3. STATEWISE STATEMENT OF TOTAL POPULATION OF ALL AREAS AND RURAL AREAS - TABLE NO 1	9
4. STATEMENT OF SCHEDULED CASTE AND SCHEDULED TRIBE POPULATION - TABLE NO 2	10
5. IMPORTANT DEMOGRAPHIC INDICATORS OF POPULATION IN INDIA BY STATE/UT - 1991 - TABLE NO 3	11
6. LITERACY BY SEX, URBAN, RURAL CLASSIFICATION (POPULATION AGED 7 YEARS & ABOVE)-1991 INDIA - TABLE NO 4	12
7. STATEWISE STATEMENT OF POPULATION AND ILLITERATES OF THE AGE GROUP 7 YEARS AND ABOVE BY SEX AND RURAL/URBAN AREAS - 1991 - TABLE NO 5	13-14
8. STATEWISE STATEMENT OF LITERATES AND LITERACY RATES OF THE AGE GROUP 7 YEARS AND ABOVE BY SEX AND RURAL/URBAN AREAS - 1991 - TABLE NO 6	16-18
9. DISTRICTWISE POPULATION AND ILLITERATES OF THE AGE GROUP 7 YEARS AND ABOVE BY SEX AND RURAL/ URBAN AREAS - 1991 - TABLE NO 7	19-49
10. DISTRICTWISE LITERATES AND LITERACY RATES OF THE AGE GROUP 7 YEARS AND ABOVE BY SEX AND RURAL/URBAN AREAS - 1991 - TABLE NO 8	50-80
11. POPULATION AND ILLITERATES OF VARIOUS AGE GROUPS FOR THE YEARS 1961, 1971 AND 1981 - TABLE NO 9	81
12. TOTAL LITERATES AND LITERACY RATES OF VARIOUS AGE GROUPS FOR THE YEARS 1961, 1971 AND 1981 - TABLE NO 10	82
13. LITERATES WITHOUT EDUCATIONAL LEVEL (FORMAL & NON-FORMAL) AND THEIR PERCENTAGE TO TOTAL LITERATES OF VARIOUS AGE GROUPS OF THE YEARS 1961, 1971 AND 1981 - TABLE NO 11	83
14. LITERATES WITH PRIMARY EDUCATION AND ABOVE AND THEIR PERCENTAGE TO TOTAL LITERATES OF VARIOUS AGE GROUPS OF THE YEARS 1961, 1971 AND 1981 - TABLE NO 12	84

15. GROSS ENROLMENT RATIO IN CLASSES I-V AND VI-VIII OF SCHOOLS FOR GENERAL EDUCATION - TABLE NO 13	85
16. DROP-OUT RATES IN CLASSES I-V - 1988-89 - TABLE NO 14	86

ANNEXURES

I. STATEWISE FREQUENCY DISTRIBUTION OF DISTRICTS BY LITERACY RATES - ALL PERSONS	89-92
II. LIST OF DISTRICTS HAVING LITERACY RATE OF BELOW 30 PERCENT FOR ALL PERSONS	93
III. STATEWISE FREQUENCY DISTRIBUTION OF DISTRICTS BY LITERACY RATES - FEMALES ONLY	94-97
IV. LIST OF DISTRICTS HAVING LITERACY RATE OF BELOW 20 PERCENT FOR FEMALES	98-99
V. LIST OF DISTRICTS COVERED UNDER TOTAL LITERACY CAMPAIGNS	100-105
VI. LITERACY POSITION OF POPULATION AGED 5 YEARS/ 7 YEARS AND ABOVE BY SEX AND RURAL/URBAN AREAS 1961-1981 - INDIA	106
VII. STATEWISE COMPARATIVE STATEMENT OF LITERACY RATES FOR THE YEARS 1981 AND 1991	107

FOREWORD

It has been envisaged in the Eighth Five Year Plan document that the district will be treated as a unit of educational planning in the Eighth Plan and that literacy programmes will be launched in districts/regions which are educationally backward or have high concentration of SC/ST population or have low female literacy. By this time, Total Literacy Campaigns (TLCs) have been launched in about 200 districts of the country. By the end of the Eighth Five Year Plan 345 districts are expected to be covered by the TLCs.

