INTRODUCTION

"Statistical Abstract 1985" is the Twenty Eighth issue in the series being brought out annually by the Directorate of Economics & Statistics, Rajasthan. It provides information on different sectors of the State's economy with break-ups relating to structure, time and important characteristics.

The statistical tables presented in this publication relate to the calendar year 1985, or the financial/agricultural/cooperative year 1984-85 except where otherwise indicated. Keeping in line with the past pattern, state data is presented in a series of five years with district/month-wise details for the latest year.

The concepts, definitions used, scope and coverage of the data contained in that particular section is indicated in brief at the beginning of each section.

It is hoped that this publication would serve as a comprehensive reference book of essential statistics of Rajasthan to Administrators, planners, policy makers, research scholars and institutions, etc.

The cooperation extended by various departments of the State and Central Government and other Organisations in preparation of this publication is gratefully acknowledged.

Constructive suggestions for making the publication more useful in future are welcome.

ENVIRONMENT STATISTICS

Temperature—Observations of temperature of air in shed are recorded at most of the observatories twice a day, at 08.30 and 17.30 hours IST. For this purpose thermometers are installed at a height of 4 feet above the ground in Stevenson screens which provide free access to the air but at the same time protect the thermometers from direct rays of the sun.

Humidity—Relative humidity is the measure of water vapours present in the atmosphere relative to the corresponding amount for saturation. It is recorded at the principal observatories by standard record at 08.30 and 17.30 hours IST.

The temperature and humidity data has been compiled from the daily bulletin issued by the Meteorological Department Government of India.

Rain fall—Actual rain fall is recorded at the stations at 08.30 hour IST every day. The amount measured gives the rain fall of the previous 24 hours and the data is tabulated by the Board of Revenue (Land Records), Rajasthan.

Normal annual rain fall is the average of rain fall data for the fifty years ending in 1950.

VITAL STATISTICS

1. *Registered deaths by Causes.*—The data are based on the reports received from the District Statistical Officers of the Directorate of Economics & Statistics, Rajasthan. Cent percent cases of deaths occurring in urban areas not reported to the municipalities of the state. Consequently there is under-registration to this extent.

2. *Registered birth and death rates and infant and maternal mortality rates.*—The birth and death rates relate to towns having population of 30,000 and above. The rates have been worked out per 1000 of population. In case of infant and maternal mortality rates the registration area is changing from year to year and as such the actual number of towns under registration area for each year has been given. The infant mortality and maternal and mortality rates were calculated on 1000 live births and 1000 total births (including still births) respectively. There has been under-registration to a certain extent in these rates.

HOUSING

In Rajasthan four main types of Housing Schemes viz. (i) Low Income Group Housing (ii) Middle Income Group Housing (iii) Subsidised Industrial Housing and (iv) Urban Housing are in operation. Of these, Information relating to first three categories are presented in Table No. 19.1.

Low Income Group Housing—This is a plan scheme and is controlled by the Local Self Government Department (now known as Town Planning Department), Government of Rajasthan under this scheme, loans up to Rs. 10,000/- are disbursed by the District Collectors to the persons having an annual income up to Rs. 5,000/- for the construction of residential buildings. The loanee has to contribute at least 20 per cent of the cost of construction. This scheme is in operation at all the district head-quarters.

Middle Income Group Housing—This is also a plan scheme and is also controlled by the Local Self Government Department (now known as Town Planning Department), Government of Rajasthan. Under this scheme, loans up to Rs. 20,000/- are disbursed by the District Collectors to the persons having an annual income between Rs. 6,000/- to Rs. 15,000/- for the construction of residential buildings.

Subsidised Industrial Housing—This is a plan scheme for the benefit of industrial workers and is being controlled by the Labour Commissioner, Rajasthan and executed by the Public Works Department (Buildings & Roads), Rajasthan.

EDUCATION

This section presents data on education statistics supplied by the Director of Primary and Secondary Education, Rajasthan, who in turn collects it from the educational institutions of all standards for submission to the Ministry of Education, Government of India.

Literate and educated Persons.—A Literate person has been defined as one who can both read and write while an educated person can not only read and write but has also passed a written examination as proof of educational Standard attained.

