PREFACE

10/17

Selected Educational Statistics is an annual publication of the Education Department in the Ministry of Human Resource Development. This publication furnishes quick estimates pertaining to statistics of number of educational institutions, enrolment, teachers and selected census data on population and literacy. Where we could not receive complete and validated data from the States, we have repeated the data for the preceding years on the premise that users prefer a timely publication, however tentative, to a perfect but an antiquated publication. Data have been repeated in respect of J&K & Orissa and for higher education in respect of Andhra Pradesh, Karnataka, Nagaland and West Bengal because we did not receive complete and correct data from these States. Earlier, UP/West Bengal provided data on plan target basis which this year has been replaced by actuals. This has, to some extent, reduced enrolment.

2. The population projections of school going children in the age group 6-11 years and 11-14 years for all communities are based on the projections worked out by Expert Committee of Planning Commission on the basis of 1991 census. This publication also contains district-wise literacy percentage in respect of total population and population belonging to SC/ST on the basis of 1991 census.

3. Users of this publication would note that the present edition seeks to be more comprehensive. Thus, the time series data on population, literacy, enrolment, teachers, educational institutions has been more systematically presented. There is greater focus on Gender, SC and ST. An attempt has been made to present comparative educational statistics of India in relation to a few selected countries. Graphical presentations have also been introduced. These improvements are a small step towards the goal of a more comprehensive, reliable and informative publication. The present edition of the publication includes three new sections giving (i) State-wise/class-wise/sex-wise enrolment, (ii) Age-wise/state-wise literacy percentages in respect of decadal censuses 1961, 1971, 1981 and 1991 and (iii) Data on literacy and Age-specific/NER from 52nd round of NSSO.

4. I would like to compliment Dr. R.S. Thakur and all the officers in the Statistics Unit, Department of Education for this publication.

AN OVERVIEW

Introduction:

India is the home of 16% of World's total population accommodated in an area of 2.42% of the World's total land area. India spends 3.8% of its GNP on education and has 46% of its population aged 15 years and above as illiterates while China spends only 2.6% of its GNP and has only 22% of its population aged 15 years and above as illiterates. According to World Education Report 1998 and Demographic Yearbook 1995, United Nations, New York and as reported by Directorate of Adult Education in their literacy facts at a glance, slightly less than one third of World's non literate aged 15 years and above are in India. The population, area, density of the world and some of our neighbouring countries has been given in Sub-Table -1:

2. Population

2.1 GROWTH OF POPULATION:

India comprises 541 districts and 5428 C.D. Blocks spread over in an area of 32,87,263 Sq. Kms. It will be observed from Sub-Table-II below that the population of our country has been increasing constantly. Total population during 1901-1991 increased by more than 3-1/2 times; the population in urban areas increased by 8.42 times while the population in rural areas almost trebled during the same period. The growth of population during the period 1901 to 1991 is given below:

2.7 Age-wise Percentages:

For educational purposes, the age-group data is very essential to find out the pace of universalisation of elementary education in these age-groups (Sub-Table VIII) for use by those who are concerned with educational planning and educational administration.

The total enrolment at primary stage during the period 1950-51 to 1996-97 increased by 5.75 times while for the girls the increase is nine times. At the upper primary stage of education, the increase during this period is more than 13 times while that of girls the increase is more than 32 times, which is quite appreciable. At the Secondary and Sr. Secondary stage the total increase is 18 times and that of girls the increase is 49 times.

7.2 PERCENTAGE OF GIRLS ENROLMENT TO TOTAL ENROLMENT:

The participation of girls at all stages of education has been increasing steadily over the time as may be seen from Sub-Table-XXVII. However, the percentages are still much below fifty per cent at all stages of education.