For proper planning and implementation of these literacy campaigns, it is very essential to have district level statistical database for literacy. National Institute of Adult Education set up by the Deptt. of Education, Ministry of Human Resource Development has interalia taken up building up of statistical database for literacy as one of its programme areas. Volume I of the Statistical database for Literacy was released on International Literacy Day 1992. Comparative data upto district level on literacy for 1981 and 1991 for age group 7 and above was brought out in that volume. While 1981 data was computed and analysed on the basis of final 1981 census, 1991 data was based on provisional figures of 1991 census. Analysis of the final data on population and literacy of the 1991 census has now been given in Volume II.

Tables 1-3 of this volume give information on Total population, population of Scheduled Caste/Scheduled Tribes; and indicators of population growth, sex ratio, birth rate, death rate and infant mortality rate. Tables 4-8 describe literacy situation for age group 7 and above at national, state and district levels by rural/urban areas and by sex. Tables 9-12 bring out comparative literacy situation by age groups and by educational levels for the years 1961, 1971 and 1981. This data for 1991 is not yet available. Tables 13 and 14 contain Gross Enrolment Ratios and Dropout Rates at primary level. Brief analytical note based on the above data also forms part of this brochure. Frequency distribution of districts by literacy rates, list of districts having literacy rate of below 30 percent for all persons and below 20 percent for females have been given in Annexures I-IV. Annexure-V contains list of districts covered under Total Literacy Campaigns.

It has been observed that literacy rates for age group 7 and above (not for total population including children of 0-6 age group) are now being used at the national and state levels as has been decided by the Planning Commission and the Registrar General and Census Commissioner in consultation with the Deptt. of Education, Ministry of Human Resource Development, Govt. of India. But at the district level, crude literacy rates based on total population still continue to be used in many cases. This booklet provides the needed data on literates, illiterates by sex and by rural/urban areas for population aged 7 years and above. I hope this data will be very useful particularly for district level planning.

Planning and compilation of the booklet has been done by Shri Prem Chand, Fellow in the National Institute of Adult Education. Shri Swarnendu Biswas and Ms. Vinita Gupta, Project Assistants have helped in compilation and processing of the data for this booklet. I would like to record my deep sense of appreciation for the initiative taken and tremendous efforts put in by Shri Prem Chand. I also appreciate the work done by Shri Biswas, Ms. Vinita Gupta and others in bringing out this booklet.

SUDEEP BANNERJEE
Director General (NLM)
and Vice Chairman (NIAE)

Dated: 2.8.93

BRIEF ANALYSIS

I - Population of All age groups

1. 1991 Census was held in 31 States/Union territories of India with reference date of 1.3.1991. It could not be held in Jammu & Kashmir. Total area of the country excluding Jammu & Kashmir is 3,065 thousand sq. kms. (including Jammu & Kashmir it is 3,287 thousand sq. kms.). Total number of districts in 31 states/union territories at the time of 1991 census was 452 (including Jammu & Kashmir, it was 466). According to the 1991 census total population of 31 States/UTs at that time was 838.58 million. Population of India, including the projected population of Jammu & Kashmir, came to 846.30 million. Final population total indicate following distribution of the population by sex and rural/urban areas.

Distribution of total population by sex and urban/rural areas

		<i>(in 000's)</i>		
1. India		<i>Persons</i>	<i>Male</i>	<i>Female</i>
(Excluding)	Total	838,584	435,216	403,368
(Jammu & Kashmir)	Rural	622,812	321,279	301,533
	Urban	215,772	113,937	101,835
2. India	Total	846,302	439,230	407,072
(Including Estimates)	Rural	628,691	324,321	304,370
(For Jammu & Kashmir)	Urban	217,611	114,909	102,702

The highest population among the states/union territories was in U.P. being 139.11 million. Other states having more than 50 million population are Bihar (86.37), Maharashtra (78.94), West Bengal (68.08), Andhra Pradesh (66.51), Madhya Pradesh (66.18) and Tamil Nadu (55.86).

