### **(3) ENVIRONMENT STATISTICS**

**TEMPERATURE** - Observations of temperature of air in shed are recorded at most of the observatories twice a day at 08.30 and 17.30 hours IST. For this purpose thermometers are installed at a height of 4 feet above the ground in Stevenson screens which provide free access to the air but at the same time protect the thermometers from direct rays of the sun.

**HUMIDITY** - Relative humidity is the measure of water vapours present in the atmosphere relative to the corresponding amount for saturation. It is recorded at the principal observatories by standard record at 8.30 and 17.30 IST.

The temperature and humidity data has been compiled from the daily bulletin issued by the Meteorological Department, Government of India.

**RAIN FALL** - Actual rain fall is recorded at the stations at 8.30 hour IST every day. The amount measured gives the rain fall of the previous 24 hours and the data is tabulated by the Board of Revenue (Land records), Rajasthan.

Normal annual rain fall is the average of rain fall data for the fifty years ending in 1950.

## (8) HEALTH

1. **GOVERNMENT MEDICAL INSTITUTIONS.**-The distinction between a hospital and a dispensary has been made on the basis of provision of in-patient beds. A hospital has beds where as a dispensary has none. T.B. clinics without beds have been grouped under dispensaries. The term general hospital here signifies those hospitals where patients of all diseases may find treatment and as such the Zanana hospitals have been grouped under General Hospital.

The Primary Health Centre is a composite institution providing facilities of in-door and out-door treatment, maternity & preventive health work. The information contained relates to those primary health centres which are actually functioning during the year.

2. **IN PATIENT BEDS** - The classification of in-patient beds is made according to diseases. As such the general beds here signify all those beds which are not meant for any particular disease and this includes the beds available in primary health centres as well. The beds shown under maternity head include beds available in maternity & child welfare centres also.
3. **MEDICAL & HEALTH PERSONNEL** - The number of medical personnel is based on the sanctioned strength of State Public Hospitals, Dispensaries, Primary health centres, Family planning centres, maternity & child welfare centres, clinics, health workers etc.
4. **PATIENTS TREATED** - The number of patients treated is the number of patients who come to Government medical institutions for treatment, Patients classified by diseases may not tally with the total patients due to administrative difficulties in registration system at different stages.

## (13) AGRICULTURE

**OPERATIONAL HOLDINGS**-This information of operational holdings by size of holdings and irrigation facilities was collected from all the villages at the time of Agriculture census in the year,1985-86 and 1990-91.

**LAND UTILISATION**-The main purpose of the table of the land Utilisation is to indicate broadly the ways in which the land of the State is utilised. The classification of area was formerly available under five classes,which has been implied to fall in line with standard classification as laid down by the Ministry of Food and Agriculture,Government of India.

**GEOGRAPHICAL AREA**-Total area is calculated in the Office of the Surveyor General of India and reported area for land utilisation purpose is based on the returns of area estimates prepared by the Revenue staff of the state. There is slight difference between these two sets of figures as pointed out in the note on area and production above,because of the different methods by which they are collected and also because some area are unsurveyed.

**FOREST**-The area shown under forest in the table on Land utilisation may not tally with that given by the Forest Department because (i) The Forest Department reports, forests worked out by the Forest Department while the table on Agriculture Statistics includes in addition,forest area administered by district officers and(ii)certain villages and other lands not covered by the forest but worked out by Forest Department as forest,are not treated as forests in the returns of Agricultural Statistics.

**AREA NOT AVAILABLE FOR CULTIVATION**-This stands for all land which is absolutely barren or uncultivable covered by buildings,Water or roads or otherwise appropriated for non-agricultural purpose Under sub-Head"Land put to non-agricultural use" is included land occupied buildings,roads,railways or under water and other lands put to uses other than agriculture while under the sub-head"Barren and un-culturable land" includes mountains,desert etc.

**OTHER UNCULTIVATED LAND EXCLUDING FALLOW LAND**-This denotes land available for cultivation but not taken up and includes culturable waste, permanent pastures and other grazing land and land under miscellaneous trees,crops and groves. The last one is that type of culturable land which is not included under area sown but is put to some agricultural use.

**FALLOW LAND**-It includes current fallow i.e. land which is left fallow during the current year only and other fallow land i.e. lands which were taken up for cultivation but are temporary out of cultivation for a period of not less than one year and more than 5 years.

