प्राक्कथन

राष्ट्रीय प्रतिदर्श सर्वेक्षण (एनएसएस) के रोजगार और बेरोजगारी संबंधी सर्वेक्षण राष्ट्रीय और राज्य स्तर पर श्रम बल के विभिन्न संकेतकों के बारे में आंकड़ों के बुनियादी स्रोत हैं। नियोजन, नीति निर्माण एवं निर्णय में मदद के लिए इन आंकड़ों का उपयोग किया जाता है तथा विभिन्न सरकारी संगठन, शिक्षाविद, शोधकर्ता और विद्वान इनका उपयोग सांख्यिकी प्रक्रियाओं के इनपुट के रूप में करते हैं। परिवारों के बड़े प्रतिदर्श आकार के साथ रोजगार और बेरोजगारी संबंधी सर्वेक्षण, एनएसएस के 27वें दौर (अक्टूबर 1972-सितंबर 1973) से पंचवार्षिक आधार पर आयोजित किए जा रहे हैं। जुलाई 2009-जून 2010 के दौरान किया गया एनएसएस का 66वें दौर का सर्वेक्षण, इस श्रृंखला का आठवां पंचवार्षिक सर्वेक्षण था। इस सर्वेक्षण का क्षेत्र-कार्य राष्ट्रीय प्रतिदर्श सर्वेक्षण कार्यालय (एनएसएसओ) के क्षेत्र संकाय प्रभाग (एफओडी) द्वारा किया गया था जिसमें केन्द्रीय प्रतिदर्शों को सम्मिलित किया गया था। अधिकांश राज्य सरकारों ने भी समान प्रतिदर्श आकार के आधार पर इस सर्वेक्षण में सहभागिता की थी।

केन्द्रीय प्रतिदर्श के आधार पर एनएसएसओ ने रोजगार और बेरोजगारी संबंधी पंचवार्षिक सर्वेक्षणों के निष्कर्ष कई प्रतिवेदनों के रूप में प्रकाशित किए हैं। एनएसएसओ ने जुलाई 2011 में भारत में रोजगार और बेरोजगारी 2009-10 के मुख्य संकेतक जारी किए थे। इसके अलावा एनएसएस के 66वें दौर के सर्वेक्षण के आधार पर रोजगार और बेरोजगारी के विभिन्न पहलुओं पर आठ विस्तृत प्रतिवेदन जारी करने की योजना बनाई गई है। इस श्रृंखला की पहली रिपोर्ट 'भारत में रोजगार और बेरोजगारी की स्थिति, 2009-10' तथा दूसरी रिपोर्ट 'भारत में अनौपचारिक क्षेत्र तथा रोजगार की स्थितियाँ' क्रमशः नवम्बर 2011 तथा जनवरी 2012 में जारी की गईं। तत्पश्चात्, श्रृंखला की तीसरी रिपोर्ट 'भारत में सामाजिक समूहों के बीच रोजगार तथा बेरोजगारी की स्थिति' सितम्बर, 2012 में जारी की गई थी। 'भारत में होम-बेस्ड वर्कर्स' नामक वर्तमान रिपोर्ट इस श्रृंखला में चौथी रिपोर्ट है।

भारत में स्व-रोजगारी कार्मिकों के महत्वपूर्ण अनुपात को ध्यान में रखते हुए, सामान्य स्थिति में होम बेस्ड वर्कर्स (एचबीडब्ल्यू) के रूप में स्व-रोजगारी व्यक्तियों के वर्गीकरण के लिए स्व-रोजगारी व्यक्तियों से कुछ प्रश्न पूछे गए। सम्स्त गैर-कृषिगत क्षेत्र और कृषिगत क्षेत्र के एक हिस्से जिसमें फसल उगाना, मॉकिएट गार्डनिंग, बागवानी तथा पशुपालन सहित फसल उगाना शामिल नहीं है, में स्व-रोजगारी व्यक्तियों से इस प्रकार की सूचना एकत्रित की गई थी। इस रिपोर्ट में सामान्य स्थिति के अनुसार स्व-रोजगार कार्मिकों की रोजगार में उनकी स्थिति, कार्यकलाप की इंडस्ट्री, कार्यस्थल, नियोजक द्वारा उत्पाद के निर्धारित मानकों के अनुसार कार्य करने आदि जैसी विभिन्न विशेषताओं का ब्यौरा दिया गया है। नियोजक द्वारा उत्पाद के निर्धारित मानकों पर पूर्ण या मुख्य रूप से कार्य करने वाले स्व-रोजगारी व्यक्तियों से अतिरिक्त सूचना एकत्र की गई जिसमें उनसे ऋण/कच्चा माल/उपकरण उपलब्ध कराने वाले, भुगतान का आधार, तैयार माल की आपूर्ति के लिए आउटलेट्स की संख्या, मातकीकरण के प्रकार आदि की सूचना शामिल है। इस रिपोर्ट में तीन अध्याय हैं जिसमें पहला अध्याय परिचय के तौर पर है और चार परिशिष्ट हैं। अध्याय दो में इस रिपोर्ट में विभिन्न मदों से संबंधित सर्वेक्षण में उपयोग में लाए गए शब्दों की अवधारणाएं तथा परिभाषाएं विस्तृत रूप से दी गई हैं। इस रिपोर्ट में दिए गए अनुमानों से संबंधित मुख्य निष्कर्ष अध्याय तीन में प्रस्तुत किए गए हैं। विस्तृत अखिल भारतीय तालिकाएँ जिन पर यह रिपोर्ट प्रस्तुत की गई है, सीडी में परिशिष्ट 'क' के रूप में प्रस्तुत की गई हैं। सर्वेक्षण में केनवास की गई अनुसूचियों की प्रतिकृति परिशिष्ट 'घ' में दी गई है।

एनएसएसओ अपने सर्वेक्षण निष्कर्ष तथा रिपोर्टें समय पर उपलब्ध कराने का प्रयास करता रहा है ताकि उपयोगकर्ताओं की अपेक्षाओं पर खरा उतरा जा सके। सर्वेक्षण के मुख्य निष्कर्ष और यूनिट स्तर के आंकड़े फील्ड-वर्क पूरा हो जाने के एक वर्ष के अन्दर जारी कर दिए गए हैं। एनएसएसओ के विभिन्न प्रभागों द्वारा विभिन्न कार्यकलापों के बेहतर नियोजन और निष्पादन तथा एनएसएसओ के स्टाफ तथा सहायक अधिकारियों की कठिन मेहनत से यह प्रतिवेदन वर्तमान रूप में संभव हो सका है। मैं प्रो. रवि श्रीवास्तव को रिपोर्ट की समीक्षा तथा उपयोगी सुझाव देने के लिए धन्यवाद देता हूँ।

मैं आशा करता हूँ कि, यह रिपोर्ट योजनाकारों, नीतिनिर्माताओं तथा शोधकर्ताओं के लिए उपयोगी होगी। इसकी विषय-वस्तु तथा कवरेज में सुधार हेतु सुझावों का स्वागत है।

(डॉ. टी.सी.ए. अनन्त)

PREFACE

The Employment and Unemployment Surveys of National Sample Survey (NSS) are the primary source of data on various indicators of labour force at National and State levels. These are used for planning, policy formulation, decision support and as input for further statistical exercises by various Government organizations, academicians, researchers and scholars. NSS surveys on Employment and Unemployment with large sample size of households have been conducted quinquennially from 27th round (October 1972-September 1973) onwards. The NSS 66th round carried out during July 2009-June 2010 was the eighth quinquennial round in the series, covering subjects of (i) Household Consumer Expenditure and (ii) Employment and Unemployment. Field work of this survey was carried out by the Field Operations Division (FOD) of National Sample Survey Office (NSSO) in which the central samples were covered. Most of the State Governments also participated in the survey on matching sample size basis.

Based on the central sample, the results of quinquennial surveys of Employment and Unemployment are brought out by NSSO in a number of reports. The NSSO released the *Key Indicators of Employment and Unemployment in India, 2009-10* in June 2011. Apart from this, eight detailed reports are planned to be released on varied aspects of employment and unemployment based on NSS 66th round data. The first report '*Employment and Unemployment Situation in India, 2009-10*' and the second report '*Informal Sector and Conditions of Employment in India*' in the series were released in November 2011 and January 2012, respectively. Subsequently the third report in the series on '*Employment and Unemployment Situation Among Social Groups in India*' was released in September 2012. The present report '*Home-based Workers in India*' is the fourth in the series.

Keeping in view the significant proportion of self-employed workers in India, some probing questions were asked to the self employed persons in the usual status for characterization of the self-employed persons as Home Based Workers (HBW). Such information was collected from the self-employed persons for whole of the *non-agricultural sector* and a part of the *agricultural sector* excluding *growing of crops, market gardening, horticulture and growing of crops combined with farming of animals*. This report presents various features of the self-employed workers in usual status, like, their status of employment, industry of activity, location of workplace, whether worked under given product specification of the employer etc. For the self-employed persons who worked wholly or mainly under product specification of the employer, further information was collected on who provided credit / raw material / equipment, basis of payment, number of outlets of disposal, type of specification. This report contains three chapters including the introductory Chapter One and four Appendices. Chapter Two describes in detail the concepts and definitions of only those terms used in the survey in connection with various items in this report. The main findings relating to the estimates given in this report are presented in Chapter Three. The detailed all India tables based on which this report is brought out are presented in Appendix A in CD. Appendix D gives a facsimile of the schedule canvassed in the survey.

NSSO has been endeavouring to bring out its survey results and reports, meeting the aspirations of users for their timely availability. The key results of the Survey and the unit level data have been released within one year of the completion of the Field work. This was possible because of the efforts made by the officials of different divisions of NSSO for meticulous planning and execution of various activities involved and the hard work done by the supporting officials and staff of NSSO. I thank Prof. Ravi Srivastava for reviewing the report and providing valuable comments.

I hope, this report will be useful to the planners, policy makers and researchers. Suggestions for improvement of its content and coverage will be highly appreciated.

(Dr. T. C. A. Anant)
Chief Statistician of India

New Delhi
December 2012

मुख्य बातें

यह रिपोर्ट जुलाई 2009 से जून 2010 के दौरान संचालित रा.प्र.स. के 66वें दौर में रोजगार एवं बेरोजगार पर किये गए आठवें पंचवार्षिक सर्वेक्षण पर आधारित है। यह सर्वेक्षण 7,402 ग्रामों एवं 5,252 नगरीय खंडों के 1,00,957 परिवारों (59,129 ग्रामीण क्षेत्रों में एवं 41,828 नगरीय क्षेत्रों में) में फैला था एवं 4,59,784 व्यक्तियों (2,81,327 ग्रामीण क्षेत्रों में एवं 1,78,457 नगरीय क्षेत्रों में) की गणना की गयी।

रा.प्र.स. के 66वें दौर में रोजगार एवं बेरोजगार पर सर्वेक्षण में सामान्य स्तर में स्व-कार्यरत व्यक्तियों से गृह-स्तरीय कामगारों के रूप में स्व-कार्यरत व्यक्तियों के वर्णन/चरित्र चित्रण के लिए सूचना एकत्र करने हेतु कुछ अन्वेषणात्मक प्रश्न पूछे गए थे। इन प्रश्नों पर सूचना गैर-कृषि सेक्टर (10-99 के रा.औ.व. 2004 के उद्योग प्रभागों) और उद्योग समूहों/प्रभागों 012, 014, 015, 02, 05, के लिए एकत्रित किया गया, जैसा इस रिपोर्ट में ए.जी.ई.जी.सी. के रूप में कहा गया है, जो कृषि क्षेत्र केवल फसल उगाने, उद्यान बाजार, उद्यान कृषि (उद्योग समूह 011) एवं फसल उगाना, जिसके साथ जानवरों की फार्मिंग (उद्योग समूह 013) को छोड़कर। अतः उद्योग समूह 011 (फसल उगाने, उद्यान बाजार, उद्यान कृषि) एवं 013 (फसल उगाने, जानवरों की फार्मिंग के साथ) को व्यापक क्षेत्र से बाहर रखा गया। यह सूचना उनसे इकट्ठी की गयी थी जो सामान्य मुख्य स्तर (पी.एस.) में एवं साथ ही वे जो गौण आर्थिक क्रियाकलाप (एसएस) में वर्गीकृत किए गए थे। अतः इस रिपोर्ट में स्व-नियोजित व्यक्तियों की विविध विशिष्टताओं पर चर्चा उन कामगारों से संदर्भित है जो सामान्य स्तर (पीएस+एसएस) एजीईजीसी एवं गैर-कृषि क्षेत्रों में कार्यरत थे।

स्व-नियोजित कामगारों से जुड़ी कुछ मुख्य खोजें निम्नलिखित हैं :-

(क) ए.जी.ई.जी.सी. एवं गैर-कृषि सेक्टरों में कामगारों का भाग (पीएस+एसएस) :

- ❖ ग्रामीण क्षेत्रों में, ए.जी.ई.जी.सी. एवं गैर-कृषि सेक्टर एक साथ सभी कामगारों (पीएस+एसएस) का 37 प्रतिशत शेयर किया (ए.जी.ई.जी.सी. : 5 प्रतिशत एवं गैर-कृषि : 32 प्रतिशत)
- ❖ नगरीय क्षेत्रों में, ए.जी.ई.जी.सी. एवं गैर-कृषि सेक्टर एक साथ कामगारों का 94.1 प्रतिशत शेयर किया (ए.जी.ई.जी.सी. : 1.6 प्रतिशत एवं गैर-कृषि : 92.5 प्रतिशत)

(ख) ए.जी.ई.जी.सी. एवं गैर-कृषि सेक्टर में स्व-नियोजित कामगारों का भाग :

- ❖ ग्रामीण क्षेत्रों में, ए.जी.ई.जी.सी. क्षेत्र के कामगारों के बीच करीब 71.3 प्रतिशत पुरुष कामगार एवं 93.1 महिला कामगार स्व-कार्यरत थे जबकि गैर-कृषि क्षेत्र के कामगारों में, करीब 41.1 प्रतिशत पुरुष कामगार एवं 43.6 प्रतिशत महिला कामगार स्व-कार्यरत थे।
- ❖ नगरीय क्षेत्रों में, ए.जी.ई.जी.सी. क्षेत्र के कामगारों के बीच करीब 63.5 प्रतिशत पुरुष कामगार एवं 94 प्रतिशत महिला कामगार स्व-कार्यरत थे जबकि गैर-कृषि क्षेत्र के कामगारों के बीच करीब 39.6 प्रतिशत पुरुष कामगार एवं 39.1 प्रतिशत महिला कामगार स्व-कार्यरत थे।

(ग) स्व-नियोजित कामगारों की श्रेणी :

- ❖ स्व-नियोजित तीन श्रेणियों (स्व-लेखा कामगार, नियोक्ता एवं पारिवारिक उद्यमों में सहायक) में स्व-नियोजित कार्यबल में नियोक्ता श्रेणी का शेयर पुरुषों एवं स्त्री और ग्रामीण एवं नगरीय दोनों में कम था।

- ❖ गैर-कृषि सेक्टर में स्व-नियोजित श्रेणी के नियोक्ता का शेयर ग्रामीण पुरुष स्व-नियोजित कार्यबल में करीब 1.6 प्रतिशत एवं नगरीय पुरुष, स्व-नियोजित कार्यबल में 5.8 प्रतिशत था जबकि ग्रामीण महिला स्व-नियोजित कार्यबल में यह 0.3 प्रतिशत था और नगरीय महिला स्व-नियोजित कार्यबल में करीब 1.1 प्रतिशत था ।
- ❖ स्व-नियोजित की दो श्रेणियों, स्व-लेखा कामगार एवं पारिवारिक उद्यम में सहायक एक साथ गैर-कृषि सेक्टर में कार्यरत ग्रामीण पुरुष कार्यबल का करीब 98.4 प्रतिशत था, और नगरीय पुरुष कार्यबल में 94.2 प्रतिशत था ।
- ❖ स्व-लेखा कामगार एवं पारिवारिक उद्यम में सहायक श्रेणी के ग्रामीण एवं नगरीय दोनों क्षेत्रों में गैर-कृषि सेक्टर के लगभग सभी स्व-नियोजित महिला कार्यबल में थे :- स्व-लेखा कामगार एवं पारिवारिक उद्यमों में सहायक श्रेणियों में करीब 99.7 प्रतिशत ग्रामीण स्व-नियोजित महिला कार्यबल एवं 98.9 प्रतिशत नगरीय स्व-नियोजित महिला कार्यबल कार्यरत थे ।

(घ) बड़े-औद्योगिक कार्य में स्व-नियोजित कामगार :

- ❖ ग्रामीण क्षेत्रों में विभिन्न उद्योग अनुभागों में कार्यरत पुरुष कामगारों के बीच स्व-नियोजित कामगारों का शेयर 50 प्रतिशत से अधिक था, अनुभाग ए में (60.8 प्रतिशत), अनुभाग बी में (60.3 प्रतिशत), अनुभाग जी में (84.6 प्रतिशत), अनुभाग एच में (63.3 प्रतिशत), अनुभाग के में (68 प्रतिशत) और अनुभाग ओ¹ में (82.8 प्रतिशत) था ।
- ❖ ग्रामीण क्षेत्रों में, विभिन्न उद्योग अनुभागों में कार्यरत महिला कामगारों के बीच स्व-नियोजित कामगारों का शेयर 50 प्रतिशत से अधिक था, अनुभाग ए में (58.8 प्रतिशत) अनुभाग बी में (82.6 प्रतिशत), अनुभाग डी में (72.4 प्रतिशत), अनुभाग जी में (93.6 प्रतिशत), अनुभाग एच में (92 प्रतिशत), अनुभाग जे में (65.3 प्रतिशत) और अनुभाग ओ में (63.6 प्रतिशत) ।
- ❖ नगरीय क्षेत्रों में, विभिन्न उद्योग अनुभागों में कार्यरत पुरुष कामगारों के बीच स्व-नियोजित कामगारों का शेयर 50 प्रतिशत से अधिक था, अनुभाग ए में (65.4 प्रतिशत), अनुभाग बी में (51.4 प्रतिशत), अनुभाग जी में (72.3 प्रतिशत) और अनुभाग ओ में (64 प्रतिशत)
- ❖ नगरीय क्षेत्रों में, विभिन्न उद्योग अनुभागों में कार्यरत महिला कामगारों के बीच स्व-नियोजित कामगारों का शेयर 50 प्रतिशत से अधिक था, अनुभाग ए में (53.4 प्रतिशत), अनुभाग डी में (66 प्रतिशत), अनुभाग जी में (77.3 प्रतिशत) एवं अनुभाग एच में (75 प्रतिशत)