2. Density of population of the country excluding Jammu & Kashmir and Assam for which comparative data for 1981 and 1991 is not available; increased from 230 in 1981 to 273 persons per sq km in 1991. Highest density is in Delhi (6,352) followed by Chandigarh (5,632). Among the major states having more than 15 million population, highest density is in West Bengal (767) followed by Kerala (749). Lowest is in Rajasthan (129), preceded by Madhya Pradesh (149).

3. Decadal growth rate of population of India which was 24.66 during 1971-81 declined to 23.85 during 1981-91. Annual exponential growth rate during 1981-91 works out to 2.14 as against 2.22 during 1971-81. The exponential growth rate was the highest in Nagaland (4.45) followed by Delhi (4.15) and A & N islands (3.97). It was the lowest in Kerala (1.34) preceded by Tamil Nadu (1.48).

4. 74.37 percent of the population of the country resides in Rural areas and 25.73 percent in Urban areas. Highest percent of urban population was in Delhi (89.93) followed by Chandigarh (89.69) and the lowest was in Dadar & Nagar Haveli (8.47) preceded by Himachal Pradesh (8.69).

5. Population of scheduled castes in the country excluding Jammu & Kashmir was 138.22 million and formed 16.48 percent of the total population of the country. Scheduled tribe population was 67.76 million and formed 8.08 percent of the total population. There is no scheduled caste population in the

States/UT of Nagaland, A & N Islands and Lakshadweep. It is less than 5 percent in Arunachal Pradesh, Goa, Manipur, Meghalaya, Mizoram, Dadar & Nagar Haveli and Daman & Diu and 20 percent or more in Himachal Pradesh, Punjab, Uttar Pradesh and West Bengal. Tribal population is more than 50% in Arunachal Pradesh, Meghalaya, Mizoram, Nagaland, Dadar & Nagar Haveli and Lakshadweep. There is no tribal population in Haryana, Punjab, Chandigarh, Delhi and Pondicherry.

6. 51.90 percent of the total population of India excluding Jammu & Kashmir was male and 48.10 percent was female. The sex ratio defined as the number of female per thousand males for the country declined from 934 in 1981 to 927 in 1991. Sex ratio was the highest in Kerala (1036) followed by Pondicherry (979), Himachal Pradesh (976) and Tamil Nadu (974). Lowest sex ratio was in Chandigarh (790) preceded by A & N Island (818), Delhi (827) and Arunachal Pradesh (859).

7. Birth rate, death rate and infant mortality rate are important demographic indicators and greatly influence size and growth of population. Crude birth rate in India has declined from 37.2 in 1981 to 29.3 in 1991. Crude death rate has also declined from 12.5 in 1981 to 9.8 in 1991. The Infant Mortality Rate has also come down from 120 in 1981 to 80 in 1991. In view of the target envisaged in the National Health Policy (1983), these indicators need to decline further to reach the target of Net Reproduction Rate of unity by 2000 A.D. It would mean reduction of birth rate to 21, death rate to 9 and Infant Mortality Rate to below 60 by 2000 A.D. as stipulated by the working group on Health For All. According to sample Registration System Estimates of 1991, birth rate is estimated to be the highest in Madhya Pradesh (35.8) followed by Uttar Pradesh (35.1) and Rajasthan (34.3). It is estimated to be the lowest in Chandigarh (14.1) preceded by Goa (16.8) and Kerala (18.1). Death rate is estimated to be the highest in Madhya Pradesh (13.8) followed by Arunachal Pradesh (13.5), Orissa (12.7). It is estimated to be the lowest in Nagaland (3.3) preceded by Chandigarh (4.0) and Lakshadweep (4.7). Infant mortality rate is expected to be very high in Orissa (126) and Madhya Pradesh (122). It is expected to be very low in Kerala (17) preceded by Punjab (53) and Tamil Nadu (57).