Schools/Colleges of Agriculture, Commerce, Engineering, Law, Medicine, Physical Education, Teacher's Training, Veterinary Science etc. come under professional Education while those for Music, Dancing, Fine arts, Oriental studies, Social education etc. come under special education. All other types of studies come under General education. Co-educational institutions are covered under institutions for boys.

Scholar means a student admitted and getting education in any of the above referred institutions as regular student on roll as on 31st March of the reporting year.

Teachers means a whole time person appointed by the management for teaching as on 31st March of the reporting year.

Expenditure means the amount actually spent on education including recurring and non-recurring charges up to 31st March of the reporting year. Indirect expenditure represents the amount incurred on direction, building, furniture, scholarships and other miscellaneous items. Its nature is such that it cannot be apportioned to each type of institutions.

Examination results relate to those students who were educated in any of the above referred institutions during the reporting year as well as those appeared as private candidates. The data in respect of candidates passed are inclusive of supplementary examination results.

HEALTH

1. *Government Medical Institutions*—The distinction between a hospital and a dispensary has been made on the basis of provision of in-patient beds. A hospital has beds whereas a dispensary has none. Accordingly T.B. clinics without beds have been grouped under dispensaries. The term general hospital here signifies those hospitals where patients of all maladies may find treatment and as such the Zenana Hospitals have been grouped under general hospital.

The Primary Health Centre is a composite institution providing facilities of in-door and out-door treatment, maternity and preventive health work. The information contained related to those primary health centres which are actually functioning at the year.

2. *In Patient beds*—The classification of in-patient beds is made according to diseases as such the general beds here signify all those beds which are not meant for any particular disease and therefore include the beds available in primary health centres as well. The beds shown under maternity head include beds available in maternity and child welfare centre also.

3. *Medical and Health Personnel*—The number of medical personnel is based on the sanctioned strength of State public hospitals, dispensaries, primary health centres, family planning centres, maternity and child welfare centres, clinics, health workers etc.

4. *Patients treated*—The number of patients treated is the number of patients who come to Government Medical institutions for treatment, patients classified by diseases may not tally with the total patients due to administrative difficulties in registration system at different stages.

AGRICULTURE

OPERATIONAL HOLDING—This information of operational holdings by size of holdings and Irrigation facilities was collected from all the villages at the time of Agriculture census in the year, 1980-81.

LAND UTILISATION—The main purpose of the table of the Land Utilisation is to indicate broadly the ways in which the land of the State is utilised. The classification of area was formerly available under five classes, which have been amplified to fall in line with standard classification as laid down by the Ministry of Food and Agriculture, Government of India.

GEOGRAPHICAL AREA—Total area is calculated in the Office of the Surveyor General of India and reported area for land utilisation purpose is based on the returns of area estimates prepared by the Revenue staff of the State. There is a slight difference between these two sets of figures as pointed out in the note on area and production above, because of the different methods by which they are collected and also because some area are unsurveyed.

FORESTS—The area shown under forest in the table on Land Utilisation may not tally with that given by the Forest Department because (i) the forest Department reports, forests worked out by the Forest Department while the table on Agricultural Statistics includes in addition, forest area administered by district officers and (ii) certain villages and other lands not covered by forest but worked out by Forest Department as forests are not treated as forests in the returns of Agricultural Statistics.

AREA NOT AVAILABLE FOR CULTIVATION—This stands for all land which is absolutely Barren or uncultivable covered by buildings water or roads or otherwise appropriated for non-agricultural purposes. Under sub-head "Land put to non-agricultural use" is included land occupied by buildings, roads, railways or under water and other lands put to uses other than agriculture while under the sub-head "Barren and unculturable land" come mountains, desert etc.

OTHER UNCULTIVATED LAND EXCLUDING FALLOW LANDS—This denotes land available for cultivation but not taken up and includes culturable waste permanent pastures and other grazing land and land under miscellaneous trees, crop and groves. The last one is that type of culturable land which is not included under not area sown but is put to some agricultural use.

FALLOW LAND—It includes current fallows *i.e.* land which is left fallow during the current year only and other fallow land *i.e.* lands which were taken up for cultivation but are temporary out of cultivation for a period of not less than one year and more than 5 years.

