Date.....

I have great pleasure in releasing the Second Volume of the Directory of Educational Institutions 1973-74. Its first Volume was brought out in July this year. The present Volume deals exclusively with Govt. Primary Schools. Comprehensive information about four thousand of Primary Schools has been adequately presented in this Volume. I hope, it will prove an information of greater utility and value to all those who are concerned with the educational development of this Pradesh.

2. Every year new Schools are opened/upgraded. On many occasions the School(s) ordered at particular place(s) is/are not started immediately. Instead, the Field Officers come up with the proposal for change of location as a school already existed at the proposed venue. As a consequence thereof, the Inspectorate has to involve itself into avoidable correspondence and the opening of schools gets delayed. I feel, in order to avoid overlapping and providing educational facilities at places where they do not exist, it is very essential that a systematic and scientific assessment of existing educational facilities is made. The Directory of Educational Institutions 1973-74 will serve this cause and make the task of planners easier. It will serve as a reference book to the Inspectorate (viz: Block Education Officers / District Education Officers/ Zonal Officers) and a guide to the general public.

3. Himachal Pradesh was formed by the political agglomeration of erstwhile 31 Princely States and some territories included in former British India. Amidst wide disparities in tastes, habits, local dialects etc., the common factors which bound the people of these areas together were around poverty, ignorance, illiteracy and an implicit faith in God and deities. The socio-economic status of the people was below low level; illiteracy and poverty were rampant in the rural setting of the Pradesh. Educational facilities hardly existed even in name. We started with one College, 9 High Schools, 51 Middle and 161 Primary Schools in 1948. Today, the educational image of the Pradesh has tremendously improved. There are as many as 21 Colleges for general education, 75 Higher Secondary Schools, 397 High Schools, 396 Middle Schools and 4284 Primary Schools in the Pradesh and the State Government can be rightly proud of the remarkable progress achieved in the expansion of educational facilities. While past achievements are very important, what is more important is the future development of education. Needless to say, in every field and more particularly in education, quality is more important than the quantity. I do not here mean to undermine the

(Continued)---2---

past performance but the fact remains that there is an urgent need to have check on the quality of education imparted at all levels to ensure parity between quality and quantity. Neglecting one at the cost of the other, will not be safe and in the interest of the Pradesh.

4. The data for this Volume was collected from the institutions through a form "School Information Blank" specially designed for the purpose. Every Block Education Officer was provided with adequate number of copies of this form and he was directed to get them filled up from the Teachers-Incharge of P. Schools in his Block and return these blanks to the Directorate. The details were meticulously sorted out and every care was bestowed to see that the correctness of the data is assured to the consumers. The facility of the consumers to consult these Volumes has also been kept in view by providing an "Index" with this Volume. The "Index" serves the two-fold purpose viz: firstly, it gives the page number where a particular institution can be located and, secondly a birds' eye view of the Index will give the reader an idea as to the type of Institution.

5. In the preparation of this publication the Statistics and Information Section of my Directorate under the guidance of Mr. R. S. Thakur, Statistical Officer, has done excellent work and I am happy to acknowledge it. Mr. Thakur, was assisted in this assignment by Servashri Kuljit Singh and Gandhi Ram Sharma, Statistical Assistants and, Bali Ram Pander, M. L. Sharma and Miss Kamlesh Gupta, Clerks. The consolidation of data was mainly completed by Shri Kuljit Singh. Despite apparent difficulties in men and material Mr. Thakur, our young Statistical Officer, has completed this work within a short period and with correctness which are both appreciated.

6. My thanks are also due to the Dy. Controller of Printing and Stationery and the Manager, A.P. Printing Press, Simla, for prompt cyclostyling of this publication.

We shall be grateful for any suggestion for further improvement.

E. L. Handa
