STATISTICAL YEAR BOOK 2016

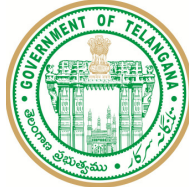

**DIRECTORATE OF ECONOMICS AND STATISTICS
GOVERNMENT OF TELANGANA
HYDERABAD**

Dr. V. Subramanyam
Director

**Directorate of Economics and
Statistics, Hyderabad**

Foreword

There is a need and demand for providing wider range of data/ information on important issues, to facilitate formulation of good development policies and for proper planning management and monitoring of investment in the fast and rapidly growing economies. Directorate of Economics and Statistics being the nodal agency at the State level has taken steps to cater to such requirements in the State.

*The present publication "**Statistical Year Book 2016**" is third in its series after the formation of Telangana State and the most comprehensive publication incorporating a large variety of data both at the State and All-India comparisons at one place.*

I am grateful to various departments and source agencies for their co-operation in supplying the data for this important publication. I, acknowledge and place on record my appreciation to the team of officers and staff associated with the compliant of the year book.

To facilitate greater access of data, this publication is disseminated in e-mode with limited number of hard copies. The e- publication is available in the official website (<http://ecostat.telangana.gov.in>) in the user friendly format to enable the interested users to download data directly.

I hope this publication will be found useful by the policy planners, researchers, academicians and other users. We endeavor to improve the utility of the publication and welcome all suggestions /comments in this regard.

Hyderabad

Overview

The State of Telangana emerged as 29th State in the Indian Union as per the Andhra Pradesh Reorganization Act, 2014 (No. 6 of 2014) of Parliament, which received the assent of the President of India on the 1st March, 2014 and came into existence with effect from 2nd June, 2014 with the city Hyderabad as its capital. The said Andhra Pradesh Reorganization Act, 2014 was received an amendment called the Andhra Pradesh Reorganization (Amendment) Act, 2014 (No. 19 of 2014) on the 17th July, 2014, transferring certain mandals and villages (327) of Khammam district to residual Andhra Pradesh, enforcing this amendment with effect from 29th May, 2014.

Telangana is a State in the Southern region of India. It has an area of 1,12,077 sq. kms., after the Andhra Pradesh Reorganization (amendment) Act, 2014 (as per act No. 6 of 2014 its area was 1,14,840 kms.), and is the twelfth largest State in terms of both area and the size of the population in the country. Telangana acquired its identity as the Telugu speaking region of the princely State of Hyderabad, ruled by Nizam of Hyderabad during the British Raj, joined the Union of India in 1948. The Hyderabad State was dissolved as part of the linguistic reorganization of States, and the Telugu speaking part of Hyderabad State, known as Telangana,

was merged with former Andhra State to form Andhra Pradesh. Following a popular movement of separation, Telangana was awarded Statehood on 2nd June, 2014.

The State is bordered by the States of Maharashtra to the North and North-West and Chhattisgarh to the North, Karnataka to the West, and Andhra Pradesh to the South, East and North-East. The major cities in Telangana State include Hyderabad, Warangal, Mahabubnagar, Karimnagar, Nizamabad, and Khammam. The State is strategically located in the Deccan plateau in the Central stretch of the eastern seaboard of Indian Peninsula. The Climate of the State is predominantly hot and dry.

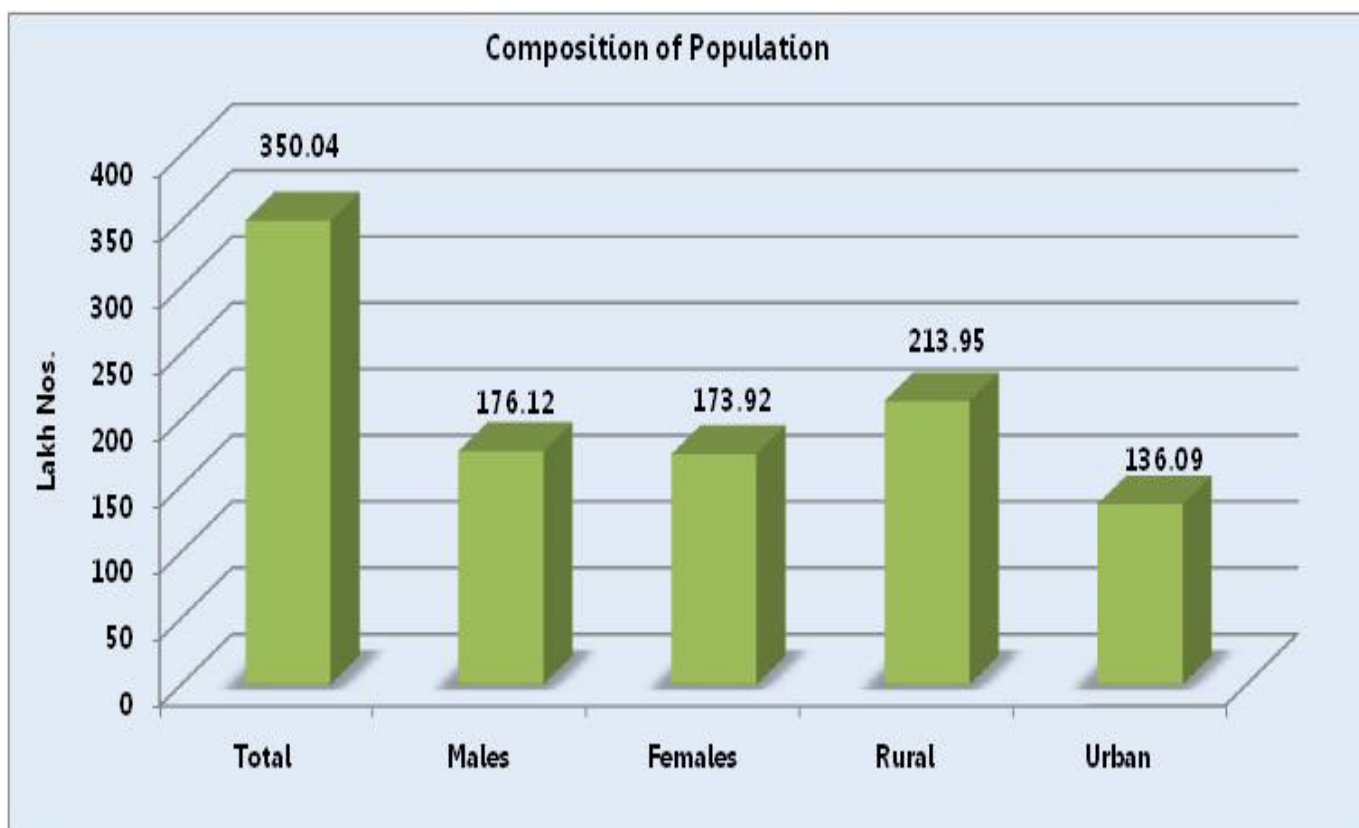

1. POPULATION

The Government of India, in exercise of the powers conferred under the provisions of the Census Act, 1948, conducting the population census across the country once in a decade and releasing the results in different phases. Accordingly, the Government of India has conducted the population census in the year 2011 and released the final results, up to the village level, in different classifications. An attempt is made in this chapter to present the results of the population census, 2011 conducted in Telangana State, excluding those

(327) revenue villages that were transferred to the State of Andhra Pradesh (Residual) as per the Andhra Pradesh Reorganization (Amendment) Act, 2014 (No. 19 of 2014) along with certain comparisons with that of the earlier censuses. Consequently, the geographical area of the Telangana State is 1,12,077 sq. kms., with a population of 350.04 lakh consisting of 176.12 lakh males and 173.92 lakh females. The sex ratio is 988 in the State. The details of population is shown in the following graph.

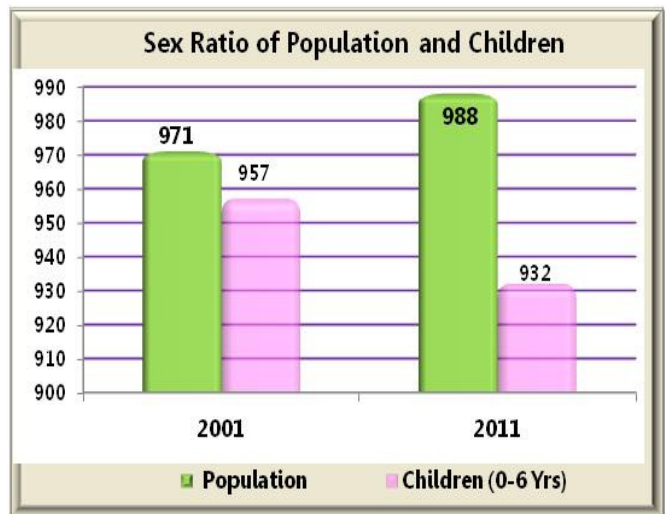

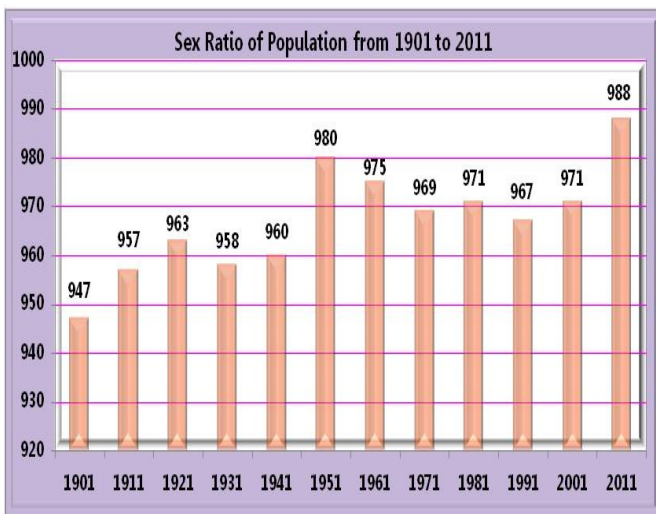

Composition of Population

One of the important characteristics of demography of population is sex composition or sex ratio. The sex ratio is defined as the number of females per 1,000 males in the population. This ratio for the State is 988 according to 2011 Census. One distinguishing feature is that the sex ratio in the districts of Nizamabad, Adilabad, Karimnagar and Khammam is more than 1,000. The sex ratio has shown an increasing trend in the State from 967 in 1991 to 971 in 2001 and further to 988 in 2011. Despite having a favorable sex ratio of the total population, the sex ratio of children in the age group of 0-6 years has

declined from 957 in 2001 to 932 in 2011. The sex ratio of the SC population at 1,008 in 2011 is much higher than the State average of 988 in all districts, except Rangareddy, Hyderabad and Mahabubnagar districts. The sex ratio of ST population at 977 in 2011 is marginally lower than the State average of 988, but it is higher in Adilabad, Karimnagar, Nizamabad and Khammam districts.

The pictorial presentation of the sex ratio of population from the years 1901 to 2011, including children (0-6 years) population is given in the following graphs.

Density of Population

The density of population is defined, in general, as average number of persons residing per square kilometer of area. The density of population in the State ranges from 170 to 18,172 per square kilometer. Adilabad district has the lowest density of 170 per sq. kilometer,

whereas Hyderabad district has the highest density of 18,172 per sq. kilometer. The districts of Adilabad, Khammam and Mahabubnagar have lower density of population with 170, 197 and 220 per sq. kilometer respectively, compared to the State average of 312 per sq. kilometer.

Growth of Population

The growth of population will have considerable impact on economic development, particularly State like Telangana. It necessitates meticulous planning for requirement of food grains, housing, education, health and other infrastructure for leading better life. The people of the State are predominantly residing in rural areas with 61.12% and the rest 38.88% are residing in urban areas. The overall growth of total population during the decade 2001 and 2011 is 13.58%, whereas it was 18.77% in the

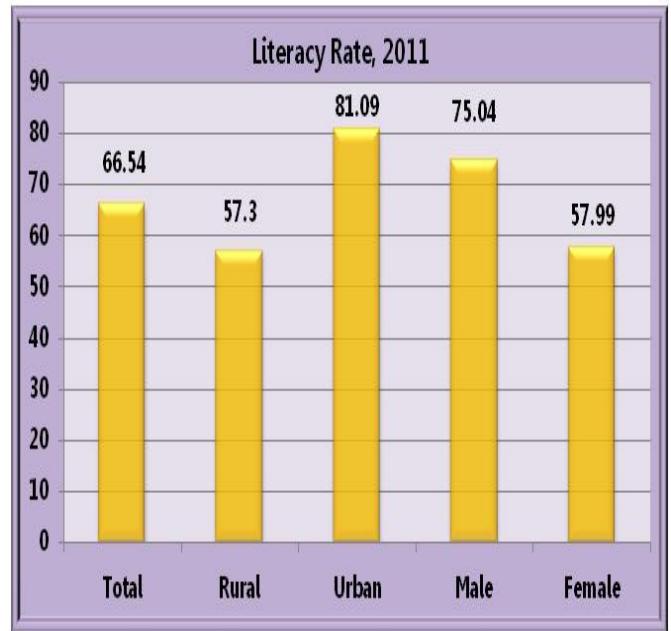

preceding decade. The growth of the population in urban areas has been witnessing a significant increase and grew by 38.12% during the decade 2001 and 2011 as compared with 25.13% in the preceding decade. In sharp contrast, rural population in the State grew by a modest 2.13% as per the 2011 census. Out of the total urban population of the State, around 30% is residing in the capital city of Hyderabad alone.

The decadal growth rates from 1901-11 to 2001-11 is depicted in the graph given below:

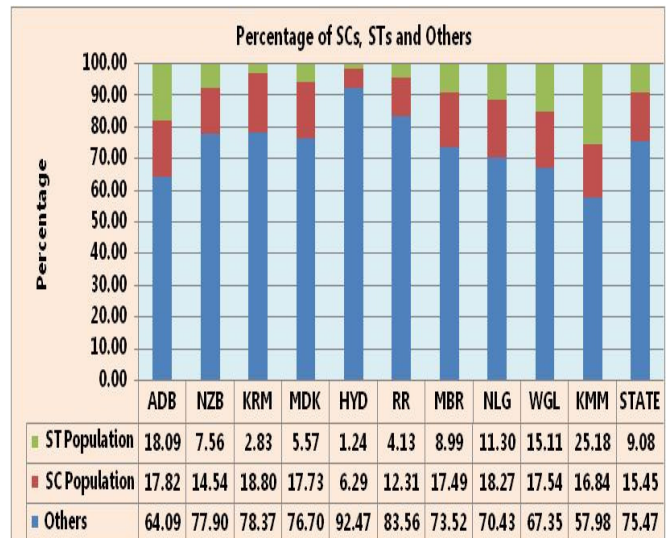

Literacy Rate

A person whose age is 7 years and above and is able to read and write with understanding in any one language is defined as literate. The literacy rate is the percentage of literates in the total population excluding 0-6 years. The literacy rate of the State as per 2011 census is 66.54%. Male literacy stands at 75.04% and female literacy at 57.99%. There is a huge gap in literacy of urban areas when compared to rural area literacy and the same is depicted in the graph. Literacy in Hyderabad district is highest with 83.25% and Mahabubnagar district lowest with 55.04%.

Social Composition of Population

The population of the State consists of scheduled castes, scheduled tribes and others. Out of the total population of the State, scheduled castes constitute 15.45% and the scheduled tribes constitute 9.08%. There has been a significant increase in scheduled tribes population from 2.81% in 1961 to 8.19% in 1981 and further to 9.08% in 2011. Details regarding percentage composition of SCs, STs and Others population are presented in the graph.

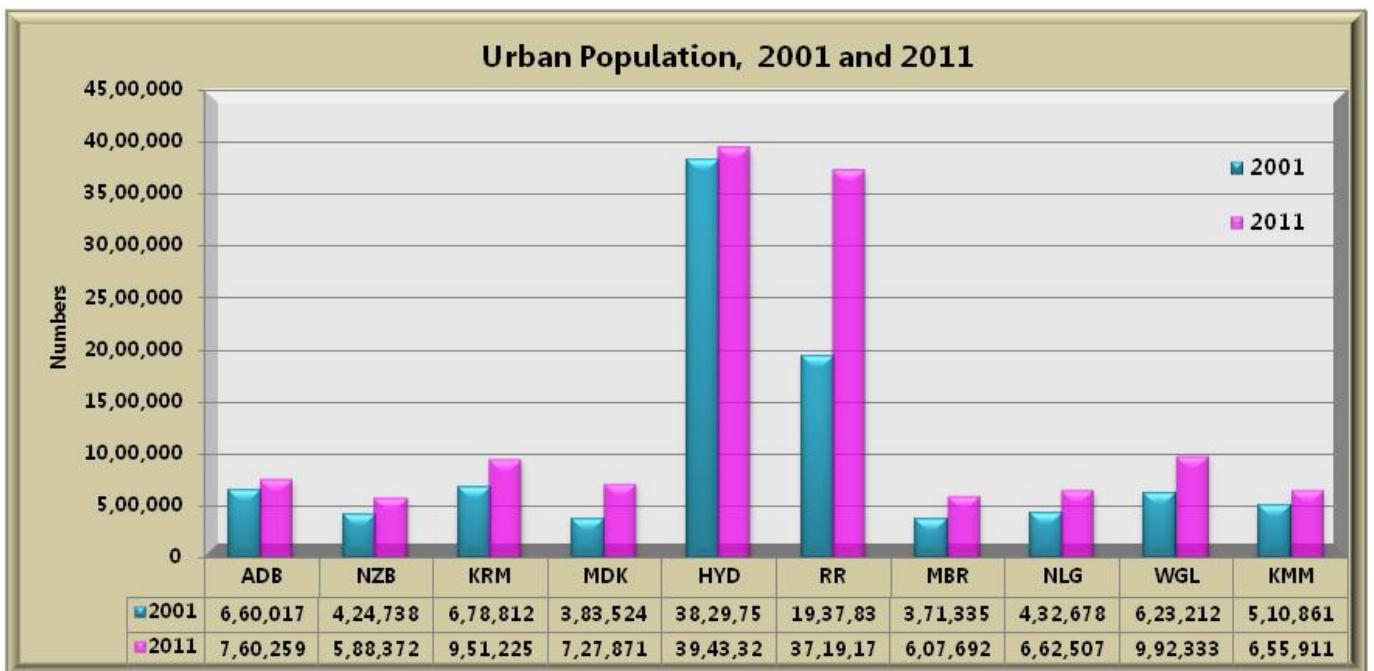

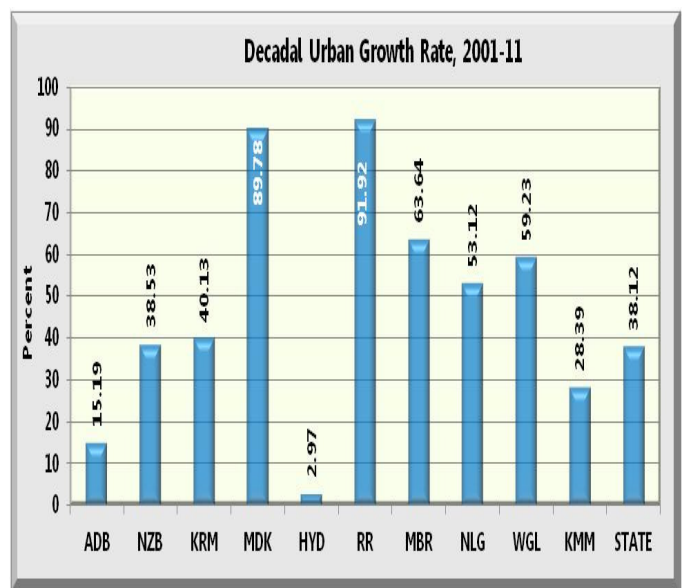

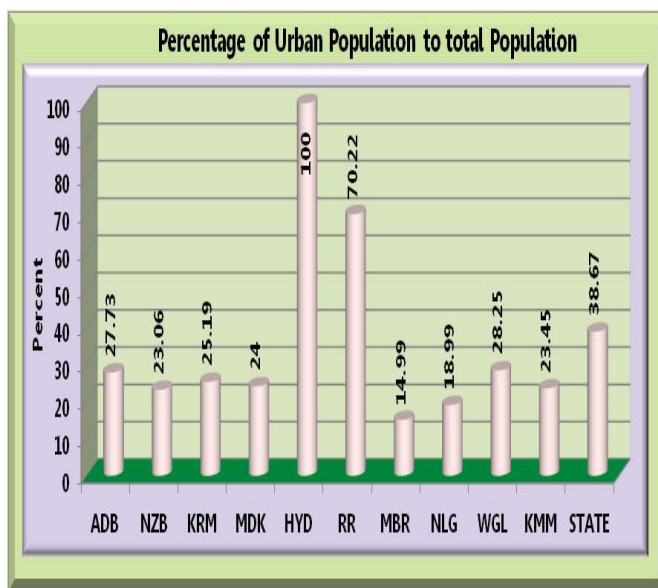

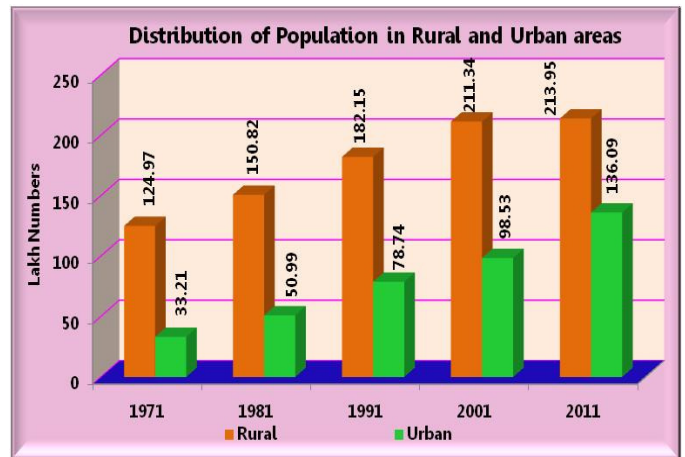

Growth and Level of Urbanization

The distribution of population in rural and urban areas shall be in equilibrium. The uneven distribution in either of the areas will pose problems relating to administration, law and order, transportation, water and other amenities. Government is taking appropriate

action for providing these facilities based on the distribution of population in rural and urban areas. Urban population, according to 2011 census, is 136.09 lakhs, whereas it was 98.53 lakhs in 2001, increased by 36% over the decade in the State.

Statistical Year Book 2016

Hyderabad is a hundred percent urban district but the city of Hyderabad spreads much beyond the district boundary into the neighboring Rangareddy district. This has made Rangareddy as the next highly urbanized district with 70.22% urban population. The Distribution of population in rural and urban areas from 1971 to 2011 is furnished in the chart.

COMPOSITION OF WORKFORCE

Workforce: Persons engaged in any economically gainful activity are considered as workers or workforce. According to population Census 2011, total workforce of the State is 163.42 lakhs.

Work participation Rate: It is the percentage of economically gainful active persons to total population.

Total Workers Include all main workers and marginal workers which constitute 163.42 lakhs in the State.

Main Workers: Main Workers are persons engaged in any economically gainful activity for 183 days or more in a year. There are 137.20 lakh main workers, of which 22.42 lakhs belong to scheduled castes and 14.58 lakhs belongs to scheduled tribes, as per 2011 Census.

Marginal workers: Marginal workers are persons engaged in any economically gainful activity for less than 183 days. As per 2011, Census there are 26.22 lakh marginal workers, of which 4.96 lakhs belong to scheduled castes and 2.93 Lakhs belongs to scheduled tribes.