8. Gross Enrolment Ratios:

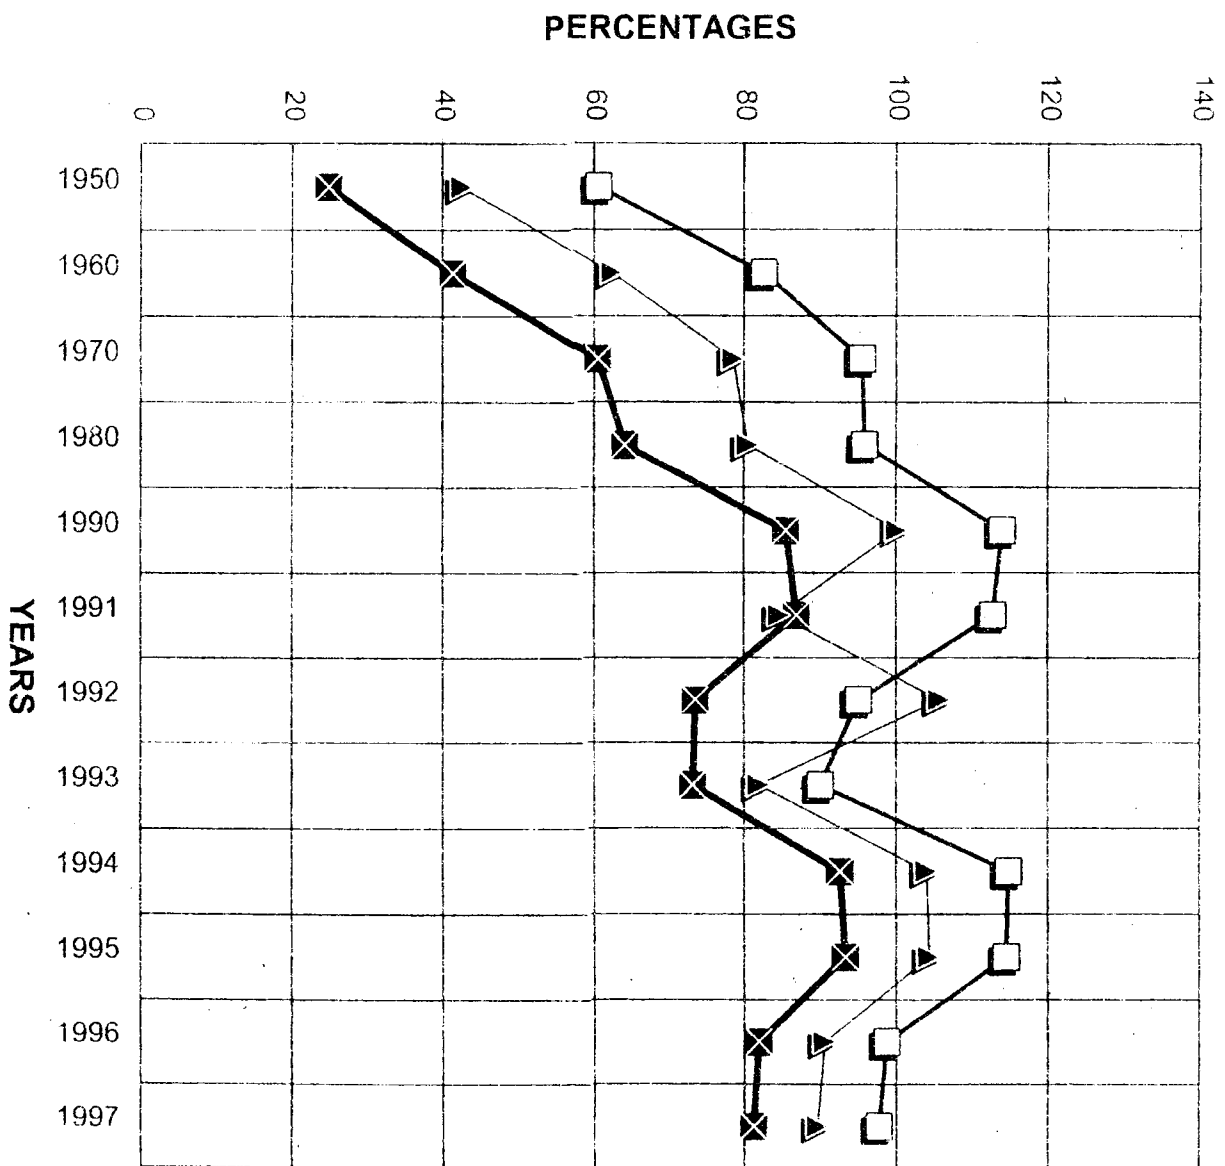

8.1 Gross Enrolment Ratio (GER) is defined as the percentage of the enrolment in classes I-V and VI VIII and/or I-VIII to the estimated child population in the age groups 6-11 years and 11-14 and/or 6-14 years respectively. Enrolment in these stages include under-age and over-age children. Hence the total percentage may be more than 100% in some cases. The gross enrolment ratios for the age-group 6-11 years, 11-14 years and 6-14 years are presented below in Sub-Table-XXIX.