(ङ) स्व-नियोजित कामगारों के कार्यस्थल की अवस्थिति :-

- ❖ ए.जी.ई.जी.सी. सेक्टर में करीब आधा स्व-नियोजित पुरुष एवं करीब तीन चौथाई स्व-नियोजित महिला कामगार 'घर'² में काम किया ।
- ❖ ग्रामीण एवं नगरीय दोनों क्षेत्रों में स्व-नियोजित पुरुष कामगारों के मुकाबले ए.जी.ई.जी.सी. सेक्टर में स्व-नियोजित महिला कामगारों का एक उच्चतर अनुपात 'घर' में कार्य कर रही थी ।

¹ रा.औ.व-2004 के अनुभागों एवं प्रभागों का विवरण इस रिपोर्ट के अध्याय दो के अनुलग्नक 1 में दिया गया है ।

² निम्नलिखित कार्य स्थलों की अवस्थित 'घर' के रूप में माना गया : स्वयं निवास ईकाई, स्वयं निवास ईकाई के साथ संलग्न संरचना और स्वयं निवास ईकाई के सन्निकट खुला क्षेत्र ।

- ❖ ए.जी.ई.जी.सी. सेक्टर का करीब 53.4 प्रतिशत स्व-नियोजित पुरुषों ने 'घर' में काम किया, उन 72.2 प्रतिशत स्व-नियोजित महिला व्यक्तियों की तुलना में जो कि ए.जी.ई.जी.सी. के नगरीय क्षेत्र में काम करते थे ।
- ❖ ए.जी.ई.जी.सी. सेक्टर में करीब 54.2 प्रतिशत स्व-नियोजित पुरुष व्यक्तियों ने 'घर' में काम किया, उन 77.3 प्रतिशत महिला स्व-नियोजित महिला व्यक्तियों की तुलना में जो ए.जी.ई.जी.सी. के नगरीय क्षेत्रों में काम किया ।
- ❖ गैर कृषि सेक्टर में करीब 73.7 प्रतिशत ग्रामीण क्षेत्रों में स्व-नियोजित महिलाएं 27.6 प्रतिशत स्व-नियोजित पुरुषों की तुलना में 'घर' में काम किया ।
- ❖ गैर कृषि सेक्टर में 71.6 प्रतिशत स्व-नियोजित महिला नगरीय क्षेत्रों में 'घर' में काम किया था, जबकि 20.7 प्रतिशत स्व-नियोजित पुरुषों ने नगरीय क्षेत्रों में काम किया ।

(च) 'नियोक्ता'³ के उत्पाद विनिर्देशन के विभिन्न रूप :-

- ❖ ए.जी.ई.जी.सी. सेक्टर में स्व-नियोजित कामगारों के बीच करीब 84.7 प्रतिशत पुरुष और 94.3 प्रतिशत महिला, अखिल-भारतीय स्तर पर बिना किसी उत्पाद विनिर्देशन के काम किया ।
- ❖ ए.जी.ई.जी.सी. सेक्टर में नियोक्ता के किसी उत्पाद विनिर्देशन के बिना ग्रामीण एवं नगरीय क्षेत्रों में काम करने वाले स्व-नियोजित पुरुष कामगारों का अनुपात क्रमशः 84.8 प्रतिशत और 83.8 प्रतिशत के आस-पास था, जबकि नियोक्ता के किसी उत्पाद विनिर्देशन के बिना ग्रामीण एवं नगरीय क्षेत्रों में काम करने वाले स्व-नियोजित महिला कामगारों का अनुपात भी क्रमशः 94.3 प्रतिशत एवं 95.3 प्रतिशत के करीब था ।
- ❖ ए.जी.ई.जी.सी. सेक्टर में स्व-नियोजित कामगारों के बीच सम्पूर्णतः या मुख्यतः उत्पाद विनिर्देशन के साथ काम करने वाले स्व-नियोजित कामगारों का अनुपात ग्रामीण क्षेत्रों में पुरुषों के बीच करीब 5.7 प्रतिशत एवं महिलाओं के बीच करीब 2.1 प्रतिशत था जबकि तदनु रूप अनुपातें नगरीय पुरुषों के लिए 12.2 प्रतिशत और नगरीय महिलाओं के बीच 3.5 प्रतिशत था ।
- ❖ करीब 21.5 प्रतिशत ग्रामीण स्व-नियोजित पुरुष और 35.1 प्रतिशत ग्रामीण महिला कामगारों ने गैर-कृषि सेक्टर में काम किया जबकि 'नियोक्ता' द्वारा 'सम्पूर्णतः' या मुख्यतः उत्पाद विनिर्देशन था जबकि नगरीय क्षेत्रों में तदनु रूप अनुपातें पुरुषों के लिए 22.9 प्रतिशत एवं महिलाओं के लिए 38.7 प्रतिशत था ।

(छ) स्व-नियोजित कामगारों जो नियोक्ता के उत्पाद विनिर्देशन के अन्तर्गत काम करते हैं उनके जमा/कच्चा माल/उपस्करों के प्रावधान के प्रकार :

- ❖ गैर-कृषि सेक्टर के स्व-कार्यरत कामगारों के बीच, जो 'नियोक्ता' के अन्तर्गत कार्य करते रहे, जमा/कच्चा माल/उपस्करों के मामले में निजी व्यवस्था की तैयारी सिर्फ पुरुषों में दोनों ग्रामीण एवं नगरीय क्षेत्रों में नजर आई ।

³ 'नियोक्ता' का अर्थ प्राकृतिक या कानूनी उस व्यक्ति जो सीधे या बिचौलिये के माध्यम से भले ही वैधानिक रूप में बिचौलिये उपलब्ध नहीं कराए गए हों, अपने व्यवसाय के अनुसरण में गृह कार्य देता हो ।

- ❖ ग्रामीण क्षेत्रों में गैर कृषि सेक्टर में 61.2 प्रतिशत स्व-कार्यरत पुरुष, एवं नगरीय क्षेत्रों में 67.8 प्रतिशत स्व-कार्यरत पुरुष, जो 'नियोक्ता' के अन्तर्गत कार्य करते थे, विभिन्न प्रकार के प्रावधानों के निजी व्यवस्था की थी।
- ❖ पुरुष कामगारों की तुलना में गैर कृषि सेक्टर में स्व-नियोजित महिला कामगारों का निम्न अनुपात में 'नियोक्ता' के विनिर्देशन के अन्तर्गत कार्य किया, जमा/कच्चा माल/उपस्कर के लिए अपनी व्यवस्था किया : करीब 29.1 प्रतिशत स्व-नियोजित महिलाएँ ग्रामीण क्षेत्रों में और 34.5 प्रतिशत स्व-नियोजित महिलाएँ नगरीय क्षेत्रों में।

(ज) स्व-नियोजित कामगारों जो नियोक्ता के उत्पाद विनिर्देशन के अन्तर्गत कार्य करते हैं उनके निपटान की निर्गम संख्या, भुगतान का आधार विनिर्देशन के प्रकार :-

- ❖ गैर-कृषि सेक्टर में करीब 59 प्रतिशत ग्रामीण पुरुष स्व-कार्यरत कामगार जो नियोक्ता के दिए गए विनिर्दिष्ट उत्पाद के अन्तर्गत कार्य कर रहे थे, का सिर्फ निपटान का एक निकासी था, 82.5 प्रतिशत महिलाओं के मुकाबले, एवं नगरीय क्षेत्रों में, तदनु रूप अनुपात थे 58.9 प्रतिशत पुरुषों के लिए एवं 77.9 प्रतिशत महिलाओं के लिए।
- ❖ करीब 69.7 प्रतिशत ग्रामीण स्व-कार्यरत पुरुष कामगार जो गैर-कृषि सेक्टर में नियोक्ता के अन्तर्गत दिए गए विनिर्दिष्ट कार्य कर रहे थे को प्रति मात्रानुपाती दर प्राप्त हुआ उन 84 प्रतिशत ग्रामीण महिलाओं के मुकाबले, एवं नगरीय क्षेत्रों में तदनु रूप अनुपात पुरुषों के लिए 68 प्रतिशत एवं महिलाओं के लिए 87.5 प्रतिशत था।
- ❖ 88.6 प्रतिशत ग्रामीण महिलाओं की तुलना में गैर-कृषि सेक्टर में करीब 75.6 प्रतिशत ग्रामीण स्व-नियोजित पुरुष कामगारों नियोक्ता के दिए गए मौखिक विनिर्देशन प्राप्त किया और नगरीय क्षेत्रों में तदनु रूप अनुपातों में 72.6 प्रतिशत पुरुष एवं 91.6 प्रतिशत महिलाओं ने नियोक्ता के दिए गए मौखिक विनिर्देशन पे काम किया।

HIGHLIGHTS

This report is based on the eighth quinquennial survey on employment and unemployment conducted in the 66th round of NSS during July 2009 to June 2010. The survey was spread over 7,402 villages and 5,252 urban blocks covering 1,00,957 households (59,129 in rural areas and 41,828 in urban areas) and enumerating 4,59,784 persons (2,81,327 in rural areas and 1,78,457 in urban areas).

In the NSS 66th round survey on employment and unemployment, some probing questions were asked to the self-employed persons in usual status for collection of information for characterisation of the self-employed persons as Home-based workers. The information on these questions was collected for the non-agricultural sector (industry divisions 10-99 of NIC-2004) as well as industry groups/ divisions 012, 014, 015, 02, 05 of the agricultural sector, referred to in this report as AGE GC, i.e., *[AG]gricultural sector [E]xcluding only [G]rowing of [C]rops, market gardening, horticulture (industry group 011) and growing of crops combined with farming of animals (industry group 013)*. Thus, the industry groups 011 (*growing of crops, market gardening, horticulture*) and 013 (*growing of crops combined with farming of animals*) were kept out of the coverage. This information was collected from those who were classified as workers according to usual principal status (ps) including those engaged in subsidiary economic activity (ss). Thus, the discussions on the various characteristics of the self-employed persons in this report refers to the workers in usual status (ps+ss) engaged in AGE GC and non-agriculture sectors only.

Some of the key findings relating to self-employed workers are given below:

(a) Share of workers (ps+ss) in AGE GC and non-agriculture sectors:

- ❖ In rural areas, AGE GC and non-agriculture sectors together shared 37 per cent (AGE GC: 5 per cent and non-agriculture: 32 per cent) of the all workers (ps+ss).
- ❖ In urban areas, AGE GC and non-agriculture sectors together shared 94.1 per cent (AGE GC: 1.6 per cent and non-agriculture: 92.5 per cent) of the workers.

(b) Share of self-employed workers in AGE GC and non-agriculture sectors:

- ❖ In the rural areas, among the workers in the AGE GC sector, nearly 71.3 per cent of the male workers and 93.1 per cent of the female workers were self-employed while among the workers in the *non-agricultural* sector, nearly 41.1 per cent of the male worker and 43.6 per cent of the female workers were self-employed.
- ❖ In the urban areas, among the workers in the AGE GC sector, nearly 63.5 per cent of the male workers and 94 per cent of the female workers were self-employed while among the workers in the *non-agricultural* sector, nearly 39.6 per cent of the male worker and 39.1 per cent of the female workers were self-employed.

(c) Category of self-employed workers:

- ❖ Of the three categories of self-employed (*own-account worker*, *employer* and *helper in household enterprise*), the share of *employer* category in the self-employed workforce was small in both rural and urban areas and male and female alike.
- ❖ The share of *employer* category of self-employed in non-agricultural sector was nearly 1.6 per cent among rural male self-employed workforce and 5.8 per cent among the urban male self-employed workforce, while it was 0.3 per cent among rural female self-employed workforce and nearly 1.1 per cent among the urban female self-employed workforce.
- ❖ The two categories of self-employed, *own-account worker* and *helper in household enterprise* together accounted for nearly 98.4 per cent of the male rural self-employed workforce engaged in the non-agricultural sector, and 94.2 per cent of the male urban self-employed workforce engaged in the non-agricultural sector.
- ❖ Almost all the female self-employed workforce in the non-agricultural sector, in both rural and urban areas, belonged to the categories *own-account worker* and *helper in household enterprise*: nearly 99.7 per cent of the rural female self-employed workforce and 98.9 per cent of the urban female self-employed workforce belonged to the categories *own-account worker* and *helper in household enterprise*.

(d) Self-employed workers in broad industry of work:

- ❖ In rural areas, among male workers engaged in different industry sections, the share of self-employed workers was more than 50 per cent in Section A (60.8 per cent), Section B (60.3 per cent), Section G (84.6 per cent), Section H (63.3 per cent), Section K (68 per cent) and Section O¹ (82.8 per cent).
- ❖ In rural areas, among female workers engaged in different industry sections, the share of self-employed workers was more than 50 per cent in Section A (58.8 per cent), Section B (82.6 per cent), Section D (72.4 per cent), Section G (93.6 per cent), Section H (92 per cent), Section J (65.3 per cent) and Section O (63.6 per cent).
- ❖ In urban areas, among male workers engaged in different industry sections, the share of self-employed workers was more than 50 per cent in Section A (65.4 per cent), Section B (51.4 per cent), G (72.3 per cent) and Section O (64 per cent).
- ❖ In urban areas, among female workers engaged in different industry sections, the share of self-employed workers was more than 50 per cent in Section A (53.4 per cent), Section D (66 per cent), Section G (77.3 per cent) and Section H (75 per cent).

¹ The descriptions of Sections and Divisions of NIC-2004 are given in Annexure 1 of Chapter Two of this Report.

(e) Location of workplace of self-employed workers:

- ❖ Nearly one-half of the male self-employed in the AGE GC sector and nearly three-fourths of the female self-employed worker in the AGE GC sector worked at ‘home’².
- ❖ A higher proportion of female self-employed workers in AGE GC sector were working in ‘home’ than the male self-employed workers in both rural and urban areas.
- ❖ Nearly 53.4 per cent of the male self-employed persons in AGE GC sector worked in ‘home’ compared to 72.2 per cent of the female self-employed persons in AGE GC sector in rural areas.
- ❖ Nearly 54.2 per cent of the male self-employed persons in AGE GC sector worked in ‘home’ compared to 77.3 per cent of the female self-employed persons in AGE GC sector in urban areas.
- ❖ In the non-agricultural sector, nearly 73.7 per cent of the female self-employed in rural areas compared to 27.6 per cent of the male self-employed worked at ‘home’.
- ❖ In the non-agricultural sector, 71.6 per cent of the female self-employed in the urban areas had worked at ‘home’ while 20.7 per cent of the male self-employed in urban areas.

(f) Different forms of product specification of the ‘employer’³

- ❖ Among self-employed workers in AGE GC sector nearly 84.7 per cent of the male and 94.3 per cent of female at the all-India level worked without any product specification.
- ❖ In AGE GC sector, proportion of male self-employed workers in rural and urban areas working without any product specification of the employer was around 84.8 per cent and 83.8 per cent respectively, while the proportion of female self-employed workers in rural and urban areas working without any product specification of the employer was also nearly 94.3 per cent and 95.3 per cent respectively.
- ❖ The proportion of self-employed workers working with the product specification either wholly or mainly among self-employed workers in AGE GC sector was nearly 5.7 per cent among male and 2.1 per cent among female in rural areas, while the corresponding proportions were 12.2 per cent for urban male and 3.5 per cent among urban females.
- ❖ Nearly 21.5 per cent of the rural male self-employed and 35.1 per cent of the rural female workers in the non-agricultural sector worked where the product specification by the ‘employer’ was either ‘wholly or mainly’ while the corresponding proportions in the urban areas were 22.9 per cent for males and 38.7 per cent for females.

² The locations of the following workplaces were considered as home: *own dwelling unit, structure attached to own dwelling unit and open area adjacent to own dwelling unit.*

³ The term ‘employer’ meant a person, natural or legal, who, either directly or through an intermediary, whether or not intermediaries are provided for in national legislation, gives out home work in pursuance of his or her business activity.

(g) Self-employed workers working under product specification of the employer by type of provision of credit/raw materials/ equipments:

- ❖ Among the self-employed workers in the non-agricultural sector, who worked under the specification of the ‘employer’, preponderance of *own arrangement* in respect of credit/raw materials/equipments was noticed for males only in both rural and urban areas.
- ❖ In rural areas in the non-agricultural sector, 61.2 per cent of self-employed males and in urban areas 67.8 per cent of self-employed males, who worked under the specification of the ‘employer’, had made *own arrangement* of the different types of provisions.
- ❖ A lower proportion of female self-employed workers in the non-agricultural sector compared to male workers, who worked under the specification of the ‘employer’, in both rural and urban areas had made *own arrangement* for credit/raw materials/equipments: nearly 29.1 per cent of the self-employed females in rural areas and 34.5 per cent of the self-employed females in urban areas.

(h) Self-employed workers working under product specification of the employer by number of outlets of disposal, basis of payment, type of specification:

- ❖ Nearly 59 per cent of the rural male self-employed workers in the non-agricultural sector working under given specification of the employer has only 1 outlet of disposal compared to 82.5 per cent for females and in urban areas the corresponding proportions were 58.9 per cent for males and 77.9 per cent for females.
- ❖ Nearly 69.7 per cent of the rural male self-employed workers in the non-agricultural sector working under given specification of the employer received piece rate payment compared to 84 per cent for rural females and in urban areas the corresponding proportions were 68 per cent for males and 87.5 per cent for females.
- ❖ Nearly 75.6 per cent of the rural male self-employed workers in the non-agricultural sector working under given specification of the employer received oral specification compared to 88.6 per cent for rural females and in urban areas the corresponding proportions were 72.6 per cent for males and 91.6 per cent for females.