Cultivator: Cultivator is a person who is engaged as employer or worker in cultivation of certain crops on land owned by him or held by him for payment in money, kind or share. Cultivators include supervision or directions of cultivation. Total number of cultivators are 31.51 lakhs as per 2011 Census.

Agricultural labourer: Agricultural labourer is a person working in another persons land for wages in cash or kind. He has no risk of cultivation. Total number of agricultural labourers as per Census 2011 in the State are 59.15 lakhs.

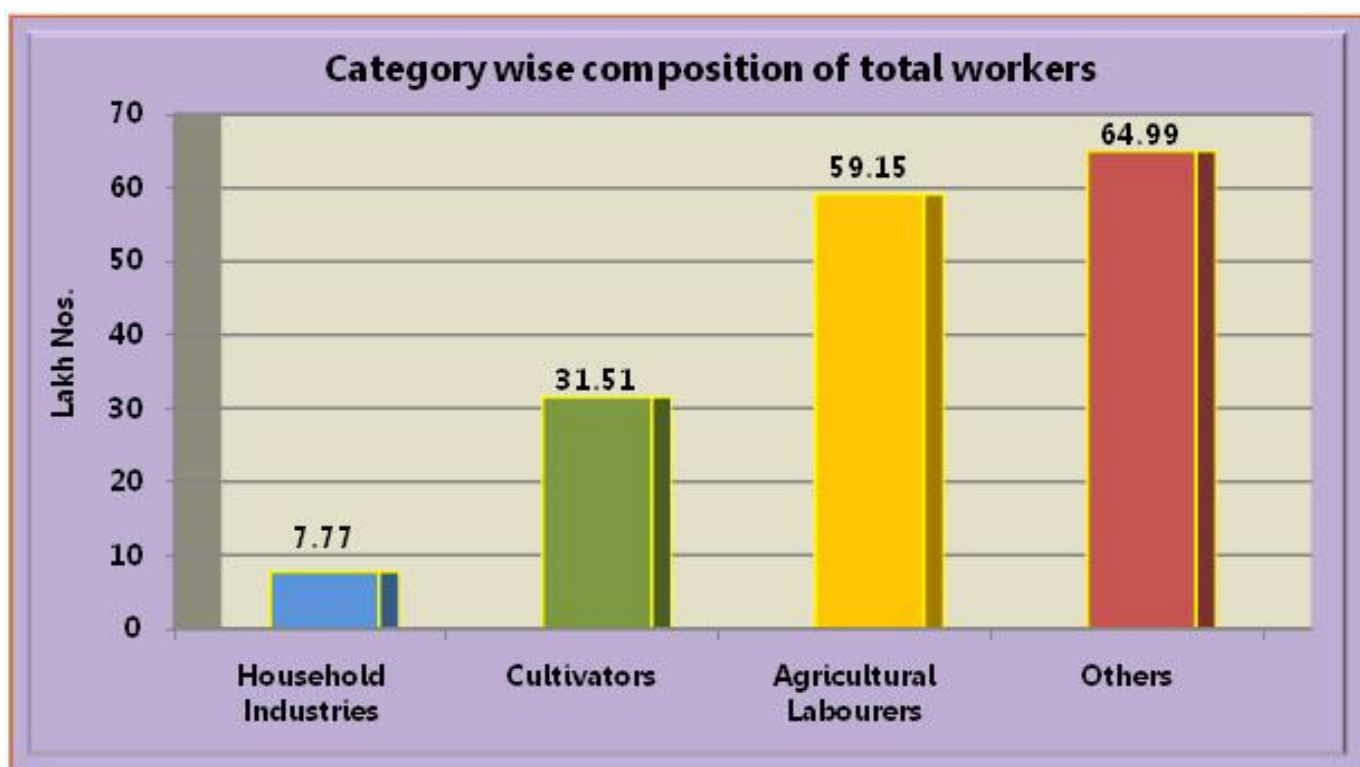

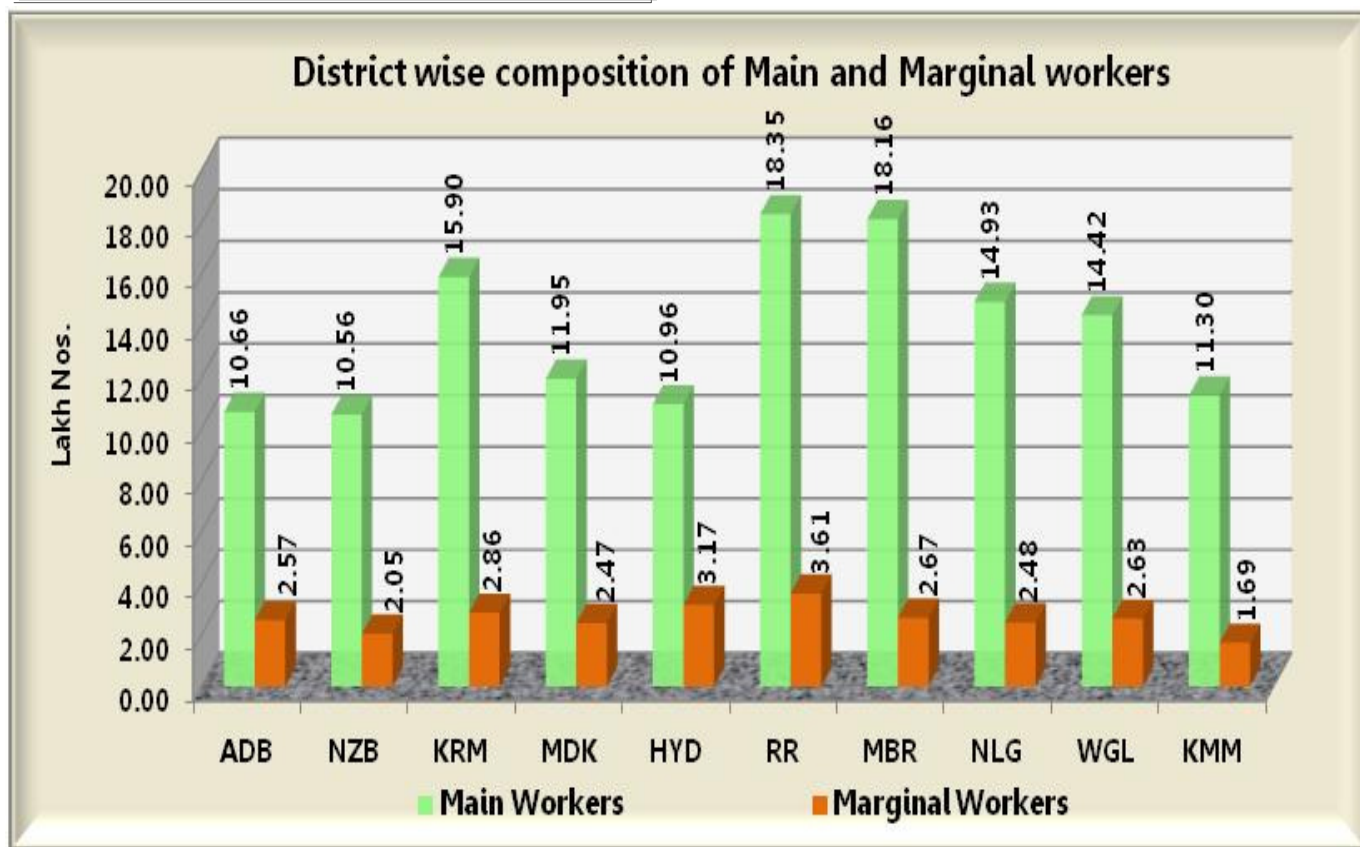

Household industry worker: Household industry worker is a person who work for a major part in household industry. Household industry relates to production, processing, servicing, repairing or making and selling of goods. There are 7.77 lakh persons engaged in household industry.

Other worker: Other worker are persons engaged in the activities other than cultivation, agricultural labour and household industry. There are as many as 64.99 lakh other workers in the State.

Non worker: Non worker is a person who is not engaged in any gainful activity. There are 186.62 lakh non workers as per 2011 Census.

Apart from the data so presented, an attempt is made in this chapter to present data

on other parameters relating to the population and related matters in different tables.

Table	Content
1.1	Demographic and other key characteristics of the State
1.2	Population and its variations, Sex Ratio and Density from 1901 to 2011 Census
1.3	Geographical Area, Revenue Divisions, Mandals, Towns, Villages, Municipal Bodies, Gram Panchayats, MPPs and Assembly Constituencies, 2015
1.4	Males and Females Population and Sex Ratio, 2011 Census
1.5	Population by Area, Gender and Sex Ratio, 2011 Census
1.6	Percentage Decadal Growth of Population in Rural and Urban areas, 2011 Census

2. Health and Family Welfare

The right to health is the economic, social and cultural right to the highest attainable standard of health. This right was well recognized in the Universal Declaration of Human Rights, International Covenant on Economic, Social and Cultural Rights and the Convention on the Rights of Persons with Disabilities. Every Country around the Globe are trying their best to address this issue of affordable health care to all their citizens.

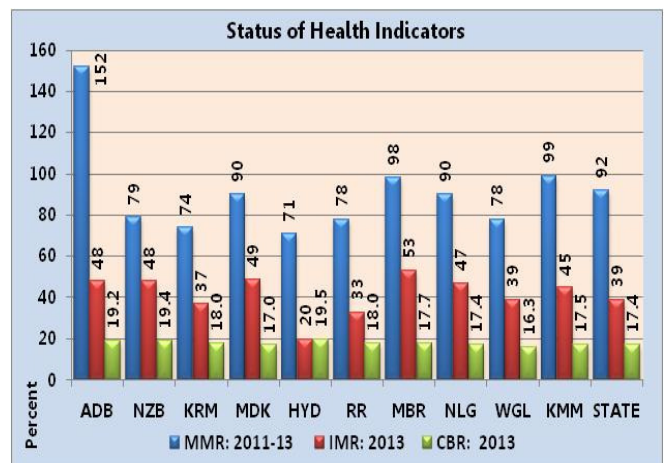

In accomplishing this, the Government of India has launched the National Health Mission (NHM) encompasses its two Sub-Missions, the National Rural Health Mission (NRHM) and the newly launched National Urban Health Mission (NUHM). The main programmatic components

include Health System Strengthening in rural and urban areas Reproductive-Maternal Neonatal Child and Adolescent Health (RMNCH+A), and Communicable and Non-Communicable Diseases. The NHM envisages achievement of universal access to equitable, affordable and quality health care services that are accountable and responsive to peoples need. As such, health care should be within the reach of every citizen. The Government has introduced various health schemes and programmes for providing basic health facilities to all of its citizens, including women, children and senior citizens are being implemented in the State. Many demographic and health indicators have been prescribed to monitor the health status in a given area like district, State etc .

Health Indicators

The availability of health care services is found to be inadequate, both quantitatively and qualitatively. Considering the fact, the Government has introduced various health schemes and programmes for providing basic health facilities to all citizens. In six out of ten districts of the State, the infant mortality rate (IMR) is found to be much higher than the State average of 39 and national average of 40. The maternal mortality rate of the State is 92 which is much lesser than the national average of 167. Among all the districts, the maternal mortality rate (MMR) of Adilabad district is comparatively very high at 152, followed by Khammam and Mahabubnagar districts. The percentage of home

deliveries is found to be very high in Adilabad district with 11.5% as per District Level Household and facility Survey (2012-13) conducted by the International Institute for Population Sciences.

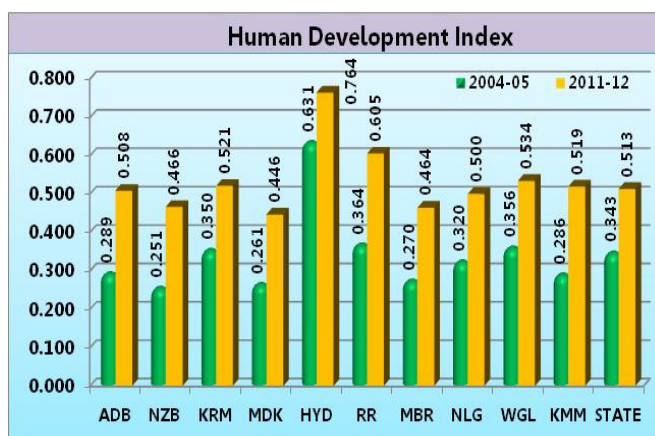

Health and Family Welfare

There are 108 general hospitals, 17 hospitals for special treatment totaling to 125 hospitals rendering services in the State. There are 671 primary health centers and 70 dispensaries are existing in the State as on 31-03-2015.

The strength of doctors in these hospitals is 3742, including 510 contract doctors to provide maternal and child health care and family welfare services to the people of the State.

Human Development Index and Rankings

Human development is the expansion of people's freedom to live long, healthy and creative lives. The construction of Human Development Index combines three dimensions of development viz., (i) per capita income, ii) longevity and health standards, and iii) literacy and education. The Human Development Index for the years 2004-05 and 2011-12 and their rankings are presented in this chapter. The indices clearly indicate that there has been a significant

improvement in the HDI in all districts of the State.

Table	Content
2.1	Estimated Birth Rate, Death Rate and Infant Mortality Rate, 2011 to 2013
2.2	Estimated Age Specific Fertility Rate, 2011 to 2013
2.3	Status of Health Indicators in the State

3. Climate

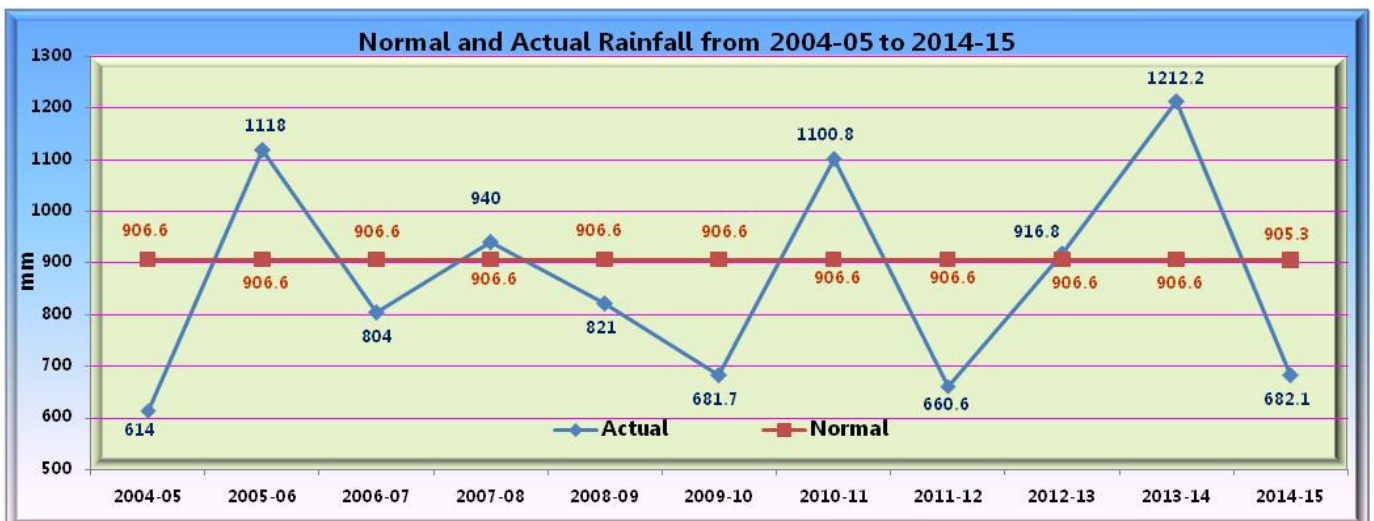

Telangana State is geographically located in a semi-arid area and has predominantly hot and dry climate. Summer starts in March, and reaches peak in May with average high temperatures of 42°C (108°F) range. The monsoons enter into the State in June and lasts until September with

about 700 mm of precipitation. A dry, mild winter starts in late November and lasts until early February with little humidity and average temperatures in the range of 22–23°C(72–73°F). The State is also prone to hailstorms in the month of April and May, occasionally.

Rainfall

The average or normal rainfall of the State is about 905.3 mm and about 80% of annual rainfall is received from the south-west monsoons alone during (June to September). The rainfall in the State is erratic and uncertain and distribution of the rainfall is uneven in various mandals thus, making agriculture a proverbial gamble with the monsoons. During

the period from 2004-05 to 2014-15, the annual actual rainfall received was lowest in 2004-05 with 614 mm, where as it was the highest in 2013-14 with 1212.2 mm as against normal rainfall of 905.3 mm in the State. Year wise details of actual and normal rainfall are depicted in the following graph.

Apart from rainfall, the details of climate conditions such as minimum & maximum temperatures, relative humidity & wind speed

and well frequency of ground water levels at different stations are presented in this chapter.

Table	Content
3.1	Season wise Rainfall from 2004-05 to 2014-15
3.2	Season wise Rainfall by Districts, 2014-15
3.3	Annual Average Rainfall by Districts, 2011-12 to 2014-15

4. Agriculture

Agriculture plays a pivotal role in the economy of the State and the better performance of this sector is vital for inclusive growth. Sustainable growth in Agriculture continues to be core agenda of the Government and occupies center stage in state economy embodying three thrust areas viz., (i) to promote inclusive growth, (ii) to enhance rural income, and (iii) to sustain food security. About 55.49 percent of the State's population is dependent, on some form or the other, on farm activity for livelihoods, it is imperative to increase the farm incomes and ensuring sustainable growth in Telangana to reduce poverty. The share of agriculture sector to the Gross State Value Added (GSVA) in 2014-15 is 8.6 percent at current prices.

The pressure on agricultural land is ever increasing for industrialization, urbanization, housing, infrastructure and others. All these

Land Utilization

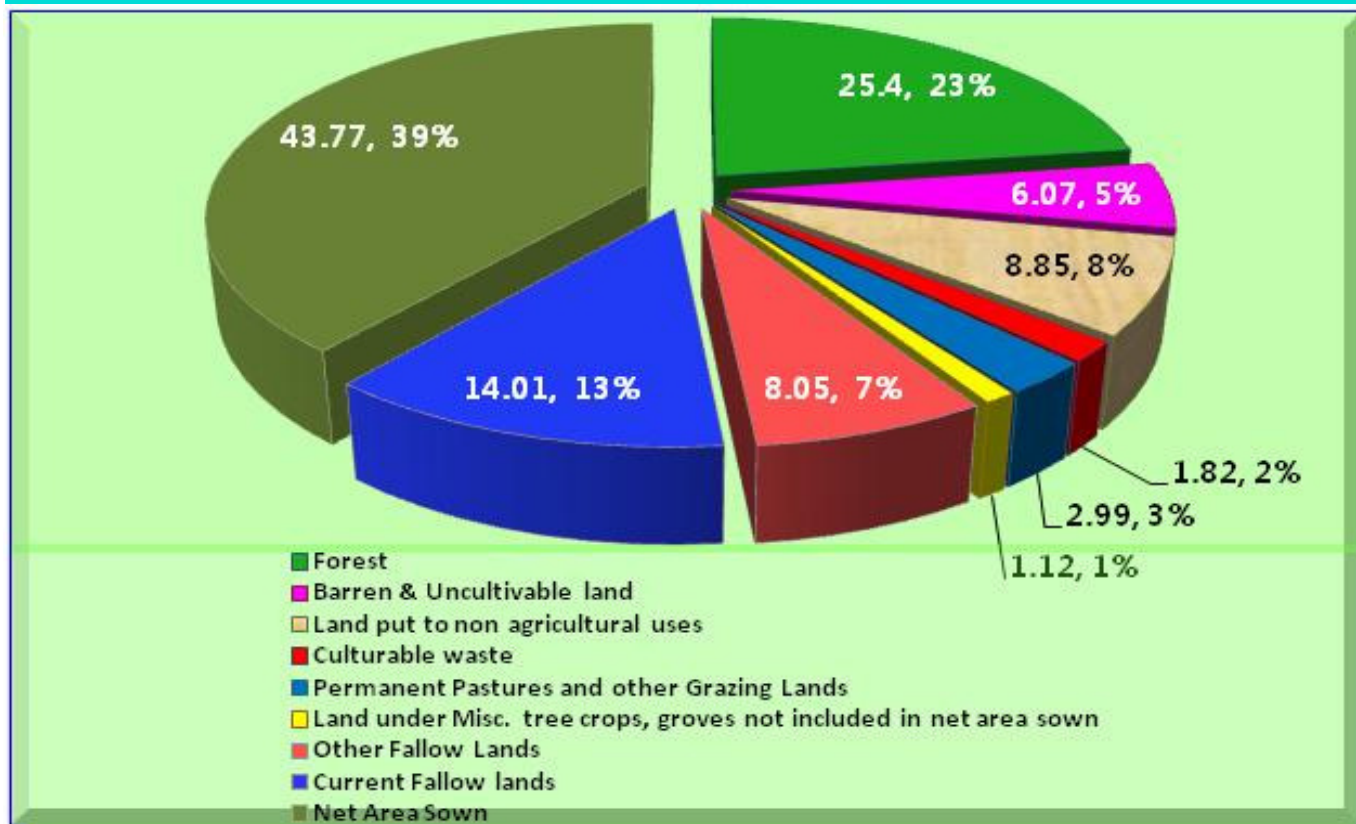

The total geographical area of the State is 112.08 lakh hectares, of which the area under forest cover is 25.40 lakh hectares, constitute 22.66% of the land. About 39.05% area is under cultivation (43.77 lakh hectares), 12.50% is current fallow lands (14.01 lakh hectares), 7.90% of land is put to non-agricultural uses (8.85 lakh hectares), 5.42% is barren and uncultivable

factors are forcing for conversion of agricultural land to non-agricultural uses. The scope for expansion of the area available for cultivation is coming down to that extent, ultimately decrease in net area sown. Paddy is the major food crop and staple food of the State. Other important crops grown are Maize, Jowar, Red gram, Green gram, Bengal gram, Groundnut, Soya bean, Mango, Cotton, Chillies, Sugarcane etc., and agriculture has been one of the important sources of income for the State's economy.

During 2014-15, production of total food grains was recorded as 72.18 lakh tonnes. Of the total food grains, production of cereals and millets was 69.55 lakh tonnes, pulses 2.63 lakh tonnes. Production of oil seeds was 7.22 lakh tonnes, Chillies 2.53 lakh tonnes, Turmeric 2.16 lakh tonnes etc.

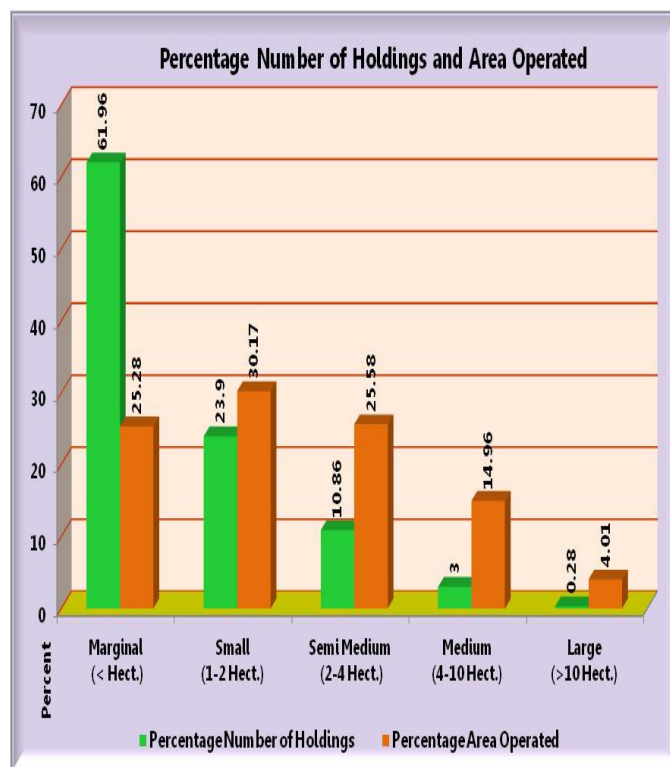

(6.07 lakh hecets.) and 7.18% falls under other fallows (8.05 lakh hecets.). The remaining 5.29% is under culturable waste, permanent pastures and other grazing lands, and land under miscellaneous tree crops and groves are not included in the net area sown (5.93 lakh hectares). The pattern of land use under various categories is indicated in the following chart.