9. Rates of Drop-out

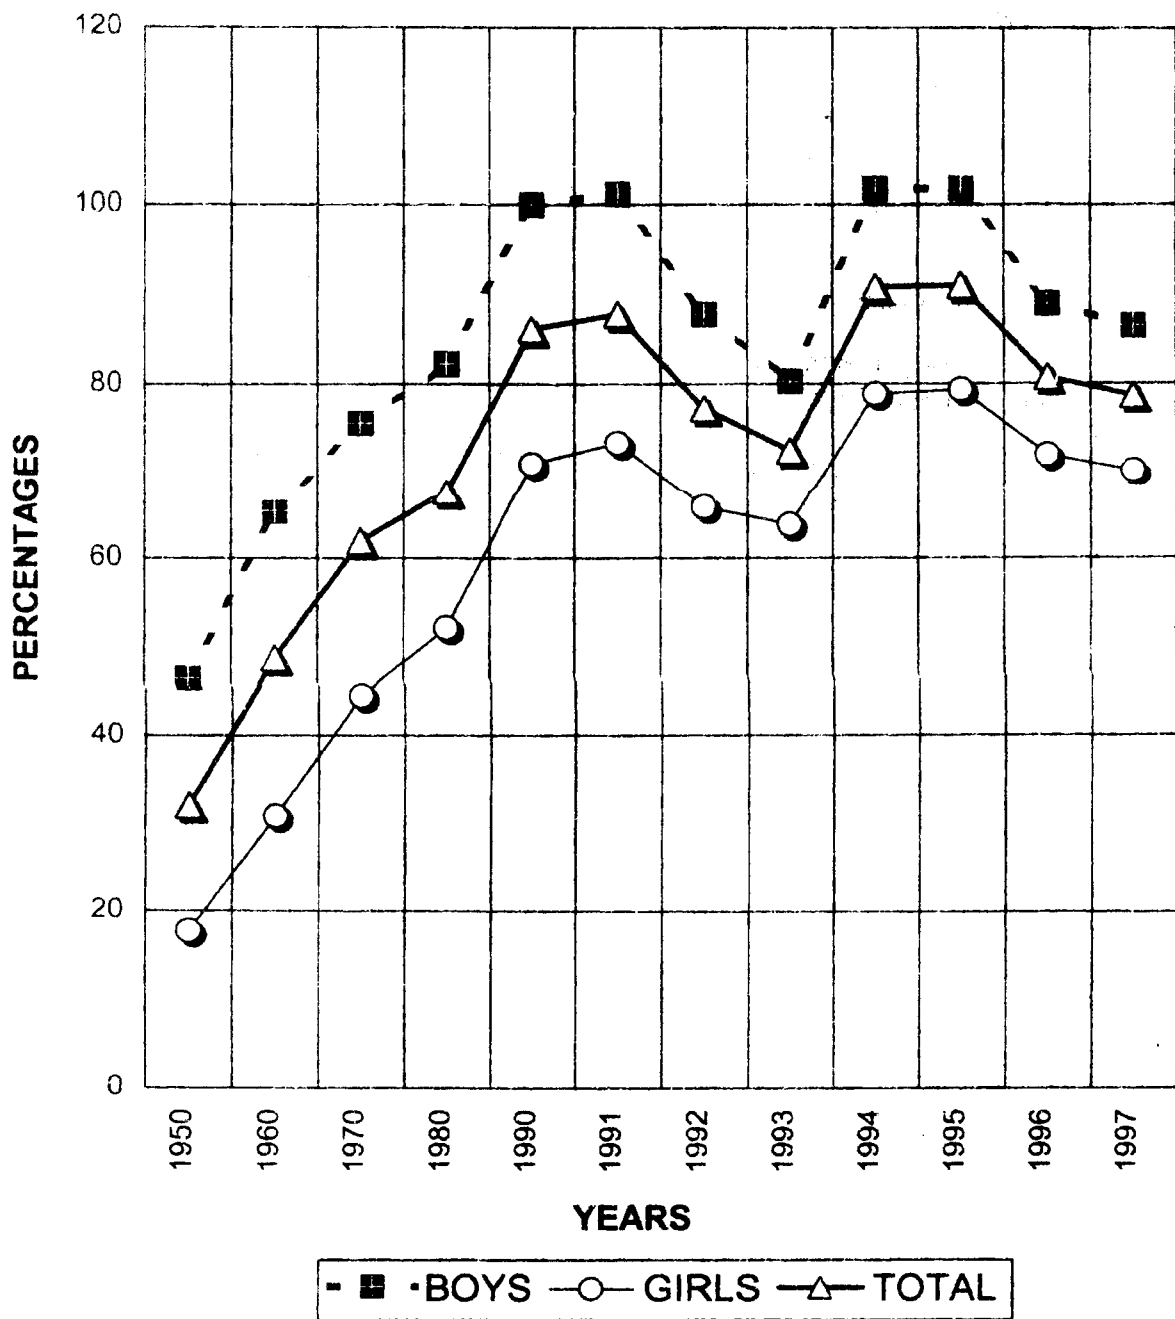

Rate of dropout has been defined as percentage of the number of children to total enrolment dropping out of the school educational system in a particular year. There are a number of methods for estimating these rates. The results arrived at by conventional method have been indicated below in Sub-Table-XXX.

**GROSS ENROLMENT RATIO AT ELEMENTARY STAGE -
1950-1997**

It will be observed from the above that the rate of dropouts has been decreasing year after year. It was 65% in 1960-61, which has now come down to 36% in 1994-95 in Primary Classes. Similarly, the rate of dropouts was 78% in 1960-61, which has come down to 53% in 1994-95 in upper primary classes. This has considerably improved the rates of retention which was 22% in 1960-61 has now gone up to 47% in 1994-95.

10. Teachers:

A Teacher is one who teaches/instructs a group of pupils (students) pursuing a course in an educational institution.

10.1 In absolute terms, a substantial increase in the number of teachers has been registered from 1950-51 in all types of schools. Total teachers increased from 7.51 lakhs in 1950-51 to 45.28 lakhs in 1996-97 by more than six times while the female teachers increased from 1.15 lakhs in 1950-51 to 15.52 lakhs in 1996-97 by more than 13 times. Details have been given in Sub-Table-XXXI.

