PREFACE

Education in India" is an annual publication of the Department of Education, Ministry of Human Resource Development.. The publication is brought out in three volumes, Volume I(S) containing numerical data on School Education, Volume II(S) Financial Data on School Education, & Volume III Examination Results of matriculation and higher levels. The present publication Vol. I (S) relates to the year 1993-94 and contains state-wise statistics on School Education enrolment, institutions, teachers and dropout rates, etc. Some of the other important indicators like dependency rates, percentage decrease/increase in the number of out of school children according to 1981 and 1991 census have been included in this publication for the country as a whole and also for different States/UTs. Educational Statistics in respect of the year 1993-94 mainly relates to VI All India Educational Survey.

It is felt that this publication would provide useful information to educational planners and policy makers as well as to those engaged in research and development in the field of education.

I would like to thank the officers of the States/Union Territory Administrations, the officers and staff of Statistics Unit and of the CMIS Unit for their efforts in bringing out this publication. This publication has been brought out in reprographic form for making available the data for official use. The data is also available on floppies.

Further suggestions, if any, for improving the publication are welcome and may be sent to Dr. R.S. Thakur, Joint Director (Plg) in this Department.

ABSTRACT - STATISTICAL ANALYSIS

1. Location and People:

India, comprising 25 States and 7 Union Territories is spread over in an area of 32,87,263 Sq. Kms. The country is well marked from rest of the Asian countries by mountains and sea. It is bounded by the Great Himalayas in the North, stretches southwards and at the tropic of cancer tapers off into the Indian Ocean between the Bay of Bengal on the East and the Arabian Sea on the West. Lying entirely in the Northern Hemisphere, the mainland extends between latitudes: 8°4' & 37°6' North; Longitudes: 68°7' & 97°25' East. It measures about 3214 Kms from North to South between the extreme latitudes and about 2933 Kms from East to West between the extreme longitudes. India has a land frontier of about 15,200 Kms and a coastline (including mainland, Lakshadweep, Andaman & Nicobar Islands) of 7516.6 Kms. Afghanistan and Pakistan are located to its North-West; China, Bhutan and Nepal to its North; Myanmar to East, Bangladesh to East of West Bengal, Sri Lanka is separated by a narrow channel of sea formed by Palk Strait and Gulf of Mannar. India is the second most populous country (after Republic of China) in the world. According to population census of 1991 India had 846.30 million citizens of which 407.07 million were females. The population has increased to 965.65 million in 1998 and is likely to reach 1012.39 million by the turn of the century in 2001 according to an estimate of the Planning Commission. The annual growth rate of population during 1981-1991 was 2.16% as against the previous annual growth rate of 2.23% during the decade 1971-1981. This is likely to require more facilities – Educational and others. Already according to 1991 census there are 7 ½ crores children in the age group 6 to 14 years which are out of schools. This works out to 45% of the total population in this age group.

2. Structure of Population and Dependency Rate:

The population structure of India is expected to experience changes. In the 21st century, population growth rate in India will decrease according to an estimate given by the Planning Commission. The growth rate of population was around 2.16% during 1981-1991 will continue to decrease to 1.81% during 1991-2001; 1.53% during 2001-2011 until approximately to 1.4% during 2011-2016. But this growth rate is still substantial keeping the massive population base that India has already achieved. Thus, though the population growth rate is expected to decrease but the total population is expected to increase tremendously from 846.3 million in 1991 to 1263.54 million in 2016 needing more facilities in the education sector. The improvement of health services and family planning programmes may lower the mortality and birth rates. We may experience a shifting pattern from population growth with high fertility and mortality rates to a growth pattern having lower fertility and mortality rates. This may further change the composition of population. The structure may change from a pyramid form i.e. apex of old age people to a dome type dominated by middle aged.

With this decrease in dependency rate, there has been a corresponding increase in population in the age group 15-60 years.

