NATIONAL SAMPLE SURVEY : FORTYSECOND ROUND  
REPORT NUMBER 365

PARTICIPATION IN EDUCATION

PART - II : MAJOR STATES  
-----

EXPLANATORY NOTES

1. The enquiry on utilisation of public educational facilities and services general by the population formed an integral part of the social consumption survey carried out in the 42nd round of NSS. The results of this enquiry (which was carried out through the medium of schedule 25.2 : Participation in Education) relating to all India have already been brought out in NSS Report No. 365 - Part I. The present report, which forms Part - II of Report No. 365, gives the results of the following 16 major states of the Union of India :

- |                    |                   |
|--------------------|-------------------|
| 1) Andhra Pradesh  | 9) Madhya Pradesh |
| 2) Assam           | 10) Maharashtra   |
| 3) Bihar           | 11) Orissa        |
| 4) Gujarat         | 12) Punjab        |
| 5) Haryana         | 13) Rajasthan     |
| 6) Jammu & Kashmir | 14) Tamilnadu     |
| 7) Karnataka       | 15) Uttar Pradesh |
| 8) Kerala          | 16) West Bengal   |

2. The all India report contained all the tables included in the tabulation programme of schedule 25.2. However, for want of space, it was not possible to do so in this report. Some of the tables which were considered to be less important compared to the rest have been omitted from (The original table numbers have been retained, however, for facilitating

comparison) Even so it has not been possible to bring out all the selected tables of all the major states in one tome This Part - II is again divided into two volumes Volume I contains the results of the first eight of the 16 states listed above in alphabetical order and Volume II, those of the remaining eight states.

3. A fairly detailed account of the survey is given in Chapter one of Part - I of this report. Similarly, the sample design and procedure of estimation adopted for the survey are given in detail as Appendix - I of Part - I. It is, therefore, not felt necessary again to include them here. However, the number of sample villages and blocks selected for survey for the 16 states covered in Part - II are given in the following table.

CONCEPTS AND DEFINITIONS

4. Although given in Part - I, the important concepts and definitions adopted for the enquiry are repeated below for ready reference. Only the terms special to this enquiry are given, however.

5. Course and level of education : Information on the educational attainment of each household member is collected in block 5 of schedule 25.2. Data employing the same concepts are recorded in other blocks also. Education is first divided into "general" and "technical" (professional and vocational) streams. General education is divided into the following "courses" :- 1. general course, 2. arts/humanities, 3. science, 4. commerce, 5. home-science, 6. oriental studies, 7. non-formal education and special education (e.g. rural science, co-operation, etc.) "General course" stands for an integrated course of many disciplines, such as followed in schools. Similarly technical education is divided into the following courses :- 1. agriculture and forestry, 2. engineering, architecture and technology, 3. medicine, dentistry, nursing, etc. 4. veterinary science, 5. teacher's training, physical education, etc. 6. law, business management, commerce, etc. 7. journalism, library science etc. 8. music, dancing, acting, fine arts etc., and 9. other crafts and trades. Education is further divided into levels or stages of instruction as follows : 1. not literate, 2. literate but below primary (including not having any formal education), 3. primary or junior basic, 4. middle or senior basic, 5. technical or vocational school course, 6. secondary or matriculation or class X, 7. higher secondary or pre-University or intermediate, 8. undergraduate diploma or certificate not equivalent to a degree. 9. degree or diploma equivalent to degree (graduation level) 10. post-graduate degree/

diploma/certificate. As can be seen, the levels listed above form a combined list for the general and technical streams and are given in increasing order of gradation.

6. One will be considered as "literate" if he/she can read and write a simple message in any language. Primary level signifies classes I - IV or I - V as per local practice. Classes IV/V to VIII will be middle or senior basic. These are some technical/vocational courses or training in which eligibility for admission is at least a pass in class VIII. Such courses come under (5). While determining the highest level of education attained by a person, the two streams are considered together and the highest level attained by the person according to the above ordering is taken as the highest level attained by that person. While considering the current enrollment status or level of a member, K.G. or Nursery class is treated as below primary.

7. If a person has passed successfully the final year of a given level, then and only then he/she will be considered as having attained that level of education. For a person studying in class IX, for example, the level attained is middle, while the level at which he/she is currently enrolled is secondary.

8. Education is considered "free" if no tuition fee is to be paid by any student, i.e. free for all students, even if some other payments are to be made by some or all of them.

9. If education is not free for all students, but some of them are exempted from paying part or whole of the tuition fees, they will be considered as enjoying "exemption" from paying it.

10. Expenses on education : This covers various educational expenses incurred or expected to be incurred during the current academic year. These will include : tuition fee, examination fee, other fees and payments, books and stationery, appliances etc., uniform, transport, private coaching and other incidental expenses. Expenditure towards extra-curricular activities like social gatherings, picnics etc are not included in educational expenses (except educational tours, expenditure on which is considered as educational expenses).

11. Number of years a person "attended" a course level refers to the actual number of years he/she spent in that course level, while number of years "completed" refers to the number of years of that course level which the person has successfully completed.

12. A "drop-out" is one who, having enrolled for any level of any course, did not complete that level successfully, i.e. discontinued before successfully completing the course.