NOTES ON TABLES

1. Estimates are provided separately for rural and urban areas and for males and females.
2. The estimates presented in the report, in general, refer to the mid-point of the survey period (July 2009 – June 2010) of NSS 66th round, i.e., 01.01.2010.
3. It may be noted that as the tables are generally presented as ‘per 1000 distribution’ or ‘estimates per 1000’, the figures are rounded off. Thus, while using the ratios from the survey results, it is to be noted that the accuracy of these derived aggregates will be limited to the number of significant digits available in the ratio or percentage estimates presented in the report. The estimated aggregates, wherever possible, can be used to get ratios with more significant digits.
4. If there are no persons in a particular category, the estimates/estimated proportions of persons in that category becomes 0. Estimated numbers per 1000 are also shown as 0, when they are greater than 0 but less than 0.5.
5. In the detailed tables, in some of the deeper classifications, some sample sizes may be small and this may have a bearing on the precision of the corresponding estimates.
6. The cell-level figures in the tables, when added up, may not exactly be equal to the figure shown against the ‘total’ column (or line) due to (i) rounding off and/or (ii) presence of non-response cases.

Chapter One

Introduction

1.1 The Report in Perspective

1.1.1 The National Sample Survey Office (NSSO), as a part of its 66th round survey programme during the period July 2009 - June 2010, carried out an all-India household survey on the subject of employment and unemployment in India. In this survey, the nation-wide enquiry was conducted to generate estimates of various characteristics pertaining to employment and unemployment and labour force characteristics at the national and State levels. Information on various facets of employment and unemployment in India was collected through a schedule of enquiry (Schedule 10) adopting the established concepts, definitions and procedures.

1.1.2 In the NSS 66th round survey on employment and unemployment, some probing questions were asked to the self-employed persons in usual status for collection of information for characterisation of the self-employed persons as Home Based Workers (HBW)¹. The information on these probing questions was collected from the self-employed persons in the usual status for whole of the non-agricultural sector and a part of the agricultural sector² excluding 'growing of crops; market gardening; horticulture' (NIC-2004 group 011) and 'growing of crops combined with farming of animals' (NIC-2004 group 013). Thus, coverage of the activities for collection of information of the self-employed persons was restricted to those workers engaged in industry groups 012, 014, 015 and industry divisions 02, 05, 10-99 of NIC-2004. Of these industry groups/ divisions, 012, 014, 015, 02 and 05 are in the [agricultural sector *excluding growing of crops, market gardening, horticulture and growing of crops combined with farming of animals (AGEGC activities for short henceforth)*].

1.1.3 This report, the fourth in the series of eight reports³ planned for NSS 66th round survey on employment and unemployment (Schedule 10), presents various features of the self-employment persons in usual status (ps+ss) workforce, like, their statuses of employment⁴, industry of activity of the self-employed persons, location of workplace, whether worked under given product specification of the employer. For the self-employed persons who worked wholly or mainly under product specification of the employer, further information was collected on *who provided credit / raw material / equipment, basis of payment, number of outlets of disposal, type of specification*.

1.1.4 It may be mentioned that NSSO during the 55th round survey (July 1999- June 2000), also collected information, through employment-unemployment survey (Schedule 10), in

¹ Concepts on Home Based Workers (HBW) are given in Chapter Two.

² The coverage of the activities of the agricultural sector for collection of information on enterprise type and conditions of employment were 'farming of animals' (NIC-2004 group 012), 'agricultural and animal husbandry service activities, except veterinary activities' (NIC-2004 group 014), 'hunting, trapping and game propagation including related service activities' (NIC-2004 group 015), 'forestry, logging and related service activities' (NIC-2004 division 02), and 'fishing' (NIC-2004 division 05).

³ The plan for release of results are given at the end of this chapter

⁴ The statuses of employment of the self-employment persons are: *own account workers, employer and helper in household enterprises* .

respect of self-employed workers engaged in the non-agricultural enterprises regarding *location of workplace, whether worked under given specification, who provided credit / raw material / equipment, basis of payment, number of outlets of disposal*, etc. The results of these aspects of the self-employed persons have been presented in NSS Report No. 460⁵.

1.2 Genesis of NSS Employment and Unemployment Survey

1.2.1 The quinquennial survey on employment-unemployment is one of the important surveys conducted regularly by the NSSO. The first such survey was conducted during September 1972 - October 1973 corresponding to the 27th round of NSSO. The present survey is the eighth in the series of such surveys.

1.2.2 *Past Quinquennial Surveys*: The assessment of the volume and structure of employment and unemployment using large scale household surveys commenced with the NSS 9th round (May - September, 1955). Subsequently NSSO conducted a number of surveys on this subject to firm up the concepts and methods. The core conceptual framework for conducting such surveys was put in place by an "Expert Committee on Unemployment Estimates" (popularly known as the Dantwala Committee), set up by the Planning Commission. The Expert Committee reviewed these surveys and the indicators generated from such surveys conducted by NSS in the past. The concepts and definitions recommended by this committee formed the basis of the first quinquennial survey on employment and unemployment conducted in the 27th round of NSS (September 1972 – October 1973). Since then, six comprehensive quinquennial surveys on employment and unemployment situation in India have been carried out in the past by the NSSO prior to the present quinquennial survey. These were carried out during the 32nd round (July 1977 – June 1978), 38th round (January 1983 – December 1983), 43rd round (July 1987 – June 1988), 50th round (July 1993 – June 1994), 55th round (July 1999 – June 2000), 61st round (July 2004- June 2005) in which concepts, definitions and procedures were based primarily on the recommendations of the Dantwala Committee. The results of these surveys have been brought out in the form of NSS reports.

1.2.3 *Other surveys on employment-unemployment*: Apart from these quinquennial surveys on employment and unemployment, NSSO had also been collecting information on certain key items on employment and unemployment, as a part of annual series, from a smaller sample of households in each round since its 45th round (July 1989 - June 1990) through the schedule on Household Consumer Expenditure (Schedule 1.0). The objective of data collected in the annual series was to measure employment and unemployment indicators in terms of the usual and current weekly statuses only and study of these indicators in respect of category of employment, industrial distribution of the usually employed, etc. These procedures continued till the 59th round (January-December 2003) of NSS. In the annual rounds, only activity status and industry of work according to usual principal status, subsidiary status and current weekly status approach were collected through a few columns of the demographic block of the Consumer Expenditure Schedule (Schedule 1.0). Particulars of employment and unemployment according to the usual principal status and usual subsidiary status were collected in the annual rounds by following a similar approach as in the quinquennial rounds. In the quinquennial rounds, particulars of current

⁵ NSS Report No. 460: Non-agricultural workers in informal sector based on Employment-Unemployment Survey, 1999-2000.

daily status of the household members are collected and current weekly status is derived from them, whereas in the annual rounds, current weekly status has been obtained through a direct query. In the 60th round (January-June 2004), a separate schedule on employment and unemployment was canvassed for the first time in an annual round and particulars on employment and unemployment was collected in the same manner as that of the quinquennial rounds. In NSS 62nd round (July 2005 - June 2006) and in NSS 64th round (July 2007- June 2008) also a separate schedule on employment and unemployment, similar to the one canvassed during NSS 60th round, was canvassed and particulars on labour force were collected in the manner similar to the quinquennial rounds.

1.3 Scope of NSS 66th round Survey on Employment and Unemployment

1.3.1 The critical issues in the context of labour force enquiries pertain to defining the labour force and measuring participation of labour force in different economic activities. The activity participation of the people is not only dynamic but also multidimensional; it varies over regions, age, education, gender, industry and occupational categories. In NSS surveys, persons are classified into various activity categories on the basis of activities pursued by them during certain specified reference periods. Three reference periods are used in NSS surveys, viz. (i) one year, (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. The activity status determined on the basis of the reference period of one year is known as the usual activity status (US) of a person, that determined on the basis of a reference period of one week is known as the current weekly status (CWS) of the person and the activity status determined on the basis of the engagement on each day during the reference week is known as the current daily status (CDS) of the person.

1.3.2 In NSS 66th round Employment & Unemployment schedule, the major features of data collected in NSS 61st round were retained. In addition, some information on 'Home based workers' was collected. There is another specific importance associated with the period of NSS 66th round. The present quinquennial round is the first one, since the major public intervention in the rural labour market made with the enactment of the Mahatma Gandhi National Rural Employment Guarantee Act 2005. The survey instruments for NSS 66th round appropriately incorporated the assimilation of data on some salient aspects relating to MGNREGA.

1.3.3 In NSS 66th round, data on employment-unemployment characteristics were collected through Schedule 10. The schedule captured a range of information on the following aspects:

- i) *Household characteristics*, like household size, religion, social group, land possessed, land cultivated, etc. For the rural households information was collected, on whether the household had Mahatma Gandhi National Rural Employment Guarantee (MGNREG) job card, whether got work in MGNREG works during the last 365 days, number of days got work in MGNREG works and mode of payment of the wages earned in MGNREG works. Information on household monthly consumer expenditure was also collected through a worksheet to study the employment-unemployment characteristics with the level of living of the population.
- ii) *Demographic particulars*, like age, sex, educational level, status of current attendance and vocational training.

iii) *Usual principal activity status* and *subsidiary economic activity status* of the all persons.

iv) *Particulars of the enterprise* for all the usual status workers (excluding those engaged in growing of crops and growing of crops combined with farming of animals) viz., location of work place, type of enterprises, number of workers in the enterprise etc. and some *particulars on the conditions of employment* for the employees, like type of job contract, eligibility for paid leave, availability of social security benefits, etc. For self-employed persons in the usual status, some particulars were collected for characterisation of the self-employed persons as home-based workers.

v) Extent of *underutilization of the labour time* and on the *qualitative aspects of employment*, like changes in activity status, occupation /industry, existence of trade unions/associations, nature of employment (permanent/temporary), etc.

vi) *Participation in specified activities* by the household members who are classified as engaged in domestic duties in the usual principal activity status.

1.4 The survey outline of NSS 66th round survey

1.4.1 *Geographical coverage*: The survey covered the whole of the Indian Union *except* (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remained inaccessible throughout the year. However, all the sample first stage units of both rural and urban areas of Leh, Kargil and Poonch districts of Jammu & Kashmir became casualty and therefore these districts were outside the survey coverage.

1.4.2 *Sub-round*: The fieldwork of the 66th round of NSSO started from 1st July, 2009 and continued till 30th June, 2010. As usual, the survey period of this round was divided into four sub-rounds, each with a duration of three months, the 1st sub-round period ranging from July to September 2009, the 2nd sub-round period from October to December 2009 and so on. An equal number of sample villages/blocks (FSUs) was allotted for survey in each of these four sub-rounds. The survey used the interview method of data collection from a sample of randomly selected households.

1.5 Sample Design

1.5.1 A stratified multi-stage design was adopted for the 66th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. In addition, two non-UFS towns of Leh and Kargil of Jammu & Kashmir were also treated as FSUs in the urban sector. The ultimate stage units (USU) were households in both the sectors. Hamlet-groups/sub-blocks constituted the intermediate stage whenever these were formed in the sample FSUs. For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks constituted the sampling frame. For non-UFS towns, frame consisted of the individual towns (only two towns, viz., Leh & Kargil constituted this frame). Within each district of a State/ UT, two basic strata were formed as follows: rural stratum comprising all rural areas of the district and urban stratum comprising all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of

them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum. There was no sub-stratification in the urban sector. However, to get adequate number of child workers, for all rural strata, each stratum was divided into 2 sub-strata. These were, sub-stratum 1: all villages with proportion of child workers $(p) > 2P$ (where P is the average proportion of child workers for the state/ UT as per Census 2001) and sub-stratum 2: remaining villages.

1.5.2 At the all-India level, a total number of 12784 FSUs were allocated for survey in the central sample. This sample size was at par with the sample size of NSS 61st round. In addition, 24 State sample FSUs (16 for rural sector and 8 for urban sector) of Leh and Kargil districts of J & K were included in the central sample. The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between two sectors in proportion to population as per *census 2001* with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (to the extent possible) was allocated to each state/ UT separately for rural and urban areas. Further the State level allocations for both rural and urban areas were adjusted marginally in a few cases to ensure that each stratum/ sub-stratum got a minimum allocation of 4 FSUs. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds.

1.5.3 For the rural sector, from each stratum/ sub-stratum, required number of sample villages were selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For urban sector, from each stratum FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples. All households listed in the selected village/block/ hamlet-groups/sub-blocks were stratified into three second stage strata (SSS). A total of 8 households were selected from each sample village/block for canvassing the employment and un-employment schedule. The sample households from each of the second stage strata were selected by SRSWOR.

1.5.4 Out of the total number of 12,808 FSUs (7,524 villages and 5,284 urban blocks) allotted for the central sample⁶ (including 24 state sample FSUs of Leh and Kargil districts of J & K: 16 for rural sector and 8 for urban sector), 12,654 FSUs (7,402 villages and 5,252 urban blocks) could be surveyed at the all-India level for canvassing Schedule 10. The number of households surveyed was 1,00,957 (59,129 in rural areas and 41,828 in urban areas) and number of persons surveyed was 4,59,784 (2,81,327 in rural areas and 1,78,457 in urban areas). The sample design and estimation procedure used for the survey is given in Appendix B of this report.

1.5.5 The domains of rural and urban sector in the survey are co-terminus with the criterion adopted in census. The urban frame used in the survey is the latest updated UFS

⁶ The sample selected for NSS 66th round which was surveyed by NSSO is termed "Central sample". As is usual in the regular NSS rounds, most States and Union Territories participated in the survey: the sample surveyed by State Government officials is termed as "State sample".

that takes into account the newly declared towns after the last census 2001. Accordingly the rural sector is the one that is not urban.

1.6. Contents of the Report

1.6.1 Based on the data collected in NSS 66th round, estimates pertaining to the characteristics of the self-employed persons in the usual status have been presented in this report.

1.6.2 This report contains three chapters including the present introduction and four appendices. Chapter Two discusses the concepts and definitions of only those terms that are relevant in connection with various items covered in this report. Chapter Three presents the main findings of the survey with respect to the different social groups. The detailed tables forming the basis of this report are presented in Appendix A. Appendix B gives a detailed description of the sample design and estimation procedure used for the survey. In Appendix C, the Projected Population as on 1st March 2009 and 1st March 2010 supplied by RGI Office have been presented along with those projected for 1st January 2010 using compound rate of growth. The projections have been given for, male and female, separately, for rural and urban for each State/U.T. Appendix D gives a facsimile of the schedule canvassed in the survey. The detailed Tables (Appendix A) are given in a CD along with the report.

1.7 NSS 66th Round Reports on Employment and Unemployment

1.7.1 The results of NSS rounds are released in reports based on comprehensive tabulation of subject parameters and indicators in various cross classifications generated from the central sample data. Corresponding to NSS 66th round quinquennial survey on Employment and Unemployment, the results are planned for release in eight reports. In addition to these eight reports planned, a document on *Key Indicators of Employment and Unemployment in India, 2009-10* has already been released in June 2011. Of the eight reports, the present one is the fourth in the series of reports, while Report no. 537 (*Employment and Unemployment Situation in India, 2009-10*), Report no. 539 (*Informal Sector and Conditions of Employment in India*) and Report no. 543 (*Employment and Unemployment Situation among Social Groups in India*) have already been released. The tentative titles of the other four reports planned to be released are:

- (i) *Status of Education and Vocational Training in India*
- (ii) *Participation of Women in Specified Activities along with Domestic Duties*
- (iii) *Employment and Unemployment situation in Cities and Towns in India*
- (iv) *Employment and Unemployment situation among Major Religious groups in India*

Chapter Two

Concepts and Definitions

2.0 The concepts and definitions of some important terms used in the survey and relevant to this report are explained in the following paragraphs.

2.1 **Household:** A group of persons who normally lived together and took food from a common kitchen constituted a household. The adverb “normally” means that temporary visitors and guests (whose total period of stay in the household was expected to be less than 6 months) were excluded but temporary stay-aways (whose total period of absence from the household was expected to be less than 6 months) were included. Thus a child residing in a hostel for studies was excluded from the household of his/her parents, but a resident domestic servant or paying guest (but not just a tenant in the house) was included in the employer’s/host’s household. “Living together” was given more importance than “sharing food from a common kitchen” in drawing the boundaries of a household in case the two criteria were in conflict. However, in the special case of a person taking food with his family but sleeping elsewhere (say, in a shop or a different house) due to shortage of space, the household formed by such a person’s family members was taken to include the person also. Each inmate of a hotel, mess, boarding-lodging house, hostel, etc., was considered to be a single-member household except that a family living in a hotel (say) was considered one household only. The same principle was applicable for the residential staff of such establishments. The size of a household is the total number of persons in the household.

2.2 **General educational level:** A person was considered as literate if he/she could both read and write a simple message with understanding in at least one language. For all the individuals who were found to be literate, the general level of education was collected in terms of highest level of education successfully completed. Highest level of education successfully completed by each member of the household was decided by considering his/her all general/ technical/ vocational educational level and was recorded in terms of 12 categories viz. (i) not literate, (ii) literate without formal schooling: (a) Education Guarantee Scheme (EGS)/Non-formal Education Courses (NFEC)/ Adult Literacy Centres (AEC), (b) Total Literacy Campaign (TLC), (c) others; (iii) literate but below primary, (iv) primary (v) middle, (vi) secondary, (vii) higher secondary, (viii) diploma/certificate course, (ix) graduate, and (x) postgraduate and above. The criterion for deciding primary, middle, secondary, etc. levels were the same as that has been followed in the concerned states/union territories. The category ‘diploma or certificate course’ meant diploma or certificate courses in general education, technical education or vocational education, which is below graduation level. Diploma or certificate courses in general education, technical education or vocational education, which is equivalent to graduation level, was considered under the category ‘graduate’. Similarly, diploma or certificate courses in general education, technical education or vocational education, which is equivalent to post-graduation level and above were considered under the category ‘post-graduate and above’.