3. According to UNESCO, Education is understood to involve organized and sustained communication designed to bring about learning. Learning is any improvement in behaviour, information, understanding, attitudes, values, skills, etc. By education, Mahatma Gandhi meant an all round drawing out of the best in the child and man – body, mind and spirit. According to Vivekananda, Education is the manifestation of divine perfection already existing in man. Education was state subject upto 1976 when by 42nd amendment, constitution was amended to include education in the concurrent list and now both State and Central Governments can legislate on education. This volume of Education in India covers all types of education and all forms of education except the informal education. It also does not cover the institutions, which are unrecognized.

4. **Institutions:**

4.1 **Different types of schools:** The number of schools of all types including Boards of School Education (including Intermediate colleges) increased from 1082385 in 1992-93 to 1368405 (26.43%) during 1993-94. There are six categories of institutions, namely: Higher Secondary Schools (10+2) including Intermediate/Pre-Degree level (23662); High/Post basic schools (65564); Middle/Sr. Basic Schools (162805); Primary/Jr. Basic Schools (570455); Pre-Primary/Pre Basic Schools (14068) and Institutions for Diploma/Certificate courses of school level (531816) apart from 35 school boards. There has been a perceptible decrease in number of pre-primary schools in 1993-94 over the previous year. Also there has

been substantial increase in Diploma/Certificate (School level) institutions mainly because during 1992-93 Uttar Pradesh had not reported any adult education schools while those have been shown as 2.70 lakhs during 1993-94. The decrease/increase of different categories of institutions during 1993-94 as compared to previous year is given in Sub-Table 2.

Sub-Table: 2

Total:	1082385	1368405	26.42

4.2 **Schools by management:** Management-wise schools have been given in Table 1.02. Out of 8.37 lakh schools, 1.26 (15.05%) lakh are managed by private bodies (aided/unaided); 3.23 (38.64%) lakh are managed by local bodies while 3.87(46.38%) lakh are managed by the Government, both Central and Provincial Governments.

4.3 **Schools in Rural Areas:** Out of 13.68 lakh institutions of all types, 12.19 (89.05%) lakh institutions, which are located in rural areas, are accommodating 70.54% of the total enrolment in the country. Further the percentage range of the total institutions varies from 96.26% in institutions imparting diploma certificate courses (school level) to 44.74% in respect of Higher Secondary Schools with vocational and academic streams. The enrolment in these institutions varies between 93.72% in institutions imparting diploma certificate courses (school level) to 39.31% Higher Secondary with academic stream only. The details are in Table 1.01 and 1.03.

4.4 **Schools for girls:** The percentage of girls' institutions to total institutions has increased from 12.12% during the year 1992-93 to 12.29% during 1993-94. In absolute terms, however, the number of girl institutions has increased from 1.31 lakh during 1992-93 to 1.68 lakh during 1993-94. The percentage of girls' schools varies between 2.55 in case of primary schools to 25.04 schools imparting instructions in Diploma/Certificate courses. The details are contained in Table 1.01.

4.5 **Growth of Schools:** Statement II gives the growth of schools in India.

5. **Enrolment:**

5.1 **Pupils in different types of schools and stages:** Enrolment in schools of all types increased from 160.67 million in 1992-93 to 163.98 million in 1993-94. Enrolment of girls increased from 64.50 million in 1992-93 to 70.15 million during 1993-94. Enrolment at the primary stage comprising I-V classes decreased from 99.62 million in 1992-93 to 97.03 million in 1993-94. At the middle stage (VI-VIII classes), the enrolment decreased from 34.09 million in 1992-93 to 34.07 million during the same period. At the High/Higher Secondary stage (including Intermediate classes) comprising IX-XII classes it has slightly increased from 20.47 million in 1992-93 to 20.68 million in 1993-94. The details are available in Table 1.03 and 1.04.