**NET AREA SOWN**-Area Sown More Than Once and Total Cropped Area in computing the net area sown, area sown more than once have been counted only once under the head "Area Sown more than once" area sown with two and more than two crops in the same year is counted as many times as the crop is sown. Total cropped area is the total of net area sown and area sown more than once.

### INDEX NUMBER-

**Coverage:** The present series of Index Numbers of Agricultural Production in Rajasthan covers 34 principal crops for which forecasts are issued by the Board of Revenue from time to time. These crops occupy major Portion of the gross sown in the State.

### 13. Agriculture

These 34 crops are further sub-divided into two main groups, namely, food-crops and non-food crops and seven sub-groups, namely cereals, pulses, oil-seeds, fibres, spices & condiments, vegetables and others.

The data about the crops included for the preparation of index cover about 83 percent of the cropped area and as such the trends in their production are fair representation of the trend of the entire agricultural production in the State.

**BASE PERIOD-**The base period for these indices has been changed from the triennium 1967-68 to 1969-70 to the triennium 1979-80 to 1981-82 considering the recommendation of the Economics & Statistical Advisor, Ministry of Agriculture & Irrigation, Govt. of India, Technical Committee on Index Numbers related to agriculture economy and of the technical committee on Prices & Cost of living. This is also reasonable period from the point of view of weather, Agriculture production and prices in Rajasthan.

**WEIGHTS-**Weights have been assigned to the different commodities in the same proportion which is the average value of its production bears to the total average value of production of all commodities during the period. The production has been valued at the annual harvest prices of the commodities prevailing each year during the base period.

**METHOD OF CONSTRUCTION OF INDEX NUMBER-**The percentage production relative for each crop for the current year has been calculated with the corresponding estimated production in the base period. To obtain group-level indices these production relatives have been multiplied with the weights of the respective crops. The aggregate of the products has been divided by the total weights.

The Concept of production utilised in the construction of index number is that of gross production of crops Revised estimates of yield for each year have further been processed as indicated above to get the estimates yield for which figures have been used for construction of the index number.

**AVERAGE YIELD OF PRINCIPAL CROPS-**It has been calculated by dividing production figures by area.

**AREA AND PRODUCTION OF CROPS-**The figures of area and production are given for principle cereals, Pulses and commercial crops. The area figures are compiled by the Board of Revenue(Land Records), Rajasthan from the Agricultural Statistical returns prepared by the Revenue staff. While the production figures for the state as a whole are estimated on the basis of crop cutting experiment results for Bajra, Maize, Jowar, Sesamum, Cotton, Groundnut, Sugarcane, Paddy, Wheat, Barly, Gram, linseed and Rape & Mustard. For other crops it is calculated on the basis of average normal yield of past 10 years. For estimating upon different crops and for the remaining districts the estimates are only tentative. The total of the district tallies with the production for the State as a whole.

The figures as given are those based final forecasts, as well as those based on revised estimates as issue from time to time along with the final forecasts for the following year. The data relates to the agriculture year ending June.

**AGRICULTURAL IMPLEMENTS AND MACHINERY-**The figures relating to the agricultural implements and machinery actual use for 1988 and 1992 are based on Quinquennial Livestock Census. The data in compiled form is supplied to the Directorate, by the Board of Revenue(Land Records), Rajasthan.

## (14) IRRIGATION

**NET IRRIGATED AREA** - The area irrigated from different sources represents the net irrigated area. If two or more crops are irrigated in the same year from the same source the area is counted only once.

**GROSS IRRIGATED AREA** - Total area irrigated under different crops represents the gross irrigated area and includes area irrigated under more than one crop during the same year. Area irrigated more than once in a single harvest is counted only once.

The data on irrigation by sources and crops is compiled by the Board of Revenue (Land Records), Rajasthan from the data contained in the Annual Agricultural Statistics Returns prepared by the Revenue Staff. The information on irrigation works is supplied by the irrigation department, Rajasthan. The data contained in Table No. 14.1 relates only to plan works in progress.

## **(18) MINING AND QUARRYING**

The mineral statistics are collected and compiled by the Directorate of Mines and Geology, Rajasthan to supply the data in case of major and minor minerals is a statutory obligation on the part of the leases but in case of certain minor minerals and specially building materials, where rent-cum-royalty leases are granted the production, sale value and average number of persons employed per day are estimated on the basis of royalty collection through royalty collection contractors.

Table No. 18.1 was introduced in 1989, the data is obtained from Indian Bureau of Mines, Nagpur.

