## Notes :

- 1 For Census of India, 2001, in Urban Agglomeration it was, decided that the core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town and the total population of all the constituents should not be less than 20,000 (as per 1991 census), with these two basis criteria having been met, the following are the possible different situations in which urban agglomerations could be constituted-
  - (i) A city or town with one or more contiguous outgrowths.
  - (ii) Two or more adjoining towns with or without their outgrowths.
  - (iii) A city and one or more adjoining towns with their outgrowths all of which form a continuous spread.
2. The Class-I urban units are referred to as cities, In other words, all urban agglomerations/towns with a population of 100,000 and above are called cities. Urban agglomerations/cities with a population of a million and above are known as metropolitan areas. For this classification the Urban agglomeration of 2001, has been treated as a single unit.

## DECADAL GROWTH OF POPULATION IN RAJASTHAN

### **(3) ENVIRONMENT STATISTICS**

**TEMPERATURE** - Observations of temperature of air in shed are recorded at most of the observatories twice a day at 08.30 and 17.30 hours IST. For this purpose thermometers are installed at a height of 4 feet 6 inch above the ground in Stevenson screens which provide free access to the air but at the same time protect the thermometers from direct rays of the sun.

**HUMIDITY** - Relative humidity is the measure of water vapours present in the atmosphere relative to the corresponding amount for saturation. It is recorded at the principal observatories by standard record at 8.30 and 17.30 hours IST.

The temperature and humidity data has been supplied by Indian Meteorological Department, Jaipur.

**RAIN FALL** - Actual rain fall is recorded at the stations at 8.30 hour IST every day. The amount measured gives the rain fall of the previous 24 hours and the data is tabulated by the Board of Revenue (Land records), Rajasthan.

Normal annual rain fall is the average of rain fall data for the fifty years ending in 1950.

## **(8) HEALTH**

1. **GOVERNMENT MEDICAL INSTITUTIONS-** The distinction between a hospital and a dispensary has been made on the basis of provision of in-patient beds. A hospital has beds where as a dispensary has none. T.B. clinics without beds have been grouped under dispensaries. The term general hospital here signifies those hospitals where patients of all diseases may find treatment and as such the Zanana hospitals have been grouped under General Hospital.

The Primary health Centre is a composite institution providing facilities of in-door and out-door treatment, maternity & preventive health work. The information contained relates to those primary health centres which are actually functioning during the year.

2. **IN PATIENT BEDS-** The classification of in-patient beds is made according to diseases. As such the general beds here signify all those beds which are not meant for any particular disease and this includes the beds available in maternity & child welfare centres also.
3. **MEDICAL & HEALTH PERSONNEL -** The number of medical personnel is based on the sanctioned strength of State Public Hospitals, Dispensaries, Primary health centres, Family planning centres, maternity & child welfare centres, clinics, health workers etc.
4. **PATIENTS TREATED -** The number of patients treated is the number of patients who come to Government medical institutions for treatment, Patients classified by diseases may not tally with the total patients due to administrative difficulties in registration system at different stages.

## **(13) AGRICULTURE**

**OPERATIONAL HOLDINGS** - This information of operational holdings by size of holdings and irrigation facilities was collected from all the villages at the time of Agriculture census in the year, 1990-91 and 1995-96.

**LAND UTILISATION** - The main purpose of the table for land Utilisation is to indicate broadly the ways in which the land of the State is utilised. The classification of area was formerly available under five classes, which has been implied to fall in line with standard classification as laid down by the Ministry of Food and Agriculture, Government of India.

**REPORTED AREA** - Reported area for land utilisation purpose is based on the returns of area estimates prepared by the Revenue staff of the state.

**FOREST** - The area shown under forest in the table on Land utilisation may not tally with that given by the Forest Department because (i) The Forest Department reports, forests worked out by the Forest Department while the table on Agriculture Statistics includes in addition, forest area administered by district officers and (ii) certain villages and other lands not covered by the forest but worked out by Forest Department as forest, are not treated as forests in the returns of Agricultural Statistics.