2.3 **Economic activity:** The entire spectrum of human activity falls into two categories – economic activities and non-economic activities. Any activity resulting in production of

goods and services that add value to national product was considered as an economic activity for the employment and unemployment survey. Such activities included production of all goods and services for market (i.e. for pay or profit) including those of government services, and, the production of primary commodities for own consumption and own account production of fixed assets.

2.3.1 The full spectrum of economic activities as defined in the UN system of National Accounts was not covered in the definition adopted for the NSS 66th round survey of Employment and Unemployment. Production of any good for own consumption is considered as economic activity by UN System of National Accounts but production of only primary goods for own consumption was considered as economic activity by NSSO. While the former considers activities like own account processing of primary products as economic activities, in the NSS surveys, processing of primary products for own consumption was not considered as economic activity.

2.3.2 The term 'economic activity' as defined in the employment and unemployment survey of NSS 66th round, therefore, included:

(i) all the market activities performed for pay or profit which result in production of goods and services for exchange.

(ii) of the non-market activities,

(a) all the activities relating to the primary sector (i.e. industry Divisions 01 to 14 of NIC-2004) which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption

and

(b) activities relating to the own-account production of fixed assets, which include production of fixed assets including construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor.

As per the practice followed in earlier rounds, certain activities like prostitution, begging, etc., which though fetched earnings, were not considered as economic activities. Activity status of a person was judged irrespective of the situation whether such activity was carried out illegally in the form of smuggling or not.

2.4 Activity status: It is the activity situation in which a person was found participated in economic and non-economic activities during the reference period. According to this, a person could be in one or a combination of the following three broad activity statuses during a reference period:

- (i) working or being engaged in economic activity (work) as defined above,
- (ii) being not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' if 'work' is available and

(iii) being not engaged in any economic activity (work) and also not available for 'work'.

Broad activity statuses mentioned in (i) and (ii) above are associated with 'being in labour force' and the last with 'not being in the labour force'. Within the labour force, broad activity status (i) and (ii) were associated with 'employment' and 'unemployment', respectively.

2.4.1 Identification of each individual in terms of a unique activity status could pose a problem when more than one of the three broad activity statuses listed above were concurrently obtained in a person. In such an eventuality, the identification uniquely under any one of the three broad activity statuses was done by adopting either *the major time* or *priority criterion*. The former was used for classification of persons according to the 'usual activity status' approach and the latter for classification of persons according to the 'current activity status' approach. Each of the three broad activity statuses was further sub-divided into several detailed activity categories. If a person categorised as engaged in economic activity by adopting one of the two criteria mentioned above was found to be pursuing more than one economic activity during the reference period, the appropriate detailed activity status code was connected to that activity in which relatively long time had been spent. A similar procedure was adopted for assigning detailed activity code for persons categorised as engaged in non-economic activity and pursuing more than one non-economic activities.

2.4.2 This report discusses various features of the self-employed persons according to usual status approach and as such the discussions of the concepts relevant for usual status approach have only been made. The detailed activity statuses under each of the three broad activity statuses (viz. 'employed', 'unemployed' and 'not in labour force') and the corresponding codes used in usual status approach are given below:

<u>code</u>	<u>description</u>
working (or employed)	
<i>self-employed</i>	
11	worked in household enterprises (self-employed) as own-account worker
12	worked in household enterprises (self-employed) as an employer
21	worked in household enterprises (self-employed) as helper
<i>regular wage/ salaried employee</i>	
31	worked as regular wage/salaried employee
<i>casual labour</i>	
41	worked as casual wage labour in public works
51	worked as casual wage labour in other types of works
not working but seeking/available for work (or unemployed)	
81	sought work or did not seek but was available for work

neither working nor available for work (or not in labour force)

- 91 attended educational institutions
- 92 attended to domestic duties only
- 93 attended to domestic duties and was also engaged in free collection of goods (vegetables, roots, firewood, cattle feed, etc.), sewing, tailoring, weaving, etc. for household use
- 94 rentiers, pensioners, remittance recipients, etc.
- 95 not able to work owing to disability
- 97 others (including beggars, prostitutes, etc.)
- 98 did not work owing to sickness (for casual workers only)
- 99 children of age 0-4 years

2.5 Workers (or employed): Persons who were engaged in any economic activity or who, despite their attachment to economic activity, abstained themselves from work for reason of illness, injury or other physical disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work, constituted workers. Unpaid helpers who assisted in the operation of an economic activity in the household farm or non-farm activities were also considered as workers. In the usual status relevant activity status codes 11 to 51 were assigned for workers. Workers were further categorized as *self-employed* (relevant activity status codes: 11, 12, 21), *regular salaried/wage employee* (relevant activity status codes: 31), and *casual wage labour* (relevant activity status codes: 41 and 51).

2.6 Seeking or available for work (or unemployed): Persons who, owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing conditions of work and remuneration, were considered as those 'seeking or available for work' (or unemployed). In the usual status, activity status codes 81 were assigned for unemployed.

2.7 Labour force: Persons who were either 'working' (or employed) or 'seeking or available for work' (or unemployed) constituted the labour force. In the usual status, persons with activity status codes 11 – 81 constituted the labour force.

2.8 Not in labour force: Persons who were neither 'working' nor 'seeking or available for work' for various reasons during the reference period were considered as 'not in labour force'. Persons under this category are students, those engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young persons, prostitutes, etc. and casual labourers not working due to sickness. Activity status codes 91-95, 97 and 98 were assigned for persons belonging to category 'not in labour force'. For the purpose of this report, status code 99 was assigned to children of age 0-4 years.

2.9 Self-employed: Persons who operated their own farm or non-farm enterprises or were engaged independently in a profession or trade on own-account or with one or a few partners were treated as self-employed in household enterprises. The essential feature of the self-employed is that they have *autonomy* (decide how, where and when to produce) and *economic independence* (in respect of choice of market, scale of operation and finance) for carrying out their operation. The remuneration of the self-employed consists

of a non-separable combination of two parts: a reward for their labour and profit of their enterprise. The combined remuneration is wholly determined by the revenue from sales after netting out value of purchased inputs used in production.

2.9.1 *Categories of self-employed persons*: Self-employed persons were categorised as follows:

- (i) ***own-account workers***: those self-employed persons who operated their enterprises on their own account or with one or a few partners and who, during the reference period, by and large, ran their enterprise without hiring any labour. They could, however, have had unpaid helpers to assist them in the activity of the enterprise;
- (ii) ***employers***: those self-employed persons who worked on their own account or with one or a few partners and, who, by and large, ran their enterprise by hiring labour; and
- (iii) ***helpers in household enterprise***: those self-employed persons (mostly family members) who were engaged in their household enterprises, working full or part time and did not receive any regular salary or wages in return for the work performed. They did not run the household enterprise on their own but assisted the related person living in the same household in running the household enterprise.

2.10 ***Regular wage/salaried employee***: These were persons who worked in others' farm or non-farm enterprises (both household and non-household) and, in return, received salary or wages on a regular basis (i.e. not on the basis of daily or periodic renewal of work contract). This category included not only persons getting time wage but also persons receiving piece wage or salary and paid apprentices, both full time and part-time.

2.11 ***Casual wage labourer***: A person who was casually engaged in others' farm or non-farm enterprises (both household and non-household) and, in return, received wages according to the terms of the daily or periodic work contract, was a casual wage labourer.

2.12 ***Public works***: 'Public works' were those activities which were sponsored by Government or Local Bodies, and which covered local area development works like construction of roads, dams, bunds, digging of ponds, etc., as relief measures, or as an outcome of employment generation schemes under the poverty alleviation programme such as *Mahatma Gandhi National Rural Employment Guarantee* (MGNREG) public works, *Sampoorna Grameen Rozgar Yojana* (SGRY), *National Food for Work Programme* (NFFWP), etc. The coverage of schemes under 'public works' was restricted to those schemes through which the Government generated wage employment under poverty alleviation programme, or relief measures. The types of works that were generally undertaken through these schemes, were watershed development, drought proofing, land levelling, flood control, laying pipes or cables, sanitation, water harvesting, irrigation canal, development of orchard, road construction, building construction / repair, running crèche, etc. To distinguish between '*public works*' and works not classifiable as '*public works*', some broad characteristics of '*public work*' were identified, viz. the primary objective is generation of wage employment and poverty alleviation, and creation of community asset as an outcome in achieving those main objectives.

2.13 Different approaches followed to determine activity status: The persons surveyed were classified into various activity categories on the basis of the activities pursued by them during certain specified reference periods. There were three reference periods for this survey. These are: (i) one year (ii) one week and (iii) each day of the reference week. Based on these three periods, three different measures of activity status are arrived at. These are termed respectively as usual status, current weekly status and current daily status. In this report, the various features of the self-employed persons have been discussed in the usual status approach. The procedure adopted to arrive at the usual status are elucidated below.

2.13.1 Usual principal activity status: The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively long time (i.e. major time criterion) during the 365 days preceding the date of survey is considered as the *usual principal activity status* of the person. To decide the usual principal activity of a person, first a two stage dichotomous-classification was followed for determining the broad usual principal activity status (employed or unemployed or not in labour force) of the person. At the first stage, persons were first categorised as those in the *labour force* (either employed or unemployed) and those *not in the labour force* depending on the major time spent during the 365 days preceding the date of survey. Persons thus adjudged as not belonging to the labour force were assigned the broad activity status 'neither working nor available for work' (*not in the labour force*). At the second stage, for persons belonging to the labour force, the broad activity status of either 'working' (*employed*) or 'not working but seeking and/or available for work' (*unemployed*) was ascertained based on the same criterion viz. relatively long time spent in accordance with either of the two broad statuses within the labour force during the 365 days preceding the date of survey. Within the broad activity status so determined, the detailed activity status of a person pursuing more than one such activity was determined once again on the basis of the relatively long time spent on such activities. In terms of activity status codes, codes 11-51 were assigned to persons classified as workers and codes 91-97 to those not in the labour force. In the usual status approach, a single code 81 was assigned to persons seeking or available for work (unemployed persons) while two separate codes 81 (sought work) and 82 (did not seek but was available for work) were assigned to unemployed persons according to current weekly status and current daily status approach.

2.13.2 Usual subsidiary economic activity status: A person whose usual principal status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference year of 365 days preceding the date of survey or for a minor period, which is not less than 30 days, during the reference year. The status in which such economic activity was pursued was the subsidiary economic activity status of that person. Activity status codes 11 to 51 only were used for the subsidiary economic activity performed by a person. It may be noted that engagement in work in subsidiary capacity may arise out of the two following situations:

- (i) a person may be engaged in a relatively long period during the last 365 days in some economic (non-economic) activity and for a relatively minor period, which is not less than 30 days (not necessarily for a continuous period), in another economic activity (any economic activity). The economic activity, which was pursued for a relatively minor period *but not simultaneously with principal activity*, was considered as his/her subsidiary economic activity.

- (ii) a person may be pursuing an economic activity (non-economic activity) almost throughout the year in the principal status and also simultaneously pursuing another economic activity (any economic activity) for a relatively short time in a subsidiary capacity. The economic activity, which was pursued for a relatively short time, was considered as his/her subsidiary economic activity.

2.13.3 Usual activity status considering principal and subsidiary status taken together:

The usual status, determined on the basis of the usual principal activity and usual subsidiary economic activity of a person taken together, is considered as the usual activity status of the person and is written as usual status (ps+ss). According to the usual status (ps+ss), workers are those who perform some work activity either in the principal status or in the subsidiary status. Thus, a person who is not a worker in the usual principal status is considered as worker according to the usual status (ps+ss), if the person pursues some subsidiary economic activity for 30 days or more during 365 days preceding the date of survey.

2.14 Industry of the work activity: For the employed persons, to record the industry of work, 5-digit classification of NIC-2004 was used. To identify certain category of workers under Division 95 (Private households with employed persons) of NIC-2004, eight additional codes were used in the survey viz., housemaid /servant (95001), cook (95002), gardener (95003), gatekeeper/chowkidar/watchman (95004), governess/baby-sitter (95005), tutor (95006), driver (95007) and 'others' (95009). Industry Divisions 96 (except the activities covered in other Industry Divisions) and 97 of NIC-2004 were not used for the purpose of collection of information on industry of activity. The entire activities described under Division 97 are not under the production boundary of Indian System of National Accounts (ISNA) and are not also considered as economic activities in the NSS survey. A part of the activities under Division 96 (viz., hunting and gathering, farming and the production of shelter), which is within the production boundary of ISNA, is also considered as economic activities in NSS surveys and the industry of these undifferentiated activities were judged in the usual manner as done now, by considering the industry in which major time was spent. Thus, this part of activities got classified against the respective industries under divisions 01-14 relating to the primary sector or 45 relating to construction. The rest of Division 96 is outside the production boundary of ISNA and was not considered as economic activity for the NSS survey. Broad structure of NIC-2004 (Sections and Divisions) have been presented at the end of this Chapter in Annexure I.

2.15 Procedure for collecting monthly per capita consumer expenditure (MPCE): For collection of data on total expenditure of the household from employment and unemployment schedule (Schedule 10), a worksheet was used in the Schedule 10 of the 66th round. The approximate value of consumer expenditure obtained through the worksheet has been used for studying employment and unemployment characteristics by different levels of living of the household members. The worksheet contained 36 different components of household consumer expenditure. Depending upon the type of item, either of the two reference periods viz., 30 days and 365 days, was used to record consumption of different groups of items. The items of consumption were classified into four groups and three different approaches viz (a) consumption approach, (b) expenditure approach and (c) first-use approach, were followed for defining consumption of items. The different groups were (i) food (other than 'cooked meals'), pan, tobacco & intoxicants and fuel &

light, (ii) cooked meals, miscellaneous goods and services including education, medical, rent, taxes and cess, (iii) clothing and footwear and (iv) durable goods. The procedure followed for defining consumption of the four groups were (i) consumption approach, (ii) expenditure approach, (iii) first-use approach and (iv) expenditure approach, respectively. The definition of household consumer expenditure and the procedure for evaluating that was the same for both Schedule 10 and Schedule 1.0 (Household Consumer Expenditure).

2.15.1 Quintile classes of MPCE: The population of any region or domain can be divided into five quintile classes of MPCE, where the 1st quintile of the distribution of MPCE means the level of MPCE below which 20 per cent of the population lie, the second quintile, the level below which 40 per cent of the population lie, and so on. In this round quintiles are estimated separately for the distribution of MPCE in the rural and urban sector of each State/U.T and all-India. Some of the indicators, in this report, have been studied with respect to MPCE quintile classes, separately for rural and urban areas. However, such indicators for rural and urban areas combined have been presented considering all quintile classes, instead of presenting separately for each quintile class. In detail tables (Appendix A) also, same format of presentation of these indicators has been followed whenever these are presented for quintile classes.

2.16 Location of workplace: The location of workplace for each of the working members of a household was categorised as follows:

- no fixed workplace
- workplace located in:
 - own dwelling unit
 - structure attached to own dwelling unit
 - open area adjacent to own dwelling unit
 - detached structure adjacent to own dwelling unit
 - own enterprise/unit/office/shop but away from own dwelling
 - employer's dwelling unit
 - employer's enterprise/unit/office/shop but outside employer's dwelling
 - street with fixed location
 - construction site
 - others

The specified locations (except 'no fixed workplace') of workplace was further distinguished depending upon the location of the workplace in rural and urban areas.

2.17 Working under given specifications: It was ascertained whether in relation to the activity status recorded in the usual status, the person carried out the production of goods and services on the basis of given or laid product-specifications of the 'employer'. The term 'employer' meant a person, natural or legal, who, either directly or through an intermediary, whether or not intermediaries are provided for in national legislation, gives out home work in pursuance of his or her business activity. When a person procured the order/contract from the 'employer' for his or her household enterprise to supply goods, normally an implicit or explicit specification of the product, written or oral, is laid by the 'employer'. Sometimes, the whole activity is carried out under the specifications of the 'employer', or a part under the specifications of the 'employer' and rest of his own specification. The appropriate situation on whether worked under given specification was

ascertained and categorised as follows: (i) wholly, (ii) mainly, (iii) partly, (iv) no and (v) not known. If the production of the whole range of products/services corresponding to the activity of the self-employed person was carried out according to the product specification of the 'employer', the work was treated as performed 'wholly' under the given specification of the employer. On the other hand, if majority of the production, in terms of value of output (i.e., more than or equal to 50 per cent), was carried out according to the product specification of the 'employer', the work was treated as performed 'mainly' under the given specification of the employer. However, if only a part of the production was carried out according to the product specification of the 'employer', the work was treated as performed 'partly' under the given specification of the employer. If the self-employed person did not work under the product specification of any 'employer', the work was treated as performed 'not' under the given specification of the employer.

2.18 Source of credit / raw material / equipment: Data on some features mentioned hereafter were collected for only those self-employed persons who worked *wholly* or *mainly* under the *given product specifications*. For such self-employed persons, it was ascertained whether the 'employer' who gave product-specifications (in terms of the order/contract) also provided credit/raw material/equipment to them. Here, 'credit' meant cash advance for a particular order or a group of orders and for working capital only (i.e. for purchase of raw material and meeting other running expenses). However, credit provided for purchase of equipment was not considered as 'credit'; instead, it was considered as 'provided for equipments'. The various sources of *credit/raw material/equipment* were as follows: (i) own arrangement, (ii) provided by the enterprise for (a) credit only, (b) raw material only, (c) equipments only, (d) credit and raw material only, (e) credit and equipment only, (f) raw material and equipment only and (g) credit, raw material and equipment. Another category, viz. 'not known', covered cases where the informant was not aware of the nature of such arrangement.