8. It is observed that the birth rate, death rate and infant mortality rates in the country are declining. However, the demographic profile of the country is not uniform. The states of U.P., Bihar, Madhya Pradesh and Rajasthan together accounting for nearly 40 percent of the population of the country, have high crude birth rate, Infant Mortality Rate (IMR), Maternal Mortality Rate (MMR), and low age of girls at marriage. As will be seen in the next section, literacy rates particularly among female are also low in these very states.

II - Population and Literacy situation of Age Group 7 Years and above

9. According to census definition, a person is deemed as literate if he or she can read and write with understanding in any language. Recognizing that ability to read and write with understanding is not ordinarily achieved until one had some schooling or had at least some time to develop these skills, Deptt. of Education, Ministry of HRD and Planning Commission felt that the population of seven years and above only should be classified as literate or illiterate. 1991 census for the first time adopted age group 7 and above for canvassing the literacy question. 0-6 age group population which is excluded from the purview of literacy question, forms 17.94 percent of the total population of the country. Keeping in view the above decision, literacy rates for population aged 7 years and above have been worked out for 1991. Comparative position for the census years 1961, 1971 and 1981 was available for population aged 5 years and above as at that time children of the age group 0-4 only were excluded from the census literacy question. Literacy situation for age group 7 and above for 1981 has however been analysed by NIAE*.

* Statistical Database for Literacy - Literacy for age group 7 and above 1981-1991 - Volume I

NATIONAL LEVEL

10. During the last three decades population of the country has been increasing at the exponential growth rate of more than 2 percent per annum. While the expanded educational facilities pushed up the number of literates in the country, it has not been able to keep pace with the increasing population. Number of illiterates has simultaneously increased though at a declining rate of growth. A statement of population, literates, illiterates of the age group 5 and over for 1961, 1971 and 1981 and the age group 7 and over for 1981 and 1991 is given below:

Comparative growth of Population, Illiterates and Literates during 1961-91

<i>Year</i>	<i>Age Group</i>	<i>Population</i>	<i>Illiterates</i>	<i>Literates</i>	<i>Literacy Rates</i>	<i>Increase in Lit. Rates</i>
(in millions)						
1961	5 and Over	372.84	267.32	105.52	28.30	-
1971	-do-	468.60	307.19	161.41	34.45	6.15
1981*	-do-	581.78	340.75	241.03	41.43	6.98
1981*	7 and Over	541.04	305.31	235.73	43.57	
1991**	7 and Over	688.16	328.88	359.28	52.21	8.64

* Excludes Assam where 1981 census was not held.

** Excludes Jammu & Kashmir where 1991 census was not held.

During 1961-71, population of the age group 5 and over increased by about 96 millions and the number of literates increased by about 56 million. Thus the number of illiterates increased by 40 million. During 1971-81 increase in population taking into account estimates for Assam for 1981 was of the order of 129 million and the corresponding increase in literates was 85 million and that of illiterates it was 44 million. Taking into account estimates for Assam for 1981 and J&K for 1991 increase in population aged 7 years and above during 1981-91 was about 138 million and increase in the number of literates was about 120 million. Increase in the number of illiterates was only 18 million. It shows that increase in population and literates has been substantially high during these decades but the rate of increase in the number of illiterates has declined over the three decades. For the first time in 1991, number of literates has exceeded the number of illiterates thereby taking the literacy rate above 50% landmark.