NET AREA SOWN, AREA SOWN MORE THAN ONCE AND TOTAL CROPPED AREA—In computing the net area sown, areas sown more than once have been counted only one under the head "Area sown more than once" area sown with two and more than two crops in the same year is counted as many times as the crop is sown. Total cropped area is the total of net area sown and area sown more than once.

INDEX NUMBER:—

COVERAGE—The present series of Index Numbers of Agricultural Production in Rajasthan covers 24 principal crops for which forecasts are issued by the Board of Revenue from time to time. These crops occupy major portion of the gross area sown in the State. These 24 crops are further sub-divided into two main groups, namely, food-crops and non-crops and seven sub-groups, namely, cereals, pulses, oil seeds, fibres spices & condiments, vegetables and others.

The data about the crops included for the preparation of the Index cover about 84 percent of the cropped area and as such the trends in their production are fair representation of the trend of the entire agricultural production in the State.

BASE PERIOD—The base period for these indicators has been changed from the triennium 1859-60 to 1961-62 to the triennium 1967-68 to 1969-70 considering the recommendation of the Economics & Statistical Advisor, Ministry of Agriculture & Irrigation, Govt. of India. Technical Committee on Index Numbers related to Agriculture economy and other Technical Committee on Prices & Cost of living. This also, reasonable period from the point of view of weather, Agriculture production and prices in Rajasthan.

WEIGHTS—Weights have been assigned to the different commodities in the same proportion, which the average value of its production bears to the total average value of production of all commodities during the base period. The production has been valued at the annual harvest prices of the commodities prevailing each year during the base period.

Method of Construction of Index Numbers—The percentage production relative for each crop for the current year has been calculated with the corresponding estimated production on the base period. To obtain group-level indices these production relative have been multiplied with the weights of the respective crops. The aggregative of the products has been divided by the total weights.

The concept of production utilised in the construction of index-numbers is that of gross production of crops. Revised estimates of yield for each year have further been processed as indicated above to get the estimates yield for which figures have been used for construction of the index numbers.

AVERAGE YIELD OF PRINCIPAL CROPS.—It has been calculated by dividing production figures by area.

Area and Production of Crops.—The figures of area and production are given for principal cereals, pulses and commercial crops. The area figures are compiled by the Board of Revenue (Land Records) Rajasthan from the Agricultural Statistical returns prepared by the revenue staff. While the production figures for the State as a whole are estimated on the basis of crop cutting experiment results for Bajra, Maize, Jowar, Seasmum, Cotton Groundnut, Sugarcane Paddy, Wheat, Barelly, Gram, linseed and Rape and Mustard. For other crops it is calculated on the basis of average normal yield of past 10 years. For estimating the production at the district level, yield is worked separately for each of the major districts, depending upon different crops and for the remaining districts the estimates are only tentative. The total of the district tallies with the production for the State as a whole.

The figures as given are those based on final forecasts, as well as those based on revised estimates as issued from time to time along with the final forecast for the following year. The date relates to the agricultural year ending June.

AGRICULTURAL IMPLEMENT AND MACHINERY.—The figures relating to the agricultural implements and machinery actual use for 1961, 1966, 1972 & 1977 are based on Quinquennial Livestock Census. The data in compiled form is supplied to the Directorate by the Board of Revenue (Land Records), Rajasthan.

IRRIGATION

Net Irrigated Area:— The area irrigation from different sources represents the net irrigated area. If two or more crops are irrigated in the same year from the same source the area is counted only once.

Cross Irrigated Area:—Total area irrigated under different crops represents the gross irrigated area and not same year more than one crop during the same year. Area irrigated more than once in a single harvest is counted only once.

The data on irrigation by sources and crops is compiled by Board of Revenue (Land Records), Rajasthan from the data contained in the Annual Agricultural Statistics Returns prepared by the Revenue staff. The information on irrigation works is supplied by the Irrigations Department Rajasthan. The data contained in Table No. 14.1 relates only to plan work in progress.

MINING AND QUARRYING

The mineral statistics are collected and compiled by the Directorate of Mines and Geology, Rajasthan. To supply the data in case of major and minor minerals is a statutory obligation on the part the lessees but in case of certain minor minerals and specially building materials, where rent-cum-royalty leases are granted, the production, sale value and average number of persons employed per day are estimated on the basis of royalty collected through royalty collection contractors.