2.19 Number of outlets of disposal: Outlet meant the 'employer' for whom the self-employed had worked. There may be cases where the self-employed had worked under the specifications of more than one 'employer'. The categorisation of number of outlets of disposal was as follows: (i) one outlet, (ii) two outlets, (iii) three or more outlets and (iv) not known

2.20 Basis of payment: The basis of payment received for the work done on which data were collected was categorised as (i) piece rate and (ii) contract rate. The first category covered cases where the payment received for the work done on order/contract was on the basis of piece rate, while the second category covered the rest of the cases.

2.21 Type of specifications: The type of specification laid by the employer on which data were collected was as follows: (i) written, (ii) oral and (iii) not known. The first two categories covered cases where the specifications laid by the 'employer' were written or oral respectively, while the third one covered cases where such specification was unknown.

2.22: Concepts relating to home-based workers

2.22.1 In the ILO (2002) report on "Women and men in the informal economy: A statistical picture", home-based workers are defined and related to homeworkers as follows: The term "home-based worker" is used to refer to the general category of workers who carry out remunerative work within their homes or in the surrounding

grounds. It does not refer to either unpaid housework or paid domestic work. Within the general category of home-based workers, there are two basic types of workers: those who work on their own (the self-employed) and those who work for others (mainly as industrial outworkers). The term “homeworker” is used to refer to a sub-set of home-based workers: namely, industrial outworkers who carry out paid work from their home. It is important to distinguish, both conceptually and statistically, between the following two categories (and related terms):

Home-based workers: all those who carry out market work at home or in adjacent grounds or premises whether as self-employed or as paid workers.

Homeworkers : those home-based workers who carry out paid work for firms/businesses or their intermediaries, typically on a piece-rate basis.

2.22.2 The ILO Convention on Homework (ILO, 1996) defined the ‘homeworker’ as follows:

“The term “homework” means work carried out by a person, to be referred to as a homeworker,

(i) in his or her home or in other premises of his or her choice ,other than the workplace of the employer;

(ii) for remuneration;

(iii) which results in a product or services as specified by the employer, irrespective of who provides the equipment, materials or other inputs used,

unless this person has the degree of autonomy and of economic independence necessary to be considered an independent worker under national laws, regulations or court decisions.

Persons with employee status do not become homeworkers within the meaning of this Convention simply by occasionally performing their work as employees at home, rather than at their usual workplaces;

The term “employer” means a person, natural or legal, who, either directly or through an intermediary, whether or not intermediaries are provided for in national legislation, gives out home work in pursuance of his or her business activity.”

2.22.3 The report of the ‘Independent Group on Home-based Workers in India’ set up by Ministry of Statistics and Programme Implementation in May 2007 recommends that:

Home-based workers are-

(a) own-account workers and contributing family workers helping the own account workers, involved in the production of goods and services, in their homes, for the market,

and

(b) workers carrying out work in their homes for remuneration, resulting in a product or service as specified by the employer(s), irrespective of who provides the equipment, materials or other inputs used; and those contributing family workers helping such workers.

Workers referred in (b) above are homeworkers working in their homes according to ILO Convention 177 on Home Work, 1996. Such homeworkers cannot be classified unambiguously into any one of the existing 'status in employment' categories. For data collection purpose, such homeworkers may be classified as own account workers.

'Home', referred to above, is defined as (i) dwelling unit and/or (ii) structure attached to dwelling unit and/or (iii) open area adjacent to the dwelling unit.

2.23 Some points on items of information collected in NSS 66th round survey on employment and unemployment on characteristics of self-employed workers

2.23.1 It may be noted that the employment and unemployment survey of NSS did not make a distinction between production of the self-employed workers for the *market* and *non-market*. However, it may be noted that the non-market activities in the context of employment and unemployment surveys of NSSO can arise out of the following:

(a) all the activities relating to the primary sector (i.e. industry Divisions 01 to 14 of NIC-2004) which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption

and

(b) activities relating to the own-account production of fixed assets, which include production of fixed assets including construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labourer or a supervisor.

2.23.2 The contributing family workers (helpers in household enterprises) were not separately identified as those helping the *own account workers* or the *employers*, in the employment and unemployment survey.

2.23.3 The status of employment of the home-workers in the employment and unemployment surveys was assigned as *self-employment* and not necessarily as *own account workers*.

2.23.4 In the employment and unemployment survey of NSS for NSS 66th round, information on *location of workplace, type of product specification, type of provision of credit/raw materials/equipment, basis of payment, number of outlets for disposal* of the product was collected. Such information can be used to study the characteristics of the self-employed workers under the coverage of the survey.

2.23.5 For the purpose of this report, 'home' has been defined as the location of workplace (i) own dwelling unit and/or (ii) structure attached to own dwelling unit and/or (iii) open area adjacent to the own dwelling unit.

2.24 Various characteristics of the self-employed workers, like, location of workplace, with specific reference to those working in 'home', type of product specification, those *working under product specification of the employer by type of provision of credit/raw materials/ equipments, basis of payment, number of outlets of disposal, basis of payment*, have been presented in the report.

Annexure I

BROAD STRUCTURE OF NIC 2004
(SECTIONS & DIVISIONS)

Section A: Agriculture, hunting and forestry

Division 01: Agriculture, hunting and related service activities

Division 02: Forestry, logging and related service activities

Section B: Fishing

Division 05: Fishing, aquaculture and service activities incidental to fishing

Section C: Mining and quarrying

Division 10: Mining of coal and lignite; extraction of peat

Division 11: Extraction of crude petroleum and natural gas; service activities incidental to oil and gas extraction, excluding surveying

Division 12: Mining of uranium and thorium ores

Division 13: Mining of metal ores

Division 14: Other mining and quarrying

Section D: Manufacturing

Division 15: Manufacture of food products and beverages

Division 16: Manufacture of tobacco products

Division 17: Manufacture of textiles

Division 18: Manufacture of wearing apparel; dressing and dyeing of fur

Division 19: Tanning and dressing of leather; manufacture of luggage, handbags, saddlery, harness and footwear

Division 20: Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials

Division 21: Manufacture of paper and paper products

Division 22: Publishing, printing and reproduction of recorded media

Division 23: Manufacture of coke, refined petroleum products and nuclear fuel

Division 24: Manufacture of chemicals and chemical products

Division 25: Manufacture of rubber and plastics products

Division 26: Manufacture of other non-metallic mineral products

Division 27: Manufacture of basic metals

Division 28: Manufacture of fabricated metal products, except machinery and equipment

Division 29: Manufacture of machinery and equipment n.e.c.

Division 30: Manufacture of office, accounting and computing machinery

Division 31: Manufacture of electrical machinery and apparatus n.e.c.

Division 32: Manufacture of radio, television and communication equipment and apparatus

Division 33: Manufacture of medical, precision and optical instruments, watches and clocks

Division 34: Manufacture of motor vehicles, trailers and semi-trailers

Division 35: Manufacture of other transport equipment

Division 36: Manufacture of furniture; manufacturing n.e.c.

Division 37: Recycling

Section E: Electricity, gas and water supply

Division 40: Electricity, gas, steam and hot water supply

Division 41: Collection, purification and distribution of water

Section F: Construction

Division 45: Construction

Section G: Wholesale and retail trade; repair of motor vehicles, motorcycles and personal and household goods

Division 50: Sale, maintenance and repair of motor vehicles and motorcycles; retail sale of automotive fuel

Division 51: Wholesale trade and commission trade, except of motor vehicles and motorcycles

Division 52: Retail trade, except of motor vehicles and motorcycles; repair of personal and household goods

Section H: Hotels and restaurants

Division 55: Hotels and restaurants

Section I: Transport, storage and communications

Division 60: Land transport; transport via pipelines

Division 61: Water transport

Division 62: Air transport

Division 63: Supporting and auxiliary transport activities; activities of travel agencies

Division 64: Post and telecommunications

Section J: Financial intermediation

Division 65: Financial intermediation, except insurance and pension funding

Division 66: Insurance and pension funding, except compulsory social security

Division 67: Activities auxiliary to financial intermediation

Section K: Real estate, renting and business activities

Division 70: Real estate activities

Division 71: Renting of machinery and equipment without operator and of personal and household goods

Division 72: Computer and related activities

Division 73: Research and development

Division 74: Other business activities

Section L: Public administration and defence; compulsory social security

Division 75: Public administration and defence; compulsory social security

Section M: Education

Division 80: Education

Section N: Health and social work

Division 85: Health and social work

Section O: Other community, social and personal service activities

Division 90: Sewage and refuse disposal, sanitation and similar activities

Division 91: Activities of membership organizations n.e.c.

Division 92: Recreational, cultural and sporting activities

Division 93: Other service activities

Section P: Activities of private households as employers and undifferentiated production activities of private households

Division 95: Activities of private households as employers of domestic staff

Division 96: Undifferentiated goods-producing activities of private households for own use

Division 97: Undifferentiated service-producing activities of private households for own use

Section Q: Extraterritorial organizations and bodies

Division 99: Extraterritorial organizations and bodies

Chapter Three

Summary of Findings

3.0 Introduction

3.0.1 *General*: In NSS 66th round, some features of the self-employed persons in the usual status were collected for those engaged in industry groups/divisions ‘*farming of animals*’ (NIC-2004 group 012), ‘*agricultural and animal husbandry service activities, except veterinary activities*’ (NIC-2004 group 014), ‘*hunting, trapping and game propagation including related service activities*’ (NIC-2004 group 015), ‘*forestry, logging and related service activities*’ (NIC-2004 division 02), and ‘*fishing*’ (NIC-2004 division 05) and ‘*non-agriculture sector*’ (NIC-2004 division 10-99). This report presents various features of the self-employed persons, like *location of workplace*, *whether worked under specifications of the employer*, etc. Moreover, for those self-employed persons who worked ‘*wholly or mainly*’ under product specification of the ‘*employer*’, discussions have been made on the aspects of ‘*source of credit/raw materials/equipment*’, ‘*number of outlets of disposal*’, ‘*basis of payment*’ and ‘*type of product specifications*’. The report provides these estimates for India and the constituent states and union territories. The discussions in this chapter, however, focus on the all-India estimates.

3.0.2 In this report, unless otherwise mentioned, the coverage of self-employed workers excludes industry group 011 (*growing of crops, market gardening, horticulture*) and industry group 013 (*growing of crops combined with farming of animals*) of NIC-2004— which are referred to in this report as the AGGC sector. Thus, the characteristics of the self-employed workforce in the usual status (ps+ss) is discussed in the report for workers engaged in the entire non-agricultural sector, and for workers engaged in the (*AG*)*gricultural sector (E)xcluding only (G)rowing of (C)rops, market gardening, horticulture, and growing of crops combined with farming of animals* (referred to in this report as the AGEGC sector).

3.0.3 *Reference period of the estimates*: The estimates presented in the report, in general, refer to the mid-point of the survey period (July 2009– June 2010) of NSS 66th round i.e. 01.01.2010.

3.0.4 *Use of estimated aggregates*: The estimates in this report are generally presented, as ratios. However, the estimates of aggregates are also given in the margin of the detailed tables presented for all-India levels. It may be noted that estimates of ratios are generally expected to be robust and the estimates of aggregates may be used only to combine the ratios. However, to arrive at estimated absolute number in any category, the users may apply the survey estimates of ratios to the census population or projections¹. It may also be noted that as the tables are generally presented as ‘per 1000 distribution’ or rates ‘per 1000’, the figures are rounded off. Thus, while using the ratios from the survey results, it is to be noted that the accuracy of these derived aggregates will be limited to the number of significant digits available in such ratios. To arrive at the absolute number in any category, the survey estimates of ratios are to

¹ In Appendix C, the Projected Population as on 1st March 2009 and 1st March 2010 supplied by RGI Office have been presented along with those projected for 1st January 2010 using compound rate of growth. The projections have been given for, male and female, separately, for rural and urban for each State/U.T. These population projections pre-date the population Census 2011 results.

be applied to the projected populations as on 01.01.2010, the mid-point of the 66th round survey period (July 2009 to June 2010).

3.0.5 It may be mentioned that discussions are mainly centered on the all-India estimates. A comparison with the results of 55th round (July 1999 – June 2000) is also made in some cases. While all-India summary results are presented along with the write-up, the corresponding results at the state/union territory level are given at the end of this chapter. The detailed tables showing the survey results at the all-India level are given in Appendix A.

3.1 Magnitude of Workforce

3.1.1 The report primarily presents the different characteristics of the self-employed persons with special emphasis on those working in 'home'. Before discussion on various features of the self-employed persons are taken up, the magnitude of workforce, break-up of the workforce in different *statuses in employment*, share of *broad industry of work* in the total workforce, proportion of self-employed workforce in different *broad industry of work* are studied.

3.1.2 *Worker population ratio (WPR) and status in employment*: Statement 3.1 presents the number of workers in the usual status (ps+ss) per 1000 persons for all-India level and their distribution in different statuses in employment. The corresponding figures for each state/UT are presented in Statement 3.1.1. This Statement shows that, the WPR in the usual status (ps+ss) was much higher in rural areas (40.8 per cent) than that in urban areas (35 per cent). Further, it was higher among males than those among females. It was the lowest for urban

females at 13.8 per cent and was 26.1 per cent among their rural counterparts. It is seen that in the rural areas, 53.5 per cent of the male workforce and 55.7 per cent of the female workforce in the usual status (ps+ss) were self-employed and in urban areas, nearly 41.1 per cent each of the male and female workforce were self-employed². The RSEs of worker population ratio (WPR) according to usual

² The self-employed workers referred to in this table cover all self-employed workers, i.e., AGGC, AGEGC and non-agricultural sector.

status (PS+SS) for all-India and each of the major States are given in Statement 3.20.1 at the end of this Chapter.

3.1.3 *Distribution of workers by industry of work*: Statement 3.2 gives the distribution of all workers (ps+ss) by broad group of industry of work, namely, ‘non-agriculture’ sector (Divisions: 10 to 99), ‘AGEGC’ (Groups: 012, 014, 015, 02, 05) and ‘AGGC’ (remaining industry groups in agriculture: 011, 013) at the all-India level and Statement 3.2.1 gives the corresponding figures for each state/UT. This gives an idea of the coverage of workers

2. industry groups/ divisions: AGGC (growing of crops, market gardening, growing of combined with farming of animals): 011, 013, AGEGC: 012, 014, 015, 02, 05, non-agriculture:10-99, all: 01-99

engaged in the non-agriculture sector and the AGEGC sector compared to the total workers in the country. It is seen that about 50.9 per cent of the workers (ps+ss) were engaged in the AGEGC and non-agriculture sector together. The proportion was 37 per cent (AGEGC: 5 per cent and non-agriculture: 32 per cent) in rural areas and 94.1 per cent (AGEGC: 1.6 per cent and non-agriculture: 92.5 per cent) in urban areas. The gender-wise differences were quite significant for both rural and urban areas. While about 55 per cent of the male workers were engaged in the AGEGC and non-agriculture sectors together, the corresponding percentage for female workers was about 40.5 per cent. The coverage of activities for

collection of information on the characteristics of self-employed workers being the AGEGC and non-agriculture sectors, workers in AGGC that accounted for nearly 49.1 per cent of the

total usual status workers remained outside the purview of this report. In Figures 1 and 2, distribution of workers in AGGC, AGEGC and non-agriculture sectors is presented for rural and urban areas, respectively.

3.1.4 *Distribution of workers between AGEGC and non-agriculture sector:* Statement 3.3

areas, nearly 4.1 per cent among females were engaged in AGEGC compared to only 1.1 per cent among males.

3.1.5 *Proportion of workers (ps+ss) in non-agriculture sector during 1999-2000 and 2009-10:* In NSS 55th round, some characteristics of the self-employed persons in the usual status were collected. In this report, some of the characteristics of the self-employed persons in the

usual status which were similar in NSS 55th round (1999-2000) and NSS 66th round (2009-10) have been compared. Since in NSS 55th round, collection of such information was only for the non-agricultural sector, the comparison has been restricted to the non-agricultural sector. Before comparison of the characteristics of the self-employed persons are made, the magnitude of the workforce in the non-agricultural sector during these two time periods have been studied. Statement 3.4, presents the proportion of workers (ps+ss) in non-agricultural sector during these two time periods. It is seen that, in 2009-10,

gives the distribution of workers (ps+ss) engaged in AGEGC and non-agriculture sectors by AGEGC and non-agriculture sectors. Between these two sectors, the non-agriculture sector alone accounted for almost 91.9 per cent of workers (ps+ss) and AGEGC engaged remaining 8.1 per cent. In the urban areas, non-agriculture sector shared nearly 98.3 per cent of workers and merely 1.7 per cent in the AGEGC. The corresponding shares for the rural areas were, 86.6 per cent and 13.4 per cent, respectively. Besides the rural-urban difference in the distribution of workers between these two sectors, the male-female difference too was significant – in rural areas, nearly 33.3 per cent among females were engaged in the AGEGC compared to 6.5 per cent among males and in the urban

areas, nearly 4.1 per cent among females were engaged in AGEGC compared to only 1.1 per cent among males.

Since in NSS 55th round, collection of such information was only for the non-agricultural sector, the comparison has been restricted to the non-agricultural sector. Before comparison of the characteristics of the self-employed persons are made, the magnitude of the workforce in the non-agricultural sector during these two time periods have been studied. Statement 3.4, presents the proportion of workers (ps+ss) in non-agricultural sector during these two time periods. It is seen that, in 2009-10,

share of non-agricultural sector has increased in both rural and urban areas: during 2009-10 the share of non-agriculture sector in total workforce in the rural areas increased to 32 per cent compared to 23.7 per cent in 1999-2000 and in urban areas, the share increased to 92.5 per cent from 91.2 per cent.