11. *Gender disparity* in literacy rate is a historical phenomenon. In 1901, while the literacy rate for males was 9.83 percent, it was only 0.60% in case of females. Comparative change in literacy rates for males and females during the last three decades has been as under:

<i>Year</i>	<i>Age Group</i>	<i>Literates in millions</i>		<i>Literacy Rate</i>		<i>Male/female difference in literacy rate (%age points)</i>
		<i>Male</i>	<i>Female</i>	<i>Male</i>	<i>Female</i>	
1961	5 & Over	77.94	27.58	40.39	15.33	25.06
1971	5 & Over	112.04	49.37	45.95	21.97	23.98
1981*	5 & Over	161.29	79.75	53.46	28.47	24.99
1981*	7 & Over	158.22	77.51	56.38	29.76	26.62
1991**	7 & Over	229.53	129.75	64.13	39.29	24.84

* Excludes Assam

** Excludes Jammu & Kashmir

The previous table indicates that large disparity still continues in the male/female literacy situation. While about two-thirds of the males in the country were literate in 1991, the landmark of 50 percent is still far beyond the reach of females. The difference between the male and female literacy rates has been of the order of about 25 percentage points during the last three decades. However there is a silverlining. While the literacy rate among males has increased by 7.70 percentage points during the decade (after excluding Assam and Jammu & Kashmir both for 1981 and 1991, for comparison purposes), corresponding increase in case of females is 9.34 percentage points. Number of female literates per 1000 male literate has gone up from 491 in 1981 to 564 in 1991 and the index of gender equality which ideally should to 100 has improved from 68.31% in 1981 to 75.25% in 1991.

12. There is a large *urban-rural differential* in literacy rates. This differential is of the order of about 30 percentage points and has continued to remain so over the last several decades as may be seen from the table below :

Year	Age Group	Literacy Rate		
		Urban Areas	Rural Areas	Difference in rural/ urban areas (percentage points)
1961	5 and Over	54.43	22.46	31.97
1971	5 and Over	60.22	27.89	32.33
1981	5 and Over	64.85	34.04	30.81
1981*	7 and Over	67.20	36.00	31.20
1991**	7 and Over	73.08	44.69	28.39

* Excludes Assam

** Excludes Jammu & Kashmir

While about three fourth of the urban population is literate, literacy rate in rural areas is yet much below the level of 50 percent mark. Literacy rate for females in rural areas is still lower being only 30.62. When it is compared with the literacy rate of 81.09 percent for urban male population, the glaring gender and rural/urban disparities become quite evident. Though there is an improvement in rural/urban differentials during the decade 1981-91, yet it is seen that if the literacy rate of rural women increases by 9 percentage points (1981-91 rate) during a decade, it will take them more than five decades to reach the present level of urban males. When we are thinking of literacy for all by the year 2000, rural areas in general and rural females in particular deserve a special treatment if they are to reach even the level of 80% literacy.

STATE LEVEL

13. Literacy rate at the national level reveal only a part of the story of disparities in literacy situation in the country. Literacy rates among the states/UTs range from 89.81 percent in Kerala to 38.48 percent in Bihar. Difference between the highest and the lowest literacy rate among States/UTs is of the order of 51.33 percentage points which is even higher than the literacy rate in Bihar. It is observed that while 22 states/UTs have literacy rate higher than the national average, 9 states and union territories besides Jammu & Kashmir where 1991 census was not held are having literacy rate of below the national average. On the basis of literacy rate State/UTs can be grouped as under:-

Below 50%- Bihar (38.48), Rajasthan, Dadra & Nagar Haveli, Arunachal Pradesh, Uttar Pradesh, Andhra Pradesh, Madhya Pradesh, Orissa, Meghalaya (49.10) and (Jammu & Kashmir).

50% to 60% - Assam (52.89), Haryana, Karnataka, Sikkim, West Bengal, Punjab, Manipur (59.89).
60% to 70% - Tripura (60.44), Gujarat, Nagaland, Himachal Pradesh, Maharashtra (64.87).
70% to 80% - Daman & Diu (71.20), A & N Islands, Pondicherry, Delhi, Goa, Chandigarh (77.81).
80% and above - Lakshadweep (81.78), Mizoram, Kerala (89.81).

While Lakshadweep, Mizoram and Kerala are having literacy rate of above 80%, Bihar and Rajasthan are still below 40 percent.