Land Utilization, 2014-15
(Area in Hectares and Percentage)

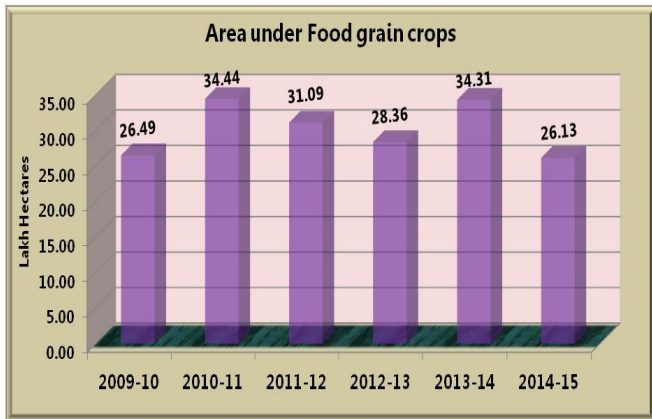

Land Holding and Area Operated

As per the Agricultural Census, 2010-11, the number of holdings in the State accounted to 55.54 lakh and the area held by these holdings was 61.97 lakh hectares. The average size of the holdings in the State is 1.12 hectares, which is highly uneconomical to operate. In the State, 62.0 percent of the holdings are marginal (less than 1 hectare) and the percentage of small holdings (1 to 2 hectares) is 23.9%. Thus, marginal and small holdings constitute about 85.9% of total agricultural holdings in the State, making agriculture a subsistence source of livelihood for majority of the population. Distribution of land holdings and area operated as per size classes is given in the graph.

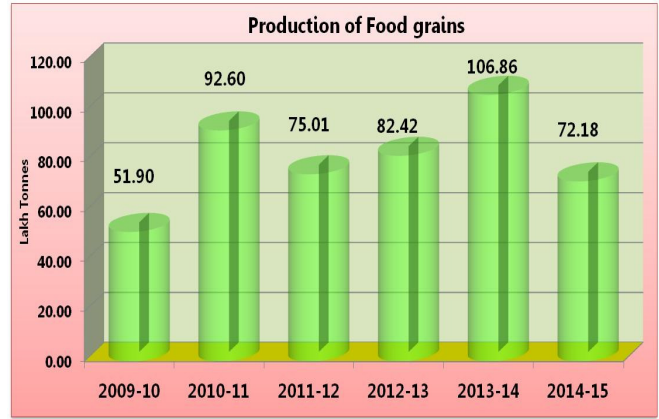

Area and Production of Food Grains

Area and production of food grains from 2009-10 to 2014-15 in the State are shown in the following charts. It can be observed that the area

sown is higher with 34.44 lakhs hectares in

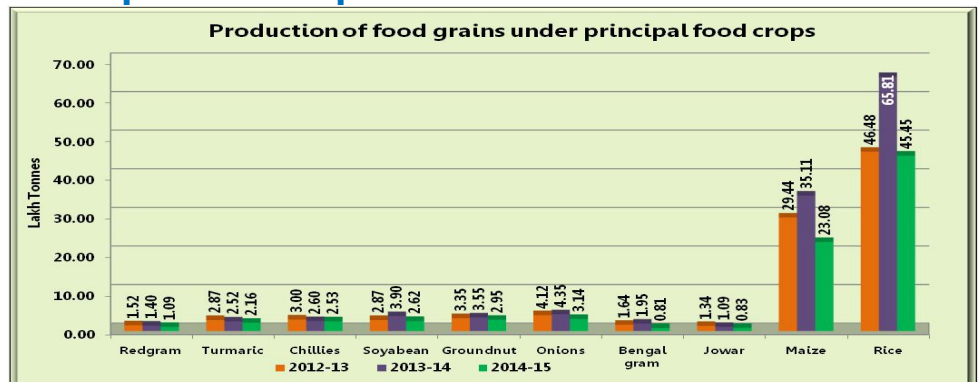

2010-11 with production of 92.60 lakhs tonnes, whereas the area sown was lowest in 2009-10 with 26.49 lakh hectares with a production of

51.90 lakh tonnes.

Production of certain Principal food crops

Production of food grains under certain principal crops like Rice, Maize, Jowar, Turmeric, Chillies, Bengal gram etc., from 2012-13 to 2014-15 is shown in the graph given.

Crop Productivity

The average productivity (average yield in kilograms per hectare of land) of principal crops during the year 2014-15 are 3,211 Kgs., in respect of Rice, 1,054 kgs., for Jowar, 3,338 Kgs., for Maize, 3,456 Kgs., for Chillies etc.

The productivity of Ragi is almost stable from 2009-10 to 2014-15, whereas productivity of Soya

bean, except in 2009-10 remains stable. In case of Palm Oil, there are fluctuations from 2009-10 to 2013-14. Productivity of chillies is highest in Khammam whereas productivity of turmeric is highest in Adilabad, productivity of cotton remains more or less at the same level across the districts.

Cropping Intensity

The cropping intensity (the ratio of gross cropped area to net cropped area) is one of the indicators for assessing efficiency of agriculture sector. The cropping intensity for the year

2014-15 is decreased 1.21 from 1.27 in 2013-14. The cropping intensity is highest in Nizamabad district with 1.55 and lowest in Adilabad district with 1.08.

5. Irrigation

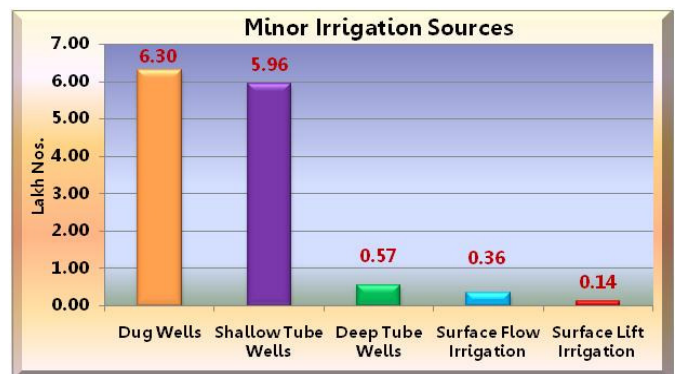

Irrigation is the artificial application of water to the land or soil. It is used to assist in growing of agricultural crops, maintenance of landscapes, and re-vegetation of disturbed soils in dry areas and during periods of inadequate rainfall. Irrigation is one of the most important critical inputs for enhancing the productivity that is required at different critical stages of plant growth. One cannot imagine agriculture without irrigation. Two important

rivers of India, the Godavari and Krishna are flowing through the State and providing irrigation. Major sources of irrigation in the state are canals, tanks, tube wells, dug wells etc., and irrigation is being done with the use of various techniques such as surface irrigation, localized irrigation, drip irrigation, sprinkler irrigation, sub-irrigation depending upon the availability of source, accessibility and others to increase the productivity of the crop grown.

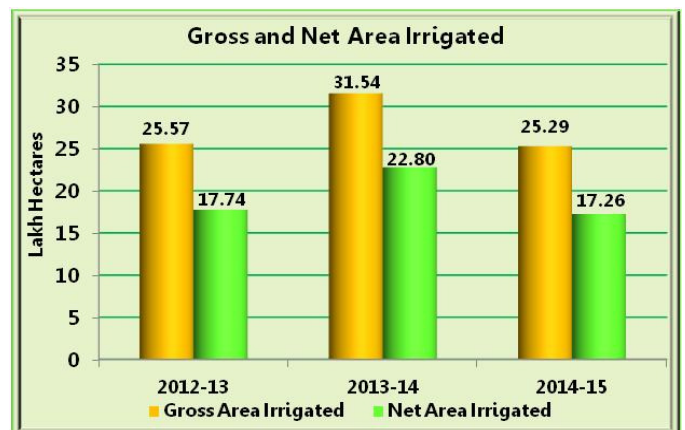

Irrigation sources

There are 6.30 lakh dug wells, 6.53 lakh tube wells, 0.50 lakh surface flow and lift irrigation sources totaling to 13.33 lakh sources are catering to the needs of agriculture, according to the fourth Minor Irrigation Census conducted in the State during 2006-07. Pictorial representation is as follows.

Gross and Net Area Irrigated

The gross area irrigated in the State during 2014-15 has decreased to 25.29 lakh hectares from 31.54 lakh hectares in 2013-14, showing a decrease of 19.81%. Similarly the net area irrigated has also decreased to 17.26 lakh hectares in 2014-15 from 22.80 lakh hectares in 2013-14, showing a decrease of 24.27%. Graphical representation is as follows.

Statistical Year Book 2016

Irrigation Intensity: The irrigation intensity is the ratio of gross area irrigated to the net area irrigated. The irrigation intensity for the year 2014-15 in the State is worked out to 1.47%. The graphical presentation of irrigation Intensity for the years from 2008-09 to 2014-15 is depicted in the following chart.

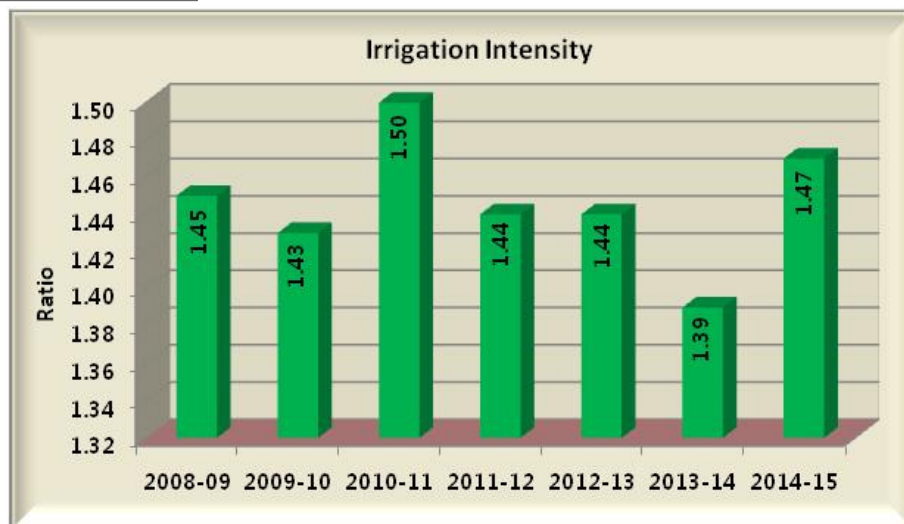

Table	Content
5.1	Minor Irrigation Sources according to periodic Minor Irrigation Censuses
5.2	Source wise Potential Created and Area Actually Irrigated according to 3rd and 4th Minor Irrigation Census
5.3	Type wise Minor Irrigation Sources Created and Area Irrigated according to 3rd and 4th Minor Irrigation Census
5.4	Minor Irrigation Sources as per 4th Minor Irrigation Census, 2006-07
5.5	Gross Area Irrigated by different Sources, 2008-09 to 2014-15
5.6	Net Area Irrigated by different Sources, 2008-09 to 2014-15
5.7	Area Irrigated by different Sources by Districts, 2014-15
5.8	Crop wise Gross Area Irrigated under Food and Non-Food Crops, 2009-10 to 2014-15
5.9	Crop wise Gross Area Irrigated under Food and Non-Food Crops by Districts, 2014-15

TABLE - 5.1

6. Livestock and Fisheries

Rearing of Live Stock play an important role in the Economy, especially in the rural areas. Apart from agriculture many rural youth are eking their livelihood in dairy, rearing sheep, goat and pig etc. The prosperity of Agriculture obviously depends upon the Livestock population it has. They are not only helping the farmer in agricultural operations and also helping more in conserving soil health and paving path for healthy crops and conservation of moisture.

Animal Health Care Services

The important animal health care services available during the year 2014-15 are Super Specialty Hospital (1), Veterinary Polyclinics (8), Veterinary Hospitals(101), Veterinary Dispensaries

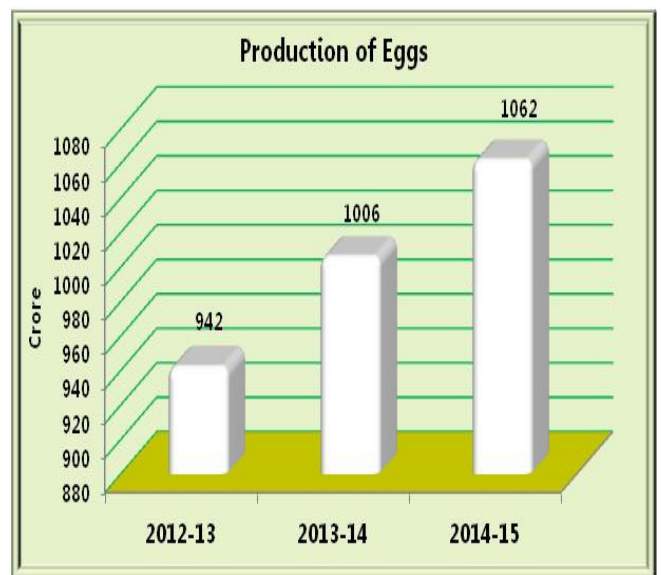

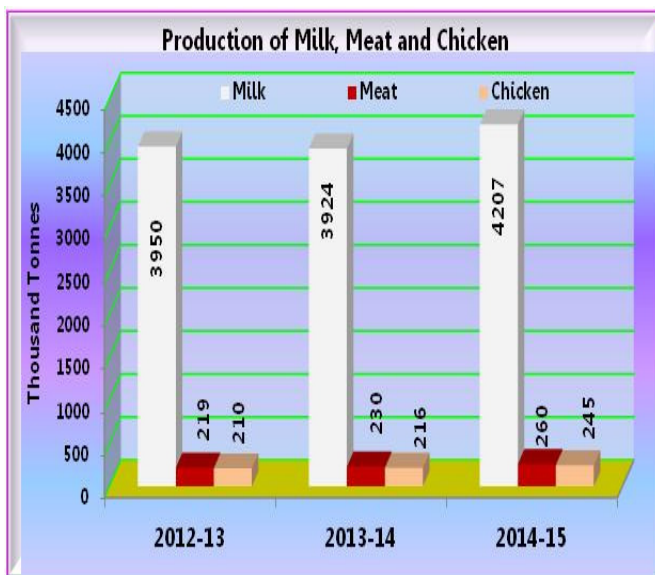

Animal Husbandry sector consists of bovine, ovine, pig and poultry population. Bovine population is further classified into cattle and buffaloes and ovine population into sheep and goat. Telangana is well off with livestock resources, especially Sheep population accounting to 19.80% of total Country's sheep population. The State stands 2nd in Sheep population, 13th in Goat population, in the country as per the Livestock Census, 2012.

(906), Mobile Veterinary Clinics (8) and Rural Livestock Units (1,101) are rendering services in the State.

Production of Milk, Meat and Eggs

The State had produced 4,207.42 thousand tonnes of Milk, 259.73 thousand tonnes of meat,

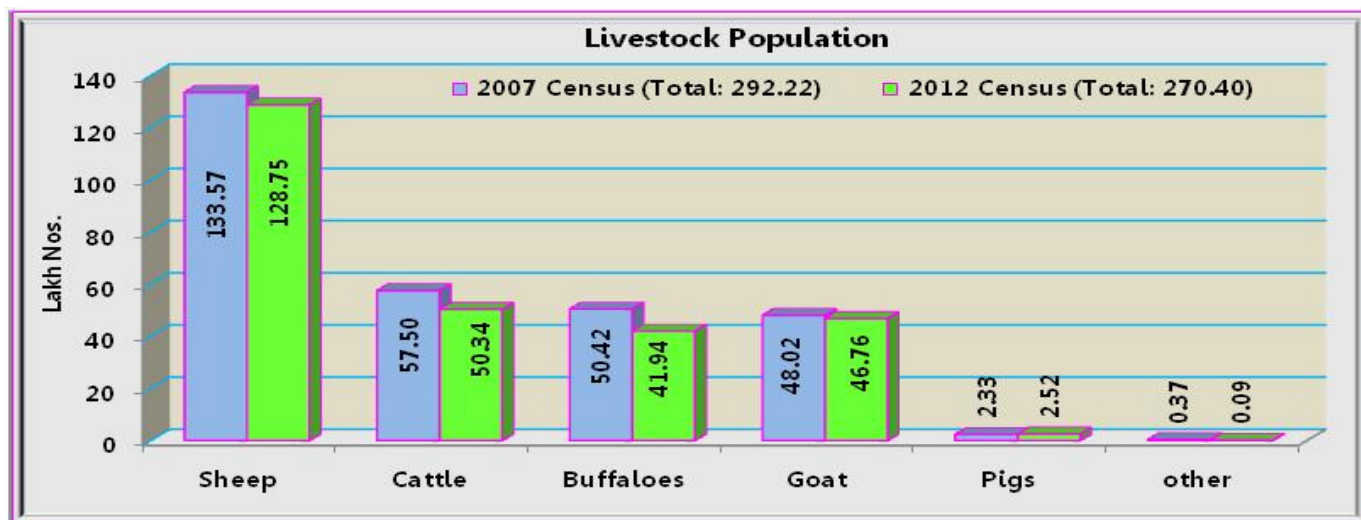

245.34 thousand tonnes of chicken and 1,062 crore eggs during 2014-15.

Composition of Livestock Population

According to Livestock Census, 2012, the State has 50.34 lakh cattle, 41.94 lakh buffaloes,

128.75 lakh sheep, 46.75 lakh goat and 691.59 lakh poultry population.

Fisheries

The State is blessed with important Irrigation Projects with abundant water such as Nagarjuna Sagar, Srisailem Project, Sri Ram Sagar Project, Nizamsagar, Singuru etc., numerous water bodies, perennial rivers like Godavari, Krishna, Manjira and Pranahitha are the resources for fresh water fish and prawn in the State.

Fisheries sector is one of the fast growing

sector which provides cheap and nutritious food and source of livelihood for a large section of economically backward population of the State. The production of inland fish and prawn during the year 2014-15 is 2,68,362 Tonnes, with a value of Rs. 2,65,191 lakh and its contribution to Gross State Value Added (GSVA) is 0.6%. Production of species wise inland fish, including prawns is given in the following chart.

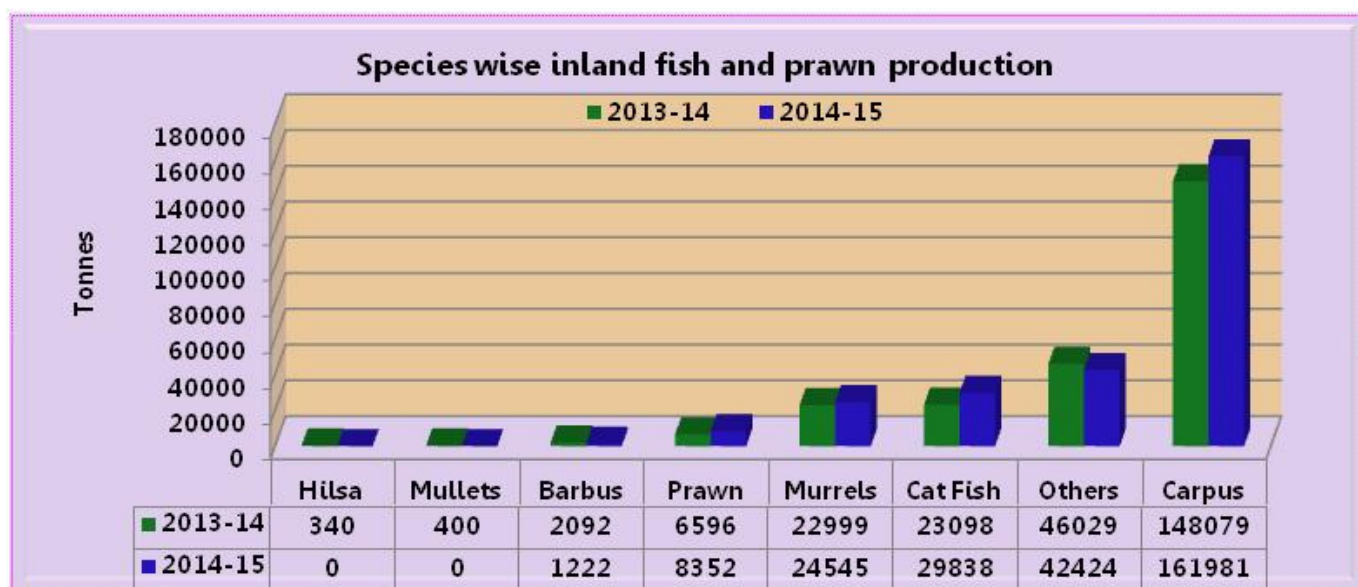

Table	Content
6.1	Livestock Development and Veterinary Services, 2008-09 to 2014-15

7. Forests

Forest is large area of land covered with trees or other woody vegetation. The Hon'ble Supreme Court of India in W.P No. 202/95 has defined the term "forest land", occurring in Section 2 of F.C Act, as it will not only include "forest" as understood in the dictionary sense, but also any area recorded as forest in the Government records irrespective of the ownership. India's National forest policy 1988 aims at maintaining 33 percent country's geographical area under forest and tree cover.

Forest cover means all lands, one hectare and more in area, with a tree canopy density of 10 percent or more irrespective of ownership and legal status. Such lands may not necessarily be a recorded forest area. It also includes orchards, bamboo and palm.