3.2 Magnitude of self-employed persons

3.2.1 Number of sample self-employed workers engaged in AGEGC and non-agricultural sector: In this report the characteristics of the self-employed persons in the usual status (ps+ss) are presented for AGEGC and non-agricultural sector. Moreover, some of the estimates have been given for different categories of the self-employed persons, viz., *own account workers (activity status code 11)*, *employers (activity status code 12)* and *helpers in household enterprises (activity status code 21)*. To have a meaningful discussion about the estimates presented in this Chapter, it is necessary to have an idea about the sample sizes which in turn can throw some light on the reliability of the underlying estimates. Statement 3.5, gives the number of sample workers in different statuses in employment according to usual status (ps+ss) engaged in the industry groups/divisions 012, 014, 015, 02, 05 (AGEGC sector), divisions 10-99 (non-agriculture sector), separately for males and females in the rural and urban areas at the all-India level. The corresponding figures for each state/UT are presented in Statement 3.5.1. It can be seen from Statement 3.5 that, even at the all-India level, in the category *employer* among the self-employed persons the sample sizes were small for both males and females in rural and urban areas. For the other categories of the self-employed, viz., *own account workers* and *helpers in household enterprises* sample sizes are larger. It may be seen that in the *AGEGC* sector, among sample male workers, only 12 sample persons in rural areas and 4 in urban areas were *employers* and among sample female workers only 5 in rural areas and 2 in urban areas were *employers*, while in the *non-agricultural* sector among sample male workers, only 360 sample persons in rural areas and 876 in urban areas were *employers* and among sample female workers only 17 in rural areas and 44 in urban areas were *employers*. Considering the limitations that the sample sizes for different categories impose for drawing valid inference at the state/U.T. level, the discussions in this chapter are restricted to the findings at the all-India level. However, in some cases, the state/U.T. level results are given corresponding to the all-India results.

*usual activity status codes: 11: own account workers, 12: employer, 21: helper in household enterprises, 31: regular wage/salaried employees, 41: casual wage labour in public works, 51: casual wage labour in other types of works

3.2.2.1 It is seen that in both rural and urban areas, among the workers (ps+ss) engaged in AGEGC sector, proportion of self-employed workers was higher compared to the workers engaged in non-agricultural sector. It is seen that in the rural areas, among the workers in the AGEGC sector, nearly 71.3 per cent of the male workers and 93.1 per cent of the female workers were self-employed while among the workers in the non-agricultural sector, nearly 41.1 per cent of the male worker and 43.6 per cent of the female workers were self-employed. In the urban areas, among the workers in the AGEGC sector, nearly 63.5 per cent of the male workers and 94 per cent of the female workers were self-employed while among the workers

in the *non-agricultural* sector, nearly 39.6 per cent of the male worker and 39.1 per cent of the female workers were self-employed. Moreover, the share of the *employer* (a category of self-employed workers) was negligible (less than 1 per cent) in rural areas in both *AGEGC* and *non-agricultural* sector for both male and female. In urban areas also, the share of *employer* was negligible (less than 1 per cent) in *AGEGC* sector both for male and female as well as for female in *non-agricultural* sector (0.4 per cent), while among the male workers in *non-agricultural* sector, nearly 2.3 per cent of the workforce was *employer*. Figure 3 gives the proportion of self-employed workers in *AGEGC* and *non-agriculture* sector.

3.2.3 Proportion of self-employed workers in the usual status (ps+ss) in non-agriculture sector during 1999-2000 and 2009-10: As mentioned earlier, in NSS 55th round the probing questions to collect information on some characteristics of the self-employed persons were asked to those engaged in the *non-agricultural* sector in the usual status. The comparison, thus, of the magnitude of self-employed workforce in the usual status (ps+ss) during 1999-2000 and 2009-10 has been done considering the *non-agricultural* sector alone. Statement 3.7 presents the proportion of self-employed workers (ps+ss) in *non-agricultural* sector during 1999-2000 and 2009-10. It shows that the share of self-employed workforce decreased in 2009-10 compared to that of 1999-2000. The decrease in the share of the self-employed workforce was more in rural areas than in urban areas and the decrease was more for females than for males in both rural and urban areas. In rural areas in 1999-2000, nearly 49.3 per cent of the workforce according to usual status (ps+ss) was self-employed, which decreased to 41.6 per cent in 2009-10 and in urban areas, the decrease in the share of self-employed workforce was from 40.8 per cent to 39.5 per cent. In 1999-2000, in rural areas among usual status (ps+ss) male workers, nearly 45.7 per cent were self-employed while in 2009-10 nearly 41.1 per cent were self-employed and among usual status (ps+ss) female workers in 1999-2000 nearly 62.2 per cent were self-employed which decreased to nearly 43.6 per cent in 2009-10. In 1999-2000, in urban areas among male workers in the usual status (ps+ss), nearly 40.1 per cent were self-employed which was 39.6 per cent in 2009-10 while among female workers, in 1999-2000 nearly 43.9 per cent were self-employed which decreased to nearly

39.1 per cent in 2009-10. Figure 4 gives the proportion of self-employed workers among workers according to usual status (ps+ss) in the non-agriculture sector.

Statement 3.7: Proportion (per 1000) of self-employed workers among workers according to usual status (ps+ss) engaged in non-agriculture sector during 1999-2000 and 2009-10

3.2.4 Proportion of self-employed workers among workers (ps+ss) in different industry sections of NIC-2004³: In Statement 3.8, proportion of self-employed workers among workers according to usual status (ps+ss) in different industry sections of NIC-2004 has been presented at the all-India level and the corresponding distribution for each State/U.T. is presented in Statement 3.8.1. It may be noted among the different industry sections of NIC-2004, self-employed workers do not exist in industry sections L (Public administration and defence; compulsory social security), P (Private households with employed persons) and Q (Extra-territorial Organisations and bodies). In rural areas, among male workers engaged in different industry sections, the share of self-employed workers was more than 50 per cent in Section A (60.8 per cent), Section B (60.3 per cent), G (84.6 per cent), H (63.3 per cent), K (68 per cent) and O (82.8 per cent). In rural areas, among female workers engaged in different industry sections, the share of self-employed workers was more than 50 per cent in Section A (58.8 per cent), Section B (82.6 per cent), D (72.4 per cent), G (93.6 per cent), H (92 per cent), J (65.3 per cent) and O (63.6 per cent). In urban areas, among male workers engaged in different industry sections, the share of self-employed workers was more than 50 per cent in Section A (65.4 per cent), Section B (51.4 per cent), G (72.3 per cent) and O (64 per cent). In urban areas, among female workers engaged in different industry sections, the share of self-employed workers was more than 50 per cent in Section A (53.4 per cent), D (66 per cent), G (77.3 per cent) and H (75 per cent).

³ The Sections and Divisions of NIC-2004 are given in Annexure 1 of Chapter Two of this Report.

Statement 3.8: Proportion of self-employed workers per 1000 workers according to usual status (ps+ss) in each of the sections of NIC-2004 during 2009-10

3.2.5 Proportion of self-employed workers among usual status (ps+ss) in different MPCE quintile classes: Statement 3.9 presents the proportion of self-employed workers among workers (ps+ss) in *AGEGC* and *non-agricultural* sector in different quintile classes on MPCE. It is seen that the proportion of self-employed workers among usual status (ps+ss) workers in the *AGEGC* sector in the rural areas, for both male and female are lower in the bottom quintile class than those in the top quintile class. For the *non-agricultural* sector in the rural areas, proportion of self-employed in the bottom quintile class for males was also lower than the top quintile class, while the scenario was the reverse for female. In rural areas in *AGEGC* sector, in the bottom quintile class, nearly 69.9 per cent of the male workers were self-employed compared to 74.5 per cent of the top quintile class, while among female workers in the bottom quintile class, 85.8 per cent were self-employed compared to 97.6 per cent in the top quintile class. In non-agricultural sector, among male workers in rural areas, in the bottom quintile class nearly 37.5 per cent were self-employed compared to 40.8 per cent of the top quintile class while among female workers in the bottom quintile class 47.1 per cent were self-employed compared to 42.4 per cent in the top quintile class. In the urban areas, proportion of male self-employed workers in the non-agricultural sector was lower in the top quintile class than that of the bottom quintile class among both male and female workers: the proportion of male self-employed workers among workers in the bottom quintile class was 40.8 per cent compared to 35 per cent in the top quintile class while the proportion of female self-employed workers among total workers in the bottom quintile class was 46.8 per cent compared to 26.5 per cent in the top quintile class. Proportion of self-employed workers per 1000 workers according to usual status (ps+ss) in the non-agriculture sector is

for different MPCE quintile classes is presented in Figure 5 and Figure 6 for rural and urban areas, respectively.

Statement 3.9: Proportion of self-employed workers per 1000 workers according to usual status (ps+ss) in AGEGC and non-agriculture sector by quintile classes on household MPCE during 2009-10

3.2.6 Distribution of self-employed workers according to usual status (ps+ss) in AGEGC and non-agriculture sectors by categories of self-employment: As mentioned earlier, self-employed workers are of three types: own-account worker, employer and helper in household

enterprises. The break-up of usual status (ps+ss) self-employed workers engaged in *AGEGC* and *non-agricultural* sector in the three categories of self-employed has been presented in Statement 3.10 and the corresponding figures for each state/U.T. are presented in Statement 3.10.1. Of the three categories of self-employed, the share of *employer* category in the self-employed workforce was small in both rural and urban areas and male and female alike. The share of *employer* category of self-employed in non-agricultural sector was nearly 1.6 per cent among rural male self-employed workforce and 5.8 per cent among the urban male self-employed workforce, while it was 0.3 per cent among rural female self-employed workforce and nearly 1.1 per cent among the urban female self-employed workforce. Thus, the other two categories of the self-employed, viz., own account workers (henceforth referred to as OAW) and helper in household enterprises (henceforth referred to as HHE), accounted for nearly whole of the male and female self-employed workforce in both rural and urban areas in *AGEGC* sector. OAW and HHE together accounted for nearly 98.4 per cent of the male rural self-employed workforce engaged in the non-agricultural sector, and 94.2 per cent of the male urban self-employed workforce engaged in the non-agricultural sector. Almost all the female self-employed workforce in the non-agricultural sector, in both rural and urban areas, belonged to the category OAW and HHE: nearly 99.7 per cent of the rural female self-employed workforce and 98.9 per cent of the urban female self-employed workforce belonged to the category OAW and HHE.

Statement 3.10: Distribution (per 1000) of self-employed workers according to usual status (ps+ss) in *AGEGC* and non-agriculture sectors by category of self-employment during 2009-10

3.3 Location of workplace of the self-employed workers

3.3.1 In NSS 66th round survey on employment and unemployment, information on *location of workplace* was collected for all the workers in the usual status engaged in *AGEGC* and *non-agricultural* sectors. Discussion in this report on the location of workplace is restricted to the self-employed persons in the usual status. In Statement 3.11, descriptions of different *locations of workplace*, on which information was collected, are given in column 1. It may be noted that location of workplace is crucial in identification of the self-employed persons working in 'home'. Information on *location of workplace* collected in NSS 66th round was different from those used in NSS 55th round and NSS 61st round. In NSS 66th round, to identify the self-employed persons working in 'home' as per the concept of 'home'⁴ given in the report of the Independent Group on Home-based Workers in India. The self-employed persons working in any of the following locations of workplace are considered as working in their 'home' for the purpose of this report: *own dwelling unit*, *structure attached to own dwelling unit* and *open area adjacent to own dwelling unit*. It may be noted that for the purpose of the survey on employment and unemployment, the term 'adjacent' area/structure was restricted within homestead land only. In NSS 55th round, the code structure of the location of workplace was different in the sense that there was no separate code for structure 'attached to own dwelling unit', 'open area adjacent to own dwelling unit'. As such comparison of the results with respect to location of workplace is not possible between these two rounds.

3.3.2 In Statement 3.11, the distribution of self-employed workers engaged in *AGEGC* and non-agricultural sector have been presented combining the categories *OAW* and *HHE*, besides presenting the situation for the all the categories of self-employed. The corresponding distribution for each State/U.T. is presented in Statement 3.11.1. The share of the category *employer* being very small in the total self-employment in both *AGEGC* and non-agricultural sector it is seen from Statement 3.11 that the distribution of the categories *OAW* and *HHE* together by location of workplace resembles the distribution as obtained for all self-employed persons for both *AGEGC* and non-agricultural sector. Thus, the discussion has been made only with respect to the 'all' self-employed workers (*OAW*, *HHE* and *employer*) engaged in *AGEGC* and non-agricultural sector.

3.3.2.1 *AGEGC sector*: Statement 3.11 shows that nearly one-half of the male self-employed in the *AGEGC* sector and nearly three-fourths of the female self-employed worker in the *AGEGC* sector worked at 'home' at the all-India level (rural+urban). It is, moreover, seen that a higher proportion of female self-employed workers in *AGEGC* sector were working in 'home' than the male self-employed workers in both rural and urban areas: 53.4 per cent of the male self-employed persons in *AGEGC* sector worked in 'home' compared to 72.2 per cent of the female self-employed persons in *AGEGC* sector in rural areas and 54.2 per cent of the male self-employed persons in *AGEGC* sector worked in 'home' compared to 77.3 per cent of the female self-employed persons in *AGEGC* sector in urban areas. Among the rest of the location of workplaces of self-employed workers in the *AGEGC* sector, the following

⁴ In the report of the Independent Group on Home-based Workers in India 'Home' is defined as (i) dwelling unit and/or (ii) structure attached to dwelling unit and/or (iii) open area adjacent to the dwelling unit.

specific locations accounted for a higher proportions of self-employed workers: ‘detached structure adjacent to own dwelling unit’ (9 per cent for male and 15.2 per cent for female in rural areas against 3.2 per cent for male and 11.6 per cent for females in urban areas), ‘own enterprise/unit/office/shop but away from own dwelling’ (8.9 per cent for male and 3.2 per cent for female in rural areas and 9.3 per cent for male and 4.4 per cent for female in urban areas).

3.3.2.2 Non-agricultural sector: It is seen that nearly 73.7 per cent of the female self-employed in rural areas and 71.6 per cent of the female self-employed in the urban areas had worked at ‘home’ while 27.6 per cent of the male self-employed in the rural areas and 20.7 per cent of the male self-employed in urban areas worked at ‘home’. It is seen that the workplace *own enterprise/unit/office/shop but away from own dwelling* shared a high proportion of male self-employed in non-agricultural sector in both rural and urban areas: 28.6 per cent of the male self-employed in the non-agricultural sector in rural areas and 42.1 per cent of the male self-employed in the non-agricultural sector in urban areas worked in *own enterprise/unit/office/shop but away from own dwelling*. Among female self-employed persons in the non-agricultural sector, the share of the workplace ‘*own enterprise/unit/office/shop but away from own dwelling*’, was nearly 9.8 per cent in rural areas and 11.6 per cent in urban areas. Figure 7 presents the proportion (per 1000) of self-employed workers among according to usual status (ps+ss) in the non-agriculture sector working at ‘home’.

3.4 Self-employed workers with workplace as ‘home’ in different industry sections

3.4.1 Distribution of self-employed workers (OAW, HHE and employers) engaged in AGEGC and non-agricultural sector in different locations of workplace has been discussed earlier. In this context, the proportion of self-employed workers in AGEGC and non-agricultural sector working in location of workplace ‘home’ was presented. In Statement 3.12, the proportion of self-employed workers with location of workplace ‘home’ among self-employed workers according to usual status (ps+ss) in different industry sections has been presented and the corresponding proportions for each State/U.T. have been presented in Statement 3.12.1.

3.4.2 In rural areas, the industries where more than 50 per cent of the male self-employed workforce worked at ‘home’ were AGEGC (53.4 per cent), manufacturing (56.9 per cent) and education (56.3 per cent) and in urban areas only in AGEGC more than 50 per cent (it was 54.2 per cent) of the self-employed workforce worked at ‘home’. In rural areas, the industry sections where more than 50 per cent of the female self-employed workers had worked at ‘home’ were AGEGC (72.2 per cent), manufacturing (89.7 per cent), hotels and restaurants (57.2 per cent), education (75.2 per cent) and other community, social and personal service activities (51.5 per cent). In urban areas, the industry sections where more than 50 per cent of the female self-employed workers had worked at ‘home’ were AGEGC (77.3 per cent), manufacturing (91.3 per cent), hotels and restaurants (54.6 per cent), financial intermediation (62.6 per cent), real estate, renting and business activities (60.2 per cent), education (77.2 per cent) and health and social work (51.2 per cent). A comparison of the share of workplace ‘home’ in the self-employed workers in rural and urban areas shows that a higher percentage of female self-employed workers worked in ‘home’ compared to their male counterparts in most of the industry sections. It may be noted that in urban areas in industry mining and quarrying (section C) only 2 female self-employed workers were netted in the sample and location of workplace of these two sample workers were ‘home’, which is the reason for getting a figure of 100 per cent of the female self-employed persons in mining and quarrying in the urban areas working at ‘home’. Figure 8 gives the proportion of self-employed workers with location of workplace at ‘home’ among self-employed workers according to usual status (ps+ss) in different industry groups/sections.

Statement 3.12: Proportion of (per 1000) of self-employed workers with location of workplace as 'home' among SE workers according to usual status (ps+ss) in different industry groups/ sections of NIC-2004 during 2009-10

3.5 Self-employed workers with workplace as 'home' in quintile classes on MPCE:

3.5.1 In Statement 3.13, the proportion of self-employed workers (OAW, HHE and employers) with location of workplace as 'home' among self-employed workers according to usual status (ps+ss) engaged in AGE GC and non-agricultural sector in different MPCE quintile classes has been presented.

3.5.2 AGE GC sector: Among the male self-employed workers in AGE GC sector in rural areas, it is seen that proportion working in 'home' in the bottom quintile class was 42.7 per cent and in the top quintile class it was 58 per cent while among the female self-employed workers in AGE GC sector a higher proportion in the bottom quintile class had worked at 'home' (73.8 per cent) than in the top quintile class (70.5 per cent). The pattern is same in the urban areas also: among male self-employed workers in AGE GC sector, the proportion working in 'home' in the bottom quintile class was 52.4 per cent and in the top quintile class it was 70.2 per cent while among the female a higher proportion in the bottom quintile class had worked at 'home' (77.6 per cent) than in the top quintile class (66.6 per cent). Thus, it is seen that in both rural and urban areas among the self-employed workers in AGE GC sector, the proportion working at 'home' was more in the top quintile class than those in the bottom quintile class for males and the proportion working at 'home' was less in the top quintile class than those in the bottom quintile class for females.