**AREA NOT AVAILABLE FOR CULTIVATION** - This stands for all land which is absolutely barren or uncultivable covered by buildings, Water or roads or otherwise appropriated for non-agricultural purpose Under sub-Head " Land put to non-agricultural use" is included land occupied buildings, roads, railways or under water and other lands put to uses other than agriculture while under the sub-head " Barren and un-culturable land" includes mountains, desert etc.

**OTHER UNCULTIVATED LAND EXCLUDING FALLOW LAND** - This denotes land available for cultivation but not taken up and includes culturable waste, permanent pastures and other grazing land and land under miscellaneous trees, crops and groves. The last one is that type of culturable land which is not included under area sown but is put to some agricultural use.

**FALLOW LAND** - It includes current fallow i.e. land which is left fallow during the current year only and other fallow land i.e. lands which were taken up for cultivation but are temporary out of cultivation for a period of not less than one year and more than 5 years.

**NET AREA SOWN** - Area Sown More Than Once and Total Cropped Area in computing the net area sown, area sown more than once have been counted only once under the head "Area Sown more than once" area sown with two and more than two crops in the same year is counted as many times as the crop is sown. Total cropped area is the total of net area sown and area sown more than once.

## **INDEX NUMBER -**

**COVERAGE :** The present series of Index Numbers of Agricultural Production in Rajasthan covers 34 principal crops for which forecasts are issued by the Board of Revenue from time to time. These crops occupy major Portion of the gross sown in the State. These 34 crops are further sub-divided into two main groups, namely, food-crops and non-food crops and seven sub-groups, namely cereals, pulses, oil-seeds, fibres, spices & condiments, vegetables and others.

The data about the crops included for the preparation of index cover about 83 percent of the cropped area and as such the trends in their production are fair representation of trend of the entire agricultural production in the State.

**BASE PERIOD -** The base period for these indices has been changed from the triennium 1967-68 to 1969-70 to the triennium 1979-80 to 1981-82 considering the recommendation of the Economics & Statistical Advisor, Ministry of Agriculture & Irrigation, Govt. of India, Technical Committee on Index Numbers related to agriculture economy and of the technical committee on Prices & Cost of living. This is also reasonable period from the point of view of weather, Agriculture production and prices in Rajasthan.

**WEIGHTS -** Weights have been assigned to the different commodities in the same proportion which is the average value of its production bears to the total average value of production of all commodities during the period. The production has been valued at the annual harvest prices of the commodities prevailing each year during the base period.

**METHOD OF CONSTRUCTION OF INDEX NUMBER -** The percentage production relative for each crop for the current year has been calculated with the corresponding estimated production in the base period. To obtain group-level indices these production relatives have been multiplied with the weights of the respective crops. The aggregative of the products has been divided by the total weights.

The Concept of production utilised in the construction of index number is that of gross production of crops Revised estimates of yield for each year have further been processed as indicated above to get the estimates yield for which figures have been used for construction of the index number.

**AVERAGE YIELD OF PRINCIPAL CROPS -** It has been calculated by dividing production figures by area.

**AREA AND PRODUCTION OF CROPS** - The figures of area and production are given for principle cereals, Pulses and commercial crops. The area figures are compiled by the Board of Revenue (Land Records), Rajasthan from the Agricultural Statistical returns prepared by the Revenue staff. While the production figures for the state as a whole are estimated on the basis of crop cutting experiment results for Bajra, Maize, Jowar, Sesamum, Cotton, Groundnut, Sugarcane, Paddy, Wheat, Barly, Gram, linseed and Rape & mustard. For other crops it is calculated on the basis of average normal yield of past 10 years. For estimating different crops and remaining districts the estimates are only tentative. The total of the district tallies with the production for the State as a whole.

The figures as given are those based final forecasts, as well as those based on revised estimates as issue from time to time alongwith the final forecasts for the following year. The data relates to the agriculture year ending June.

