPCE of bottom 30% of urban population (MPCE < A)	2	1

3.12.3 Thus, for each schedule type, a total of 8 households were selected for survey from each FSU ó 4 from each selected hamlet-group/sub-block in FSUs where hg/sbø were formed.

### 3.13 Selection of households

3.13.1 From each SSS the sample households for each of the schedules were selected by SRSWOR. If a household was selected for Schedule 1.0 (Type 1), it was not allowed to be selected for Schedule 1.0 (Type 2) or Schedule 10. Similarly, if a household was not selected for Schedule 1.0 (Type 1) but selected for Schedule 1.0 (Type 2) it was not allowed to be selected for Schedule 10. If a household got selected for more than one schedule, only one schedule was canvassed in that household in the priority order of Schedule 1.0 (Type 1), Schedule 1.0 (Type 2) and Schedule 10 and in that case the household was replaced by selecting another household for the other schedule.

3.13.2 However, at least one household was to be surveyed from each SSS for each of the three schedules of enquiry. To adhere to this restriction, the condition of not canvassing more than one schedule in the same household was waived in the extreme cases where there were an insufficient number of households in the frame of a particular second stage stratum.

### 3.16 Estimation Procedure

**Notations:** The notations used for describing the procedure of estimation are given below:

s	= subscript for s-th stratum
t	= subscript for t-th sub-stratum
m	= subscript for sub-sample (m = 1, 2)
i	= subscript for i-th FSU [village (panchayat ward)/ block]
d	= subscript for a hamlet-group/ sub-block (d = 1, 2)
j	= subscript for j-th second stage stratum in an FSU/ hg/sb [ j = 1, 2 or 3]
k	= subscript for k-th sample household under a particular second stage stratum within an FSU/hg/sb
D	= total number of hg's/ sb's formed in the sample village (panchayat ward) / block
D*	= 1 if D = 1 = D/ 2 for FSUs with D > 1
N	= total number of FSUs in any urban (UFS) sub-stratum
Z	= total size of a rural sub-stratum (sum of sizes for all the FSUs of a sub-stratum)
z	= size of sample village used for selection.
n	= number of sample village/ block/ surveyed including zero cases but excluding casualty for a particular sub-sample and sub-stratum.
H	= total number of households listed in a second-stage stratum of a village/ block/ hamlet-group/ sub-block of sample FSU
h	= number of households surveyed in a second-stage stratum of a village/ block/ hamlet-group/ sub-block of sample FSU
x, y	= observed value of characteristics x, y under estimation
X <sup>^</sup> Y <sup>^</sup>	= estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$  = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg/ sb (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum;

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

### 3.17 Formulae for Estimation of Aggregates for a particular sub-sample and stratum in Rural / Urban sector:

**Rural:**

**Estimation formula for stratum 1:**

(i) For households selected in j-th second stage stratum:

$$\hat{Y} = \frac{N}{n_j} \sum_{i=1}^{n_j} D_i * \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]; j = 1, 2.$$

(ii) For all selected households:

$$\hat{Y} = \sum_j \hat{Y}_j$$

**Estimation formula for other strata :**

(i) For households selected in j-th second stage stratum:

$$\hat{Y} = \frac{Z}{n_j} \sum_{i=1}^{n_j} D_i * \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]; j = 1, 2.$$

(ii) For all selected households:

$$\hat{Y} = \sum_j \hat{Y}_j$$

**Urban:**

Estimation formula for a sub-stratum:

(i) For households selected in j-th second stage stratum:

$$\hat{Y} = \frac{N}{n_j} \sum_{i=1}^{n_j} D_i * \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]; j = 1, 2.$$

(ii) For all selected households:

$$\hat{Y} = \sum_j \hat{Y}_j$$

**Overall Estimate for Aggregates:**

Overall estimate for aggregates for a stratum ( $Y_s$ ) based on two sub-samples is obtained as:

$$\frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

**Estimates of Ratios:**

Let  $\hat{Y}$  and  $\hat{X}$  the overall estimate of the aggregates Y and X for two characteristics y and x respectively at the State.

Then the combined ratio estimate ( $R^c$ ) of the ratio ( $R=Y/X$ ) will be obtained as  $R^c = \hat{Y}/\hat{X}$ .