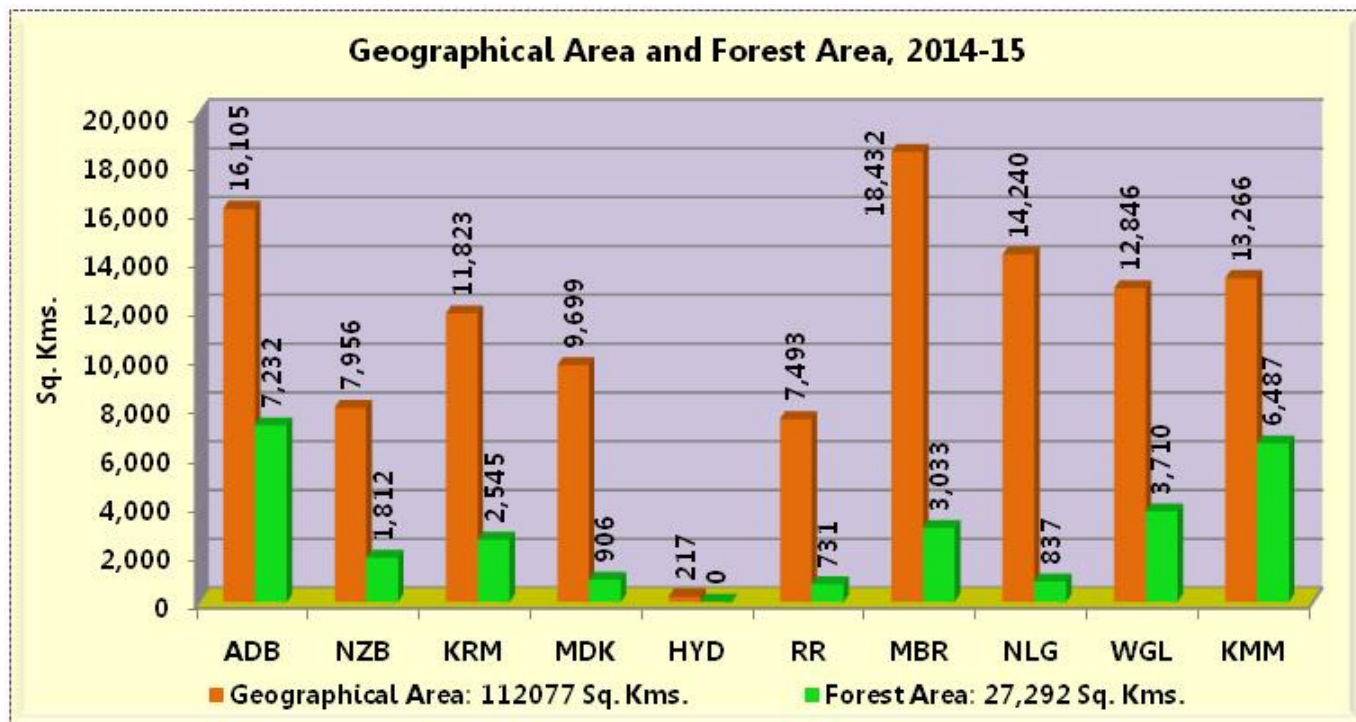

As far as Telangana is concerned, the Central Deccan Plateau dry deciduous forests eco-region covers much of the State, including Hyderabad. The characteristic vegetation is woodlands of *Hardwickiabinata* and *Albiziaamara*. Over 80% of the original forest cover has been cleared for agriculture, timber harvesting, or cattle grazing, but large blocks of forest can be found in Nagarjuna sagar-Srisailam Tiger Reserve and elsewhere. The more humid Eastern Highlands moist deciduous forests cover the Eastern Ghats in the eastern part of the state.

Forests cover is critical for living environment, as it influences the quality and quantity of air and water and plays a major role in supporting livelihood activities of rural poor, contributing to the economy of the State, mitigating the threat of Global warming besides conserving the fertile soil and vulnerable Wildlife.

Forestry and logging contribution to State GSDP at current prices is 0.5% and 3.13% in Agriculture and allied sector GVA for the year 2014-15. The core objective of forests is to enhance green cover by integrating it with livelihood.

The Geographical area of the Telangana State for the year 2014-15 is 1,12,077 sq. kms., and stood at 12th position in India, having 27,292 sq. kms., forest area which accounts for 24.35% of total geographical area, including social forestry. Out of that Area, Reserved Forest area is 19,696 sq. kms., Protected Forest forms 6,953 sq. kms., and the rest of 642 sq. kms., are unclassified. The total revenue realized during 2014-15 is Rs. 8,208 lakhs on sale of forest produce in the State.

The district wise geographical area and the corresponding forest area for the state of Telangana is depicted in the graph below.

Social Forestry

The Government has launched a massive people’s movement involving general public and farmers in a big way to increase tree cover outside reserve forests to improve and protect the environment and also to provide gainful employment. The main components of social

forestry are distribution of seedlings, raising of plantations in community lands, institutions and road side avenues.

The main species raised for free distribution and planting in public lands are Raavi, Marri, Neem, Kanuga, Badam, Neredu, Rela and others.

National Parks and Sanctuaries

There are three National Parks in the state viz., Kasu Brahmananda Reddy National Park in Hyderabad district, Mahavir Harina Vanasthali National Park and Mrugavani National Park in Ranga Reddy district.

Wild life Sanctuaries in the state include Eturunagaram Wildlife Sanctuary and Pakhal Wildlife Sanctuary in Warangal district, Kawal

Tiger Reserve and Pranahita Wildlife Sanctuary in Adilabad district, Kinnerasani Wildlife Sanctuary in Khammam district, Manjira Wildlife Sanctuary in Medak district, Nagarjuna Sagar-Srisailem Tiger Reserve in Nalgonda and Mahabubnagar districts, Pocharam Wildlife Sanctuary in Medak and Nizamabad districts, Shivaram Wildlife Sanctuary in Karimnagar district.

8. Industries

The State of Telangana is the twelfth largest State in India both in terms of land and population with abundant Road, Rail and Air Transport connectivity and providing wide range of opportunities for the entrepreneur willing to establish industries in the State. Availability of Land, water, manpower at affordable price with congenial atmosphere are attracting the new industries for establishment in the State.

The State is now home for several major manufacturing industries in bulk drugs, pharmaceuticals, agro-processing, cement & mineral-based industries, high precision engineering, textiles, leather, apparels, automobiles and auto components industry, spices, horticulture, poultry farming, bio-technology, defense equipment etc.

The Industry Sector is contributing around 25% to 30% to the Gross State Domestic Product with a direction of positive growth in the State.

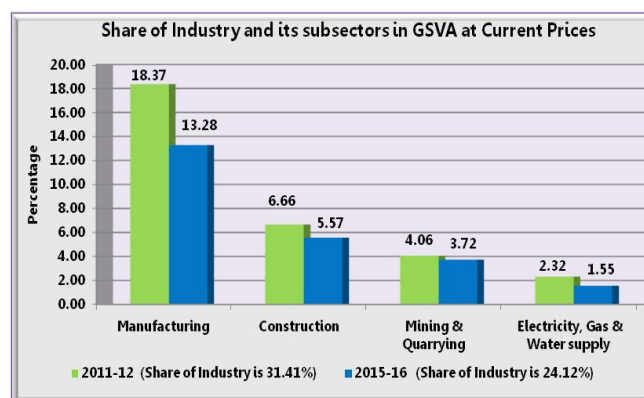

Annual Survey of Industries

The Annual Survey of Industries is the principal source of organized manufacturing statistics in India and in the state as well. It provides statistical information to assess and evaluate, objectively and realistically, the changes in the growth, composition and structure of organized manufacturing sector comprising activities related to manufacturing processes, repair services, gas and water supply and cold storage. The Survey is conducted annually under the statutory provisions of the Collection of Statistics Act, 2008 and Rules, 2011.

The Annual Survey of Industries covers all

The long-term average annual growth of industries comprising mining & quarrying, manufacturing, electricity, gas and water supply and construction, during the period between 2011-12 and 2015-16 is averaged at 6.3% as against GSDP growth of 11.7% in the State. The contribution of industry sector is showing similar trend in respect of share and growth as that of all India.

The Share of Industrial sector along with its sub sectors is depicted in the chart given below.

factories registered under sections 2m(i) and 2m(ii) of the Factory Act, 1948. The survey also covers Beedi and Cigar manufacturing establishments registered under Beedi and Cigar Workers (Condition of Employment) Act, 1966 employing 10 or more workers using power and 20 or more workers without using power.

The data pertaining to (i) factories registered under sections 2m (i) and 2m (ii) of the Factory Act, 1948 (ii) distribution and working of factories by districts industry wise, (iii) results of Annual Survey of Industries, 2012-13 are presented in this chapter.

Table	Content
8.1	Working of Factories Registered under Sections 2m(i) and 2m(ii) of the Factories Act

9. Mining

In general, mining is defined as extraction of valuable metals and minerals or other geological materials from the earth or from an ore body, lode, vein, seam, reef etc. Ores recovered by mining include metals, coal, oil, shale gemstones, limestone, dimension stone, rock salt potash, gravel and clay.

Mining is required to obtain any material that cannot be grown through agricultural processes, or created artificially in a laboratory or factory. Mining in a wider sense including extraction of any non-renewable resource such as petroleum, natural gas, or even water.

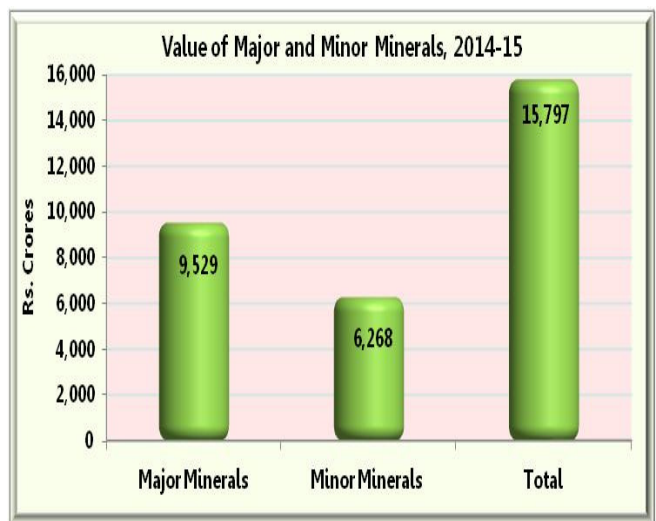

Mining operations usually create a negative environmental impact, both during the mining activity and after the mine has closed. Hence, most of the world's nations have passed regulations to decrease the impact. In this direction, the Government has evolved a comprehensive policy on mineral policy, which aims at optimum exploitation, scientific development, value addition, marketing and exports under private and joint sectors. The Government has kept open the mineral sector for private investment and likes to withdraw from areas in which their presence is no longer required and disinvest from these public sectors.

Telangana region has rich natural resources. About 20 per cent of the country's coal deposits are also found here. The Singareni Collieries Company Limited excavates coal from these

mines for industrial needs and also to cater to thermal power stations. Telangana is also rich in limestone deposits that cater to cement factories. Telangana has other mineral resources like bauxite and mica.

Minerals and mineral industries have significant macro links with the economy of a country. Mining activity which generates employment opportunities; is obviously an important source of tax revenue and contributes to State income thereby leading to economic growth.

Mining is one of the core sectors that drives growth in an economy. Not only does it contribute to GSDP, it also acts as a catalyst for the growth of other core industries like power, steel, cement, etc., which, in turn, are critical for the overall development of the economy. The value of major and minor minerals produced during the year 2014-15 is given in the following graph.

Production of principal minerals

The production of certain principal minerals during the year 2014-15 are 527.19 lakh tonnes of Coal, 218.97 lakh tonnes of Limestone, 37.56 lakh tonnes of Stowing Sand, 23.52 lakh tonnes of Laterite, 6.11 lakh tonnes of Feldspar, 5.53 lakh tonnes of Dolomite etc., in the State. The same is illustrated in the right side graphically.

10. Energy

Electric Energy is considered to be the most versatile and important source of power consumed by industry, commercial buildings, institutions and residents. In one sentence energy is required for all facets of our life and also a basic human need and is a critical infrastructure for socio economic development of a state or nation. It is supplied by generating stations. Traditional generating stations manufacture power in electrical generators. This

is accomplished by turning those generators with turbines that are in turned by a number of sources. In the case of fossil-fuel burning stations, energy sources such as coal, oil, natural gas (actually, any source of fuel that is carbon based) are used to boil water. That water is boiled into high pressure steam. This high pressure steam is what turns the turbines that turn the generator that in turn manufactures Electric Energy.

Service Connections

There are 122.98 lakh service connections are released with a connected load of 27,066 MW in the State during the year 2014-15, including both low tension and high tension. Category

wise number of service connections released and their consumption during 2014-15 is given in the following chart.

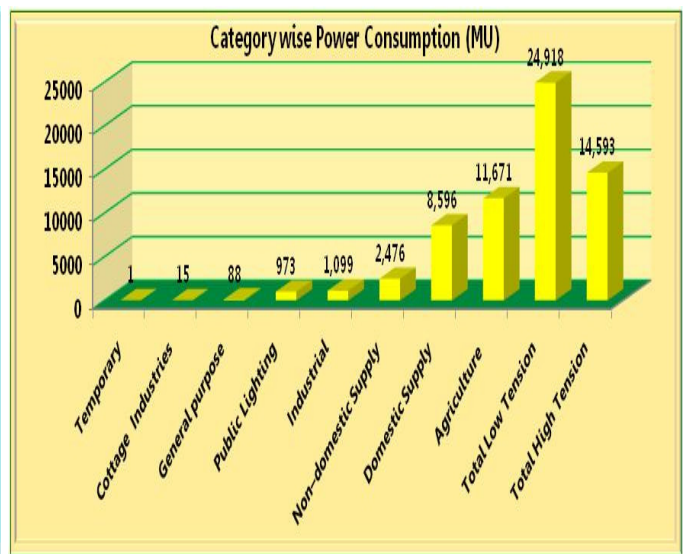

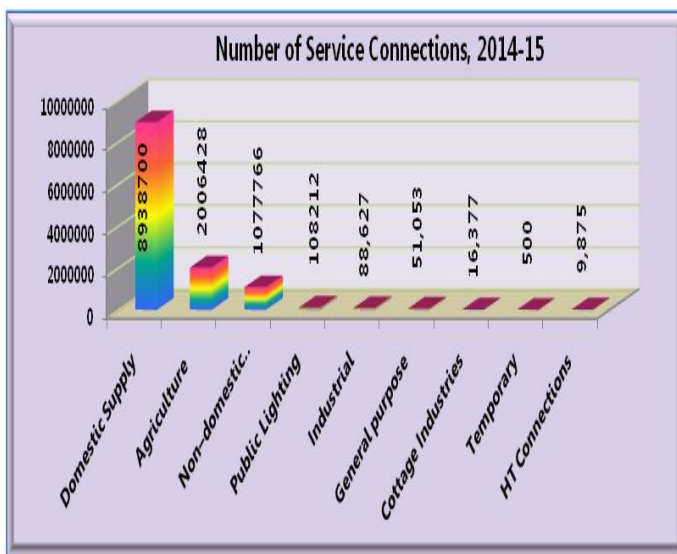

Table	Content
10.1	Installed Capacity and Generation of Electricity, 2013-14 and 2014-15
10.2	Growth of Transmission and Distribution Lines
10.3	Category wise Number of Services and Connected Load
10.4	Category wise Sale of Electricity by SPDCL and NPDCL, 2014-15 (P)
10.5	Category wise power Consumption, 2012-13 to 2014-15
10.6	Per Capita Consumption of Electricity, 2013-14 and 2014-15
10.7	Agricultural Services released at the end of 2014-15
10.8	Utilization of Non-Conventional Energy, 2013-14 and 2014-15
10.9	Category wise Number of Services and Connected Load, 2014-15

11. Transport and Communications

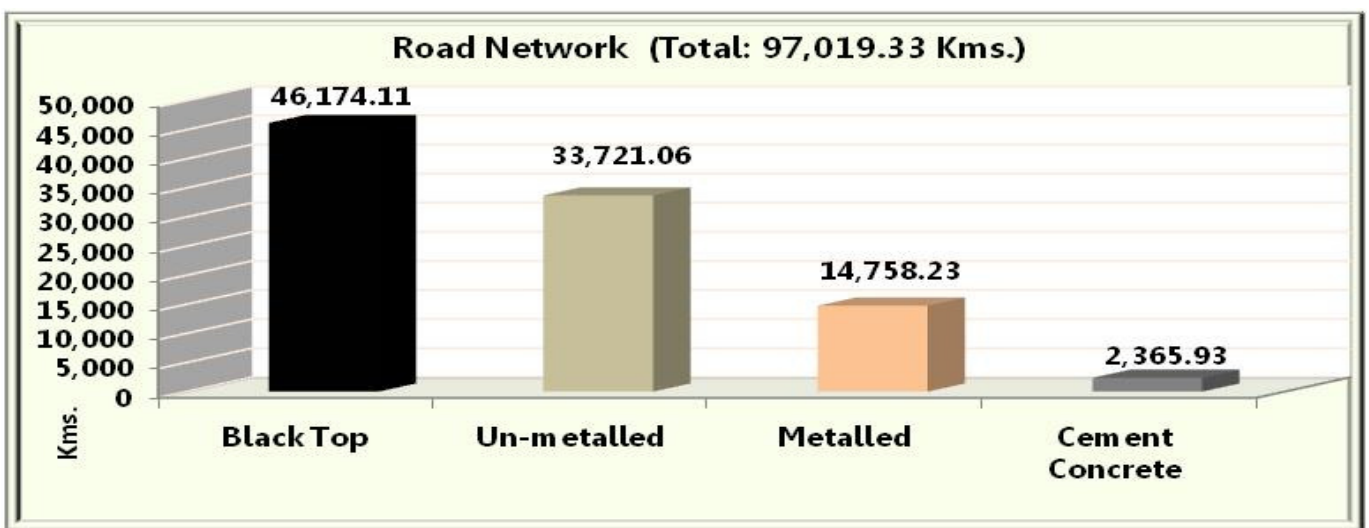

Roads

Availability of the transport road network plays an important role in the economic development and, therefore, the kilometer age of paved roads existing in a country is often used as an index to assess the extent of its development. The proper development of the transport road network not only reduces the cost of transportation, both in terms of money and time, but also helps in the integration of various parts of the State or Country. The transport road network contributes to the development of the State by bringing in direct benefits in the development of some sectors, such as agriculture, industry, minerals and commerce.

As such, a systematic development of Roads is one of the important pre-requisites for development and acceleration of economic growth. The importance of Road network is much more in a State like Telangana whose economy is from service sector and has chosen

manufacturing as its future, where the Rail connectivity is poor and where the rural areas are hardly covered by the Rail network.

Among the different modes of domestic transport systems, road transport carries more than 80% of the goods and passenger traffic. The network of roads, particularly from rural to urban facilitates speedy movement of goods and services and ensures higher growth trends, social integrity and wellbeing of the society. The productivity and efficiency of Road transport is directly linked with the availability and quality of Road network. Total Network constitute 97,019.33 kms., of road length in which 2,365.93 kms., cement concrete; 46,174.11 kms., Black-Top; 14,758.23 kms., metalled; and 33,721.66 kms., Un-metalled pertaining to National Highways, Roads & Buildings and Panchayat Raj departments respectively. Pictorial representation of the road network is as follows.

Statistical Year Book 2016

Railways: Indian Railways have a history and rich heritage spanning over 150 years. Indian Railways is a State owned public utility of Government of India under the Ministry of Railways. As a national common carrier transporting passenger and goods over vast network of 65,808 kms., route lengths and it has been playing a key role in country's as well as States' social and economic development. It is

Rail Network: As on 31.03.2015, the Indian railways are rendering its services by establishing

Transport: Road Transport plays a prominent role in the economic development of the State. The Transport Department plays a key role in issuing driving licenses, registration of motor vehicles, issue of transport permits, levy and collection of motor vehicle tax, enforcement of

comparatively cheap and affordable means of transportation for lakhs of passengers.

As a carrier of bulk freight, namely ores and minerals, iron and steel, Cement, mineral oils, food grains, fertilizers etc., and the importance of Indian Railways for development of Agriculture, Industry and for the benefit of common public is well recognized.

229 railway stations with a route kilometerage of 1676 in the State.

vehicle violations and acts as nodal agency for road safety. During the year 2014-15, the State has registry of more than 78.38 lakh vehicles, of which about 8.74 lakh are transport vehicles and rest about 69.64 lakh are non-transport vehicles.

12. Public Finance

Public finance is concerned with how a government raises money, how that money is spent and the effects of these activities on the economy and society. It is an act how Governments at all levels, State and Local, provide the public with desired services and how they secure the financial resources to pay for these services.

Public finance deals with the finances of

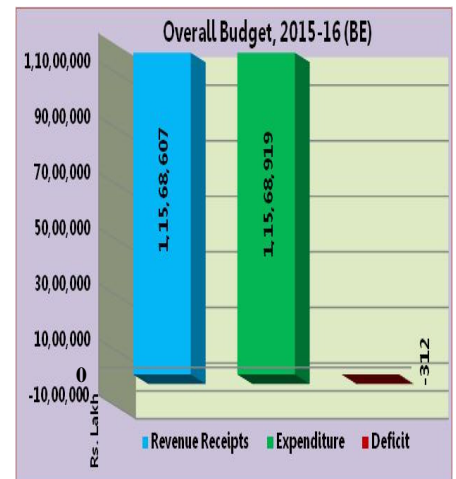

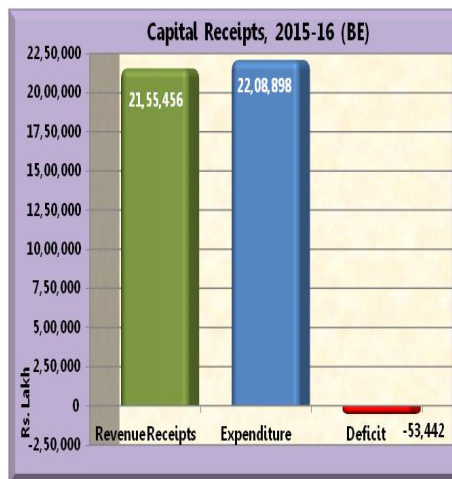

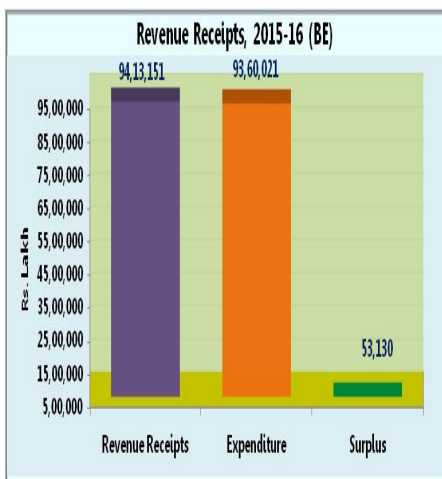

Budget Outlay

It is obvious that the budget of the Government has considerable impact on the economy of the State as a whole. Due to its sheer size, as reflected in high magnitude of receipts and expenditure of Government and various policy prescriptions articulated through the Budget, it can be easily considered to be the prime mover of the growth trajectory of the economy. The State Government, since it is formed very recently is ambitious to develop

public bodies, State or Local, for the performance of this functions. The performance of these functions leads to expenditure. The expenditure is incurred from funds raised through taxes, fees, fine, sale of goods & services, grants, loans etc. The different sources constitute the revenue of the public authorities. Public finance analyses the manner in which revenue is raised and how the expenditure is incurred upon different items etc.

the State in all respects in the light of aspirations of its citizens across the State. The Budget for 2015-16 was presented against the backdrop of the GSDP growth rate of the economy and the aspirations of the citizens on one hand and the challenges in front of the State Government to withstand to accelerate the development and welfare programmes on the other hand.

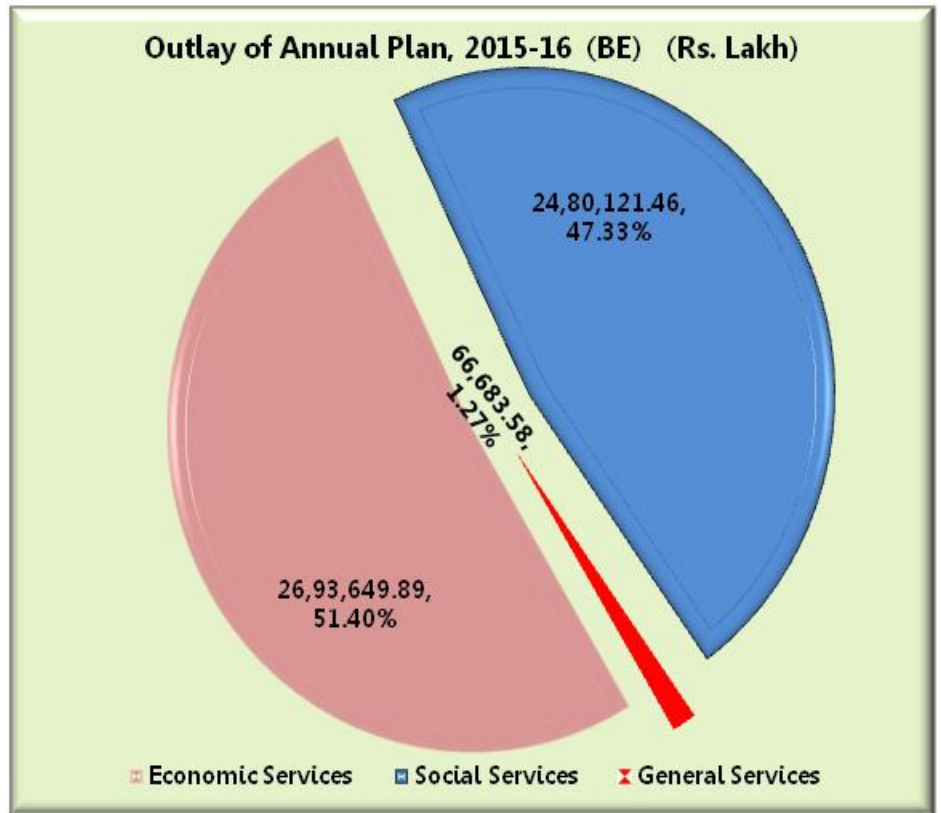

Overall budget provisions for the year 2015-16 are depicted in the following graphs.