**AGRICULTURAL EQUIPMENT AND IMPLEMENTS** - The figures relating to the Agricultural equipment and implements, actual use for 2003 are based on 17th Quinquennial Livestock Census. The data is compiled from Live Stock Census, 2003, Supplied by Board of Revenue for Rajasthan, Ajmer.

## (19) MANUFACTURING

**ANNUAL SURVEY OF INDUSTRIES** - Till the year 1960, the data with regard to Industrial statistics was collected under the Census of Manufacturing Industries. Since 1961 it has been started to be collected under the Annual Survey of Industries under Collection of Statistics Act, 1953. The coverage of this survey extends to all the factories registered under section 2(m) (i) and 2 (m) (ii) of the Indian Factories Act, 1948. Undersized factories have been excluded. Undersized factory is that factory which did not employ at least 10 workers with the aid of power, or at least 20 workers without the aid of power, throughout the reference year. The data so collected relates to the accounting year of the factories ending on any day during 1st April and 31st March of the reference year. The following are the important definitions and concepts used for this survey.

**PRODUCTIVE CAPITAL** - It includes both fixed and working capital. Fixed capital comprises of land, building including those under construction, improvement of land, other construction plant and machinery, tools (including un-installed), transport equipments, other fixed assets such as furniture, fixture etc. and excludes intangible assets. Working capital consists of stock of materials, store fuels, semi-finished goods including working in progress, finished products and by products, cash in hand and at the bank and the algebraic sum of sundry creditors as represented by (a) outstanding factory payments e.g. rent, wages, interest and dividend (b) purchases of goods and services, (c) short term service loans and advances and sundry debtors comprising amount due to the factory on account of sale of goods and services and advances towards purchase and tax payment.

**WORKER** - As defined under section 2 (i) of the Indian Factories Act, 1948, a worker means a person employed directly or through any agency, whether for wages or not in any manufacturing process or in cleaning any part of the machinery directly or premises used for a manufacturing process, or any other kind of work incidental to, or connected with manufacturing process or the subject of the manufacturing process.

**PERSON OTHER THAN WORKERS** - This head includes person employed in administrative and clerical jobs within factory area and all those engaged in effecting delivery of the output.

**NUMBER OF PERSONS EMPLOYED** - The average number of persons employed in each factory has been computed by taking the total attendance of persons in all the shifts on all working days and dividing it by the number of days worked. These averages are aggregate for all factories in the State or industry as the case may be and the aggregate is taken as the number of person, employed in the State or industry respectively. It includes attending and on leave with pay such as sick leave or paid vacation and also those engaged in welfare activities.

**WAGES** - The term wages is used in the same sense as defined in section 2 (iv) of the Payment of wages Act, 1956 and denotes all remuneration capable of being expressed in terms of money which would, in the terms of contract of employment expressed or implied were fulfilled by payable more or less regularly for each pay period whether conditional upon regular attendance, good work, conduct or behaviour of the persons employed or otherwise, to a person in respect of his employment or of work done in such employment and includes any bonus or other additional remuneration of the nature aforesaid which would be so payable and any sum payable to such person by reason for the termination of his employment does not include -

- (a) The value of any house, accomodation, supply of light, water, medical attendance other amenity for any service specifically excluded by general or special order of the State Government.
- (b) any contribution paid by the employer to any pension fund or provident fund.
- (c) any travelling allowance of the value of any travelling concession.
- (d) any sum paid to person employed to defray special expenses entailed on him by nature of his employment.
- (e) any gratuity payable on discharge.

**OTHER BENEFIT** - This includes various benefits over and above wages such as free or subsidised housing, food grains at concessional rates etc.

**PURCHASE VALUE OF FUELS AND RAW-MATERIALS CONSUMED** - This is the purchase value of fuels and raw-materials (inclusive of transport charges and other incidental cost), actually consumed in the factory included and the purchase value of goods sold in the same condition as purchase and value of productions reported for sale in the previous year but consumed during the current year for further manufacture. The value of fuel or materials manufactured within the factory and consumed for further processing has not been accounted.