5.2 **Enrolment in Schools of Rural Areas:** Enrolment in schools of rural areas was 115.67 million (70.54%) of the total enrolment as against the rural population being 74.29% in the country. In terms of percentage, rural enrolment is the highest in Institutions imparting instructions in Diploma/Certificate (school level) courses (including Social Adult Education Centers) being 93.72% followed by primary schools 80.40% and middle schools 69.50%. The enrolment of girls in schools located in rural areas was 68.97% of girls total (Rural/Urban) enrolment whereas corresponding enrolment of boys was 71.72%. Details of enrolment for different

categories of schools are given in Table 1.03. States/UT-wise details of enrolment for different categories of institutions in rural areas is given in table No. XVI.

5.3 Percentage of Enrolment of Girls at School Stages: At the primary stage (I-V classes) the girls' proportion was to the extent of 43.16%. In middle stage (VI-VIII classes) and Secondary and Higher Secondary stage (including Intermediate) (IX-XII Classes), the girls share was 39.62% and 36.33% respectively during the year 1993-94. The details are available in Table 1.04.

5.4 Gross Enrolment Ratio for different age groups:

Population for the age-group 6-11 years, 11-14 years and 14-18 years during 1993-94 has been estimated on the basis of Expert Committee (Planning Commission Population estimates). The percentage ratio of enrolment in classes I-V, VI-VIII and IX-XII to the corresponding age group of population of 6-11 years, 11-14 years and 14-18 years respectively have been worked out. These ratios have been termed as Gross Enrolment Ratio for the respective age group of population. The Gross Enrolment Ratio for the age-group 6-11 years was 81.69%, for 11-14 years and 14-18 years, these ratios worked out to 58.61% and 29.99% respectively during the year 1993-94. For girls these ratios are comparatively lower at 73.15% (6-11 years), 49.15% (11-14 years) and 23.37% (14-18 years). Details are given in Table VII.

5.5 Retention of School Going Children: Statement 4 indicates that out of 2.39 crores children who were in class I during the year 1984-85, only 1.31 crore (55%) reached class V in 1988-89; 1.04 crores (44%) reached class VIII in 1991-92 and only 0.68 crore (28%) reached class X in 1993-94 respectively. Remaining students were either repeating different grades or had left education system over the years. This deceleration rate in the case of girls is steeper than the totals. In case of girls, out of 0.98 crore who were in class I during the year 1984-85, 0.51 crore (52%) reached class V in 1988-89; 0.39 crore (39%) reached class VIII in 1991-92 and only

0.24 crore (25%) reached class X during the year 1993-94. Year-wise and sex-wise details are contained in Statement 4.

5.6 **Number of Repeaters in different classes:** Table 6 contains information of Class-wise/sex-wise enrolment and number of repeaters. At the primary stage of Education, 7.81% children are repeating grades in classes I-V. These include 7.65% boys and 8.02% girls. At the Upper Primary stage, 8.07% of the children are repeating grades in classes VI-VIII. 8.26% are boys and 7.79% are girls. At the Secondary stage, 8.36% of the children are repeating grades in classes IX-X of which 8.96% are boys and 7.30% are girls. Class-wise position is given in Sub-Table 3.

Sub-Table: 3

CLASSES	PERCENTAGE OF REPEATERS		
	Boys	Girls	Total
I	8.87	9.00	8.93
II	6.50	6.85	6.65
III	8.65	9.10	8.84
IV	7.04	7.49	7.24
V	6.47	7.00	6.69
I-V	7.65	8.02	7.81
VI	9.10	8.48	8.85
VII	7.68	7.18	7.48
VIII	7.83	7.57	7.73
VI-VIII	8.26	7.79	8.07
IX	9.51	8.69	9.21
X	8.29	5.53	7.30
IX-X	8.96	7.30	8.36
Total up-to X	7.91	7.86	7.89

5.7 Statement 7 gives the rates of drop outs from the year 1976-77 to 1993-94 year-wise and sex-wise for classes I-V, I-VIII and I-X separately. It will be observed therefrom that the rates of dropout has slightly decreased during the year 1993-94 when compared with the rate of dropout during the year 1992-93 in all classes/stages of school education. This may be because of the fact that Sixth Survey data have been taken during 1993-94.