Plan Outlay

An attempt is also made to present in brief the Plan Outlay of the Budget Estimates for the year 2015-16. According to the Budget Estimates for the year 2015-16 total provision under Plan is Rs. 52,40,454.93 lakh, of which Rs. 5,54,705.37 lakh (10.58%) is provided for Scheduled Castes Sub-Plan and Rs. 2,87,811.74 lakh (5.49%) for the Tribal Sub-Plan. The total outlay consists of 51.4% for Economic Services, 47.33% for Social Services and rest of 1.27% for General Services.

The category wise outlay of Annual Plan for the year 2015-16 (BE) is illustrated in the graph.

Collection of Sales Tax

The performance of the Commercial Tax Department during the period from 2011-12 to 2014-15 is depicted below.

The sales tax realized from Petrol, Liquor, Cigarettes, PSUs etc., pertains to combined State and is included in the total up to 2013-14. The sales tax collection for the year 2014-15 exclusively for the State of Telangana.

Apart from the State budget, attempt has been made to cover the revenue from excise and revenue departments.

Table	Content
12.1	Budget Estimates for the years 2014-15 and 2015-16.
12.2	Principal Heads of Revenue Receipts for the years 2014-15 and 2015-16.
12.3	Principal Heads of Expenditure (Revenue Account) for the years 2014-15 and 2015-16
12.4	Principal Heads of Capital Budget for the years 2014-15 and 2015-16
12.5	Outlay of Annual Plan, 2014-15 and 2015-16

13. State Economy

Gross State Domestic Product

State Income or Gross State Domestic Product (GSDP) is the most important indicator for measuring the economic development. It is a measure in monetary terms of the sum total of volume of all goods and services produced during a given period of time, usually one year, accounted without duplication, within the geographical boundaries of the State.

These estimates of economy, over a period of time, reveal the extent and direction of changes in the level of economic development and also the performance made by various

sectors towards the overall economy. The sectoral composition of State Domestic Product gives an idea of the relative position of different sectors in the economy over a period of time. It not only indicates the real structural changes taking place in the economy but also facilitates formulation of policies for overall economic development. When studied in relation to the total population of the State, they indicate the level of per capita net output of goods and services available or the relative standard of living of the people in the State. These are referred as estimates of Per Capita Income (PCI).

Adoption of new Base Year (2011-12)

The Government of Telangana has revised its GSDP estimates by adopting the new base year 2011-12, on par with the Central Statistics Office, Ministry of Statistics and Programme Implementation (MOSPI). The reason for changing the base year periodically is to take into account the structural changes that have been taking place in the economy over the years, adoption of latest methodologies, new data sets and latest census and survey results and to depict a true picture of the economy through macro aggregates like Gross State Domestic Product (GSDP), Capital Formation etc. The estimates of these macro-economic aggregates are prepared at the prices of selected year known as base year for examining the

performance of the economy in real terms. The estimates at the prevailing prices of the current year are termed as "at current prices", while those prepared at base year prices are termed as "at constant prices". The comparison of the estimates at constant prices, which means "in real terms", over the years gives the measure of real growth.

As per new series, industry-wise estimates will be presented as Gross Value Added (GVA) at basic prices, while "GSDP at market prices" will henceforth be referred to as GSDP. Estimates of GVA at factor cost (earlier called GSDP at factor cost) can be compiled by using the estimates of GVA at basic prices duly adjusting the production taxes less subsidies.

Statistical Year Book 2016

Here it is important to note that the basic price is a price that includes the Production taxes minus production subsidies, whereas market price is a price, which includes the Product taxes

minus product subsidies. In nut shell, basic price means total expenditure incurred for production of goods or services whereas market price is the price available for consumer.

Distinct features of the new series

One of the distinct features of the new series is compilation of GSDP estimates at market prices instead of factor cost and GVA at basic prices.

Another feature is usage of the results of latest censuses, surveys, studies, Ministry of Corporate Affairs data etc.

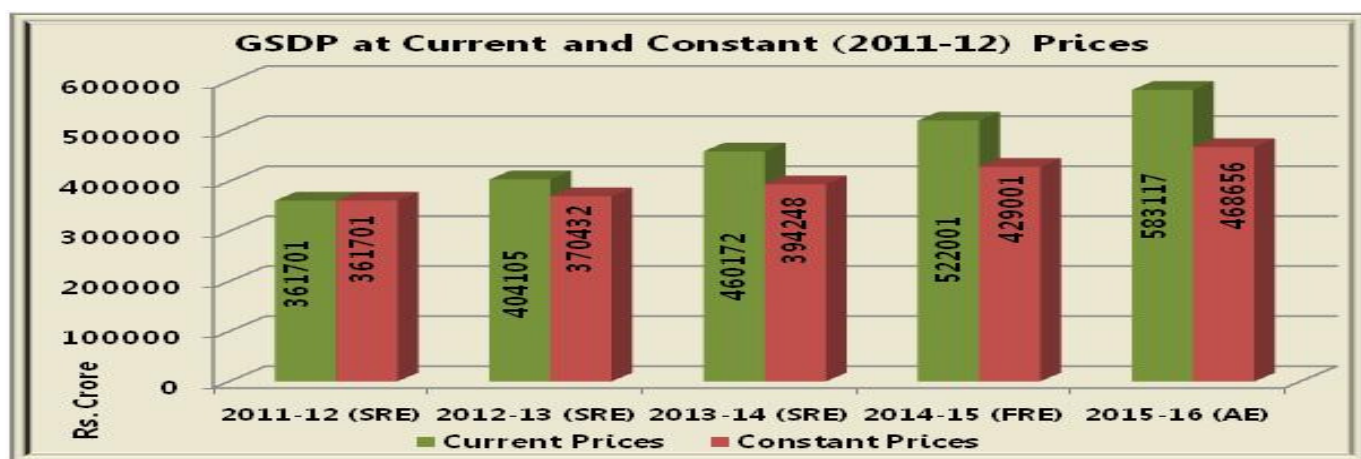

Gross State Domestic Product (GSDP) during 2015-16

The Government of Telangana has released the GSDP estimates for the year 2015-16 (Advance Estimates). According to this, the anticipated GSDP at constant (2011-12) prices for the year 2015-16 (AE) is Rs. 4,68,656 crore as against Rs. 4,29,001 crore for 2014-15 (FRE), registering growth of 9.2 percent.

The GSDP at current prices for the year 2015-16 (AE) is anticipated at Rs. 5,83,117 crore as against Rs. 5,22,001 crore for 2014-15 (FRE), exhibiting a growth rate of 11.7 per cent. The GSDP at current and constant prices is given in the following chart.

GSDP at Current and Constant (2011-12) Prices				
Year	Current Prices		Constant (2011-12) Prices	
	GSDP (Rs. crore)	Growth (%)	GSDP (Rs. crore)	Growth (%)
2011-12 (SRE)	3,61,701	-	3,61,701	-
2012-13 (SRE)	4,04,105	11.7	3,70,432	2.4
2013-14 (SRE)	4,60,172	13.9	3,94,248	6.4
2014-15 (FRE)	5,22,001	13.4	4,29,001	8.8
2015-16 (AE)	5,83,117	11.7	4,68,656	9.2

Note: FRE: First Revised Estimates; SRE: Second Revised Estimates; TRE: Third Revised Estimates; and AE: Advance Estimates

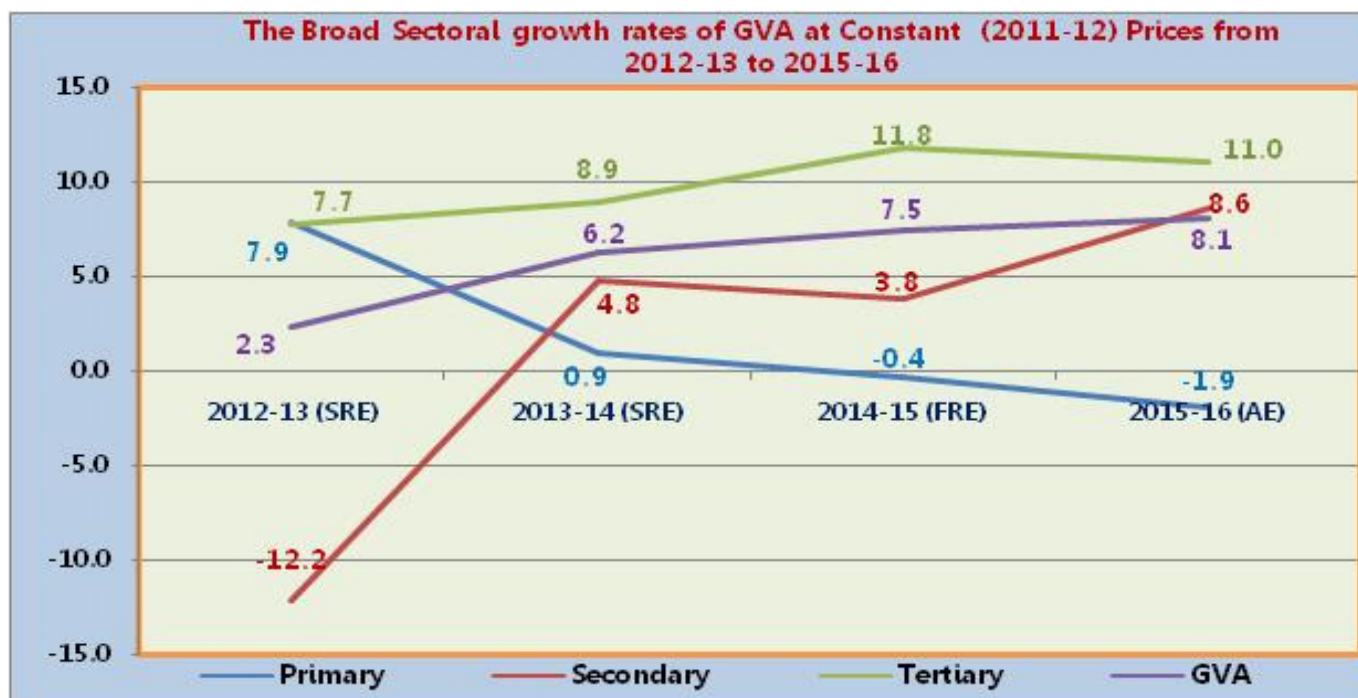

Sectoral Growth Trends

The growth rate of GSDP denotes the performance of economy of the State and changes in the magnitude and composition of the State economy, over time. The structure of the economy is classified into three broad sectors, i.e., primary, secondary and tertiary. The primary sector consists sub-sector of crops; livestock; forestry & logging; fisheries; and mining & quarrying.

The secondary sector consists manufacturing; electricity, gas, water supply &

other utility services; and construction sub-sectors. The tertiary sector consists sub-sectors of trade & repair services; hotels & restaurants; transport, including railways, road, water, air & services incidental to transport; storages; communications & services relating to broadcasting; financial services; real estate, ownership of dwellings & professional services; public administration; and other services.

The Contribution of each of the sectors will be measured in terms of GVA at basic prices.

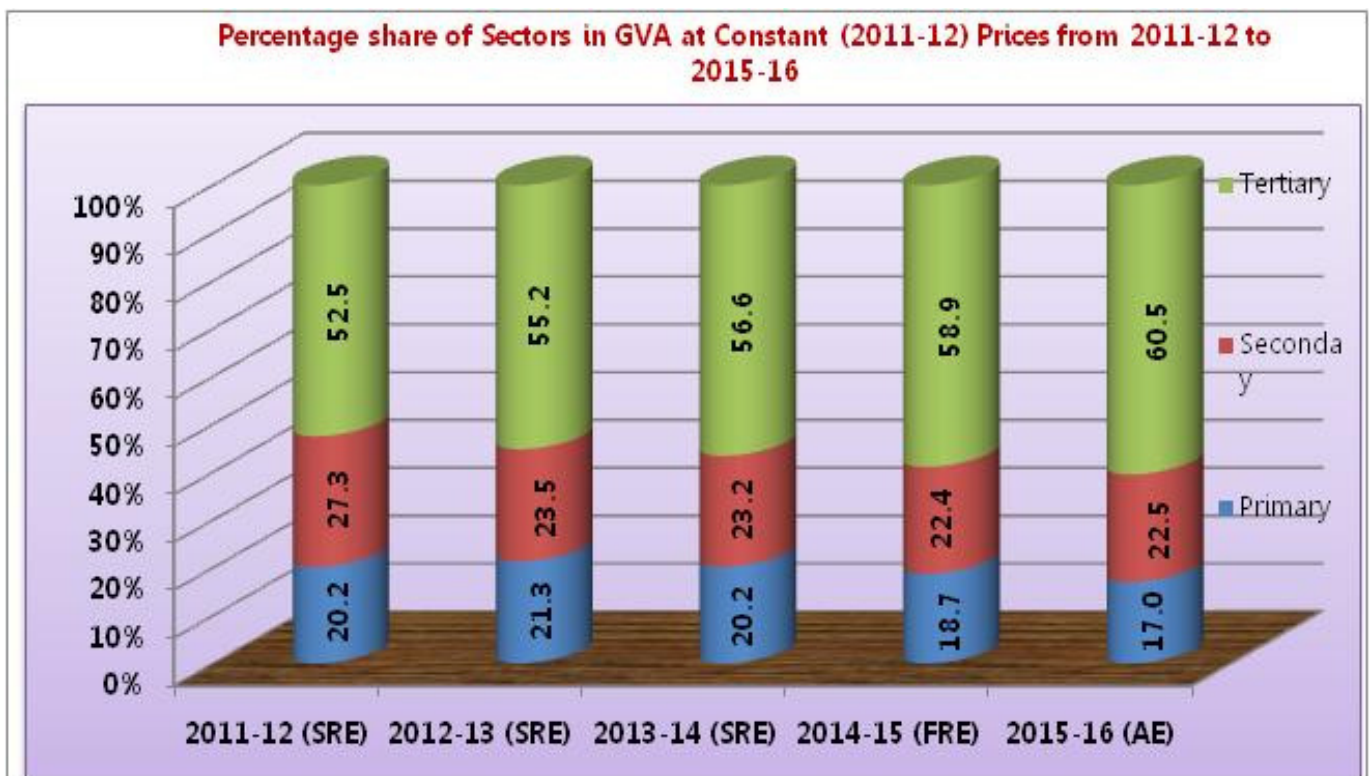

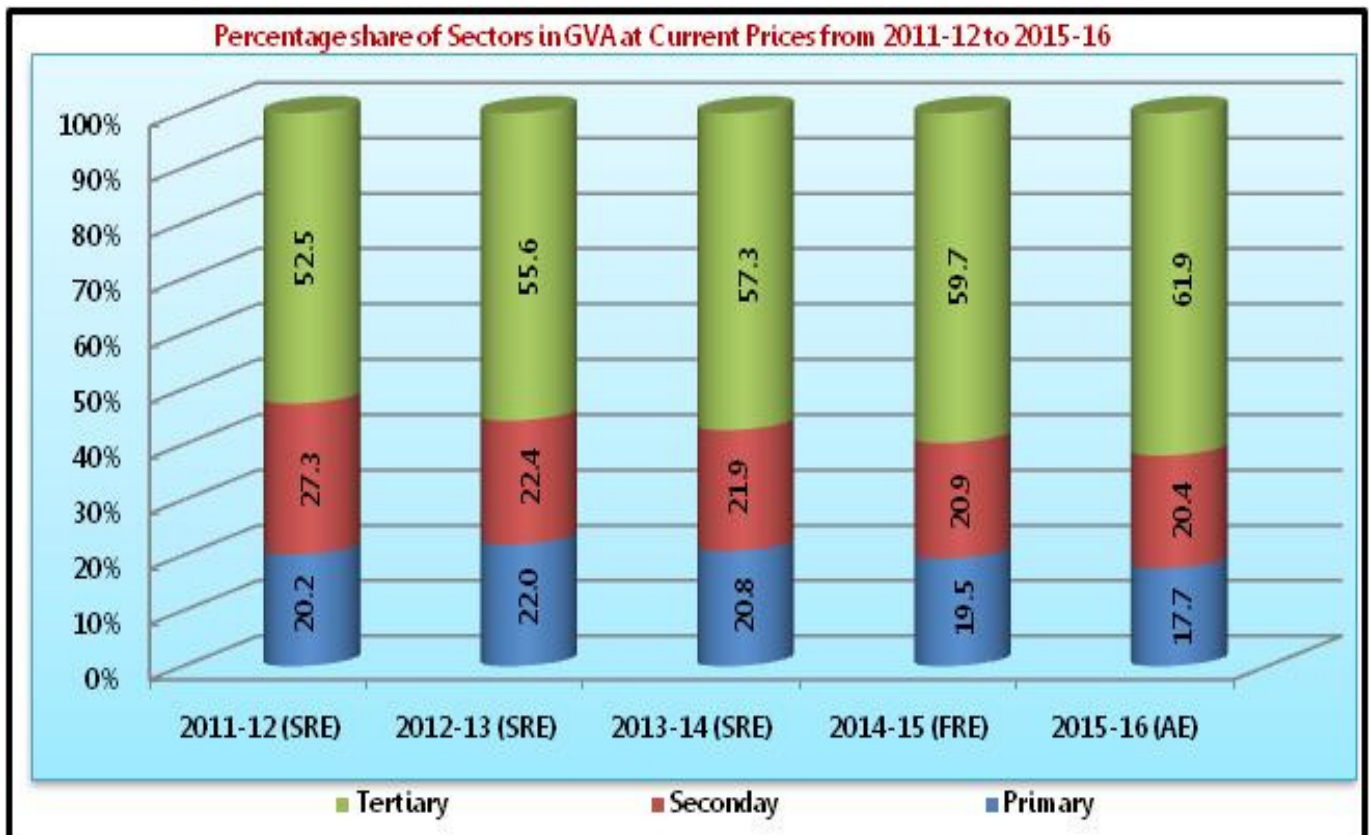

Structural Composition of the Economy

The composition of GSDP is changing significantly over the years. The State has witnessed a decelerating share of primary sector in overall GSDP. The crops sector experienced a decelerating trend in 2014-15 and 2015-16, still it continues to remain a priority sector

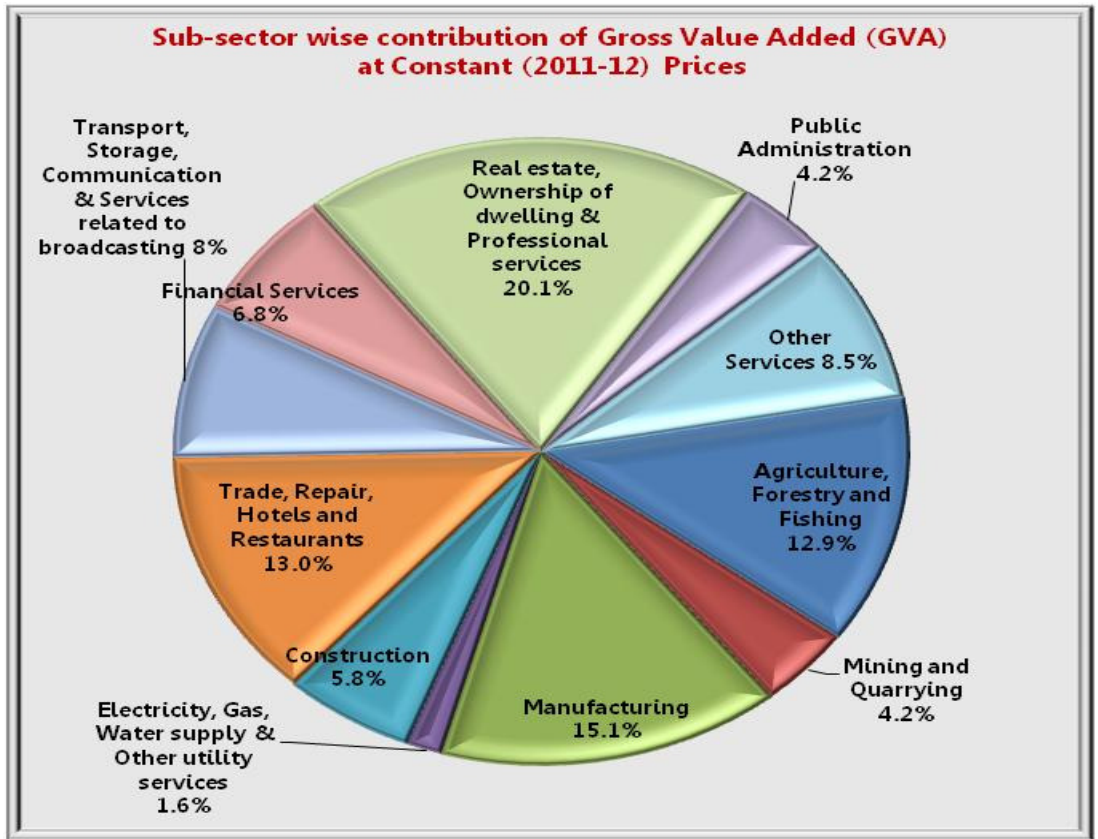

for the State because of its high potential of employment generation, food security, inclusiveness and sustainability of growth as 55.7 percent of the workforce draws its subsistence fully or partially from agriculture in the State.