The percentage of female teachers to total is 33% in primary schools, 36% in Upper Primary Schools and 35% in High and Sr. Secondary Schools.

On the basis of the school enrolment and the number of teachers, the TPR after independence is as follows:

GROWTH OF SCHOOL TEACHERS - 1950-1997

SUB-TABLE-XXXII

Year	Primary	Upper Primary	High / Hr. Secondary
1950-51	1:24	1:20	1:21
1960-61	1:36	1:31	1:25
1970-71	1:39	1:32	1:25
1980-81	1:38	1:33	1:27
1990-91	1:43	1:37	1:31
1995-96	1:47	1:38	1:33
1996-97	1:45	1:38	1:33
1997-98	1:42	1:37	1:31

At the time of independence there was a widespread dearth of educational institutions in the country and whatever institutions were available, their utilisation was also not optimum. During the year 1950-51 the Teacher Pupil Ratio in primary schools was 1:24, in middle schools it was 1:20, in High and Higher Secondary schools, the TPR was 1:21. In 1997-98 this ratio has now increased to 1:42 in primary schools; 1:37 in upper primary schools and 1:31 in High and Higher Secondary Schools. Though the number of educational institutions has considerably increased after independence yet the higher TPR indicates that the utilisation of these educational facilities has also increased and on the basis of enrolment, there seems to be rush in the educational institutions demanding for opening of more and more educational institutions for handling the rush in these institutions and improving the quality of education.