5.8 **Out of School Children:** According to 1991 census there are 7.55 crores out of school children, out of which 4.19 crores are females and 3.36 crores are males.

The number of out of school children in the age group 6-14 years was 7.41 crores (3.15 crores males and 4.26 crores females) during 1981 census which has increased to 7.55 crores i.e. by 1.89% during 1991 census. However, the male children not attending schools increased from 3.15 crores in 1981 to 3.36 crores i.e. by 6.67% in 1991 whereas the female children not attending schools have decreased from 4.26 crores in 1981 to 4.19 crores i.e. by 1.64% during 1991 census. This decrease in the case of female children can be attributed to the extra care and programme launched by both Central and State Governments for the education of the girl child. Further out of these 7.55 crores, 5.65 crores (2.60 crores boys and 3.05 crores girls) are in the age group 6-11 while the remaining 1.90 crores (0.76 crore boys and 1.14 crore girls) are in the age group 11-14. The details are in table XX. Percentage-wise, 45% of the population in the age-group 6-14 years are not attending schools. These include 38.41% of the boys and 51.88% girls. During 1981 census, this was 51.19%. State-wise percentages of out of school children in 1991 census are given below in Sub-Table 4.

The details are contained in Table XX and XXI. State-wise comparative position given in Sub-Table 5 indicates that in the North-Eastern States of Manipur, Meghalaya, Mizoram and Nagaland, percentage of out of school children have increased from 46.94 in 1981 to 47.70 in 1991. This is a matter of concern because all our Programmes for universalisation of Elementary Education are meant for reducing the actual number of out of school children and increasing retention in the schools. Therefore, over the years the number of out of school children should decrease. Even if we examine the crude numbers in these States, it will be observed from Table No. XX that the number of children not attending schools have actually increased in these four States from 403227 in 1981 to 531101 i.e. by 31.71%. Further, in Sikkim, the percentage of girls who were not attending schools also increased from 35% in 1981 to 42% in 1991. This also needs to be looked into by State concerned. So is the case of UT (Chandigarh). In Delhi again, there is an overall increase in the number of out of school children by 1.75%. Delhi has a different status and there may be a number of reasons for this increase. On the whole, there is a decrease in the out of school children by 7.11 percent. However, in absolute terms the number of male children has increased in 1991 when compared with their number in 1981. This is not the case with female children. In the case of female children, the number of children percentage-wise have decreased by 12.59%

and in absolute terms also the female children have decreased from 4.26 crores in 1981 to 4.19 crores in 1991. Statewise percentage of out of school children and the extent of decrease-increase is given in Sub-Table 5.

5.9 **Number of Girl students per 100 Boys:**

On the whole there are 76 girls in primary classes, 66 in Upper Primary and 57 in Secondary Classes against 100 boys in these classes respectively. In primary classes, the highest number of girl students has been observed in Meghalaya, closely followed by Kerala, Delhi, Tamil Nadu, Nagaland, Goa, Himachal Pradesh, Pondicherry and the lower number of girl-pupils per 100 boys has been noticed in Rajasthan, Uttar Pradesh, Bihar. In upper primary classes, the highest number of girls against 100 boys has been noticed in Nagaland (97) followed by Kerala, Sikkim, Meghalaya while very low number of girls per 100 boys has been observed in Rajasthan, U.P. & Bihar. In Secondary stage of education again, the highest number of female students per 100 boys has been observed in Kerala (106) followed by Mizoram (100) and lowest in Rajasthan (29) followed by Bihar and Uttar Pradesh working out 33 for each and Madhya Pradesh (38). State-wise details are given in Table XVIII.