Statistical Year Book 2016

The pictorial representation in terms of percentage contribution of various sectors in the total GVA at current and constant (2011-12) prices are presented below:

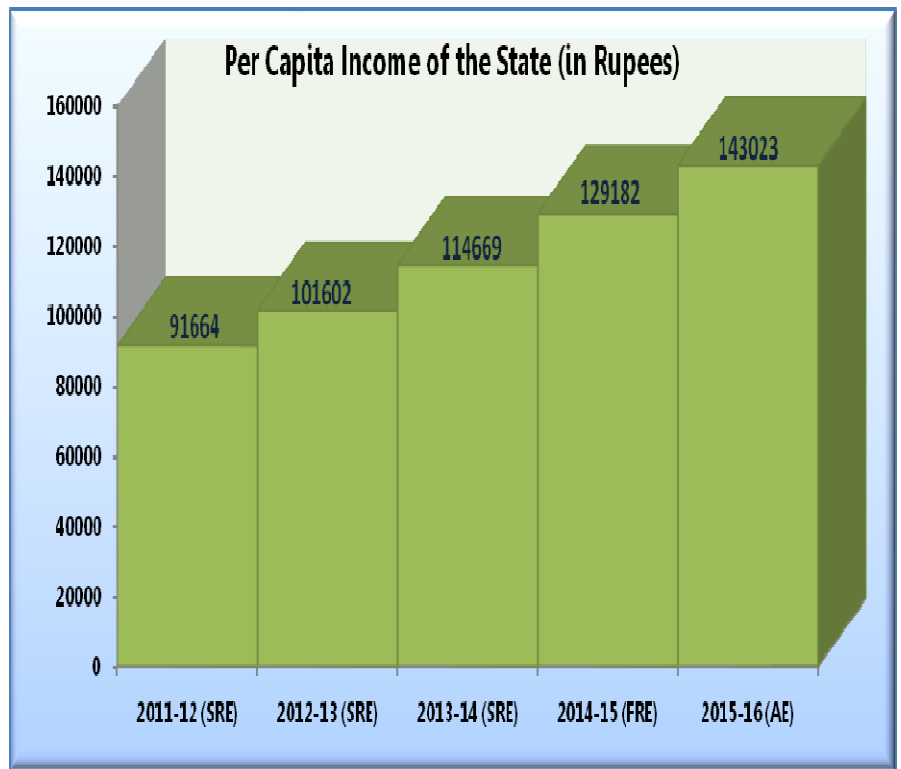

The sub-sectoral contribution of Gross Value Added (GVA) for the year 2015-16 (AE) at Constant (2011-12) Prices is depicted in the graphs shown here.

Per Capita Income

Per capita income is the mean income from all the sources computed for every man, woman, and child in a geographic area, usually for a year. It is arrived at by dividing the total income originated in a geographical area by the total population (mid-year) in that area. The Per Capita Income gives a better idea about the level of development in a State, which is a proxy indicator for the standard of living of the people.

The Per Capita Income at current prices is depicted in the chart.

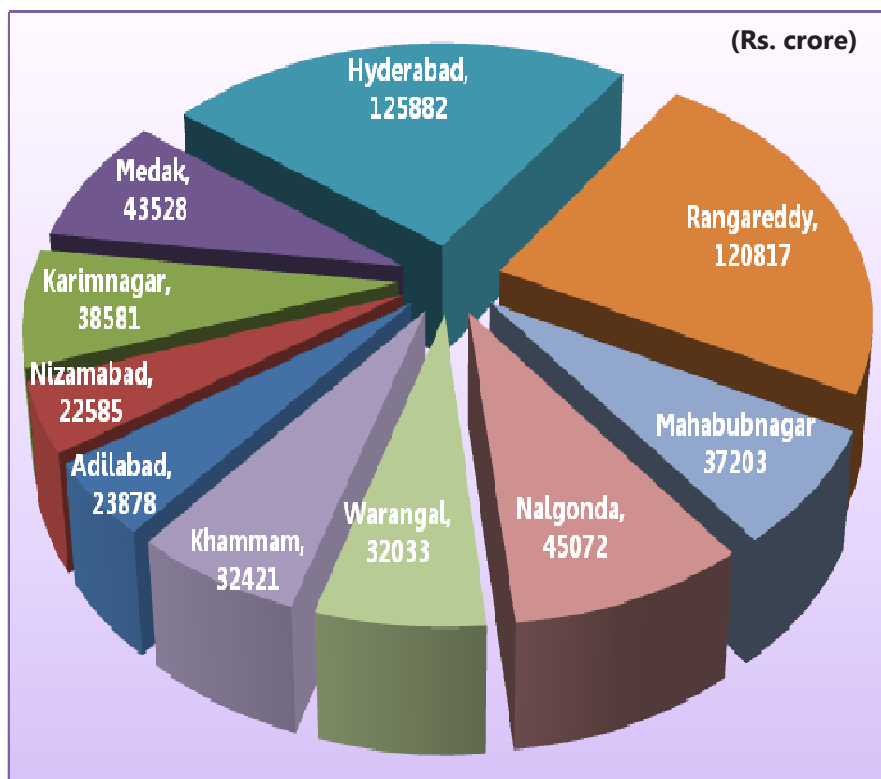

Gross District Domestic Product

The estimates of Gross District Domestic Product (GDDP) reveal the size of the district economy and also to assess how the district is progressing over a period of time. As per the GDDP estimates for the year 2014-15 at current prices, Hyderabad occupies the highest position followed by Rangareddy and Medak districts. These three districts account for about 45 per cent of State GDP. On the other hand, the rest of seven districts together account for about 55 per cent of the State GDP. The GDDP of the three major districts grew at the average rate of more than 10 percent from 2004-05 to 2013-14. Whereas, Adilabad district's GDDP grew at an average growth of 5.9 percent

which is lowest among all the districts during the period.

District wise GDDP at Current Prices, 2014-15

District wise Per Capita Income at Current Prices, 2014-15

14. Joint Stock Companies

A company is an incorporated association of persons formed usually for the pursuit of some commercial purpose. Any establishment formed and registered under the Section 3(1) of Indian Companies Act, 2013 is known as company or a company which is formed and registered under any of the previous company laws is also termed as company.

A Joint Stock Company is a voluntary association of individuals for profit, having its capital divided into transferable shares, the ownership of which is the condition of membership. The individuals or entities in possession of shares are called shareholders.

A Joint Stock Company is a type of

corporation or partnership involving two or more individuals that own shares of stock which enables the companies to perform their activities according to the predetermined plans, without intervention of the company.

As on 20-11-2015, there are 52 companies in public, 5,729 in private and 172 are one person companies (OPC), totaling to 5,953 companies working in the State with a paid-up capital of Rs. 729.05 crore, Rs. 911.31 crore and Rs. 2.07 crore, totaling to Rs.1,642.43 crore, respectively. Apart from discharging their legitimate functions, they are providing employment to thousands of unemployed and contributing their share in development of the economy of the State.

15. Banking

A Bank is a financial institution which accepts money from the public for the purpose of lending or investment repayable on demand or otherwise withdrawal by cheques, drafts or order or otherwise. They are not only the store houses of wealth but also the reservoirs of resources necessary for economic development.

“An institution, such as the banking system, which touches and should touch the lives of millions, has necessarily to be inspired by a larger social purpose and has to sub serve national priorities and objectives.”

There are 4,648 Scheduled Commercial bank branches in the State as on 30-09-2015, including

nationalized banks, foreign banks, regional rural banks and private banks. On an average one bank branch is available for every eight thousand population in the State. Their credit-deposit ratio is 103.29 percent.

An attempt is made to showcase the functioning of District Central Co-operative Banks. There are 249 branches in the State with share capital of Rs. 47,007.50 Lakh. The long term and short term loans disbursed for various purpose from the year 2010-11 to 2014-15 is also shown. All scheduled Commercial Bank branches functioning during 2015 is illustrated below.

16. Prices

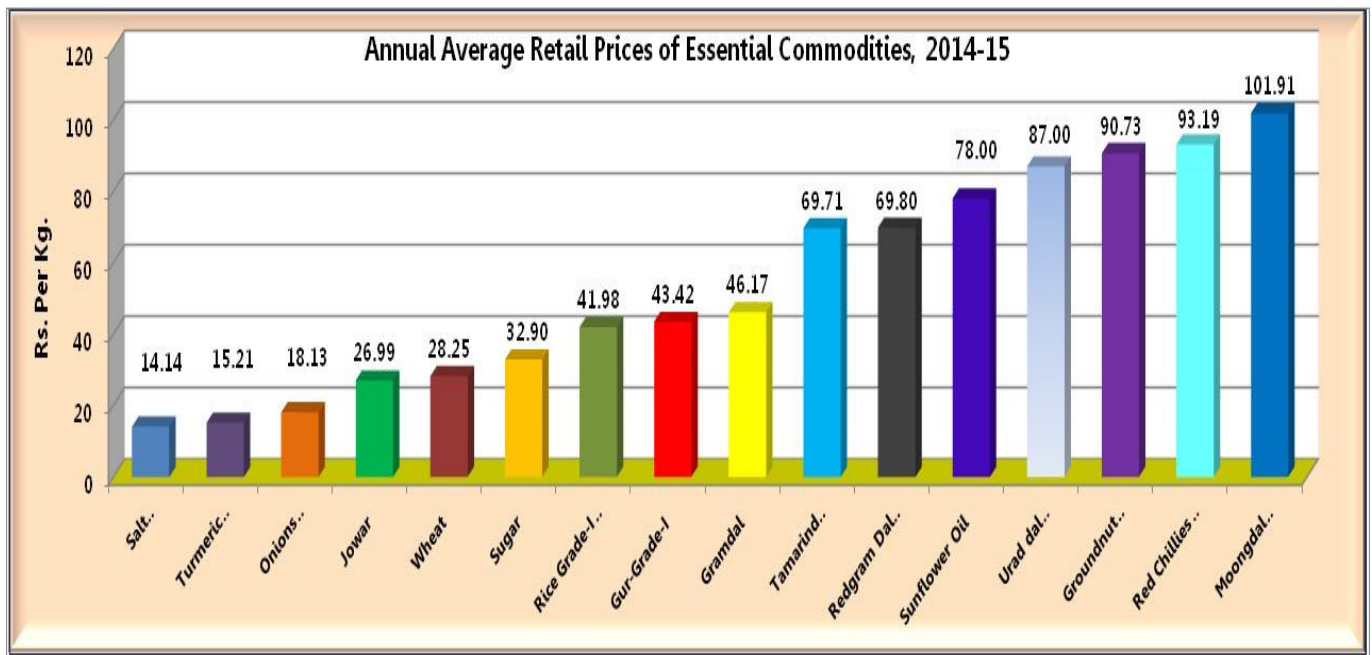

Generally price is the quantity of payment or compensation given by one party to another in return for goods or services, usually in units of some form of currency. Prices affect all sections of society as such price statistics are regarded as the most important economic data reflecting changes in the economy of a country. The prices influence both the quantum of production and

the pattern of consumption. However, changes in the prices of different commodities affect different sections of society differently. As such, it becomes necessary to compile different types of Price Statistics as each has its own importance and impact in the economy. There are different prices which have their impact on different sections of people and economy as a whole.

Retail Prices

Retail Price is the price at which the ultimate consumer pays for relatively small transactions. These prices are collected on daily and weekly basis from all Revenue Divisional headquarters with an objective to supply these retail prices regularly to the departments

concerned have to initiate suitable measures for achieving the desired stability in prices. Annual average retail prices of certain essential commodities in the State during the year 2014-15 are given in the following chart.

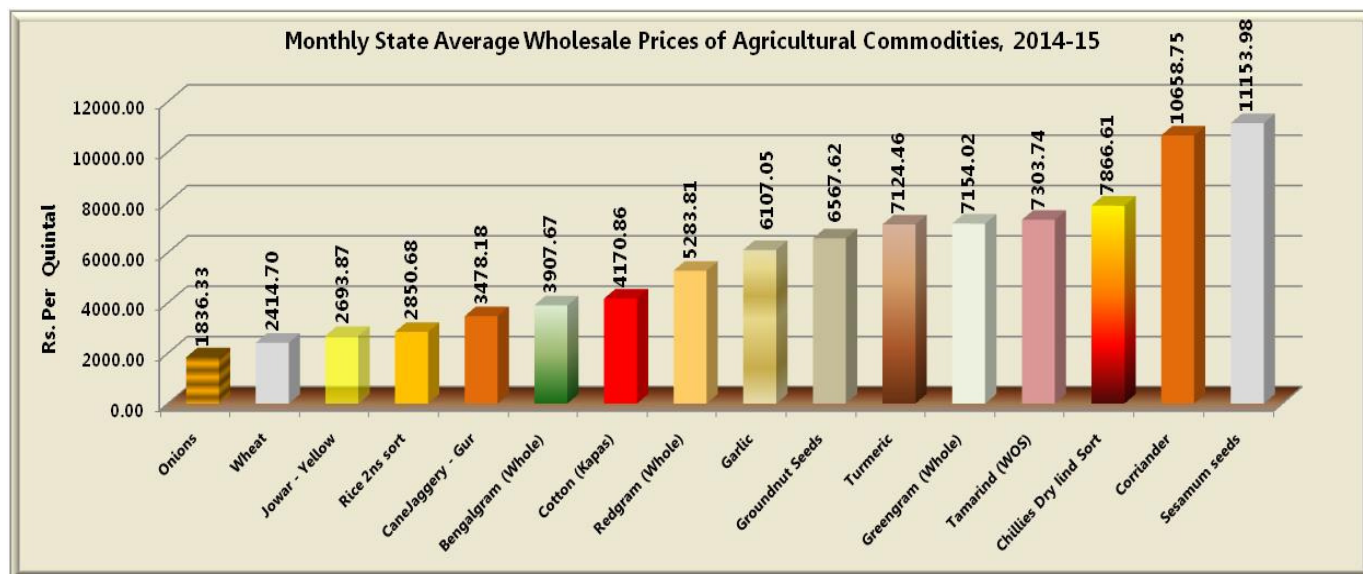

Wholesale Prices of Agricultural Commodities

The wholesale price is the cost of a goods sold by a wholesaler. The wholesaler will usually charge a price somewhat higher than he or she paid to the producer, and the retailer who purchases the goods from the wholesaler will increase the price again when they sell the good

in their store. Goods available on wholesale have a lower price than goods at retail do.

The monthly average whole prices of certain selected agricultural commodities during the year 2014-15 are shown in the chart given below.

Consumer Price Index Numbers for Industrial Workers (CPI-IW)

Consumer Price Index numbers is a comprehensive measure used for estimation of price changes in a basket of goods and services representative of consumption expenditure in an economy, over a period of time. It is one of the

most important statistics for an economy and is generally based on the weighted average of the prices of commodities. It gives an idea of the cost of living of people for which these index numbers are compiled.

17. Labour and Employment

It is felt that narrating the meaning of Labour, Employment and Wages is relevant to understand the contents contained in this chapter. Labour includes both physical and mental work undertaken for some monetary reward. In this way, workers working in factories, services of doctors, advocates, ministers, officers, teachers etc., are all included in labour.

According to S.E. Thomas, "Labour connotes all human efforts of body or mind which are undertaken in the expectation of reward."

Any physical or mental work which is not undertaken for getting income, but simply to attain pleasure or happiness, is not labour.

Employment can be expressed in number of people working or in total working hours. A mixed measure is the number of hours divided by standard working hours to give a full-time equivalence to jobs.

Wages are defined to include all remuneration in monetary terms and also payable more or less regularly in each pay period to workers as compensation for work done during the accounting year.

Many industrial units or companies are established in the State and are provide labour and employment to different sections of people. They are from different sections, Religions, social groups etc., and their way of behaving, doing things will obviously be not uniform.

Hence there is every possibility to arise disputes among the employees it self, some times between the management and employees cause industrial disputes. The State has witnessed numerous instances of industrial disputes

in many of the industrial units.

In this direction, the government has enacted many legislations aimed at social and economic security of the labour to minimize the industrial disputes and also to ensure industrial peace. The information such as occurrence of industrial disputes, man days lost, industrial accidents and compensation paid are being collected and published periodically to facilitate the government and policy makers to evolve corrective mechanism as and when such disputes are taken place.

This chapter presents data in respect of category wise employment in Coal Mines, Registration and Placements through Employment Exchanges and also particulars of Industrial disputes and man-days lost, employment in shops and commercial establishments etc., for better understanding.

There are, on an average 58,837 number of daily workers deployed in coal mines of Singareni Collieries Company Limited, during 2015. The Colliery wise average number of workers employed are given in following graph and subsequent tables.

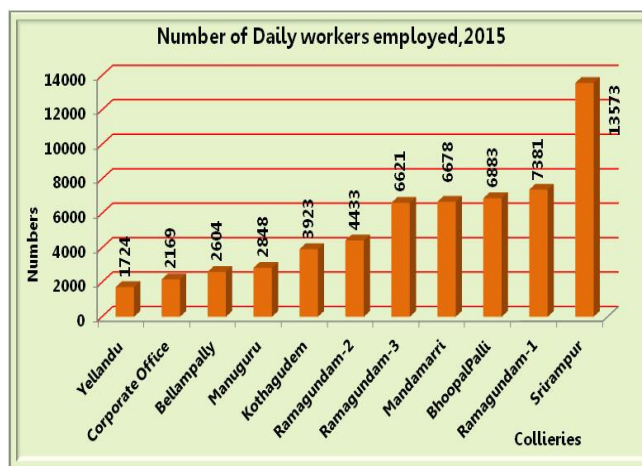

Table	Content
17.1	Average number of daily workers in Coal Mines, 2008 to 2015
17.2	Average number of daily workers employed in Coal Mines by categories of Employment, 2015
17.3	Number of Applicants on Live Register classified by broad divisions for the year 2013 & 2014
17.4	Category wise Registrations, Notifications, Placements and on Live Register as on 31.12.2014
17.5	Registrations and Placements through Employment Exchanges, 2014
17.6	Registrations and Placements by Employment Exchanges in respect of special categories of applicants, 2014
17.7	Occurrence of Industrial Accidents and Compensation paid by Industries, 2015
17.8	Employers using Exchanges, vacancies Notified and Placements, 2008 to 2014
17.9	Industrial Disputes and Man-days lost in Major Industries, 2008 to 2015
17.10	Employment in Shops and Commercial Establishments, 2014-15
17.11	Average Daily Earnings of Labour at different Coal Fields, 2009 to 2014

18. Social Security

Social Security is both a concept as well as a system. It represents basically a system of protection of individuals who are in need of such protection by the State as an agent of the society. Such protection is relevant in contingencies which are beyond the control of the individual members of the Society. State as an agent of the society has an important mandate to harmonize such differences through a protective cover to the poor, the weak, the deprived, the distraught and the disadvantaged.

The concept of social security is now generally understood as meaning protection provided by the State to its citizens through a series of public measures against the economic and social distress that otherwise is caused by the stoppage or substantial reduction of earnings resulting from sickness, maternity, employment injury, occupational diseases, unemployment, invalidity, old age and death.

The Directive Principles of the constitution of India direct that "the State shall strive to promote a social order in which justice, social, economic, and political, shall inform all the institutions of the national life" and, in particular, shall ensure "that the citizens, men and women equally, have the right to an adequate means of livelihood.

In this endeavor, the State Government has made promoting peoples' welfare as the central agenda. Accordingly, a number of initiatives have been taken in this direction. Some of the achievements made under various programmes such as distribution of Government land for Agricultural purposes, house sites to weaker sections, construction of houses for weaker sections, functioning public distribution system, functioning of anganwadies, disbursement of social security pensions etc., during the year 2014-15 are exhibited in this chapter.

Table	Content
18.1	Distribution of Government Lands for Agriculture Purposes, 2013-14
18.2	Distribution of House Sites to Weaker Sections, 2013-14 and 2014-15
18.3	Physical Status of Houses completed under Weaker Section Housing Programme
18.4	Houses completed under Weaker Section Housing Programme, 2014-15
18.5(a)	Public Distribution System - Average number of cards in use, 2014-15 (April to Dec., 2014)
18.5(b)	Public Distribution System - Average number of cards in use, 2014-15 (January to March, 2015)
18.6	Public Distribution System - Allotment of Rice and Sugar, 2014-15
18.7	Coverage of Rural Water Supply Schemes and Individual Sanitary Latrines, 2014-15
18.8	Number of Fair Price Shops and functioning of Rythu Bazars, 2015
18.9	Functioning of Self Help Groups and Bank Linkages, 2014-15
18.10	Workers and wage earnings under M.G. National Rural Employment Guarantee Scheme, 2014-15
18.11	Disbursement (Physical) of Social Security Pensions by Area and Scheme, 2014-15
18.12	Functioning of Anganwadi Centers, 2014-15
18.13	Company wise Number of LPG connections from 2011-12 to 2014-15

19. Education

Education in its general sense is a form of learning in which the knowledge, skills, values, beliefs and habits of a group of people are transferred from one generation to the next through story telling, discussion, teaching, training, or research. Education may also include informal transmission of such information from one human being to another through a set of instructions in the process of making them educated about the society, surroundings, environment etc.

Telangana state has multiple institutes of higher education universities along with numerous primary and secondary schools. The

School Education

The Government of India with an objective to provide universal education to all of its citizens has enacted the Right of Children to Free and Compulsory Education Act, 2009 to provide free and Compulsory Education to all the children in the age group of 6 to 14 years, in the country. In order to achieve this objective, need exists for ensuring access to education, gender parity in school enrolment, overall enrolment and retention and the quality of education being imparted.