Manufacturing

Annual Survey of Industries.—Till the year 1960, the data with regard to industrial statistics was collected under the Census of Manufacturing Industries. Since 1961 it has been started to be collected under the Annual Survey of Industries under Collection of Statistics Act, 1953. The coverage of this survey extends to all the factories registered under section 2(m)(i) and 2(m)(ii) of the Indian Factories Act 1948. Underseized factories have been excluded. Underseized factory is that factory which did not employ atleast 10 workers with the aid of power, or atleast 20 workers without the aid of power, throughout the reference year. The data so collected related to the accounting year of the factories ending on any day during 1st April and 31st March of the reference year. The following are important definitions and concepts used for this survey.

Productive Capital.—It includes both fixed and working capital. Fixed capital comprises of land, building including those under construction, improvement to land and other construction; plant, machinery, tool (including uninstalled), transport equipment, other fixed assets such as furniture, fixture etc. and excludes intangible assets. Working capital consists of stock of materials, stores, fuels, semi-finished goods including works in progress, finished products and by products, cash in hand and at the bank and the algebraic sum of sundry creditors as represented by (a) outstanding factory payment e.g. rent, wages, interest and dividend, (b) purchase of goods and services, (c) short term service loans and advances and sundry debtors comprising amount due to the factory on account of sale of goods and services and advances towards purchase and tax-payment.

Worker.—As defined under section 2(1) of the Indian Factories Act 1948, a worker means a persons employed directly or through any agency, whether for wages or not, in any manufacturing process or in cleaning any part of the machinery or directly or through premises used for a manufacturing process, or any other kind of work incidental to, or contracted with the manufacturing process or the of the subject manufacturing process.

Persons other than workers.—The head includes persons employed in administrative and clerical jobs within factory area and all those engaged in effecting delivery of the output.

Number of person employed.—The average number of persons employed by each factory has been computed by taking the total attendance of persons in all the shifts on all working days and dividing it by the number of days worked. These averages are aggregated for all factories in the State or industry, as the case may be and the aggregate is taken as the number of persons employed in the State or industry, respectively. It includes persons attending and on leave with pay such as sick leave, casual leave or paid vacation and also those engaged in welfare activities.

Wages.—The term wages is used in the same sense as defined in section 2 (iv) of the Payment of Wages Act, 1956 and denotes all remuneration capable of being expressed in terms of money which would, if the terms of contract of employment expressed or implied were fulfilled, be payable more or less regularly for each pay period whether conditional upon regular attendance, good work, conduct or behaviour of the persons employed or otherwise, to a person in respect of his employment or of work done in such employment and includes any bonus or other additional remuneration of the nature aforesaid which would be so payable, and any sum payable to such person by reason of the termination of his employment but does not includes—

- (a) the value of any house, accommodation, supply of light, water medical attendance other amenity for any services Specifically excluded by general or special order of the State Government.
- (b) any contribution paid by the employer to any pension fund or provident fund.
- (c) any travelling allowance or the value of any travelling concession.
- (d) any sum paid to persons employed to defray special expenses entailed on him by the nature of his employment.
- (e) any gratuity payable on discharge.

Other benefits.—These includes various benefits over and above wages such as free or subsidised housing food grains at concessional rates etc.

Purchase value of fuels and raw materials consumed.—This is the purchase value of fuels and raw materials (inclusive of transport charges and other incidental costs) actually consumed in the factory included and the purchase value of goods sold in the same condition as purchase and value of productions reported for sale in the previous year but consumed during the current year further manufacture. The value of fuel or materials manufactures within, the factory and consumed for further processing has not been accounted.

Other Expenses.—Under this head are included transportation charges, directors and managing agents fees and interest paid etc.

Depreciation.—Depreciation on fixed assets is calculated at the rates allowed by the income tax authorities for assessing taxable income.

Ex-factory selling value of production and by products.—This represents the value of products and by products of the factory and is exclusive of transport charge from the factory, commission to selling agents etc. This term includes all products made during the year for sale (whether actually sold during the year or not).

Value of work done for others.—This means value of work done by the factory for others on payment when the materials are supplied by them.

Output.—It is the aggregate of products and by products manufactures for sale and of work done for consumers and adjusted for the difference in value of stocks of semi-finished goods at the beginning and the end of the survey year.