3.5.3 Non-agricultural sector: The proportion of male self-employed workers working at

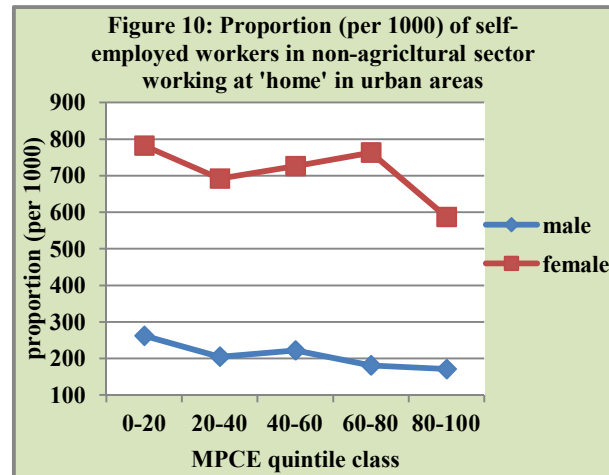

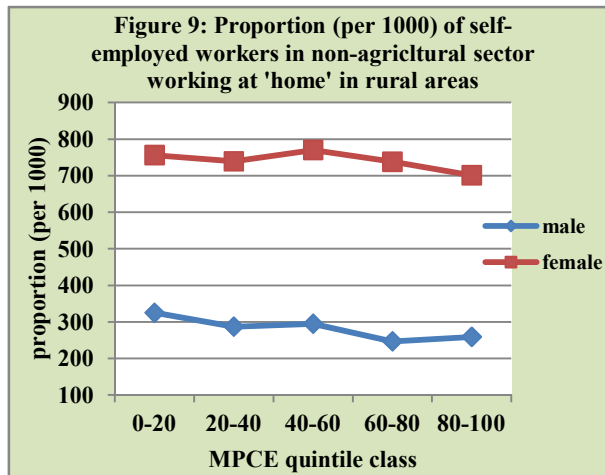

Statement 3.13: Proportion of (per 1000) of self-employed workers with location of workplace as 'home' among self-employed workers according to usual status (ps+ss) for different quintile classes on MPCE during 2009-10

reference: Appendix Table 3

'home' among the self-employed workers in the non-agricultural sector display distinctly different pattern compared to that of the AGEGC sector. It is seen in the non-agricultural sector for both male and female in both rural and urban areas, the proportion of self-employed workers working at 'home' has reduced in the top quintile class compared to that in the bottom quintile class. Among rural male self-employed workers in the non-agricultural sector, nearly 32.5 per cent in the bottom quintile class was working at 'home' which decreased to 25.9 in the top quintile class and for rural female self-employed workers 75.6 per cent in the bottom quintile class was working at 'home' which decreased to 70.1 in the top quintile class. The corresponding proportion for urban male was 26.2 per cent for the bottom quintile class and 17.1 per cent in

the top quintile class while for female it was 78.2 per cent in the bottom quintile class and 58.7 per cent in the bottom quintile class. Proportion (per 1000) of self-employed workers according to usual status (ps+ss) in the non-agriculture sector working at 'home' for different MPCE quintile classes is presented in Figure 9 and Figure 10 for rural and urban areas, respectively.

3.6 Product specification of the ‘employer’

3.6.1 *Different forms of product specification of the ‘employer’*: It was ascertained whether the self-employed person carried out the production on the basis of given or laid product-specifications of the ‘employer’⁵. The different forms of product specifications were as follows: wholly, mainly, partly, no or not known. If the production of the whole range of products/services corresponding to the activity of the self-employed person was carried out according to the product specification of the ‘employer’, it was considered as ‘wholly’ specified by the employer. On the other hand, if majority of the production, in terms of value of output (i.e., more than or equal to 50 per cent), is carried out according to the product specification of the ‘employer’, it was considered as ‘mainly’ specified by the employer.. However, if only a part of the production is carried out according to the product specification of the ‘employer’, it was considered as ‘partly’ specified by the employer. If the self-employed person does not work under the product specification of any ‘employer’, it was considered as not specified by the employer.

3.6.1.1 Statement 3.14 gives the proportion of self-employed workers (OAW, HHE and employers) working under different levels of product specification of the ‘employer’ among the self-employed workers in AGEGC and non-agricultural sector at the all-India level and the corresponding proportions for each State/U.T. is presented in Statement 3.14.1.

Statement 3.14: Proportion of (per 1000) of self-employed workers under different forms of product specification given by the employer among self-employed workers according to usual status (ps+ss) during 2009-10

category of self-employment: all										all-India
category of person	rural			urban			rural+urban

person	243	76	629	256	52	653	249	65	640	
AGEGC and non-agriculture										
male	198	70	675	227	52	680	211	62	677	
female	182	41	746	354	45	574	229	42	698	
person	193	61	698	250	51	661	216	56	683	

Reference: Appendix Table 7

3.6.1.2 *AGEGC sector*: It is seen that among self-employed workers in AGEGC sector nearly 84.7 per cent of the male and 94.3 per cent of female at the all-India level had worked without any product specification. The proportion of male self-employed workers in rural and urban areas working without any product specification of the employer was around 84.8 per cent and 83.8 per cent respectively, while the proportion of female self-employed workers in rural

⁵ The term ‘employer’ meant a person, natural or legal, who, either directly or through an intermediary, whether or not intermediaries are provided for in national legislation, gives out home work in pursuance of his or her business activity

and urban areas working without any product specification of the employer was also nearly 94.3 per cent and 95.3 per cent respectively. The proportion of self-employed workers working with the product specification either wholly or mainly among self-employed workers in AGE GC sector was nearly 5.7 per cent among male and 2.1 per cent among female in rural areas, while the corresponding proportions were 12.2 per cent for urban male and 3.5 per cent among urban females.

3.6.1.3 *Non-agricultural* sector: Among the self-employed workers in the non-agricultural sector, a higher proportion were working with the product specification of either 'wholly or mainly' than those in the AGE GC sector in both rural and urban areas. Nearly 21.5 per cent of the rural male self-employed and 35.1 per cent of the rural female workers in the non-agricultural sector worked where the product specification by the 'employer' was either 'wholly or mainly' while the corresponding proportions in the urban areas were 22.9 per cent for males and 38.7 per cent for females. Thus, among the self-employed in the non-agricultural sector, a higher proportion of females than males had worked where the product specification was either 'wholly' or 'mainly'. In both rural and urban areas, nearly a half of the self-employed female workers (53.6 per cent of the female in rural areas and 53.5 per cent of the female in urban areas) and two-thirds of the self-employed male workers (65.4 per cent in rural areas and 67.7 per cent in urban areas) had worked without any product specification of the employer.

3.6.2 *Self-employed workers working under product specification of the employer in different locations of workplace*: For the purpose of this report, a self-employed worker is considered as worked under product specification of the 'employer' if he had worked either 'wholly' or 'mainly' under the product specification of the 'employer'. Statement 3.15 gives the proportion of self-employed workers working either wholly or mainly under the product specification of the employer among self-employed workers according to usual status (ps+ss) engaged in AGE GC and non-agricultural sector for each location of workplace and the corresponding distribution for each state/U.T. is presented in Statement 3.15.1.

3.6.2.1 *AGE GC* sector: In the rural areas, nearly 4.5 per cent of the male self-employed workers in the AGE GC sector working at 'home' had worked under the product specification of the employer, while the corresponding proportion for female was 1.8 per cent. In the urban areas, nearly 6 per cent of the male self-employed workers in the AGE GC sector working at 'home' had worked under the product specification of the employer, while the corresponding proportion for female was 3.2 per cent.

3.6.2.2 *Non-agricultural* sector: In the rural areas, nearly 26.8 per cent of the male self-employed workers in the *non-agricultural* sector working at 'home' had worked under the product specification of the employer, while the corresponding proportion for the rural female was 42.8 per cent. In urban areas, nearly 31.3 per cent of the male self-employed workers in the non-agricultural sector working at 'home' had worked under the product specification of the employer, while the corresponding proportion for female was 46.9 per cent.

Chapter Three
Summary of Findings

3.6.2.2 *Changes in the proportion of self-employed workers in non-agricultural sector working under the specification of the employer:* As has been mentioned earlier, in NSS 55th round (1999-2000), some characteristics of the self-employed persons similar to those in NSS 66th round (2009-10) were collected for those in the non-agricultural sector. A comparison

Statement 3.16: Proportion of (per 1000) of self-employed workers in the non-agricultural sector working wholly or mainly under the product specification among self-employed workers according to usual status (ps+ss) during 1999-2000 and 2009-10

category of person	66 th round (2009-10)		55 th round (1999-2000)		all-India
	rural	urban	rural	urban	
(1)	(2)	(3)	(4)	(5)	(5)
male	215	229	166	164	164
female	351	387	358	307	307
person	243	256	218	192	192

Source: NSS report no. 460 (Non-agricultural workers in informal sector based on Employment-Unemployment Survey, 1999-2000) for figures of NSS 55th round, NSS 66th round

Ref: Appendix Table 7 for NSS 66th round

with respect to those working wholly or mainly under the product specification of the employer is presented in Statement 3.16. During 2009-10, in both rural and urban areas, higher proportion of self-employed workers worked under product specification of the employer compared to that of 1999-2000: in rural areas, nearly 24.3 per cent in 2009-10 compared to 21.8 per cent in 1999-2000 and in urban areas, nearly 25.6 per cent in 2009-10 compared to 19.2 per

cent in 1999-2000 worked under the product specification of the employer. It is seen that during 1999-2000, nearly 16.6 per cent of the male self-employed workers in rural areas worked under the product specification of the employer, which increased to 21.5 per cent in 2009-10 and in urban areas for male corresponding increase during this period was from 16.4 per cent to 22.9 per cent. For rural females, the proportion of self-employed workers working under the given specification of the employer was 35.8 per cent during 1999-2000 which decreased to 35.1 per cent in 2009-10 while in urban areas, in 1999-2000, nearly 30.7 per cent of the female self-employed workers worked under the product specification of the employer, which increased to 38.7 per cent in 2009-10. Figure 11 presents the proportion (per 1000) of self-employed workers according to usual status (ps+ss) working under the product specification of the employer.

3.7 Some special features of the self-employed workers working under product specification of the employer

3.7.1 In this section, some other features of the self-employed workers working under product specification of the employer has been studied. These are regarding who *provided credit/raw material/equipment* to them, *outlets of disposal* of the product, *basis of payment* received for the work done and type of specifications laid by the 'employer'. Here 'outlets' meant the 'employer' for whom the self-employed persons were working. It may be noted that sample size of the self-employed workers working under product specification of the employer for the AGE GC sector is small (reference Appendix Table 8) and as such discussion in this section has been restricted to the situation of the non-agricultural sector only.

3.7.2 *Self-employed workers working under product specification of the employer by type of provision of credit/raw materials/ equipments:*

3.7.2.1 It was ascertained from the self-employed persons whether the 'employer' who gives product-specifications also provides credit/raw material/equipment to them. Here, 'credit' meant cash advance for a particular order or a group of orders and for working capital only (i.e., for purchase of raw material and meeting other running expenses). Different types of provision for credit/raw materials/equipments are given in column 1 of Statement 3.17. The Statement gives the distribution of self-employed workers according to usual status (ps+ss) in the AGE GC and non-agricultural sector who worked under specification of the 'employer' (i.e., who worked wholly or mainly under the given specification of the 'employer') by type of provision. Discussion in this section is made with respect to the non-agricultural sector only. Statement 3.17 gives the distribution (per 1000) of self-employed workers according to usual status (ps+ss) who worked wholly or mainly under given specifications by type of provision for credit/raw material/equipments, separately for AGE GC and non-agricultural sector. Since sample size of self-employed workers working under product specification of the *employer* for the AGE GC sector is small, even at the all-India level, Statement 3.17.1 gives the corresponding distribution separately for *non-agriculture sector* and for AGE GC and *non-agriculture sector* combined.

3.7.2.2 Among the self-employed workers in the non-agricultural sector, who worked under the specification of the 'employer', preponderance of *own arrangement* in respect of credit/raw materials/equipments was noticed for males in both rural and urban areas: in rural areas 61.2 per cent of self-employed males and in urban areas 67.8 per cent of self-employed males, who worked under the specification of the 'employer', had made *own arrangement* of the different types of provisions. It is seen that a lower proportion of female self-employed workers than males, who worked under the specification of the 'employer', in both rural and urban areas had made *own arrangement* for credit/raw materials/equipments: nearly 29.1 per cent of the self-employed females in rural areas and 34.5 per cent of the self-employed females in urban areas, who worked under the specification of the 'employer', had made *own arrangement* of different types of provisions. For the self-employed workers, who worked under the specification of the 'employer', the enterprises provided *raw materials only* for a large proportions of them and more for the female self-employed workers than for the male self-employed workers: enterprises provided *raw materials only* to nearly 21 per cent of male self-employed workers, who worked under the specification of the 'employer', compared to 56.5 per cent of females in rural areas and to nearly 16.8 per cent of the male self-employed

workers, who worked under the specification of the ‘employer’, compared to 52 per cent of females self-employed workers in urban areas.

Statement 3.17: Distribution (per 1000) of self-employed workers according to usual status (ps+ss) who worked wholly or mainly under given specifications by type of provision for credit/raw material/equipments during 2009-10

Ref: Appendix Table 7

sector working under product specification made their *own arrangement* of the specific provisions compared to 47.2 per cent in 1999-2000 while the corresponding proportions for rural females were 29.1 per cent in 2009-10 and 14.4 per cent in 1999-2000. For urban males, 67.8 per cent in 2009-10 compared to 50.5 per cent in 1999-2000 and for urban females, 34.5 per cent in 2009-10 compared to 21.1 per cent in 1999-2000 made *own arrangement* of the specific provisions. The proportion of self-employed workers in the non-agricultural sector working under product specification who were provided with the specific provisions by the enterprise were lower in 2009-10 compared to those of 1999-2000 for both males and females in rural and urban areas. In rural areas, among the male self-employed working under the product specification, nearly 36.5 per cent in 2009-10 were provided with the specific provision by the enterprise compared to 47.4 per cent in 1999-2000, while the corresponding proportions for rural females were 70.7 per cent in 2009-10 compared to 84.5 per cent in 1999-2000. For urban males, 30.1 per cent in 2009-10 compared to 42.9 per cent in 1999-2000 and for urban females, 64.9 per cent in 2009-10 compared to 75.9 per cent in 1999-2000 were provided with the specific provisions by the enterprise. Figure 12 presents the proportion (per 1000) of self-employed workers according to usual status (ps+ss) working under the product specification for whom provision of *credit/raw materials/equipments* was made by the employer.

employed persons in the non-agricultural sector who worked under given specification of the employer with arrangement of provision for credit/raw materials/equipments during 1999-2000 and 2009-10. It is seen that in 2009-2010, the proportion of self-employed workers in the non-agricultural sector working under product specification who made their *own arrangement* with respect to the specific provisions has increased compared to the situation in 1999-2000, with a commensurate decrease in the proportion receiving those provisions from the enterprise. In 2009-10 nearly 61.2 per cent of the rural male self-employed workers in the non-agricultural

3.7.3 *Self-employed workers working under product specification of the employer by number of outlets of disposal, basis of payment, type of specification:* In this section, some features of the self-employed workers working under production specification of the ‘employer’ is studied. These are *outlets of disposal* of the product, *basis of payment* received for the work done and *type of specifications* laid by the employer. Statement 3.19 presents proportions of self-employed workers working under given specification with respect to these features at the all-India level and the corresponding figures for non-agricultural sector and AGE GC & non-agricultural sector combined have been presented in Statement 3.19.1. Discussion has been made for the non-agricultural sector only.

3.7.3.1 *Number of outlets:* It is seen that among the self-employed workers in the *non-agricultural* sector working under the given specification of the employer, the incidence of only 1 *outlet of disposal* was prominent and it was more among the females than males in both rural and urban areas: nearly 59 per cent of the rural male self-employed workers in the non-agricultural sector working under given specification of the employer had only one outlet of disposal compared to 82.5 per cent for females and in urban areas the corresponding proportions were 58.9 per cent for males and 77.9 per cent for females.

3.7.3.2 *Basis of payment:* It is seen that piece rate formed the basis of payment for the majority of the self-employed workers in the *non-agricultural* sector working under the given specification of the employer and a higher proportion of females received piece rate payment than males. Nearly 69.7 per cent of the rural male self-employed workers in the non-agricultural sector working under given specification of the employer received piece rate payment compared to 84 per cent for rural females and in urban areas the corresponding proportions were 68 per cent for males and 87.5 per cent for females.

3.7.3.3 *Type of specification:* It is seen that a vast majority of the self-employed workers in the non-agricultural sector worked on the oral specification of the employer and the incidence of oral specification was more among females than males. Nearly 75.6 per cent of the rural male self-employed workers in the non-agricultural sector working under given specification of the employer received oral specification compared to 88.6 per cent for rural females and in urban areas the corresponding proportions were 72.6 per cent and 91.6 per cent for females.

Statement 3.19: Distribution (per 1000) of self-employed workers according to usual status (ps+ss) who worked wholly or mainly under given specifications by number of outlets, basis of payment and type of specification

all India	0.38	0.93	0.46	1.99

The major states are those with population one crore¹ or more as per population census 2001 in respect of rural or urban sector separately. As per this criterion, there are 20 major states in the rural areas and 21 major states in the urban areas. The major states are: Andhra Pradesh, Assam, Bihar, Chhattisgarh, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh, Uttarakhand, West Bengal and urban Delhi.