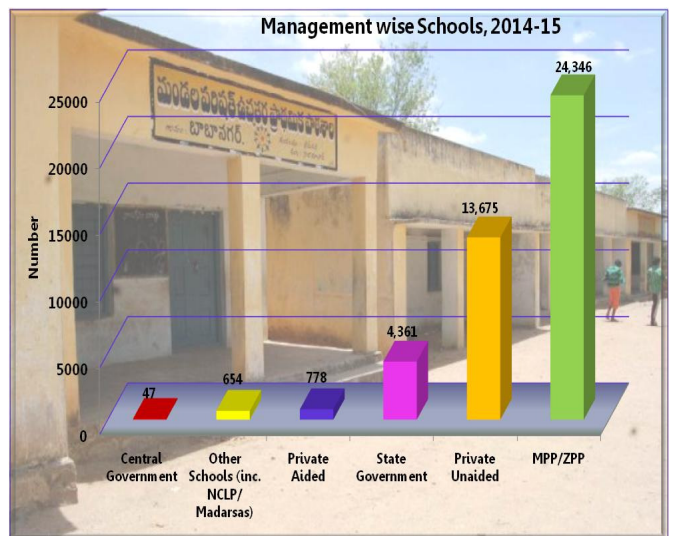

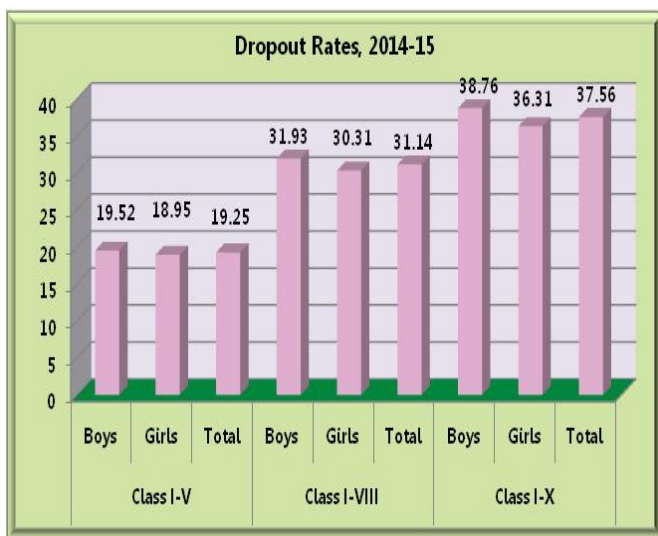

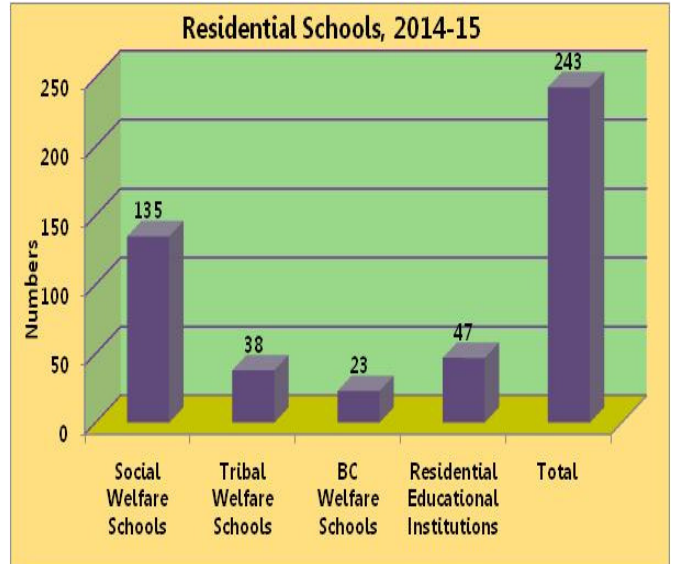

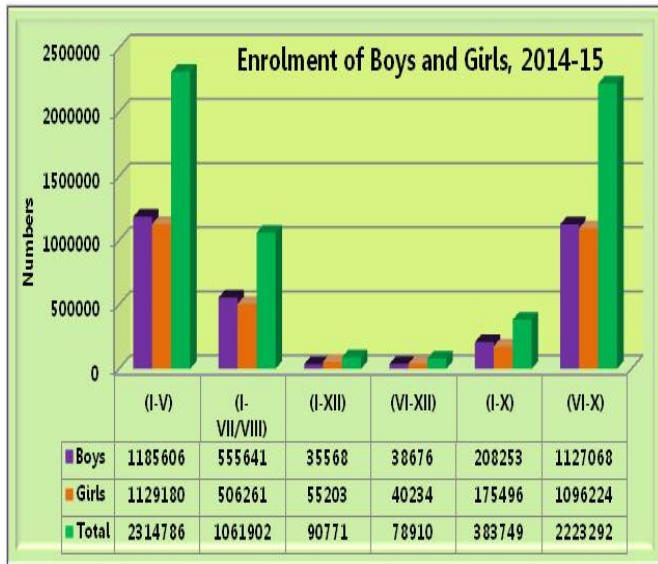

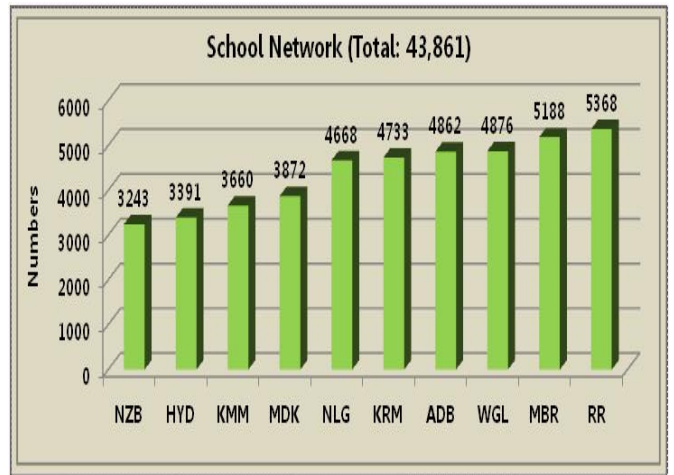

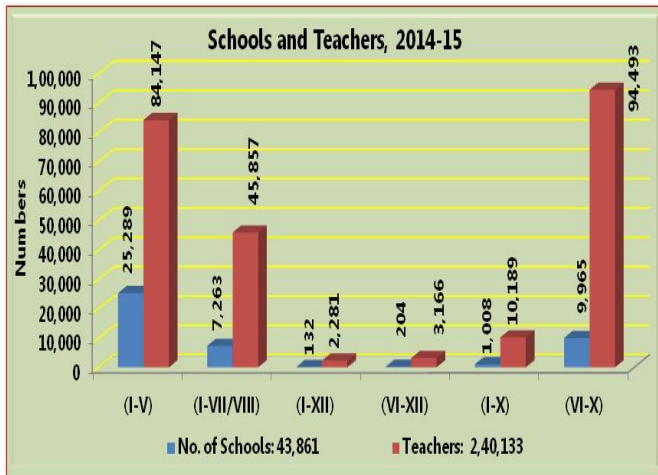

In the light of Right of Children to Free and Compulsory Education Act, 2009, the Government has taken various initiatives for universalization of elementary education like

state is home to a number of institutes, which impart higher education. The higher education includes many colleges, universities and research institutes providing professional education in the fields of arts, humanities, science, engineering, law, medicine, pharmacy, business, and veterinary sciences, with undergraduate and post-graduation. These institutions are producing lakhs of professional scholars, every year who in turn give direction to the state in transforming its objectives into reality. There is a saying that today's children are tomorrow's citizens and the future of the state would be as directed by them.

strengthening of existing schools, opening of new primary schools, and other type of educational facilities in remote and un-served habitations, in the State.

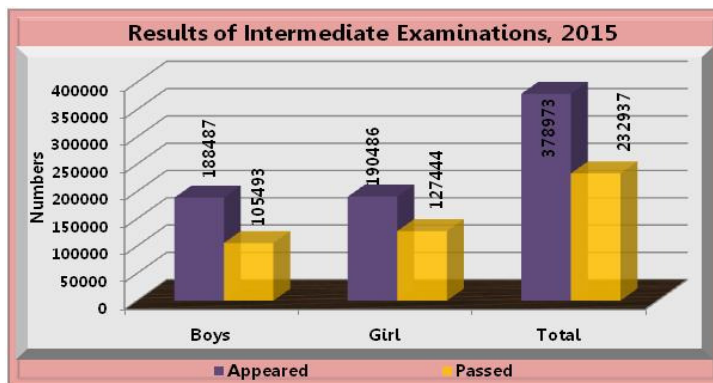

There are 43,861 schools functioning under various managements during 2014-15 in the State and imparting quality education to pupil. Total students enrolled during the year are 61.53 lakhs, consisting of 31.51 lakhs boys and 30.02 lakhs girls. The teachers deployed are 2.40 lakh and the teacher-pupil ratio is 26. Category wise number of schools functioning, students enrolled and teachers employed are shown in the charts given here under.

Statistical Year Book 2016

Junior Colleges

All put together, there are 2,493 Junior Colleges functioning during the year 2014-15 in the State. The number of students enrolled are 3,42,754 consisting of 1,69,088 boys and 1,73,666 girls and a total of 23,114 lecturers are imparting education in these colleges. The results of Intermediate Examinations held during 2015 are presented in the graph.

Degree Colleges

There are 195 Degree Colleges functioning in the State with an enrolment of 1,41,250 students, consisting of 71,618 men and 69,632 women.

There are 3,877 Lecturers imparting education in these colleges, out of them 1,988 are men and 1,889 are women lecturers.

Engineering Colleges

Engineering colleges are primarily established to produce engineers and technicians with technical knowledge and adequate skills with an objective to meet the technical skills requirements as per the needs of the industry.

There are about 354 engineering colleges in the State with a total intake of 96,648 students. Apart from engineering, there are 250 polytechnic colleges functioning with a strength of 61,790 students during 2014-15.

Welfare Hostels

Government has been taking numerous welfare measures for importing quality education to all those children whose parents are not in a position to offer education to their children by establishing residential schools and hostels, in the State.

functioning in the State during 2014-15.

There are 780 hostels with a strength of 61,526 students for scheduled castes, 203 hostels with a strength of 43,361 students and 283 ashram schools with a strength of 84,558 students for scheduled tribes and 737 hostels with a strength of 58,428 students for backward classes welfare

Apart from these institutions, several other institutions are also functioning in the fields of arts, humanities, medical, pharmacy, business administration, computer applications and special schools for deaf and dumb, mentally challenged, blind etc., and imparting quality education to the students in the light of achieving the universal education in the State.

An attempt is made in this chapter to provide information on the functions various educational institutions in the subsequent tables.

20. Economic Census

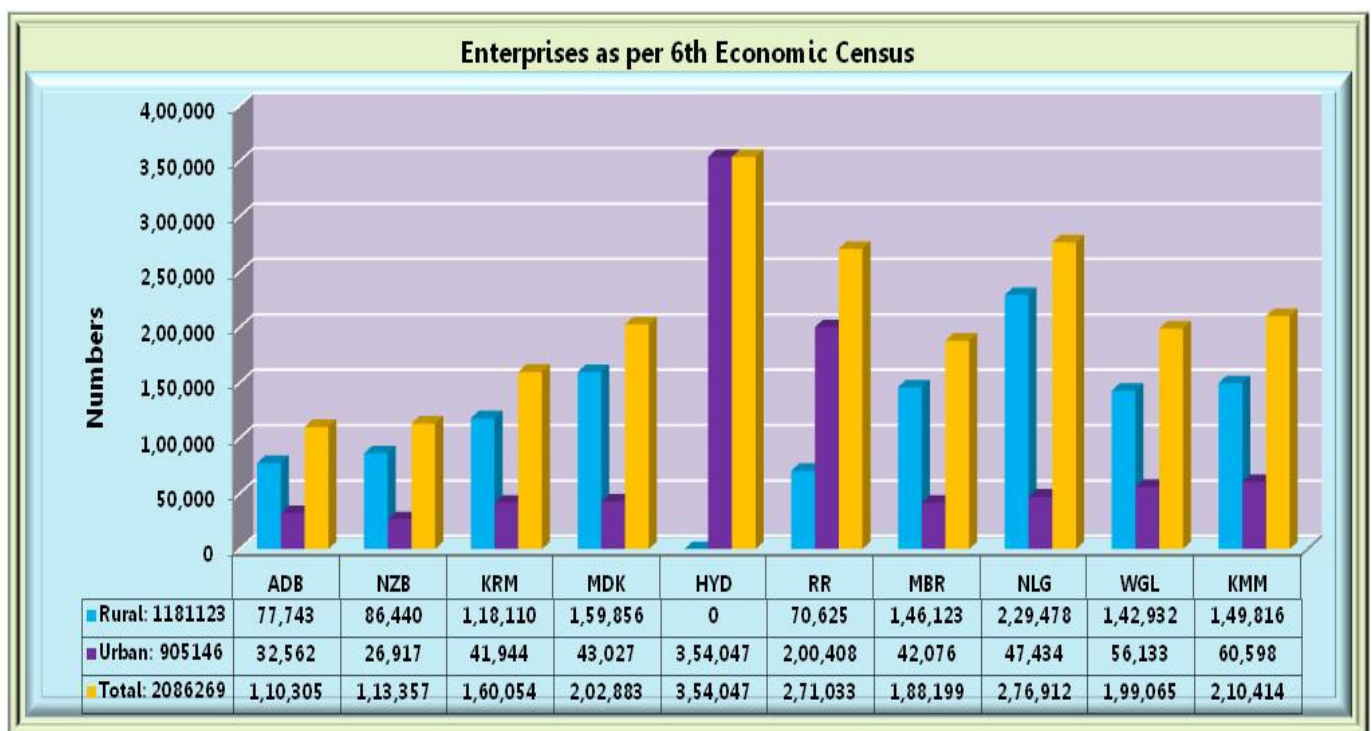

Economic Census is the process of complete enumeration of all the establishments or enterprises engaged in economic activity within the geographical boundaries of the country/state/district. Any activity resulting in production of goods and services that adds value to the national product is considered an economic activity. Such activities include production of all

goods and services for the market (i.e. for pay or profit) including those of government Services, and production of primary commodities for own consumption and own account production of fixed assets, except those involved in crop production and plantation, public administration, defense and compulsory social security.

Enterprises as per 6th Economic Census

In this chapter, efforts are made to present, the provisional figures in brief, the total number of enterprises existing and the number of persons working in the enterprises, district-wise according to the 6th Economic Census

commenced in the month of February, 2013 and completed in the month of July, 2013 along with comparison of some of the details with that of 5th Economic Census held during 2005, in the State.

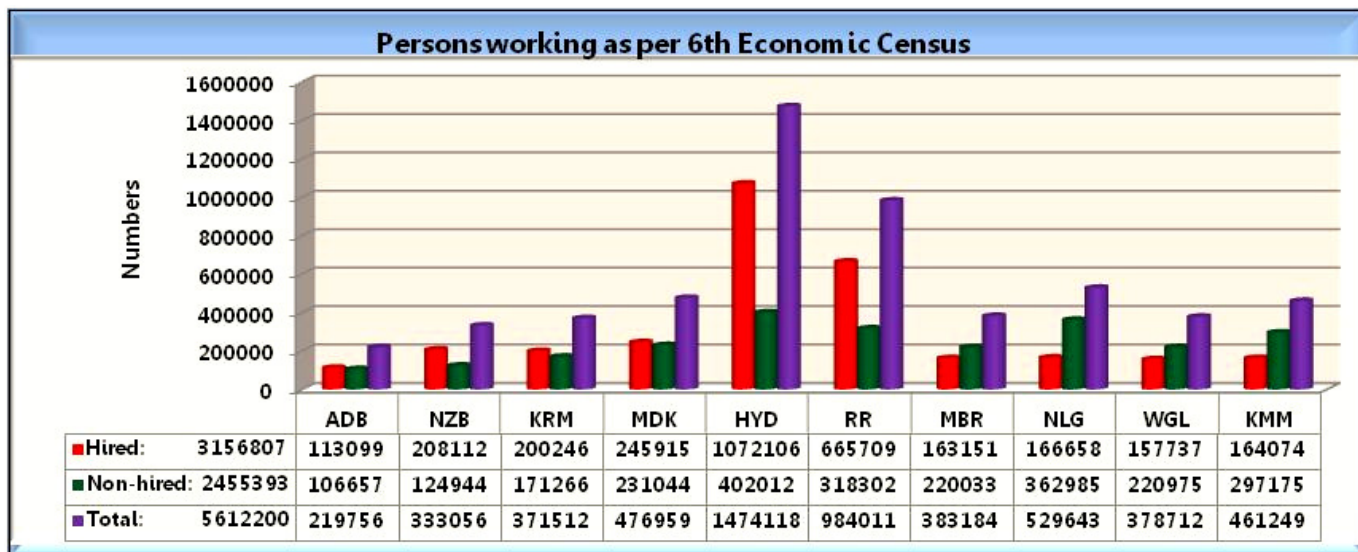

Table	Content
20.1	Number of Enterprises as per 6 th Economic Census (Rural)
20.2	Number of Enterprises as per 6 th Economic Census (Urban)
20.3	Number of Enterprises as per 6 th Economic Census (Combined)
20.4	Number of Persons working in Enterprises as per 6 th Economic Census (Rural)
20.5	Number of Persons working in Enterprises as per 6 th Economic Census (Urban)
20.6	Number of Persons working in Enterprises as per 6 th Economic Census (Combined)
20.7	Enterprises according to Fifth (2005) and Sixth (2013) Economic Census
20.8	Persons Working in Enterprises according to Fifth (2005) and Sixth (2013) Economic Census

Statistical Year Book 2016

21. Local Bodies

Local Bodies are the institutions of Local Self Government and play a pivotal role in local governance and development. The Local bodies in state are broadly classified into two categories viz., Rural Local Bodies and Urban Local Bodies. The Local bodies constituted for local Planning, development and administration in rural areas are referred as Rural Local Bodies (Gram Panchayats, Mandal Praja Parishads and Zilla Praja Parishads) and those institutions constituted for local Planning, development and administration in Urban areas are referred as Urban Local Bodies (Municipal Corporations, Municipalities, Nagar Panchayats).

A Gram Panchayat is the Grass root level statutory institution of Rural Self Government in the **Panchayat Raj** system at the village or small town level, and has a **Sarpanch** as its elected head. The word Panchayat comes from Sanskrit *panch* meaning five. This is because such councils originally are consisted of five members. Gram Panchayat is the Grass root level statutory institution of Rural Self Government.

Mandal Praja Parishad is a local government body at the Mandal level in the state. The Mandal Praja Parishad is the link between the Gram Panchayat and the Zilla Praja Parishad. A Mandal Praja Parishad is

constituted for a revenue Mandal, as such, both the Mandal Praja Parishads and the revenue Mandals are coterminous comprising of group of villages in the State.

Zilla Praja Parishad is a local government body at the district level in the state. It looks after the administration of the rural area of the district and its office is located at the district headquarters. The Hindi word Parishad means Council and Zilla Parishad translates to District Council

In India, a Nagar Palika or Municipality or **Nagar Nigam** is an urban local body that administers a city of population 100,000 or more. However, there are exceptions to that, as previously nagar palikas were constituted in urban centers with population over 20,000 so all the urban bodies which were previously classified as Nagar palika were reclassified as Nagar palika even if their population was under 100,000. Under the Panchayat Raj system, it interacts directly with the state government, though it is administratively part of the district. Generally, smaller district cities and bigger towns have a Nagar palika. Nagar palikas are also a form of local self-government, entrusted with some duties and responsibilities, as enshrined and guided upon by the Constitutional (74th Amendment) Act, 1992.

Municipal Corporations

Municipal Corporations are urban local government that works for the development of a city, which has a population of more than one million. The growing population and urbanization in various cities of India necessitated a local

governing body that can work for providing necessary community services like health care, educational institution, housing, transport etc. by collecting property tax and fixed grant from the State Government.

Statistical Year Book 2016

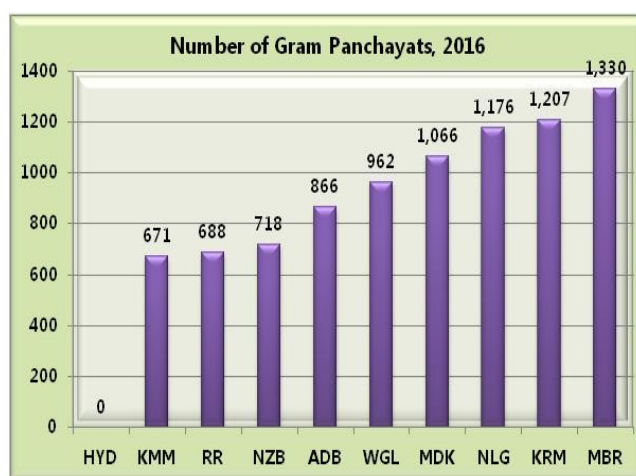

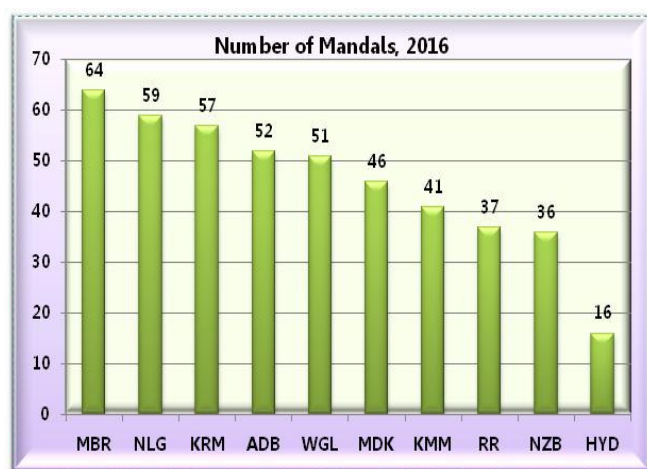

Major functions to be performed by the local bodies are i. providing public health, sanitation and drainage services; ii. Maintaining village roads, wells, tanks etc., and burial and cremation grounds; iii. Building

shelters for travelers; iv. Construction, repair & maintenance of public places and buildings for public use; v. Laying out new roads, footpaths and its maintenance etc.

Functioning of Local Bodies and Mandals

There are 8,695 Gram Panchayats, 438 Mandal Praja Parishads, 25 Nagar Panchayats, 37 Municipalities and 6 Municipal Corporations, the local self governments, functioning in the State

as on 31st March, 2016. Pictorial representation of number of mandals and Gram Panchayats existing is shown in the and are shown in the following graph.

The Local Bodies are getting grants from the central and state budgets apart from generating their own resources and utilize them in the process of discharging their legitimate functions as stated above. Efforts have been made in this

chapter to explain the Income and Expenditure of Greater Hyderabad Municipal Corporation, Municipalities, Zilla Praja Parishads, Mandal Praja Parishads and Gram Panchayats in the State.

Table	Content
21.1	Income of Greater Hyderabad Municipal Corporation (GHMC), 2011-12 and 2012-13
21.2	Expenditure of Greater Hyderabad Municipal Corporation (GHMC), 2011-12 and 2012-13
21.3	Income and Expenditure of Municipalities at a glance, 2014-15
21.4	Income and Expenditure of Zilla Praja Parishads (ZPPs) 2013-14 and 2014-15
21.5	Income and Expenditure of Mandal Praja Parishads (MPPs), 2013-14 and 2014-15
21.6	Income and Expenditure of Gram Panchayats (GPs), 2013-14 and 2014-15

22. Judicial

The judiciary (also known as the judicial system) is the system of courts that interprets and applies the law in the name of the state. The judiciary also provides a mechanism for the resolution of disputes. Under the doctrine of the separation of powers, the judiciary generally does not make law (that is, in a plenary fashion, which is the responsibility of the legislature) or enforce law (which is the responsibility of the executive), but rather interprets law and applies it to the facts of each case. This branch of the state is often tasked with ensuring equal justice under law. It usually consists of a court of final appeal (called the "Supreme court" or "Constitutional court"), together with lower courts.

In many jurisdictions the judicial branch has the power to change laws through the process of judicial review. Courts with judicial review power may annul the laws and rules of the state when it finds them incompatible with a higher

norm, such as primary legislation, the provisions of the constitution or international law. Judges constitute a critical force for interpretation and implementation of a constitution, thus defects in common law countries creating the body of constitutional law.

In 1980s, the Supreme Court of India for almost a decade had been encouraging public interest litigation on behalf of the poor and oppressed by using a very broad interpretation of several articles of the Indian Constitution.

The term "judiciary" is also used to refer collectively to the personnel, such as judges, magistrates and other adjudicators, who form the core of a judiciary, as well as the staff who keep the system run smoothly.

Status of petitions in the state at the beginning of the year, institutions and disposals during the year and pending at the end of the year for 2014-15.

An attempt is made to present the number of cases pending at the beginning of the year, institutions and disposals during the year and pending at the end of the year for 2014-15 and working of judicial officials in this chapter.

Statistical Year Book 2016

23. Police and Crime

Crime Statistics is an important and essential input for assessing quality of life and the human rights situation in the society. Crime Statistics broadly reflects the status of operations of Criminal Justice System in a Country. Crime Statistics includes data on offences, breaches of the law offenders, those who commit offences (victims), those who are offended against etc. In the state Crime statistics are generated on the basis of crime records maintained by different law enforcing agencies like the Police, the Judiciary at different level of administrative/legal jurisdiction. These statistics are normally readily available and are generally used for assessing how crime is being

Apart from incidence of cognizable crimes, attempt has been made to present information on Police, Juvenile Statistics Category of Prisons, Lock-up report of the Prisons, Age-wise classification of Prisoners, Type of Offence and

dealt with by law enforcement agencies. However, these statistics being based on those cases which are generally reported to the law enforcement agencies and recorded through all stages of actions on the cases reported.

Remand Period, Particulars of Education, Employment and Marital Status of Prisoners and production of Industrial, Agricultural and Dairy & Poultry production in Jails etc., in the subsequent tables.

Table	Content

24. Tourism

It is evident that from nomadic existence to present day economies, people have always been on the move. Purpose may be anything, but people are moving on a pilgrimage, documenting history of locations, visiting relatives, visiting places for medical treatment, leisure or business, or those travelling distances, fired merely by the zest to travel, people have crisscrossed the globe integrating cultures and systems.

The tourism in the present day, has become increasingly significant and organized (industry) as more and more people with increased disposable income, higher propensity to spend and changing social mores trot cities and countries due to variety of reasons. Along with the evolution of tourism, its definition has also formalized over the years and in the present parlance a visitor is considered to be a traveler taking a trip to a main destination outside their usual environment, for less than a year, for any main purpose (business, leisure or other personal purpose) other than to be employed by a resident entity in the country or place visited.