Value added by manufacture.—This represents that part of the value of product which is created in the factory and is computed by deducting the value of input comprising cost of material, funds, amount paid for work done by other concerns, other expenses (which includes cost of transport, fee of directors and managing agents charges etc., and depreciation of fixed assets.)

ELECTRICITY AND POWER

The data on generation and consumption of electricity relates to both private and public undertakings in the State and excludes Military, Factory and Railway power stations. Electricity generated covers the total power generation in the State through steam/gas and diesel. Electricity purchased covers both from non-electric utilities and hydel power from adjoining States. The statistics are compiled in the Directorate of Economics and Statistics, Rajasthan. The data is obtained from Rajasthan State Electricity Board.

TRADE

The Trade statistics gives quantity (generally net weight i.e. exclusive of packing of certain commodities) exported from the State of Rajasthan to other States and imported from other State to Rajasthan. Data relates to river and rail borne trade only and are presented for the financial year (April to March). The figures are compiled by the Director General of Commercial Intelligence and Statistics, Ministry of Commerce and Industry, Government of India, Calcutta and are published in the Accounts Relating to the Inland (Rail and River borne) Trade of India.

These statistics are recorded on 'Import basis' According to the arrangement in force, each of Railways register such traffic-en-route to a destination on a different Railway station on the same or to a station on the same system but located outside the trade block. The imports into the station on the minor railway are recorded by the major railway connecting them. The traffic carried partly by rail and partly by river, when booked through and carried by steamers running in connecting with railways, is to be recorded generally by the railway administrative concerned.

LABOUR AND EMPLOYMENT

Trade Unions.—The data in table 26.1 relates to trade unions registered and cancelled under the Indian Trade Union's Act, 1926. The statistics in table 26.1 relate to only those unions which have submitted returns.

Industrial Complains.—Only the number of complaints, by causes, received in the office of the Labour Commissioner have been reported.

Industrial Disputes.—Industrial disputes relate to strike and lock-outs resulting in stoppage of work involving ten or more workers in all sectors of employment including factories, transport, municipal services etc. Sympathetic strikes and certain other types of stoppages which do not strictly come under the definition of industrial disputes as laid down in the Industrial Disputes Act, 1947, are not covered.

Factory accidents.—Under this head are covered only the accidents occurring in factories (enquired into) which result into either death or injury to a worker necessitating his absence from work for 48 hours or more. This information is collected under the Indian Factories Act 1948. The data has been compiled in this Directorate from the monthly reports on labour situation issued by the Labour Commissioner Rajasthan and its Annual Administration Reports.

Mandays worked.—Number of mandays worked during the month are obtained by adding together the number of workers who worked on each shift on each day of the month i.e. the total presence of all the workers in the month.

Mandays lost.—Number of man days lost during the month on account of absence is obtained by adding together the number of workers absent on each day during the month. Mandays lost by absence due to strikes, lock-out or employer ordering lay off are excluded.

Mandays scheduled to work.—This is the total of mandays worked and lost.

Absenteeism in Factories.—It is the percentage of mandays lost to mandays scheduled to work and has been worked out as under:—

$$\frac{\text{Mandays lost}}{\text{Total mandays worked + lost}} \times 100$$

This data has been collected on annual basis with monthly and quarterly breakdowns in the Annual Survey of Industries, by the Directorate of Economics and Statistics, Rajasthan.

Employment in Industries.—This section deals with mandays worked by industrial workers and their earnings. Statistics relating to mandays worked by industries and average daily cash earnings of industrial workers have been compiled in the Directorate of Economics & Statistics, Rajasthan on the basis of returns collected under Annual Survey of Industries from the factories Registered under section 2(m) of the Indian Factories Act, 1948. The returns from individual factories are treated as confidential and no figure for any individual Factory are presented unless there are atleast three units in the same industry or the concerned industry has consented. The average daily cash earnings have been obtained by dividing the gross earnings of the workers by the mandays paid for.

Employment in Mining.—The supply of such data to the Directorate of Mines and Geology, Rajasthan is a statutory obligation on the part of the lessee but in case of certain minor minerals and specially building materials where rent-cum-royalty leases are granted, average number of persons employed per day are just estimated on the basis of royalty collected through royalty collection centres. In case of certain minerals where data for any particular year was not available, this has been estimated on the basis of production during the last year. The figures given in this table represent the daily labour employment both above-ground and under-ground.