¹ 10 million = 1 crore

Appendix A

Detailed Tables

Table 1: Number of self-employed (SE) workers (activity status codes 11, 12, and 21), per 1000 of workers (activity status codes 11 to 51) according to usual status (ps+ss) and their distribution (per 1000) by categories of self-employment for each quintile classes on MPCE

Appendix B

Sample Design and Estimation Procedure

Appendix - B

Sample Design and Estimation Procedure

1. Introduction

1.1 The 66th round (July 2009-June 2010) of NSS was earmarked for survey on 'Household Consumer Expenditure' and 'Employment and Unemployment'. The survey covered the whole of the Indian Union *except* (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year. All the sample first stage units of both rural and urban areas of Leh, Kargil and Poonch districts of Jammu & Kashmir became casualty and therefore these districts were outside the survey coverage. In addition to these, all the sample first stage units of the following areas were casualty in different sub-rounds: (i) in sub-rounds 1, 2, and 4, both rural and urban areas of Rajouri district of Jammu & Kashmir, (ii) in sub-round 2, urban areas of Lakhisarai district of Bihar, (iii) in sub-round 3, rural areas of Doda district of Jammu & Kashmir. The estimates of the different sub-rounds, therefore, excluded these areas. The period of survey was of one year duration starting on 1st July 2009 and ending on 30th June 2010. The survey period of this round was divided into four sub-rounds of three months' duration each, the 1st sub-round period ranging from July to September 2009, the 2nd sub-round period from October to December 2009 and so on. In each of these four sub-rounds equal number of sample villages/ blocks (FSUs) were allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period.

2 Sample Design

2.1 A stratified multi-stage design was adopted for the 66th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. In addition, two non-UFS towns of Leh and Kargil of Jammu & Kashmir were also treated as FSUs in the urban sector. The ultimate stage units (USU) were households in both the sectors. Hamlet-groups/sub-blocks constituted the intermediate stage whenever these were formed in the sample FSUs.

2.2 *Selection of the first-stage units:* The various steps involved before making the selection of the FSUs are discussed at length in the following few paragraphs before taking up the issue of selection of USUs within FSUs.

2.2.1 *Sampling Frame for First Stage Units:* For the rural sector, the list of 2001 census villages (Panchayat wards in case of Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks constituted the sampling frame. For non-UFS towns, frame consisted of the individual towns (only two towns, viz., Leh & Kargil constituted this frame).

2.2.2 *Stratification of the first stage units*: Within each district of a State/ UT, two basic strata were formed as follows:

- i) rural stratum comprising of all rural areas of the district and
- (ii) urban stratum comprising of all the urban areas of the district.

However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum.

2.2.3 *Sub-stratification*: There was no sub-stratification in the urban sector. However, to net adequate number of child workers, for all rural strata, each stratum was divided into 2 sub-strata as follows:

sub-stratum 1: all villages with proportion of child workers (p) $>2P$ (where P is the average proportion of child workers for the state/ UT as per Census 2001)

sub-stratum 2: remaining villages

2.2.4 *Allocation of FSU's among Strata*: At the all-India level, a total number of 12784 FSUs were allocated for survey in the central sample. In addition, 24 State sample FSUs (16 for rural sector and 8 for urban sector) of Leh and Kargil districts of J & K were included in the central sample. The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to the availability of investigators and ensuring minimum sample allocation to each State/ UT. The State/ UT level sample size was allocated between two sectors in proportion to population as per census 2001 with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu, etc. did not exceed the rural sample size. A minimum of 16 FSUs (to the extent possible) was allocated to each state/ UT separately for rural and urban areas. Further the State level allocations for both rural and urban areas were adjusted marginally in a few cases to ensure that each stratum/ sub-stratum got a minimum allocation of 4 FSUs. Within each sector of a State/ UT, the respective sample size was allocated to the different strata/ sub-strata in proportion to the population as per census 2001. Allocations at stratum/ sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal number of samples was allocated among the four sub rounds.

2.2.5 *Selection of first-stage units*: For the rural sector, from each stratum/ sub-stratum, required number of sample villages were selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For urban sector, from each stratum FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples.

2.3 *Selection of Ultimate Stage Units (USU) within a FSU*: The remaining paragraphs of this sub-section outlines the various steps leading to the actual selection of USUs within a FSU.

2.3.1 *Selection of hamlet-groups/sub-blocks:* Selected FSUs with approximate population 1200 or more were divided into a suitable number (say, D) of ‘hamlet-groups’ in the rural sector and ‘sub-blocks’ in the urban sector as stated below.

approximate present population of the sample FSU	no. of hgs/sbs to be formed
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (Plains), Nainital (Plains), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups were formed as follows:

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

Hamlet-groups/ sub-blocks were formed in the sample FSU by more or less equalising populations. Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU, wherever hamlet-groups/ sub-blocks were formed. This was done in the following manner – one hg/ sb with maximum percentage share of population was always selected and termed as hg/ sb 1; one more hg/ sb was selected from the remaining hg’s/ sb’s by simple random sampling (SRS) and termed as hg/ sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/ sub-blocks. The FSUs without hg/ sb formation were treated as sample hg/ sb number 1.

2.3.2 *Sampling frame of households:* All households listed in a village/UFS block where no hamlet-group/sub-block formation was done, or the households listed in the two selected hamlet-groups/sub-blocks of the village/UFS block where hamlet-group/sub-block formation was done, constituted the sampling frame of households.

2.3.3 *Stratification of rural households:* For employment and un-employment survey of NSS 66th round, all households listed in the selected FSU/hamlet group/sub-blocks were stratified into three second stage strata (SSS). The three second-stage-strata (SSS) formed in the rural areas were:

SSS	Rural composition of SSS	number of households to be surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
SSS 1:	relatively affluent households	2	1
SSS 2:	of the remaining, households having principal earning from non- agricultural activity	4	2
SSS 3:	other households	2	1

Identification of affluent households was done by taking into account factors generally associated with affluent households such as: ownership of motor car/ jeep/ tractor/ combine-harvester/ truck/ bus/ etc.; consumer durables like DVD/ VCP/ refrigerator/ washing machine etc.; ownership of large business/ highly remunerative profession/ high salaried income etc.; ownership of spacious pucca house in good condition; ownership of 7 hectares or more of cultivable land; ownership of 3.5 hectares or more of irrigated land; ownership of a good number of cattle, buffaloes and camels (10 or more in number).

2.3.4 *Stratification of urban households:* Three second stage strata (SSS) were formed in the urban areas as follows:

SSS	Urban composition of SSS	number of households to be surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
SSS 1:	households having MPCE of top 10% of urban population (MPCE > B)	2	1
SSS 2:	households having MPCE of middle 60% of urban population ($A \leq MPCE \leq B$)	4	2
SSS 3:	households having MPCE of bottom 30% of urban population (MPCE < A)	2	1

The cut-off points 'A' and 'B' (in Rs.) were determined from NSS 61st round data for **each NSS region** for urban areas in such a way that top 10% of the population have MPCE more than 'B' and bottom 30% of the population have MPCE less than A.

2.3.5 *Selection of households:* For employment-unemployment survey a total of 8 households were selected from each village/FSU. In both rural and urban areas, in case no hamlet-group/sub-block formation was done in the village/block, a number of 2, 4 and 2 households were selected from the second stage strata SSS1, SSS2 and SSS3, respectively. In case hamlet-groups/sub-blocks were formed in the village/block, a number of 1, 2 and 1 households were selected respectively from the second stage strata SSS1, SSS2 and SSS3 of each of the hamlet-groups/sub-blocks. The sample households from each of the second stage strata were selected by SRSWOR.

2.4 Number of village/blocks allotted for survey in the NSS 66th round along with the number of village/blocks actually surveyed and number of persons enumerated in respect of employment and unemployment survey are given for different states and union territories in Table 1 at the end of Appendix-B.

3. Estimation Procedure

Procedures for obtaining estimates of aggregates, ratios and their RSEs is briefly indicated below:

3.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum (only for rural sector)

m = subscript for sub-sample (m =1, 2)

i = subscript for i-th FSU [village (panchayat ward)/ block/ non-UFS town]

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/ hg/sb [j = 1, 2 or 3]

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

$D^* = 0$ if $D = 1$

= (D – 1) for FSUs with $D > 1$

N = total number of FSUs in any urban stratum

Z = total size of a rural stratum/sub-stratum (= sum of sizes for all the FSUs of a stratum/sub-stratum)

z = size of sample village used for selection.

n = number of sample FSUs surveyed including 'zero cases' but excluding casualty for a particular sub-sample and stratum/sub-stratum.

H = total number of households listed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg/ sb (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum.

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2 Estimation of aggregates for a particular sub-sample (m) and stratum (s):

3.2.1 Sub-sample estimate for a sub-stratum in rural areas:

For j -th second stage stratum of a sub-stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2.2 Sub-sample estimate for a stratum in rural areas: Sub-sample estimate for a stratum will be obtained by adding sub-sample wise estimates of all the sub-strata (\hat{Y}_{st}) of the stratum.

3.2.3 Sub-sample estimate for a stratum in urban areas:

For j -th second stage stratum of a stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \times \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

For all second-stage strata combined:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.3 Overall Estimate for Aggregates: Overall estimate for aggregates for a stratum (\hat{Y}_s) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

3.4 Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India.

3.5 Estimates of Ratios: Let \hat{Y} and \hat{X} be the overall estimates of the aggregates Y and X for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

3.6 *Estimates of Error:* The estimated variances of the above estimates will be as follows:

3.6.1 *For aggregate \hat{Y} :*

$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$ where $V\hat{a}r(\hat{Y}_s)$ is given by

$V\hat{a}r(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2$ for rural stratum, where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

and

$V\hat{a}r(\hat{Y}_s) = \frac{1}{4} (\hat{Y}_{s1} - \hat{Y}_{s2})^2$ for urban stratum, \hat{Y}_{s1} and \hat{Y}_{s2} being the stratum estimates for sub-sample 1 and 2 respectively.

3.6.2 *For ratio \hat{R} :*

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \sum_t \left[(\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R} (\hat{Y}_{st1} - \hat{Y}_{st2}) (\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

for rural and

$$M\hat{S}E(\hat{R}) = \frac{1}{4\hat{X}^2} \sum_s \left[(\hat{Y}_{s1} - \hat{Y}_{s2})^2 + \hat{R}^2 (\hat{X}_{s1} - \hat{X}_{s2})^2 - 2\hat{R} (\hat{Y}_{s1} - \hat{Y}_{s2}) (\hat{X}_{s1} - \hat{X}_{s2}) \right]$$

for urban.

3.7 *Estimates of Relative Standard Error (RSE):*

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

Table B1: Number of FSUs (villages/urban blocks) allotted, number of FSUs surveyed and number of persons enumerated in different states and union territories

Note: 1. Projected population as on 1st March 2009 and 1st March 2010 are from RGI (reference Tables 8 and 9 of the Population Projections for India and States: 2001-2026).

2. Table 8 provides projected population as on 1st March 2009 and 1st March 2010 for rural+urban combined and Table 9 provides projected population as on 1st March 2009 and 1st March 2010 for urban.

3. Projected population as on 1st January 2010 has been derived using the formula, $A = A_1 * \left(\frac{A_2}{A_1}\right)^{[1/1 - A]1^0}$, where A1 is the population for 1st March 2009, A2 is the population for 1st March 2010 and A is the population for 1st January 2010.

4. Projected population as on 1st January 2010 has been derived for the rural+urban and urban separately and that for rural has been derived by subtracting these two.

5. The projections given in this table pre-date the population Census 2011.

Table C1: Projected population (000) as on 1st March 2009, 1st March 2010 and 1st January 2010 for each State/U.T
female

	(ii) receipt									
	(iii) scrutiny									
	(iv) despatch									
3.	number of additional sheets attached									
4.	total time taken to canvass	Schedule 10								
5.	(in minutes)	block 9 of Schedule 10								
6.	whether the schedule contains remarks? (yes -1, no-2)		in block 10/ 11			elsewhere in the schedule				
7.	signature									

[10] remarks by investigator

[11] comments by supervisory officer (s)

[3] household characteristics												
1.	household size			10.		whether the household has NREG job card (yes-1, no-2)						
2.	principal industry (NIC-2004)	description:			11.	for rural areas,	whether got work in NREG works during last 365 days (code)					
		code (5-digit)							12.	if code 1 in item 11,	no. of days worked	
												mode of payment (code)
3.	principal occupation (NCO-2004)	description:			is any member of the household the holder of post office account (yes-1, no-2, don't know-9) and number of such accounts in the household as on the date of survey [in items 14 to 17]							
		code (3-digit)						type of post office account	whether held by any member (yes-1, no-2, don't know -9)	no. of accounts in the hh.		
4.	household type (code)			14.	savings bank							
5.	religion (code)			15.	recurring deposit account							
6.	social group (code)			16.	monthly income accounts scheme							
7.	land owned as on the date of survey (0.000 hectares)			17.	any other account or savings instruments							
8.	land possessed as on the date of survey (0.000 hectares)			has any member used the following services in any Post Office during last 3 months (yes-1, no-2, don't know-9) [items 18 to 20]								
				18.	money order							
9.	land cultivated (including orchard and plantation) during July 2008–June 2009 (0.000 hectares)			19.	instant money order							
				20.	international money transfer service							

Note: 1 acre = 0.4047 hectare, 1 hectare = 10,000 sq. metre

Codes for Block 3

item 4: household type:

for rural areas: self-employed in non-agriculture -1, agricultural labour -2, other labour -3, self-employed in agriculture -4, others -9.

for urban areas: self-employed -1, regular wage/salary earning -2, casual labour -3, others -9.

item 5: religion: Hinduism -1, Islam -2, Christianity -3, Sikhism -4, Jainism -5, Buddhism -6, Zoroastrianism -7, others -9.

item 6: social group: scheduled tribe -1, scheduled caste -2, other backward class -3, others -9.

item 11: whether got work in NREG works: got work in NREG works -1, sought but did not get work in NREG works -2, did not seek work in NREG works -3.

item 13: mode of payment: paid: directly into post office account-1, directly into bank account-2, in a gram sabha meeting-3, by the field assistant/mate-4, by an SHG member-5, through a smartcard-6, other-9; not yet paid-7.

[3.1] indebtedness of rural labour household as on the date of survey (i.e., for households with code 1 in item 5, block 1 along with code 2 or 3 in item 4, block 3)				
srl. no. of loan	nature of loan (code)	source (code)	purpose (code)	amount outstanding including interest as on the date of survey (Rs)
(1)	(2)	(3)	(4)	(5)
total				

Codes for Block 3.1

col. (2): nature of loan: hereditary loan -1, loan contracted in cash -2, loan contracted in kind -3, loan contracted partly in cash and partly in kind -4.

col. (3): source: government -1, co-operative society -2, bank -3, employer/ landlord -4, agricultural/ professional money lender -5, shopkeeper/ trader -6, relatives/ friends -7, others -9.

col. (4): purpose: household consumption: medical expenses -1, educational expenses -2, legal expenses -3, marriage and other ceremonial expenses-4, other household consumption expenses -5; purchase of land/ construction of building -6, other productive purpose -7, repayment of debt -8, others -9.

Codes for Block 4**col. (3): relation to head:**

self -1, spouse of head -2, married child -3, spouse of married child -4, unmarried child -5, grandchild -6, father/ mother/ father-in-law/ mother-in-law -7, brother/ sister/ brother-in-law/ sister-in-law/ other relatives -8, servants/ employees/ other non-relatives -9.

col. (6): marital status:

never married -1, currently married -2, widowed -3, divorced/separated -4.

col. (7): educational level - general:

not literate -01, literate without formal schooling: EGS/ NFEC/ AEC -02, TLC -03, others -04; literate: below primary -05, primary -06, middle -07, secondary -08, higher secondary -10, diploma/certificate course -11, graduate -12, postgraduate and above -13.

col. (8): educational level - technical:

no technical education -01, technical degree in agriculture/ engineering/ technology/ medicine, etc. -02, diploma or certificate (below graduate level) in: agriculture -03, engineering/ technology -04, medicine -05, crafts -06, other subjects -07; diploma or certificate (graduate and above level) in: agriculture -08, engineering/ technology -09, medicine -10, crafts -11, other subjects -12.

col. (9): status of current attendance:

currently not attending:
never attended: school too far -01, to supplement household income -02, education not considered necessary -03, to attend domestic chores -04, others -05;
ever attended but currently not attending: school too far -11, to supplement household income -12, education not considered necessary -13, to attend domestic chores -14, others -15;
currently attending in: EGS/ NFEC/ AEC -21, TLC -22, pre-primary (nursery/ Kinder garten, etc.) -23, primary (class I to IV/ V) -24, middle -25, secondary-26, higher secondary-27, graduate in: agriculture -28, engineering/ technology -29, medicine -30, other subjects -31; post graduate and above -32, diploma or certificate (below graduate level) in: agriculture -33, engineering/ technology -34, medicine -35, crafts -36, other subjects -37; diploma or certificate (graduate level) in: agriculture -38, engineering/ technology -39, medicine -40, crafts -41, other subjects -42; diploma or certificate in post graduate and above level- 43.

col. (10): type of institution: government -1, local body -2, private and aided -3, private and unaided -4, not known -5.

col. (12): whether receiving/received any vocational training:

yes: receiving formal vocational training -1; received vocational training: formal -2, non-formal: hereditary-3, self-learning-4, learning on the job-5, others -6; did not receive any vocational training -7.

col. (13): field of training:

mechanical engineering trades -01, electrical and electronic engineering trades -02, computer trades -03, civil engineering and building construction related works -04, chemical engineering trades -05, leather related work -06, textile related work -07, catering, nutrition, hotels and restaurant related work -08, artisan/ craftsman/ handicraft and cottage based production work -09, creative arts/ artists -10, agriculture and crop production related skills and food preservation related work -11, non-crop based agricultural and other related activities -12, health and paramedical services related work -13, office and business related work -14, driving and motor mechanic work -15, beautician, hairdressing & related work -16, work related to tour operators/ travel managers -17, photography and related work -18, work related to childcare, nutrition, pre-schools and crèche -19, journalism, mass communication and media related work -20, printing technology related work -21, other -99.