6 **Teachers:**

6.1 **Number of Teachers and Percentage of Female Teachers in schools:** The number of teachers working in schools of all types increased from 44.29 lakh in 1992-93 to 49.94 lakh during 1993-94. The male teachers marginally increased from 2926094 during 1992-93 to 3214233 during 1993-94. However, the female teachers increased from 1503017 during 1992-93 to 1779977 during 1993-94 thereby registering an overall increase of 12.76%. The percentage of women teachers varies considerably for different categories of institutions, between 31.61% in respect of Primary/Junior Basic Schools to 71.31% in respect of Pre Primary Schools. The details may be seen in Table 1.05.

6.2 The percentage of female teachers is the highest in respect of Pre-Primary Schools in the country followed by Middle/Senior Basic Schools (35.97%); High/Post Basic Schools (34.68%); Higher Secondary (10+2 pattern) (33.18%) and Primary Schools (31.61%). However, State/UT-wise break-up indicates that the

Chandigarh (UT) has the highest percentage of female teachers in all types of schools; 93.35% in primary schools; 91.19% in Upper Primary Schools; 87.10% in High/Post Basic schools; 77.50% in Higher Secondary (10+2 Pattern). On the whole 83.86% of the total teachers are female teachers in Chandigarh (UT). In case of Primary/Junior Basic Schools, Bihar has the lowest percentage of women teachers but in case of Middle and Senior Basic Schools, Orissa followed by Assam have the lowest percentage of women teachers, in case of High/Post Basic Schools; again Bihar has the lowest percentage of women teachers while in case of Higher Secondary Schools, UP has the lowest percentage of women teachers. On the whole, Bihar has the lowest percentage of women teachers in all types of schools. Details are given in Table X.

6.3 **Percentage of trained teachers:**

Percentage of trained teachers in Primary/Jr. Basic School varies from as high as 100 in Tamil Nadu and Delhi to as low as 30.75 in Tripura. In Middle/Sr. Basic Schools, the percentage of trained teachers had a much higher variation. It was highest (100) for Tamil Nadu and Delhi and lowest for Meghalaya (22.50). Delhi had the highest viz. 100% trained teachers in High/Post Basic schools, and lowest in Assam (30%). In Higher Secondary Schools the percentage of trained teachers was highest in Delhi (100%) and lowest in Assam and Nagaland (28%) each. State-wise details can be seen in tables XI, XII, XIII & XIV.

6.4 **Pupil/Teacher Ratio:**

Average number of students per teacher also termed 'Pupil Teacher Ratio' varies considerably from State to State and for different categories of institutions. Pupil Teacher Ratio in Primary/Jr. Basic School is found to be highest in Bihar (50) and lowest in Sikkim (11). In Middle/Sr. Basic schools, it is highest in Karnataka (54) and lowest in Mizoram and Nagaland (14) each. The Pupil Teacher Ratio in High/Post Basic schools is highest in West Bengal (38) and lowest in Meghalaya and Mizoram (16) each. The State-wise details for different types of institutions are given in table X.

6.5 **Proportion of female teachers in schools.** On an average, the highest number of female teachers per 100 male teachers has been noticed in Chandigarh followed by Kerala, Delhi, Goa and the lowest number of female teachers has been observed in Bihar, closely followed by Arunachal Pradesh, UP, Lakshadweep, Tripura etc. The details of number of female teachers per 100 male teachers are contained in Table XIX.

7. EFFICIENCY OF PRIMARY EDUCATION IN INDIA

1. Introduction:

(1) Efficiency in education refers to the relationship between inputs into the educational system and outputs therefrom. An activity is stated to be efficient if maximum output is obtained from given inputs and if a given output is being obtained with the minimum possible inputs. Input and output have, however, to be valued so that they may be aggregated and usually prices are used to perform this valuing function. The problems of measuring efficiency in education notwithstanding are considerable. These stem from difficulties in measuring educational output. How educational output is to be measured depends, to a large extent, on the nature of objectives of the educational system. Depending on the analytical and philosophical viewpoint adopted, the objective may differ considerably.