Rajasthan Government Employees.—The Directorate of Economics and Statistics, Rajasthan is conducting a regular census of Rajasthan Government Employees on half-yearly basis. The first census was conducted for the employees as on 31-12-56. The data are collected separately for gazetted and non-gazetted staff under various pay ranges. The non-gazetted staff has been further sub-divided into permanent, temporary, part-time, piece rate etc. while the gazetted staff has been sub-divided into permanent and temporary. The data in the prescribed form are supplied by the Drawing and Disbursing Officers to the respective Heads of the Departments and they in turn compile the data for their departments and pass on to the Directorate of Economics and Statistics, Rajasthan for compilation at State level. Employment represents the actuals as on the date of census while the monthly employment are estimated by multiplying the total employees with the mid values of the respective pay ranges.

Employment Exchange.—Statistics under the section shows the working of the employment exchanges in Rajasthan. The nature of work undertaken by the employment exchanges consists of registering people who are seeking employment and securing employment for them. The data is supplied by regularly the Directorate of Employment, Rajasthan.

PUBLIC FINANCE

Receipt and expenditure of the State Government have been shown in this section. The data for these tables have been collected from the annual budget volumes published by the Finance Department, Government of Rajasthan. The figures represent actuals for the past years, revised estimates for the preceding year and budget estimates for the current financial year. All figures relate to financial year from April to March. The tables have been classified on the basis of economically significant categories. For instance, the receipts have been classified into tax revenue, non-tax revenue and the like. Similarly, the expenditure have been classified into revenue, capital development and non-development expenditure includes expenditure for Economic Development and on Special Services.

The tax revenue of the State has been classified into two important heads viz. the State Tax Revenue and the Receipts from Centrally levied taxes. Total revenue has also been represented under Direct and Indirect taxes in a separate table. The important sources of State Tax Revenue and Land Revenue, State Excise Duties, Sales tax, Tax on Motor Vehicles and Stamps and Registration. The receipts from Centrally levied taxes represent the share of Rajasthan Government from the divisible pool of Income Tax Union Excise Duties, Estate Duty, and grant in lieu of tax on Railway passenger fares on the basis of the recommendations of the Sixth Finance Commission amounting to 4,50,5,00,476 and 6.59 per cent respectively on the basis of recommendations of Fifth Finance Commission, of the total divisible pool allotted to the States. The share in lieu of Railway Passenger Fares has been abolished on the basis of recommendations of the Fifth Finance Commission (Final Report). The non-tax Revenue largely consists of receipt from Forests, Irrigation Multipurpose river valley projects, Civil Works and receipts from Civil Administration etc. The total revenue expenditure has been broadly classified into development and non-development expenditure. The development expenditure has been further classified into expenditure on economic development and expenditure on Social services with a view to present in a concise and consolidated form the progress of development expenditure on revenue account into the broad categories which represent the basic objective of the plans.

Under the head expenditure on non-development services, the items included under direct demands on revenue comprises establishment charges for the collection of Land Revenue, State Duties, Sales Tax and other important source of revenue debt services include the amount of interest paid on public debt.

The total capital expenditure has also been classified into development and non-development categories. The items included in Government trading under capital expenditure relate to the charges incurred for grain supply schemes, distribution of seeds, fertilizers and implements, Salt Trading Schemes, Jaipur Milk Supply Scheme, State Woollen Mills, Bikaner and Wool Trading Scheme etc.

The public account transactions have been given in a consolidated form showing the total of receipts and disbursements in table 28.14 under the head 'Debt' Deposits and Remittance Transactions.

Index numbers have also been given in most of the tables under this section with year 1970-71 as the base to facilitate a ready comparison of the financial transactions of the State Government. The indices are simple arithmetic averages.