14. Literacy rate in 1991 for rural areas varied from 88.92 in Kerala to 30.37 in Rajasthan and for urban areas it varied from 92.25 in Kerala to 61.0 in Uttar Pradesh. While literacy rate for male population varied from 93.62 in Kerala to 51.45 in Arunachal Pradesh literacy rate for female population varied from 86.17 in Kerala to 20.44 percent in Rajasthan. Among the states, highest literacy rate of 95.58 was in case of Kerala urban male population and the lowest rate of 11.59 was in case of Rajasthan's rural female population

15. Number of literates increased in all States/Union Territories during 1981-91. Increase in literacy rate varied from 16.05 percentage points in Arunachal Pradesh to 3.00 percentage points in Chandigarh in respect of all persons and from 19.31 percentage points in Sikkim to 3.02 percentage points in Chandigarh in respect of only females. Increase in literacy rates was over ten percentage points in the States/UTs of Arunachal Pradesh, Sikkim, Lakshadweep, Himachal Pradesh, Haryana, Nagaland, Daman & Diu, Tripura, Punjab and Manipur. It was below the national average of 8.65 in the States/UTs of Rajasthan (8.44), Andhra Pradesh, Tamil Nadu, Uttar Pradesh, Mizoram, Kerala, Orissa, Dadar & Nagar Haveli, Meghalaya, Bihar, Delhi and Chandigarh (3.00).

16. Total number of illiterates of the age group 7 and above in India excluding J & K according to 1991 census was 328.88* million. Out of these more than half were in the five low literacy states of Uttar Pradesh, Madhya Pradesh, Bihar, Andhra Pradesh and Rajasthan. Other states having more than 10 million illiterates of age group 7 and above are Maharashtra, West Bengal, Orissa, Karnataka and Gujarat. There was increase in the number of illiterates during 1981-91 in most of the States/UTs. In case of Goa, Gujarat, Himachal Pradesh, Mizoram, Punjab, Sikkim, Tamil Nadu and Lakshadweep, there was marginal decrease in the number of illiterates during 1981-91. In case of Kerala the decline was of the order of 35% from 39.68 lakh in 1981 to 25.74 lakh in 1991. Increase in the number of illiterates during 1981-91 is more pronounced in case of low literacy states. It indicates that there is a vicious circle of low literacy, and increase in the absolute number of illiterates. This vicious circle will need to be broken in order to bring the low literacy states to the national level and then possibly to the level of high literacy states.

17. Statewise analysis of literacy situation indicates wide disparity in literacy among States/UTs. While Kerala, Mizoram and Lakshadweep have achieved the distinction of crossing the 80 percent mark which is considered a stage of self reliance, states like Bihar and Rajasthan which are still below 40 percent level of literacy and Dadra & Nagar Haveli, Arunachal Pradesh, Uttar Pradesh, Andhra Pradesh, Madhya Pradesh, Orissa, Meghalaya and Jammu & Kashmir are struggling to cross the off take point of 50 percent.

18. In terms of the size of the problem of illiteracy 7 states having more than 20 million illiterates each need special attention, as more than 70 percent of the illiterates of the country reside in these 7 States. Four of these seven States are in the Hindi belt and besides having about half the illiterates of the country, are faced with the problem of low literacy rate (40.92) as may be seen from the following table :-

* Including estimates for Jammu & Kashmir, number of illiterates of the age group 7 and above comes to 332.7 million.

Sl. No	Name of the States	No. of illiterates (in millions)	Percentage to Total Illiterates	Literacy Rate
1	Uttar Pradesh	64.77	19.47	41.60
2.	Bihar	42.21	12.69	38.48
3.	Madhya Pradesh	29.62	8.90	44.20
	Sub-Total (4 States)	158.20	47.55	40.92
5.	Andhra Pradesh	31.06	9.33	44.09
6.	West Bengal	23.91	7.19	57.70
7	Maharashtra	22.98	6.91	64.87
	Sub-Total (7 States)	236.15	70.98	46.96
	Total India	332.68	100.00	52.21

It is essential to mount sustained literacy effort in the above states particularly in the first four low literacy states which have been nicknamed as BIMARU (sick) states.