**OTHER EXPENSES** - This head includes transportation charges directors, and managing agents fees and interest paid etc.

**DEPRICIATION** - Depreciation on fixed assets is calculated at the rates allowed by the income tax authorities for assessing taxable income.

**EX-FACTORY SELLING VALUE OF PRODUCTS AND BY-PRODUCTS** - This represents the value of products and by- Products of the factory and is exclusive of transport charges from the factory commission to selling agent etc. The term includes all products made during the year for sale (whether actually sold during the year or not).

**VALUE OF WORK DONE FOR OTHER** - This means value of work done by the factory for others on payment when the materials are supplied by them.

**OUTPUT** - It is the aggregate of products and by-products manufactured for sale and of work done for customers and adjusted for the difference in value of stocks of semi-finished goods at the beginning and the end of the survey year.

**VALUE ADDED BY MANUFACTURE** - This represents that part of the value of product which in created in the factory and is computed by deducting the value of input comprising cost of materials, fuels, amount paid for work done by other concerns, other expenses which include cost of transport, fee of directors and managing agents, interest charges etc; and depreciation of fixed assets.

## **(21) TRADE**

The trade statistics gives quantity (generally net weight i.e. exclusive of packing) of certain commodities outward from the State of Rajasthan to other states and inward from other states to Rajasthan. Data related to river and rail borne trade only and are presented for the financial year (April to March). The figures are compiled by the Director General of Commercial Intelligence and Statistics, Ministry of Commerce and Industry, Government of India, Kolkata and are published in the accounts relating to the Inland (Rail and River borne) Trade of India.

These statistics are recorded on "Import basis" according to the Arrangement in force, each of railway register such traffic-on-route to a destination on a different railway station on the same or to a station on the system but located outside the trade block. The imports into the station on the minor railway are recorded by the major railway connecting them. The traffic carried partly by rail and partly by river, when booked through and carried by steamers running in connection with railways, is to be recorded generally by the railway administrative concerned.

Table 21.2 pertaining to Air-port wise inward and outward movement of cargo of inland trade by air in Rajasthan.

## (26) LABOUR AND EMPLOYMENT

**TRADE UNIONS** - The data in table 26.1 relates to trade unions registered and cancelled under the Indian Trade Unions Act, 1926. The statistics in table 26.1 relate to only those trade unions which have submitted returns.

**INDUSTRIAL COMPLAINTS** - Only the number of complaints, by causes, received in the office of the Labour Commissioner have been reported.

**INDUSTRIAL DISPUTES** - Industrial disputes relate to strikes and lock-outs resulting in stoppage of work involving ten or more workers in all sectors of employment including factories, transport/municipal services etc. Sympathetic strikes and certain other types of stoppages which do not strictly come under the definition of industrial disputes as laid down in the industrial disputes Act, 1947, are not covered.

**FACTORY ACCIDENTS** - Only the accidents occurring in factories (enquired into) which result into either death or injury to a worker necessitating his absence from work for 48 hours or more covered under this head. This information is collected under the Indian factories Act, 1948. The data has been compiled in the Directorate from the monthly reports on labour situation issued by the Labour Commissioner, Rajasthan and its Annual Administrative Reports.

**MANDAYS WORKED** - Number of mandays lost during the month are obtained by adding together the number of workers who worked on each day of the month i.e the total presence of all the workers in the month.

**MANDAYS LOST** - Number of mandays worked during the month on account of absence is obtained by adding together the number of workers absent on each day during the month. Mandays lost by absence due to strikes lock-outs or employer ordering lay-off are excluded.

**MANDAYS SCHEDULED TO WORK** - This is the total of mandays worked and lost.

**ABSENTEEISM IN FACTORIES** - It is the percentage of mandays lost of mandays scheduled to work and has been worked out as under :

$$\frac{\text{Mandays lost}}{\text{Total mandays worked + lost}} \times 100$$

This data has been collected on annual basis with monthly and quarterly breakdowns in the Annual Survey of Industries by the Directorate of Economics and Statistics, Rajasthan.