INCOME-TAX.— Income-tax statistics relate to the assessment on account of income-tax, super-tax and surcharge made by the Income-tax Department, Government of India. The figures refer to assessment made under the Income tax Act and do not include demands raised for advance payment, provisional assessment and miscellaneous demands like penalties, warrant offences etc. Figures of taxes represent the demand raised and not the collection actually made against these demands. These tables analyse the demand for income-tax, super-tax and surcharge according to the classes of assesses viz. (1) Individuals, (2) Hindu Undivided families, (3) Registered firms, (4) Un-registered firms and other associations of person and (5) Companies and other concerns assessable at company rates. The statements are designed to show the total tax demand, payable by assesseees and net income in their hands after the payment of tax. The number of assesseees shown are in respect of each source of income and an assesseees having more than one source is included under each of source from which he derived his income. The data is also given on Trade classification of business and professional income assessed to Income-Tax and Super-Tax including surcharge. The data has been supplied by the Directorate Inspection (Research Statistics and Publication) Government of India.

PRICES AND INDICES

New Series of Consumer Price Index Numbers of Jaipur and Ajmer centres—Jaipur and Ajmer were among the 50 centres selected for conducting Family Living Surveys among industrial workers under the Government of India's scheme during the Second Five year Plan. Accordingly, Family Living Surveys were conducted by the Labour Bureau, Government of India, Simla at these two centres the Period September, 1958 to August, 1959 in the course of which data were collected from 350 families for Ajmer centre and 239 families for Jaipur centre. Both single member families and multi-members family were covered in the course of survey and an average budget giving a combined expenditure pattern of both types of Families was tabulated.

Weighting Diagram.—On the basis of expenditure of above families, average budget for each centres was prepared, the weights to various commodities/Sub-group being their respective share of expenditure in an average budget. The following items of non-consumption expenditure and non-priceable expenditure were excluded from the average budget:—

- (a) All items under the sub-group "Subscription etc."
- (b) All items under the sub-group "Taxes".
- (c) All items under the sub-group "Interest, Litigation and Remittances".
- (d) All items under the sub-group "Savings and Investment" and
- (e) Debts Repaid.

The rest of the items in the average budget have been classified in the various sub-groups, and group Suitable imputations were also done for the unpriced items and those having insignificant expenditure. The weighing diagram for both the centres is given below:—

Group	Weights	
	Jaipur	Ajmer
I. Food	55.42	53.73
I.B Tobacco Pan, Supari and intoxicants	3.88	4.19
II. Fuel and light	6.26	4.58
III. House rent	6.32	4.94
IV. Clothing, Bedding and Footwear	12.66	12.17
V. Miscellaneous	15.46	19.49
TOTAL	100.00	100.00

The special feature of the series is the varying monthly weights for the components of sub-group. "Fruits and Vegetables" which has a highly seasonal character and introduction of half-year varying index for House rent.

Base Year.—Calendar year 1960 has been taken as the base period. For each month a pooled average of all the quotations from all the four markets in each centre has been taken as the average monthly price. A simple average of the monthly average prices for 1960 has been taken as the base price for each item.

Collection of Prices.—Price collection work at each centre is being done by four price collectors under the supervision of the District Statistical Officer at the respective Centre. The localities selected for price collection work at the two Centres are as follows:—

<u>Jaipur Centre</u>	<u>Ajmer Centre</u>
1. Chandpole	1. Kaisarganj
2. Johari Bazar	2. Nagra
3. Ramganj	3. Ramganj
4. Station Road	4. Srinagar Road

Prices for each item for which detailed specifications etc. have been given are collected weekly on every Sunday at Ajmer and on every Friday at Jaipur from selected shops. The price returns are subject to a close scrutiny at both Labour Bureau, Simla and Directorate of Economics and Statistics, Rajasthan, Jaipur before the price quotation and utilised for preparation of Consumer Price Index Numbers.

Method of Computation.—The Index for each centre has been calculated by Laspeyres's formula as a weighted average of price relatives. The weights being proportion of expenditure as determined from the Family Living Survey. Price relatives for the items for a current month are obtained by expressing the average monthly price of an item for the current month as a percentage of the corresponding base price. In case where more than one variety being prices for an item the price relative is calculated separately for each variety and then a simple average of these price relatives is taken to be price relative of this item.

The price relative of each item is multiplied by its weight in the sub-group/group and the sum of these Products for all items in a sub-group/group is divided by the sum of the weights of the item i.e. 100 and the resultant figure is the sub-group-group Index. The sub-group index numbers in the Food and Miscellaneous groups are multiplied by their respective sub-group weights the sum of the products when divided by the sum of the weight, i.e. 100 yields the Food and Miscellaneous Group Index respective. For determining the general consumer price index numbers for a month, the group index numbers are again multiplied by the total weight of the different groups and the total product is divided by the sum by the the group weights.