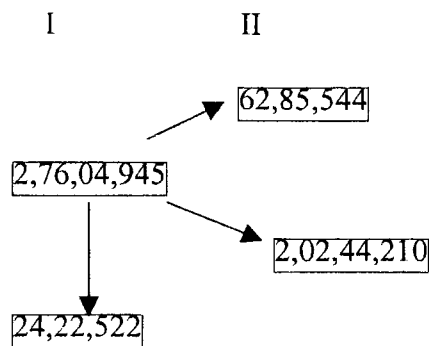

(2) Educational inputs comprise school buildings, teachers, textbooks, AV aids, teaching-learning materials etc. which may all be aggregated and converted financially in terms of expenditure per student- year. This process is rather difficult to accomplish. However, an input indicator appropriate for the measure of output in terms of successful completers is the number of pupil years used in a cohort analysis. In a system consisting of five grades, a minimum of five pupil years would be required for a pupil to complete successfully the cycle. However, perfect efficiency is almost never achieved in the real world. Pupils repeat grades, thereby increasing the number of student-years (input); students' dropout before completing education cycle, thus diminishing output.

2. Educational Flow Model:

(3) At the end of each school year in India, the students may, -

- a) be promoted to the next higher grade
- b) have to repeat the same grade during the following year
- c) have dropped out either because they have left the school system due to illness or otherwise or died etc.

It is the analysis of these flows of students over time between and within grades, which forms the core of the basic educational flow model. In order to illustrate the fundamental concepts involved, the flow of students of primary stage of school education in India between 1992 and 1993 have been examined and are presented graphically as under:

The assumptions in the re-constructed cohort method are as follows:

- a) That there are no new entrants to grades other than grade 1.
- b) That the rates of repetition, promotion, dropouts remain constant over the entire period.

3. Apparent Cohort Method:

(4) When data on repetitions are not available, apparent cohort method is often used to estimate the dropouts between grades. This method requires data on enrolment by grade for successive years. The method consists of comparing the enrolment in grade 1 of a cycle, a particular year with the enrolment in successive grades during the successive years assuming that the decrease from each grade to the next cycle is dropout. If there is no repetition this method would give the same estimates for dropouts as the reconstructed cohort method. The apparent cohort method may still give reasonable results if the repetition rates are relatively small and do not vary much in magnitude between grades. However, if repetition rates are large and vary in magnitude between grades, the results given by the two methods may be very different. Moreover, the apparent cohort method can at best give only an approximate estimate of dropouts and in no case can it give information on the effect of repetition.

4. Reconstructed Cohort Method

(5) The rates of promotion and dropouts under reconstructed cohort method are calculated as follows:

(a) The Promotion Rate: (pit)

$$(pit) = \frac{\text{No. of students promoted to grade } i+1 \text{ in } t+1}{\text{No. of students in grade } (i) \text{ in year } t.}$$

$$\text{- Symbolically: } (Pit) = \frac{(Pi+1t+1)}{(Eit)}$$

(b) The Repetition Rate (rit)

$$(rit) = \frac{\text{No. of students repeating grade } i \text{ in year } t+1}{\text{No. of students in grade } 1 \text{ in year } t}$$

$$\text{- Symbolically: } (rit) = \frac{(Ri t+1)}{(Eit)}$$

(c) The rate of Dropouts: (dit)

$$(dit) = \frac{\text{No. of students dropping out from grade } 1 \text{ in year } t}{\text{No. of students in grade } 1 \text{ in year } t}$$

$$\text{- Symbolically: } (dit) = \frac{(Eit) - (Ri t+1 + Pi+1 t+1)}{(Eit)}$$

(6) The enrolment and repeaters for the years 1992 and 1993 are contained in Appendices 1 to 33. These are state-wise/UT-wise and for the country as a whole. Further, these are also grade-wise and sex-wise. All these rates have been calculated for the individual states and UT administrations. The enrolment data for the year 1992 is based on the data contained in "Education in India 1992-93" issued by the MHRD, New Delhi in 1998 while the enrolment and repeaters data for the year 1993-94 have been taken from the results of VI All India Educational Survey as issued by NCERT, New Delhi in the form of National Tables (Vol. VI) pertaining to age-wise enrolment, repeaters etc. in schools.