DISTRICT LEVEL

19. Of the 466 districts in the country at the time of 1991 census, census data is available for 452 districts(14 districts of Jammu & Kashmir were not covered). Disparity in literacy rates at the district level was more acute. It varied from 95.72 percent in Kottayam District of Kerala to 19.01 in Jhabua district of Madhya Pradesh. Highest literacy rate of 97.67 percent was in respect of urban male population of Kottayam district and the lowest rate of 4.2 percent was in case of rural female population of Barmer district of Rajasthan.

20. Frequency distribution of districts by literacy rates in respect of all persons for Rural and Urban areas is given below -

Literacy Rate All Persons	No of districts having literacy rate	
	All Areas	Rural Areas %
0-10	-	-
10-20	1	5
20-30	26	59
30-40	88	108
40-50	121	110
50-60	91	88
60-70	76	48
70-80	28	11
80 and above	21	17
Total	452	446*

* There are no rural areas in 6 districts.

Statewise frequency distribution of districts is given in Annexure-I.

It is observed that there are 27 districts which have still literacy rate of below 30 percent (Annexure-II). These districts are located in the states/ut's of Madhya Pradesh(3), Arunachal Pradesh(2), Bihar(10), Rajasthan(3), Orissa(1), Uttar Pradesh(7) and Andhra Pradesh(1). More than 50 percent of the total districts of the country are still having literacy rate of below 50%. Only 21 districts forming less than 5 percent are above the 80 percent mark. These districts are located in the states of Gujarat(1), Kerala(14), Maharashtra(1), Mizoram(1), Tamil Nadu(2), Lakshadweep(1) and Pondicherry(1). Position of literacy

in Urban Areas is better. If we take into account literacy rate of only rural areas, number of districts, which fall below 30% literacy rate, rises to 64 and the number of districts with rural literacy rate of below 50% rises to 282. There are only 17 districts in the country where the rural literacy rate is higher than 80%.

21. Frequency distribution of districts by literacy rates of females for all areas and rural areas indicates a different scenario.

<i>Literacy Rate Female Only</i>	<i>No of districts having female literacy rate</i>	
	<i>All Areas %</i>	<i>Rural Areas %</i>
0-10	2	27
10-20	71	107
20-30	104	99
30-40	92	82

Frequency distribution of districts by states according to female literacy rate is given in Annexure-III.

22. There are 73 districts (Annexure-IV) in the country which still have female literacy rate of below 20 percent including 2 districts of Rajasthan having literacy rate of below 10% . Of these 66 viz. 90.4% are located in the four low literacy Hindi speaking states of Madhya Pradesh (10), Bihar (18), Rajasthan (19) and Uttar Pradesh (19). Position of female literacy in rural areas is still worse.

There are 27 districts (15 Rajasthan, 7 Uttar Pradesh, 3 Madhya Pradesh, one each in Bihar and Orissa) which have rural female literacy rate of below 10 percent. The number of districts having rural female literacy rate of below 20% was 134 forming about 30 percent of the total districts of the country in 1991.