## (19) MANUFACTURING

**ANNUAL SURVEY OF INDUSTRIES** - Till the year 1960, the data with regard to Industrial statistics was collected under the Census of Manufacturing Industries. Since 1961 it has been started to be collected under the Annual Survey of Industries under Collection of Statistics Act, 1953. The coverage of this survey extends to all the factories registered under section 2 (m) (i) and 2 (m) (ii) of the Indian Factories Act, 1948. Undersized factories have been excluded. Undersized factory is that factory which did not employ at least 10 workers with the aid of power, or at least 20 workers without the aid of power, throughout the reference year. The data so collected relates to the accounting year of the factories ending on any day during 1st April and 31st March of the reference year. The following are the important definitions and concepts used for this survey.

**PRODUCTIVE CAPITAL** - It includes both fixed and working capital. Fixed capital comprises of land, building including those under construction, improvement of land, other construction plant and machinery, tools (including un-installed), transport equipments, other fixed assets such as furniture, fixture etc. and excludes intangible assets. Working capital consists of stock of materials, store fuels, semi-finished goods including working in progress, finished products and by products, cash in hand and at the bank and the algebraic sum of sundry creditors as represented by (a) outstanding factory payments e.g. rent, wages, interest and dividend (b) purchases of goods and services, (c) short term service loans and advances and sundry debtors comprising amount due to the factory on account of sale of goods and services and advances towards purchase and tax payment.

**WORKER** - As defined under section 2 (i) of the Indian Factories Act, 1948, a worker means a person employed directly or through any agency, whether for wages or not in any manufacturing process or in cleaning any part of the machinery directly or premises used for a manufacturing process, or any other kind of work incidental to, or connected with manufacturing process or the subject of the manufacturing process.

**PERSON OTHER THAN WORKERS** - This head includes person employed in administrative and clerical jobs within factory area and all those engaged in effecting delivery of the output.

**NUMBER OF PERSONS EMPLOYED** - The average number of persons employed in each factory has been computed by taking the total attendance of persons in all the shifts on all working days and dividing it by the number of days worked. These averages are aggregate for all factories in the State or industry as the case may be and the aggregate is taken as the number of person, employed in the State or industry respectively. It includes attending and on leave with pay such as sick leave or paid vacation and also those engaged in welfare activities.

**WAGES** - The term wages is used in the same sense as defined in section 2 (iv) of the Payment of wages Act, 1956 and denotes all remuneration capable of being expressed in terms of money which would, in the terms of contract of employment expressed or implied were fulfilled by payable more or less regularly for each pay period whether conditional upon regular attendance, good work, conduct or behaviour of the persons employed or otherwise, to a person in respect of his employment or of work done in such employment and includes any bonus or other additional remuneration of the nature aforesaid which would be so payable and any sum payable to such person by reason for the termination of his employment does not include—

- (a) The value of any house, accomodation, supply of light, water, medical attendance other amenity for any service specifically excluded by general or special order of the State Government.
- (b) any contribution paid by the employer to any pension fund or provident fund.
- (c) any travelling allowance of the value of any travelling concession.
- (d) any sum paid to person employed to defray special expenses entailed on him by nature of his employment.
- (e) any gratuity payable on discharge.

**OTHER BENEFIT** - This includes various benefits over and above wages such as free or subsidised housing, food grains at concessional rates etc.

**PURCHASE VALUE OF FUELS AND RAW-MATERIALS CONSUMED** - This is the purchase value of fuels and raw-materials (inclusive of transport charges and other incidental cost), actually consumed in the factory included and the purchase value of goods sold in the same condition as purchase and value of productions reported for sale in the previous year but consumed during the current year for further manufacture. The value of fuel or materials manufactured within the factory and consumed for further processing has not been accounted.

**OTHER EXPENSES** - This head includes transportation charges, directors and managing agents fees and interest paid etc.

**DEPRICIATION** - Dereciation on fixed assets is calculated at the rates allowed by the income tax authorities for assessing taxable income.

**EX-FACTORY SELLING VALUE OF PRODUCTS AND BY-PRODUCTS** - This represents the value of products and by - Products of the factory and is exclusive of transport charges from the factory commission to selling agent etc. The term includes all products made during the year for sale (whether actually sold during the year or not).

**VALUE OF WORK DONE FOR OTHER** - This means value of work done by the factory for others on payment when the materials are supplied by them.

**OUTPUT** - It is the aggregate of products and by - products manufactured for sale and of work done for customers and adjusted for the difference in value of stocks of semi finished goods at the begining and the end of the survey year.