A visitor (domestic, inbound or outbound) is classified as a tourist (or overnight visitor),

if his/her trip includes an overnight stay, or as a same-day visitor (or excursionist) otherwise. A traveler on the other hand is someone who moves between different geographic locations, for any purpose and any duration. The visitor is a particular type of traveler and consequently tourism is a subset of travel. However, "Tourism" refers to all activities of visitors, including both "tourists (over-night visitors)" and "same-day visitors".

In the context of Telangana, its culture combines cultural customs from Persian traditions embedded during Moghuls, Qutub Shahis and Nizams rule with prominent and predominantly south Indian traditions and customs. The State has a rich tradition in classical music. It has a rich painting and folk arts such as Burrakatha, Shadow Puppet Show, and Perini Shiva Tandavam, Gusadi Dance, Kolatam etc. Telangana has a variety of tourist attractions including historical places, monuments, forts, waterfalls, forests and temples. Lakhs of tourists, including foreign tourists visit these tourist attractions every year and carrying their experiences, customs and traditions of Indian heritage, sweet memories to their native states or countries.

Rural Tourism

Telangana has a tremendous potential for Rural Tourism and is a fascinating canvas of myriad colors, cultures and customs. Handicrafts

represent, perhaps, the oldest traditions of living culture and Telangana has some of the richest sources of handicrafts.

Wildlife and Eco Tourism

Telangana has rich forests and wild life sanctuaries, which provide scope for eco-tourism and wildlife tourism that cover Alisagar Deer park in Nizamabad, the Eturunagaram Sanctuary and Pakhal Wildlife Sanctuary in Warangal, Kawal Wildlife Sanctuary, Jannaram, Pranahitha Wildlife

Sanctuary and Sivaram Wildlife Sanctuary in Adilabad, Mahavir Harina Vanasthali National Park, Vanasthalipuram and Nehru Zoological park in Hyderabad, Manjira Bird Sanctuary in Sangareddy, and Pocharam Sanctuary in Medak, Shamirpet Deer Park in Rangareddy.

Heritage Tourism

Telangana is a historic land dotted with a number of forts, which have a potential to be developed into classic heritage tourism sites. Some famous forts, where Tourism Department is taking up projects to develop amenities for tourists are Golconda Fort, Medak Fort, Khammam Fort, Nizamabad Fort, Elagandula Fort, Karimnagar and Bhongir Fort, Nalgonda. Warangal Fort and Golconda Fort also host Sound and Light shows which take us back to a magnificent past. More shows of this kind

will highlight the rich heritage of Telangana. Telangana State Tourism Development Corporation (TSTDC) organizes all the above tourist packages and also connects the neighboring States. TSTDC also maintains Haritha Hotel chains, wayside amenities, river cruises and water fleet in different locations. Any trip to Telangana State is incomplete without a taste of its cuisine, including the famous Hyderabadi Biryani, Qubani-ka-Meetha, Haleem, Osmania Biscuits and Irani Chai.

Medical Tourism

Hyderabad has the potential to emerge as a global medical tourism hub, in view of the world class treatment at affordable prices offered in the leading hospitals located in the city. Steps are being taken to prepare a comprehensive plan

for this purpose and to conduct road shows abroad. An attempt is made in this chapter to present domestic and foreign tourists visited the State in the following graphs and subsequent data tables.

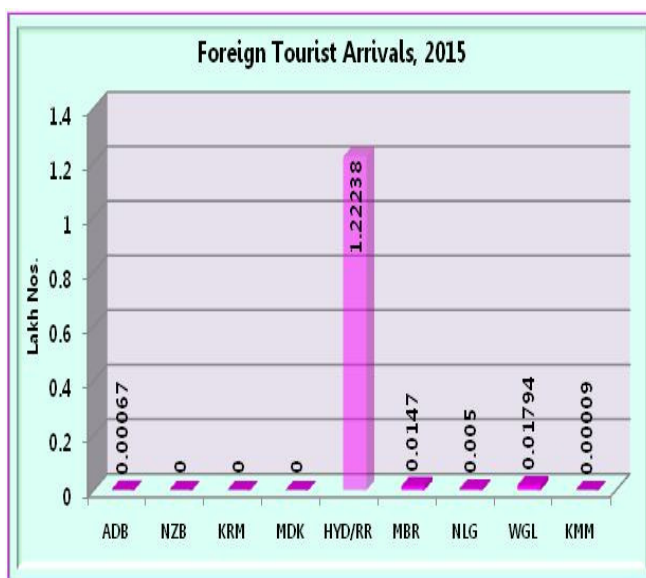

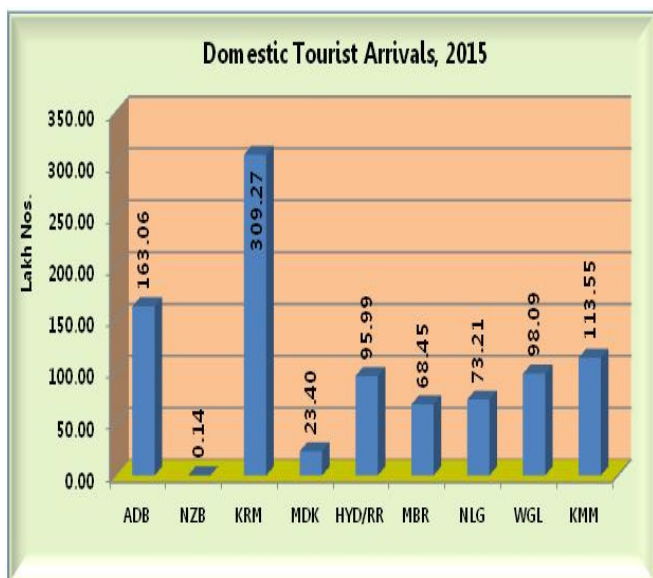

Table	Content
24.1	Number of Tourist Arrivals, 2005 to 2015
24.2	Number of Domestic and Foreign Tourist Arrivals, 2014 and 2015

India - Telangana

Statistical Year Book 2016

26. Comparative Statistics of Telangana State with All India

Efforts are made to present the Comparative Statistics of Telangana State with that of All India under various parameters viz., demographic characteristics according to Population Census, 2011, classification of workers, land utilization, area and out-turn of food grains, operational holdings and operated area, livestock population

according to Livestock Census, 2012, railway route length, working of factories, per capita income, details of Economic Census, functioning of bank branches, etc. This comparison will facilitate better understanding of State with that of All India and its position in various parameters at national level.

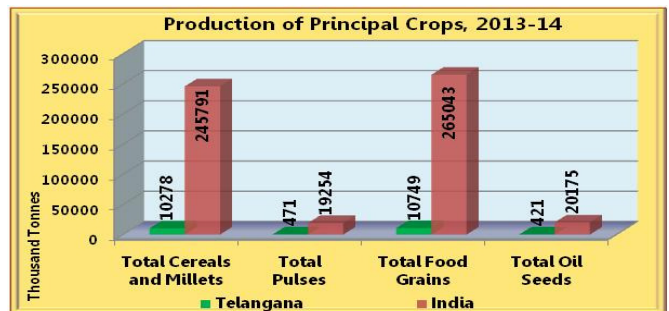

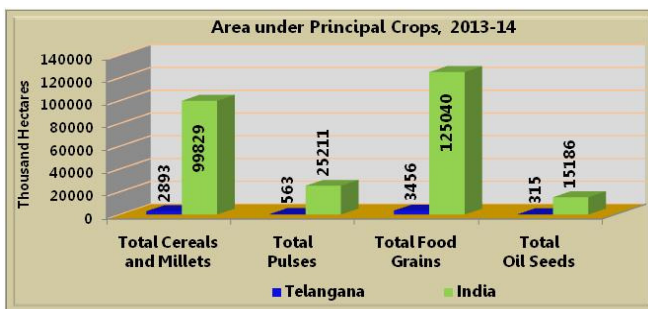

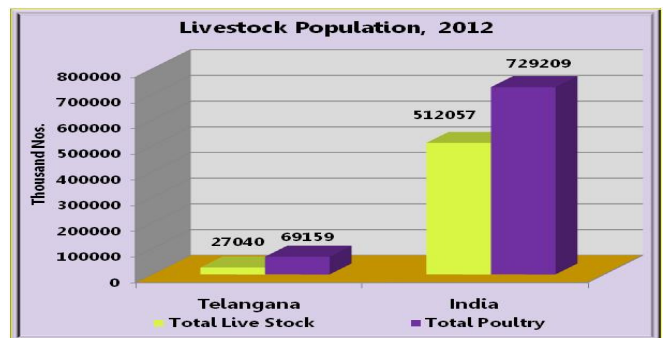

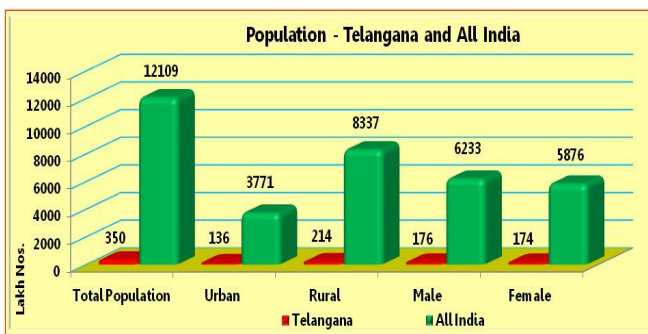

Table	Content
26.1	Comparison of Demographic Characteristics of Telangana State with All India, 2011 Census
26.2	Comparison of Age Group wise population of Telangana State with All India, 2011 Census
26.3	Comparison of Land Utilization of Telangana State with All India, 2010-11 to 2012-13
26.4	Comparison of Area and Production of Principal Crops of Telangana State with All India, 2013-14
26.5	Comparison of Source wise Area Irrigated in Telangana State with All India 2011-12 and 2012-13
26.6	Comparison of Livestock Census, 2007 and 2012 of Telangana State with All India
26.7	Comparison of Mineral Production in Telangana State with All India, 2015
26.8	Comparison of working of Joint Stock Companies Limited by Shares at work, Telangana State with All India 2012 and 2013
26.9	Comparison of Reporting Offices, Aggregate Deposit and Gross Bank Credit of Scheduled Commercial Banks (SCBs), 2015

27. Important Statistics of all States

Efforts are made in this chapter to present important Statistics of all States and all India in the country. The statistics presented in this chapter include Geographical Area, Population, Land Utilization, Area and Out-turn of Food

grains, Livestock including Poultry population, Gross State Domestic Product and Gross Domestic Product etc. It is envisaged to have comparison of States with that of all India on each of the parameters presented in this chapter.

Statistical Year Book 2016

Table	Content
27.1	Area, Households, Population and Sex Ratio, 2011 Census
27.2	Male and Female Population by Residence, 2011 Census
27.3	Child (0-6 Years) Population, Literates and Literacy Rate, 2011 Census
27.4	Scheduled Castes and Scheduled Tribes Population, 2011 Census
27.5	Literacy particulars of Scheduled Castes Population, 2011 Census
27.6	Literacy particulars of Scheduled Tribes Population, 2011 Census
27.7	Main workers, Marginal Workers and Non-workers, 2011 Census
27.8	Classification of Main Workers, 2011 Census
27.9	Classification of Marginal Workers, 2011 Census
27.10(A)	Pattern of Land Utilization, 2011-12
27.10(B)	Pattern of Land Utilization, 2012-13
27.11	Area and Out-turn of Food grains, 2013-14
27.12	Source wise Net Area Irrigated, 2012-13
27.13	Operational Holdings and Area Operated according to Major Size Classes, 2010-11
27.14	Livestock and Poultry Population, 2012 Census
27.15	Railway Route Length at the end of the year 2015
27.16	Principal Characteristics in Annual Survey of Industries, 2013-14
27.17	Gross State Domestic Product at Current Prices
27.18	Gross State Domestic Product at Constant (2011-12) Prices
27.19	Net State Domestic Product at Current Prices
27.20	Net State Domestic Product at Constant (2011-12) Prices
27.21	Per Capita Net State Domestic Product at Current Prices

28. Important Statistics of All India

This chapter contains important Statistics at all India under various parameters like land utilization, area and out-turn of principal crops, electricity generated, index of industrial

production, mineral production, consumer price index numbers for working class, gross domestic product, per capita income, etc.

Statistical Year Book 2016

Table	Content
28.1	Land Utilization, 2007-08 to 2012-13
28.2	Area, Production and Yield of Principal Crops, 2011-12 to 2013-14
28.3	Per Capita Net Availability of Food Grains, Year wise, in India
28.4	Per Capita Net Availability of Food Grains, per Day, in India
28.5	Per Capita Net Availability of Crop wise Food Grains in India from 2009 to 2014
28.6	Livestock Census 2007 and 2012
28.7	Electricity Generated and Sold, 2009-10 to 2012-13
28.8	Index of Industrial Production from 2006-07 to 2014-15
28.9	Mineral Production in 2012-13 to 2014-15
28.10	Factory Employment by Industry Groups, 2011 and 2013
28.11	Average Per Capita Annual Earnings of Factory Labour in Manufacturing Industries for the years, 2010 to 2012
28.12	Performance of Employment Exchanges for the years 2000 to 2012
28.13	Working of Joint Stock Companies Limited by Shares, 2001 to 2014
28.14	Gross Domestic Product and Growth Rates at Current Prices
28.15	Gross Domestic Product and Growth Rates at Constant (2011-12) Prices
28.16	Index Numbers of Wholesale Prices by Major Groups and Sub Groups, 2011-12 to 2013-14
28.17	Consumer Price Index Numbers for Industrial Workers, Month wise, 2011 to 2014
28.18	Consumer Price Index Numbers for Industrial Workers (General Index), 2007 to 2015
28.19	Distribution of Establishments and Persons Employed according to Sixth Economic Census
28.20	Distribution of Establishments and Persons Employed in Rural Sector according to Sixth Economic Census
28.21	Distribution of Establishments and Persons Employed in Urban Sector according to Sixth Economic Census
28.22	Distribution of total Establishments and Persons Employed according to Sixth Economic Census

Statistical Year Book 2016

TABLE - 28.1
LAND UTILISATION, 2007-08 TO 2012-13

(in Lakh hectares)

Sl. No.	Particulars	2007-08	2008-09	2009-10	2010-11	2011-12	2012-13
1	2	3	4	5	6	7	8

The net availability of food grains is estimated to be gross production(-) seed, feed and wastage, (-) exports(+/-) imports(+/-) change stocks. the net availability of food grains divided by the population estimates for a particular year indicates per capita availability of food grains in terms of kg/year net availability, thus worked out further divided by the number of days in a year i.e. 365 days gives us net availability of food grain in terms of grams/day. figures in respect of per capita net availability given above are not strictly representative of actual level consumption in the country especially as they do not take in to account any change in stocks in possessions of traders, producers and consumers. P-provisional

*P-provisional. The net availability of food grains is estimated to be gross production(-) seed, feed and wastage, (-) exports(+)
imports (+/-) change stocks the net availability of food grains divided by the population estimates for a particular year indi-
cates per capita availability of food grains in terms of kg/year net availability, thus worked out further divided by the number of
days in a year i.e 365 days gives us net availability of food grain in terms of grams/day. figures in respect of per capita
net availability given above are not strictly representative of actual level consumption in the country especially as they do not
take in to account any change in stocks in possessions of traders, producers and consumers.*

TABLE - 28.11
AVERAGE PER CAPITA ANNUAL EARNINGS OF FACTORY LABOUR IN MANUFACTURING INDUSTRIES
FOR THE YEARS, 2010 TO 2012

(Rs. in '000s.)

NIC-2008 Code	Industry	2010	2011	2012
1	2	3	4	5
10	Manufacture of Food Products	79,132	77,951	82,744
11	Manufacture of Beverages	56,410	79,209	88,298
12	Manufacture of Tobacco Products	62,702	101,624	21,967
13	Manufacture of Textiles	55,302	63,551	26,540
14	Manufacture of Wearing Apparel	67,788	76,616	72,090
15	Manufacture of Leather and Related Products.	69,610	82,045	37,055
16	Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials	71,750	71,347	86,751
17	Manufacture of Paper and Paper Products.	72,267	66,254	91,692
18	Printing and Reproduction of Recorded Media (This Division Excludes Publishing Activities)	85,938	75,632	62,889
19	Manufacture of Coke and Refined Petroleum Products	71,274	76,442	77,895
20	Manufacture of Chemicals and Chemical Products	67,160	78,551	85,779
21	Manufacture of Pharmaceuticals, Medicinal Chemical and Botanical Products.	78,537	98,917	92,207
22	Manufacture of Rubber and Plastics Products	69,389	78,301	1,00,398
23	Manufacture of other Non-Metallic Mineral Products	62,738	83,317	77,418
24	Manufacture of Basic Metals	59,282	77,318	95,172
25	Manufacture of Fabricated Metal Products, Except Machinery and Equipment	90,538	85,425	79,202
26	Manufacture of Computer, Electronic and Optical Products.	59,865	80,676	77,661
27	Manufacture of Electrical Equipment.	62,947	84,118	86,974
28	Manufacture of Machinery and Equipment n.e.c	70,207	82,579	84,988
29	Manufacture of Motor Vehicles, Trailers and Semi-Trailers.	77,832	91,374	74,532
30	Manufacture of other Transport Equipment	73,798	84,504	81,317
31	Manufacture of Furniture;	78,305	72,497	82,983
32	other Manufacturing	78,618	86,426	72,374
All Manufacturing Industries		65,943	80,994	80,903

ABBREVIATIONS USED

N.A	=	Not Available
-	=	Nil or Negligible
%	=	Percentage
Kg.	=	Kilogram
m.m.	=	Millimeter
Km.	=	Kilometer
K.v.	=	Kilovolt
K.w.	=	Kilowatt
K.w.h.	=	Kilowatt hour
G.w.h.	=	Giga watt hour
M.V.A	=	Million Volts Ampere
M.W.	=	Megawatt
Sq. Km.	=	Square Kilometer
Tonne	=	Metric Tonne
W.B.M	=	Water Bound Macadam
M.C.M	=	Million cubic meters
ROM	=	Run of Mines
ADB	=	Adilabad
NZB	=	Nizamabad
KRM	=	Karimnagar
MDK	=	Medak
HYD	=	Hyderabad
RR	=	Rangareddy
MBR	=	Mahabubnagar
NLG	=	Nalgonda
WGL	=	Warangal
KMM	=	Khammam

CONVERSION TABLE

(For Changing British units of Weight, Length and Capacity in to Metric Units)

I. STANDARDS OF WEIGHTS

1 Ounce	=	28.3495 Grams
1 Gram	=	0.035274 Ounce
	=	0.09 Tola
1 Pound	=	0.45359 Kilogram
1 Kilogram	=	2.20462 Pounds
1 Tonne (Metric Ton)	=	0.98420 Ton
	=	1,000 Kilograms
	=	10 Quintals
1 Ton	=	1.01605 Metric Tons
	=	2,240 Pounds
1 Maund	=	0.037324 Metric Tons
	=	82.2857 Pounds
	=	0.3732 Quintal
1 CWT	=	0.508 Quintal
1 Seer	=	0.9331 kilogram
1 Bale of Cotton Lint (392 lbs.)	=	0.1778 Metric Ton
1 Bale of Jute (400 lbs.)	=	0.181436 Metric Ton
1 Metric Ton	=	5.624 Bales
	=	5.5166 Bales of Jute

II. STANDARDS OF AREA

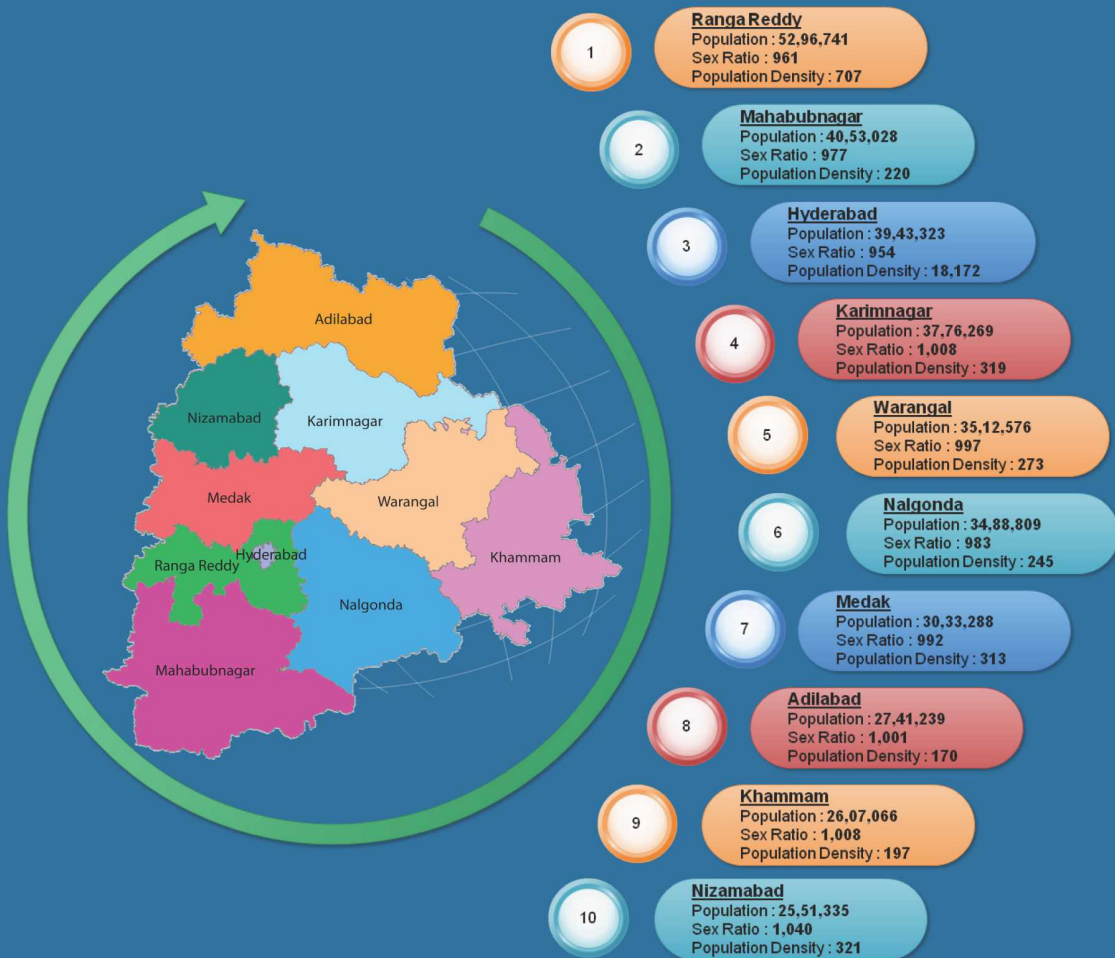

1 Hectare	=	2.47105 Acres
1 Acre	=	0.404686 Hectare
	=	4,840 Square Yards
	=	43,564 Square Feet
1 Sq. Mile	=	640 Acres
	=	2.59 Sq. Kilometers
1 Sq. Kilometer	=	0.3861 Sq. Miles
	=	100 Hectares
1 Sq. Yard	=	0.8361 Sq. Meter
1 Sq. Meter	=	1.1960 Sq. Yards

III. STANDARDS OF LENGTH AND CAPACITY

1 Kilometer	=	0.6214 Mile
1 Meter	=	1.0936 Yards
1 Yard	=	0.9144 Meter
	=	91.44 Centimeters
1 Inch	=	25.4 Millimeters
1 Millimeter	=	0.04 Inch
1 Gallon	=	4.546 Liters
1 Litre	=	0.2199 Gallon