**EMPLOYMENT IN MINING** - To supply such data to the Director of Mines and Geology, Rajasthan is a statutory obligation on the part of the lease but in case of certain minor minerals and specially building materials where rent-cum-royalty lease are granted, average number of persons employed per day are just estimated on the basis of royalty collected through royalty collection centres. In case of certain minerals where data for any particular year was not available this has been estimated on the basis of Production during the last year. The figures given in this table represent the daily labour employment both above ground and under ground.

**RAJASTHAN GOVERNMENT EMPLOYEES** - The Directorate of Economics and Statistics, Rajasthan is conducting a regular census of Regular Rajasthan Government Employees on half-yearly basis. The first census was conducted for the employees on 31.12.56. The data are collected separately for gazetted and Non-gazetted staff under various pay ranges. The data in the prescribed form are supplied by the Drawing and Disbursing officers to the respective Head of the Departments and they in turn compile the data for their departments and pass to the Directorate of Economics and Statistics, Rajasthan for compilation at state level. Employment represents the actuals as on the date of census while the monthly emoluments are estimated by multiplying the total employees with the mid values of the respective pay ranges. District wise figures also shown in some tables.

**EMPLOYMENT EXCHANGE** - Statistics under this section show the working of the employment exchanges in Rajasthan. The nature of work undertaken by the employment exchanges consists of registering people who are seeking employment and securing employment for them. The data is supplied by the Directorate of Employment, Rajasthan.

## **(28) PUBLIC FINANCE**

### **RECEIPT AND EXPENDITURE -**

Receipt and expenditure of the State Government have been given in this para. The data used have been called out from the annual budget of the State Government. The figures represent actuals (A/C) for the past years and revised estimates (RE) for the current financial year. All the figures relate to the concerned financial year. The table incorporated in this part have been classified on the basis of economically significant categories.

The tax revenue of the State has been classified into two major heads Viz. State Tax Revenue and Share in Central Taxes. Total tax revenue has been shown under Direct and Indirect taxes in a separate tables. The important sources of State Tax Revenue are Land Revenue, State Excise & Duties, Sales Tax, Tax on Motor Vehicles and Stamps & Registration. Share in Central Taxes represents the share of the state in the divisible pool of Income Tax, Union Excise Duties and Estate Duty on the basis of recommendations of Finance Commission. The non-tax revenue, largely consists of interests, receipts, dividends and profits, general and social services such as medical, health and family welfare, education, arts & culture, water supply & sanitation, irrigation and forestry etc. The total revenue expenditure has been broadly classified into development and Non-development expenditure. The development expenditure has been further classified into expenditure on economic development and expenditure on social services. The non development expenditure includes expenditure on general services which consist of expenditure on state organs, fiscal and administrative services, interest payments and grants-in-aid, etc.

The indices have been given in most of the tables under this part with the year 1993-94 as the base year to facilitate comparison of the financial transactions of the state government.

## (34) ECONOMIC CENSUS

### I. Introduction :-

For making concerted effort in developing infrastructure for sound and reliable data basis particularly for the un-organised sectors of non-agricultural economy, a scheme on Economic Census and surveys was launched by central statistical organisation, Government of India, in the year 1976. Under this scheme the first Economic Census was conducted in 1977. The Second and Third Economic Census was conducted during 1980 and 1990 alongwith houselisting operations of population census 1981 and 1991 respectively. To get reliable and timely data, the Fourth Economic Census was conducted in June 98 independently instead of linking in with houselisting operation of next population census. In this census information regarding location of enterprises, description of activity, nature of operation, type of ownership, social group of owner, power/fuel used, the total number of persons and hired persons usually working in the agricultural (excluding crop production and plantation) and non agricultural activity were collected. The reference date for collecting required information of fourth Economic census was 1st May, 1998.