The group wise and general indices from 1977 to 1981 and monthly indices for 1981 both for Ajmer and Jaipur centre have been given in tables 10.4 and 10.5 respectively.

Consumer Price Index numbers for Working Classes (Beawar).—These indices relate only to Working Class of families of survey. These represent change in the cost of a given basket of goods and services consumed by an average working class household. The items in the list of article are grouped under five heads viz. food, fuel and lighting, clothing, bedding and footwear; house rent and miscellaneous and separate indices are worked out for individual groups. These indices are worked out and supplied by the Director, Labour Bureau, Government of India, Simla. The prices of certain prescribed commodities for this purpose are collected by the Labour Bureau, Simla for this centre of Rajasthan through the agency of this Directorate.

Consumer Price Index Numbers for Agricultural Labourers (Base July, 1950—June, 1961=100)—The all India Index is weighted average compiled by Labour Bureau, Simla in respect of 15 constituent States or groups of States.

These indices measure the extent to which the over all level of retail prices of good and services consumed by agricultural labourers in different states (or groups of states) has changed when compared with the base period viz. July, 1950—June, 1961=100.

The State index is worked out by Laspeyres's formula as a weighted average for the price relatives, the weights being proportions of expenditure as determined by the second Agricultural Labour Enquiry Commission.

Consumer Price Index numbers for Urban Non-Manual Employees (Base 1950=100)—Consumer Price Index Numbers for Urban Non Manual Employees (Base 1950=100) for all India, and for 45 selected centres are compiled and published by Central Statistical Organisation, Government of India, New Delhi.

Index Number of Building Construction Cost for Jaipur Centre (Base 1971 =100)—This Directorate has compiled Building construction cost Index Numbers for residential buildings for Jaipur centre with year 1971 as base year. The cost of building material and labour have been considered in the computerisation of these indices.

The weighted arithmetic average method is used for the computation of the Index. For each variety of material/labour the price relative is computed by dividing the current rate by the corresponding base rate. The weighted arithmetic average of the price relative of the varieties is taken as the material labour Index. The weighted arithmetic average of these materials and labour indices is the General Building Cost Index.

The weighing diagram is based on the proportion of expenditure incurred on each item in relation to the total construction cost in building construction during 1971. The cost of construction on building material/labour related to the residential building of plot size 25'X 50' (Two rooms house)—low income group house constructed by the Rajasthan Housing Board, Jaipur.

Index Number of Wholesale Prices in Rajasthan.--The Directorate of Economics and Statistics compiles index number of whole-sale price for measuring the variation in the price level in the state. It is a general purpose index with year 1952--53 as the base. The index is divided into four major groups viz. food articles, fuel, power, light and lubricants; Industrial raw materials and manufactured articles. In all, it cover 59 items for which 98 quotations are collected from 22 centres in the state on every Friday.

Whole-sale Prices of Livestock products in Rajasthan.--Whole-sale prices of selected items are collected on weekly basis on every Wednesday from selected shops/reserve shops. Consolidated week wise prices alongwith their simple arithmetic average are supplied to Directorate where these price have been used for estimation of state income.

Farm Harvest Prices.--The farm harvest price is the average whole-sale price at which the commodity is sold by the producer to the trader at the village site during the harvest period. The average farm price of a commodity for the state as a whole is arrived at by the method of weighted average, with the district production figures the current year as wights.

PUBLIC ADMINISTRATION AND ELECTORAL STATISTICS

This section deals with the information pertaining to the constitution and administration of local bodies viz. Municipalities and Village Panchayats.

The data on income and expenditure of Municipalities have been obtained from the Directorate of Local Bodies, Rajasthan.

There are 200 assembly seats in Rajasthan in the Seventh general election held in 1980 and 25 Parliamentary seats. Ten members are sent to Rajya Sabha as elected representative of the Vidhan Sabha of the State.

First table incorporated in this chapter contains information on total electorate in each Parliamentary constituency and votes secured by the various parties contesting the general elections held in 1980. Second table contains the constituency-wise name of the elected member party to which he belongs and the percentage of votes secured by the member. The third table contains party-wise names of the members of Rajya Sabha from the State.