(6) On the basis of reconstructed cohort analysis, the various rates of promotion, repetition, dropout for the states of Indian union are as follows:

(7) The dropout rate for the country as a whole works out to 27.4% in primary education. Twenty states/UTs have a lower dropout rate than the national average i.e. these States and UTs are better placed amongst the Comity of States/UTs while 12 states/UTs have a higher dropout rate than the national average. The highest dropout rate has been observed in Assam followed by Rajasthan, Nagaland, Bihar, Tamil Nadu, Sikkim, West Bengal, and Gujarat. Amongst females, the highest

dropout rate has been observed in Rajasthan followed by Assam, Sikkim, Bihar, Nagaland, Mizoram, Tamil Nadu etc. All our efforts to achieve compulsory primary education are being nullified by this constant leakage in the form of dropout rate. However, all our efforts should be made not only to bring every un-enrolled child to the school but also to retain him/her in the schools until he or she completes primary schooling. Till such time this is not done, our efforts will elude our aims of compulsory primary education. Another reason, which, also to some extent, leads towards dropout is the rate of repetition. The highest rate of repetition has been observed in Dadra and Nagar Haveli (just one third of enrolment) followed by Arunachal Pradesh, Assam, Lakshadweep, Sikkim, Tripura, Orissa, Tamil Nadu, Karnataka, Himachal Pradesh, Haryana etc. Repetition, in addition, contributes towards educational wastage. 11 States/UTs have a repetition rate lower than the national average while the remaining 21 States/UTs have a repetition rate higher than the national average.

5. Transition Rates:

(8) The rate of transition from primary to upper primary school education during 1992 to 1993 have been as under in the various States/UTs of the Indian union. Half States/UTs have transition rate lower than the national average while the remaining half have the transition rates higher than the national average. On the whole the transition rate from primary stage of school education to upper primary school stage of education is just 81%. This has been calculated by deducting the number of repeaters from the enrolment of class VI during 1993 and then dividing the resultant figure by class V enrolment of 1992. The results are as follows:

Rate of Transition from Primary to Upper Primary

The coefficient of primary education in India comes to 61.7%. Nine States/UTs have a coefficient lower than the national average while 23 States/UTs have a higher coefficient at primary stage of education than the national average. Amongst the states the higher coefficient of efficiency of primary education has been observed in Himachal Pradesh followed by Goa, Kerala, Manipur, Punjab etc.

(10) The average years required by a child to complete primary education in India is 5 years. The highest number of years has been consumed by Nagaland (17.2 years) followed by Assam (13.7 years), Bihar (13.6 years), Sikkim (10.7 years), Tamil Nadu (10.6 years). On the whole 8.1 years have been taken on an average as against the ideal number of five years which has contributed to wastage of 62% over and above the normal time taken and expenses incurred thereto, to complete primary education by a child. Twenty two States/UTs are either equivalent to this or have a lower number of years than national average while the remaining ten States have a higher wastage in terms of more number of years invested in primary education than the national average. The input:output ratio in primary education is 1.62 as against the ideal one. This input:output ratio had been weakest in Nagaland (3.44) followed

by Assam (2.74), Bihar (2.72) etc. This means that in Nagaland child had taken 17 years as against the optimum five years for completing primary education whereas in Assam and Bihar, a child had taken 14 years as against the optimum five years; in Sikkim and Tamil Nadu, a child had taken around 11 years as against the optimum five years. From the data, it seems that the system of primary education is highly inefficient in most of the States and replete with wastage. The input output ratio in States like Gujarat, H.P., Manipur, Kerala, A&N Islands is, however, nearing the ideal one.