III - Flow of illiterate children to adult population

23. If the constitutional directive of free and compulsory education for the children up to the age of 14 years was fulfilled, all the children would have at least been literate before entering the adult population of 15 years and above. Literacy rates are worked out for quinquennial age groups from 5-9 to 20-24 years. Literacy rate in age group 5-9 was 19.83 percent in 1961 and went up to 30.27 in 1981 (Age wise data for 1991 census is not yet available). Children of this age group particularly of ages 5 and 6 have not had enough schooling to be literate, it would be appropriate to consider literacy rate of age group 10-14 to measure the impact of primary education on literacy. Literacy rate of the age group 10-14 which was 42.26 percent in 1961 increased by about 7 percentage points in each of 1961-71 and 1971-81 decades and was 49.62 in 1971 and 56.38 in 1981. Gross Enrolment Ratio of children of age group 6-10 in classes I-V which was 83.1 percent in 1981 has gone up to 102.7 percent in 1992 and that of girls has also improved from 66.2 to 88.1 during this period. There are other factors which impinge upon the literacy of these children. Definite data on net enrolment ratios, rates of attendance and achievement at primary level is not available. However the dropout rates give a rough idea of the retention at this stage. According to 1988-89 dropout rates, out of 100 students enrolled in class I in 1984-85, 48 dropped out by the time the cohort reached class V in 1988-89. The dropout rate in case of girls was 50. The retention rate which was 52 in 1988-89 and is projected to have improved to 54 at

the beginning of the eighth five year plan and is proposed to be raised to 80 by the end of the eighth five year plan. The high rate of dropout at primary stage, affects the literacy rate of age group 10-14. Though efforts are now being made to enrol the dropouts in non-formal education centres and even in the total literacy campaigns, a large proportion of them continue to enter as illiterates in the adult population of age group 15 and over. Literacy rate of the adult population aged group 15 and over which was 27.76 percent in 1961 increased to 34.08 percent in 1971 and to 40.83 percent in 1981. Number of illiterates in this age group increased from 187 million in 1961 to 210 million in 1971 and 238 million (excluding Assam) in 1981. As per the UNESCO estimates for 1990, number of adult illiterates aged 15 years and over in India was 280.7 million and the literacy rate was 48.2 percent. It shows that more and more illiterate children have been joining the illiterates of the age group 15 and over during these decades. Census results over the decades not only indicate that a sizable section of the children of age group 10-14 are entering adulthood without being literate, these results also inform us that a large section of the literates of this age group continue to have literacy level of below primary education. According to 1981 census 39 percent of the literates of age group 10-14 and 13 percent of the age group 15-19 were those who had not completed primary education and were classified as literates without educational level. There is, therefore, need to ensure that all children below the age of 14 are provided not only access to education but their participation in the educational effort and achievement of minimum levels of learning also needs to be ensured.

IV - Adult Literacy Situation and Literacy Programmes

24. Magnitude of the problem of adult illiteracy of age group 15 and over in India as already indicated is very large. Of the 948.1 million adult illiterates in the world, 280.7 million forming 29.6 percent were in India in 1990. No other country of the world, except China with 223.7 million illiterates, had more than 50 million adult illiterates. Adult literacy programmes in India have primarily been aimed at the most productive and reproductive age-group of 15-35. Literacy rate of this age group was 32.40 percent in 1961, increased to 42.03 percent in 1971 and to 50.02 percent in 1981 (63.92 percent for male and 35.30 percent for female). Number of illiterates in this age group has also been increasing. It increased from 97 million in 1971 to 107 million (Excluding Assam) in 1981. Including estimates for Assam, number of illiterates of this age group in 1981 was 110 million. Standing committee of experts on population projections, projected in 1989 that the population in the age group 15-35 would be about 297 million in 1991. If the number of illiterates of this age group is assumed to have stabilized around the 1981 level of 110 million, literacy rate for this age group works out 63 percent for 1991 as compared to that of 50 percent for 1981. Age group wise census data 1991 on literacy is likely to be available during 1994. The Eighth five year plan has set a target of making 100 million adults literate during 1992-97. Total literacy campaigns have been started in more than 200 districts of the country. In many districts, the campaign covers the district as a whole in one phase, while in some others, the coverage has been planned in two to three phases. The total target group of the campaigns already taken up is more than 50 million. By the end of the Eighth five year plan, these campaigns are likely to be extended to 345 districts of the country. Target group of the Total Literacy Campaigns has varied from age group of 6-50 in Kerala to 9-45, 9-35 and 15-35 in case of several districts in different states. Age group 15-35 essentially forms part of the target group.