**VALUE ADDED BY MANUFACTURE** - This represents that part of the value of product which in created in the factory and is computed by deducting the value of input comprising cost of materials, fuels, amount paid for work done by other concerns, other expenses which include cost of transport, fee of directors and managing agents, interest charges etc; and depriciation of fixed assets.

## (21) TRADE

The trade statistics gives quantity (generally net weight i.e. exclusive of packing) of certain commodities exported from the State of Rajasthan to other states and imported from other states to Rajasthan. Data related to river and rail borne trade only and are presented for the financial year (April to March). The figures are compiled by the Director General of Commercial Intelligence and Statistics, Ministry of Commerce and Industry, Government of India, Calcutta and are published in the accounts relating to the Inland (Rail and River borne) Trade of India.

These statistics are recorded on "Import basis" according to the Arrangement in force, each of railway register such traffic-on-route to a destination on a different railway station on the same or to a station on the system but located outside the trade block. The imports into the station on the minor railway are recorded by the major railway connecting them. The traffic carried partly by rail and partly by river, when booked through and carried by steamers running in connection with railways, is to be recorded generally by the railway administrative concerned.

For each month a pooled average of all the quotations from all the four market in each centre has been taken as the average monthly price. A simple average of the monthly average prices for 1960 has been taken as the base price for each item since Oct., 88 the base has been changed to 1982=100.

COLLECTION OF PRICES- Price collection work at Ajmer and Bhilwara centre is being done by four Price collector under the supervision of District Statistical officers at the respective Centres. At Jaipur centre this work is being carried out by price collector appointed by Labour Bureau Shimla, under the Supervision of Assistant Director, DES, Rajasthan. The localities selected for price collection works at the two Centres are as follow:-

Jaipur Centre		Ajmer Centre	
1.	Chandpole	1.	Kaisarganj
2.	Jhotwara	2.	Nagra
3.	Ramganj	3.	Ramganj
4.	Station Road	4.	Srinagar Road

Price for each item for which detailed specification etc. have been given are collected weekly at Ajmer, Jaipur and Bhilwara shops. The Price returns are subjected to a close scrutiny at both Labour Bureau Shimla and Directorate of Economics and Statistics, Rajasthan, Jaipur before the price quotations are utilised for preparation of Consumer price Index Number.

METHOD OF COMPUTATION.- The Index for each centre has been calculated by Lespeyer's formula as a weighted average of price relatives. The weights being proportion of expenditure as determined from the Family Living Survey. Price relatives for the items for a current month are obtained by expressing the average monthly price of an item for the current month as a percentage of the co-responding base price. In case where more than one variety is being priced for an item the price relative is calculated seperately for each variety and then a simple average of these price relatives is taken to be price relative of this item.

The price relative of each item is multiplied by its weight in the sub-group/group and the sum of these Products for all items in a sub-group/group is divided by the sum of the weight of the items i.e. 100 and the resultant figure is the sub-group/group Index. The sub group index numbers in the Food and Miscellaneous groups are multiplied by other respective sub group weight the sum of the products when divided by the sum of the weight i.e. 100 yield the food and Miscellaneous Group Index respectively. For determining the general consumer price index numbers for a month the group index numbers are again multiplied by the total weight of the different groups and the total product is divided by the sum of the group weights.

CONSUMER PRICE NUMBERS FOR AGRICULTURAL LABOURERS (BASE JULY, 1960-JUNE, 1961=100) - The all India Index is weight average compiled by Labour Bureau, Shimla in respect of 15 constituent State or group of States.

The State index is worked out by Laspeyer's formula as a weight average for the price relatives, the weights being proportions of expenditure as determined by the second Agricultural Labour Enquiry Commission.

Now instead of 45 centres, 59 centres are being covered at All India Level. These indices measure the average change in consumer retail price over time at each centre as such these can not be used for comparison of cost lines amongst different centres. All India C.P.I. on new base 1984-85=100 may be converted to the old base by multiplying with the factor 5.32.

**INDEX NUMBER OF BUILDING CONSTRUCTION COST FOR JAIPUR CENTRE (BASE 1971=100)** - This Directorate has compiled Building construction cost index Numbers for residential buildings for Jaipur centre with year 1971 as base year. The weighted arithmetic average of the price relatives of the varieties taken as the material labour Index. The weighted arithmetic average of these materials and labour indices the General Building Cost Index.

The weighting Diagram is based on the proportion of expenditure incurred on each item in relation to the total construction cost in building construction during 1971.