7. Percentage of Pupil-Years spent in excess:

(11) From the reconstructed history of cohort of 1000 pupils it will be observed that the total number of years invested by both boys and girls in India works out to 3701 Pupil years as against the ideal number of 2285 (457x5) pupil years purported to have been spent. Therefore, 1416 (3701-2285) pupil years have been invested in excess of ideal number of pupil years, which works out to 38.26% in excess as follows:

$$(1416/3701) \times 100$$

(12) These pupil years spent in excess are attributable to:

- (a) Passouts, and
- (b) Dropouts.

The position about graduates is as follows:

309 children completed the cycle well in time.	
116 took one extra year	= 116
26 took two extra years	= 52
5 took three extra years	= 15
1 took four extra years	= 4

TOTAL: 187

Thus the number of extra years due to pass outs was 187 pupil years. This works out to 13.21%. Remaining 86.79% are therefore, attributed to un-successful repetitions.

(13) The position about some of the States is as follows: In Andhra Pradesh 57 pupil years (3.77%) are attributable to passouts while remaining to unsuccessful repetitions. In Maharashtra, 364 pupil years (33.24%) are attributable to passouts while the remaining 66.76% to unsuccessful repetitions and so is the case in many other states as listed below :

States	Pupil Yrs spent in excess due to pass outs							Total	%

West Bengal	296	93	21 x 2	4 x 3	1 x 4	-	151	13.65	

8. Places absorbed by dropouts but effective i.e. leading to promotion:

The purpose of calculating the places absorbed by effective dropouts is to stress the relevant benefits accruing from the proportion of the places occupied by dropouts who left school after having been promoted at some school stage(s)

116 children dropped, effective one year	= 116
89 children dropped, effective two years	= 178
59 children dropped, effective three years	= 177
31 children dropped, effective four years	= 124
TOTAL:	= 595

This works out to 42.02% years spent in excess but were effective for these children because these children were in schools before finally dropping out. So they have gained from the instructions and from the peer groups during the period they were in schools. The position about some of the States/UTs is as follows:

States	Pupil Yrs spent in excess due to dropouts						Total	%
	Initially	1 Yr extra	2 Yr. Extra	3 Yr. Extra	4 Yr extra			
Andhra Pradesh	295	90	69 x 2	38 x 3	115 x 4	802	53.08

Orissa	198	113	39 x 2	16 x 3	89 x 4	595	35.82
Rajasthan	380	226	15 x 2	34 x 3	4 x 4	444	33.31
Tamil Nadu	346	186	89 x 2	63 x 3	17 x 4	621	37.05
Uttar Pradesh	90	120	188 x 2	102 x 3	40 x 4	962	61.32
West Bengal	386	84	65 x 2	76 x 3	-27 x 4	374	33.83

The highest percentage has been observed in Bihar where 96.26% children were benefited by repetitions followed by U.P. (61.32%), Andhra Pradesh (53.08%), M.P. (71.63%), Nagaland (53.49%) who were benefited by school instructions during their repetitions in school classes before finally dropping out from the school system.

(14) The menace of dropouts is eluding our efforts to universalize primary education and it has not been possible for us to achieve the aim of universalization of compulsory primary education so far. According to RGI 1991 estimates, there are 5.65 crores children out of schools in India but according to NFHWS, Bombay, the number is 3.5 crores in the age group 6-11 years despite massive expansion of primary schools and primary education in India both quantitatively and qualitatively. According to another estimate 3.92 crores additional children will have to be brought to schools and retained in the schools in order to achieve the aim of compulsory primary education. State-wise details are as follows:
