## INTRODUCTION

The contribution of the Surveys at micro as well as at macro-level planning of school education is well-recognised. Over a period of time, Educational Surveys have acquired important status and are a major source of educational statistics for different organisations at national as well as at international levels. The present *All India School Education Survey*, seventh in the series of All India Educational Surveys (AIESs), was conducted with reference date as September 30, 2002. The data from States/ Union Territories were collected with the active participation of States. The survey covered 10.31 lakh schools functioning in 5.87 lakh villages and around 5.3 thousand towns/ urban areas. It also provided information about 55.3 lakh teachers imparting education to more than 20 crore pupils in the country. The survey is comprehensive in its scope as it covers all aspects of school education in all States/UTs. It provides certain basic inputs such as identification of school-less habitations, their population and distance at which schooling facility is available in addition to number of other important educational statistics required for planning and management of school education. The present survey also covers some new features of the emerging areas of concern whose details are given in the subsequent section. The entire national data of the survey has been presented in nine reports mentioned in earlier part of this report.

### Objectives of the 7th Survey

The objectives of the Survey are as follows:

1. To assess the availability of schooling facility for primary, upper-primary, secondary and higher secondary stages within the habitations (including SC/ST) in different population slabs. In case the facility is not available within the habitation, the distance at which it is available.
2. To assess availability of basic facilities in the recognised schools such as building, classrooms, drinking water, electricity, urinals, lavatories, furniture for students and teachers, incentive schemes and beneficiaries, medical check-up and vaccination/inoculation of students.
3. To know classwise enrolment (Total, SC, ST, educationally backward minority community and children with disabilities by sex) in primary, upper primary, secondary and higher secondary stages of recognised schools.
4. To know the number of children with disabilities enrolled at primary, upper primary, secondary and higher secondary schools.
5. To find out the subjectwise enrolment, by sex in academic stream and availability of qualified teachers at higher secondary stage.
6. To know about the availability of science laboratory and library, physical education, teachers, librarians, guidance counsellors, non-teaching staff in the recognised secondary and higher secondary schools.
7. To assess the position of teachers (by sex and by social category) with academic and professional qualifications at different school stages in recognised schools.
8. To find out distribution of recognised schools with regard to languages taught and languages used as medium of instruction.
9. To find out the enrolment and teachers in primary and upper primary classes of unrecognised schools.

10. To assess the position of enrolment and instructors in schools/centres under Education Guarantee Scheme and Alternative and Innovative Education (EGS&AIE).
11. To find out number of children and teachers by sex in pre-primary schools.
12. To know the disabilitywise enrolment, teachers, structural facilities, equipments and instructional material in special schools.
13. To find out the position of enrolment and teachers in oriental schools, viz., *Maktabas*, *Madrasas* and *Sanskrit Pathshalas*.
14. To estimate the classwise enrolment by single age, new entrants, promotees, repeaters, dropouts and gap between enrolment and attendance in the context of Universalisation of Elementary Education (UEE).

### Tools

In order to achieve the above objectives, the following eight tools were used for the collection of data.

Name of the Tool	To be Canvassed in
1. Village Information Form (VIF)	All Villages
2. Urban Information Form (UIF)	All Urban Areas
3. School Information Form-1 (SIF-1)	All recognised primary and upper primary schools
4. School Information Form-2 (SIF-2)	All recognised secondary and higher secondary schools
5. College Information Form (CIF)	All degree colleges with classes XI and XII
6. Special School Information Form (SSIF)	All special schools meant for children with disabilities
7. State Policies and Practices in School Education (SPPSE)	All States and Union Territories
8. Post Enumeration School Information Form (PESIF)	On an average 50 schools per district

*Note:* A detachable flash sheet was attached to the tools, i.e. VIF, SIF-1, SIF-2 and CIF for bringing out the report of *Provisional Statistics*.

### Some New Features of the 7th Survey

Some new data items, in addition to the data items of 6<sup>th</sup> All India Educational Survey, have been included to provide a comprehensive picture of the school education in general and elementary education in particular. These are as under:

1. Enrolment of educationally backward minority community (Muslims) in recognised schools,
2. Enrolment of children with disability in recognised schools,
3. Type of mid-day meal served in recognised primary schools,
4. Para-teachers and their qualifications in recognised schools,

5. Non-teaching staff in secondary and higher secondary schools,
6. Pre-vocational and vocational courses with enrolment in secondary and higher secondary schools respectively,
7. Enrolment and teachers in unrecognised schools,
8. Enrolment and teachers in Alternative Schools and Alternative & Innovative Education Centres,
9. Enrolment and teachers in oriental schools (*Maktabs, Madrasas and Sanskrit Pathshalas*),
10. Enrolment, teachers and structural facilities in Special Schools,
11. State policies and practices in school education.

Further, the Post Enumeration Survey has been undertaken with the twin objectives:

- (i) To make an assessment of the quality of the *7th All India School Education Survey*.
- (ii) To estimate the classwise enrolment by single age, promotees, repeaters, dropouts and gap between enrolment and attendance in the context of UEE.

The first objective is achieved through re-collection of data on some of the items included in the first phase of the survey from a sample of schools. To achieve the second objective data have been collected on certain additional items such as repeaters, new entrants, enrolment and attendance of students on the day of visit to school by enumerator.

Web technology using the NICNET facility was employed for monitoring the progress of different survey activities up to the district-level. For this purpose, the NIC developed a website (<http://ednsurncert.nic.in>). The NIC District Informatics Officer regularly updated the website on the basis of progress reports submitted by the District Survey Officer. The NCERT, the NIC and each State/UT utilised this facility to monitor the progress of activities, and to take appropriate measures.

### **Operational Aspects of the 7th Survey**

At the national level, the Union Ministry of Human Resource Development (MHRD), the National Council of Educational Research and Training (NCERT) and the National Informatics Centre (NIC) were responsible for the Survey. The MHRD provided funds and administrative support for this project. The NCERT undertook the responsibility of providing all academic inputs, management and coordination of survey activities, across States and UTs and preparation of the survey reports. The NIC was assigned the responsibility of development of software for computerisation of data and generation of tables. Webhosting of data was also the responsibility of the NIC. An Advisory Committee under the Chairmanship of the Director, NCERT was constituted to provide academic and administrative support in the execution and monitoring the progress of the survey.

In each State/UT, a State Survey Unit was created and the State Survey Officer (SSO) was made responsible for the execution of all survey activities. Further, in the States, District Survey Unit was created in each district. In case of UTs, District Survey Units were not created and the work was executed by the UT Survey Unit. The District Survey Officer (DSO) was responsible for all the survey activities in the district. The Block/Town level Education Officer was responsible for data collection with the help of Headmasters/Principals. In case of Class I cities, the data collection was organised at

the Ward level. A Headmaster/Principal in the Ward was made in-charge for this purpose. The Block/Town Level Officer was responsible for providing complete and error free data by undertaking manual scrutiny of filled-in tools with the help of teachers.

Every State Government and Union Territory Administration constituted a state level Monitoring and Review Committee headed by the Education Secretary for providing administrative and operational support to the State Survey Unit. In order to have close coordination between state and national teams, the NCERT and the NIC were also represented on these Committees. The State Survey Officer was the Member Convener for the same.

The present survey is different from the previous six surveys with regard to survey methodology also. For the first time, in this survey a post enumeration survey has been undertaken to establish the quality of survey data. Besides this, certain additional information regarding single agewise enrolment, new entrants, promotees, repeaters and attendance on the day of visit of the enumerator have been collected up to elementary stage.

Like the 6th Survey, the computerisation work was undertaken by the NIC which accrued the following benefits.

1. The database of benchmark data has been created which will help in the storage and retrieval of voluminous data on different variables related to each and every primary unit, namely, the village, the town/city and the school. The agencies at the state and national level would be able to share these large database through the national communication network system.
2. Like the previous AIESs, blockwise up-to-date complete list of schools with postal addresses were prepared in advance for canvassing the school questionnaires and monitoring the progress. This time it has been stored on computer for use. Needless to mention, this database would help in establishing a Management Information System (MIS) at the national, state and district levels. This MIS would help in developing the Directories of schools at the national /state/district/block level for ready use and reference.
3. This approach of MIS would also provide a platform to develop different kinds of up-to-date sampling frames in order to draw rigorous samples for conducting sample surveys. In this way, the data of sample surveys would provide supplementary, demonstrable and a firm basis for drawing valid conclusions which would, in turn, help in taking the right decisions. Gradually, the 7th AISES would evolve into a more comprehensive validation exercise of generation of time-series indices on sound and scientific lines.
4. This new feature called for well-laidout design of the survey, training and its execution strategy at every stage of the survey. The details for training of the survey personnel, data collection, manual scrutiny of data, handling of forms, etc. were contained in the manual 'Guidelines for Survey Officers'. For analysis plan and scrutiny of tables, separate manuals were prepared. The training programme for data collection methodology, data preparation, coding, data transcription, etc. were organised at the state level for the staff of the State Survey unit and for the District Survey Officers. The State/District Survey Officers in turn conducted a two-day training programme for the block level officers.

In addition to manual scrutiny of data and its validation for data transcription, special efforts were made to identify and correct the inconsistency within and between tables. The data in the tabulations were validated from the results of the *Sixth AIES* and also from other sources like census. The national level team made frequent visits to the States for supervisions of these operations and for providing guidance to the State Survey Officers and State NIC Officers.

### **Dissemination of Data**

In earlier AIESs, the data were aggregated at the block, district, state and national levels. These aggregated data were available for the use at the respective state headquarters. States and UTs used to prepare analytical reports in the print form containing district level aggregated data. At the national level, the NCERT used to print the national report giving statewise information on most of the data items alongwith other classificatory variables, like, rural and urban areas, school management, gender, etc. from the third survey onward, the NCERT has started publishing *Provisional Statistics* on important aspects much before the release of final data.

In the 7th AISES, a detachable sheet (Information for Flash Statistics ) was developed and attached with VIF/UIF, SIF-1, SIF-2 and CIF to release statistics in advance. The data from this sheet were entered, validated and compiled to produce the 'Provisional Statistics'. The statewise results were published in the *Provisional Statistics* report in June, 2005. The same were also made available on magnetic media in the form of CD.

Also for wider dissemination, the database of survey on different parameters was hosted on a website [www.7thsurvey.ncert.nic.in](http://www.7thsurvey.ncert.nic.in) giving educational statistics at the national, state and district levels.

The final tabulation plan for VIF, UIF, SIF-1, SIF-2 and CIF tools provided information at the block, district, state and national levels. The tabulation plan for SSIF tools provides information at state and national levels. The national and state level tables based on data collected in census mode will be available in print form as 'National Tables' and 'State Tables'. Also, the databases and tables, both at national level and state level, will be available on magnetic media with NCERT and NIC. These databases and tables would also be hosted on the website [www.7thsurvey.ncert.nic.in](http://www.7thsurvey.ncert.nic.in) for its wider and global dissemination. The website also contains information on certain aspects, generally needed for planning at district level. Hence, thirty district level tables for each district in a State are available on website serially numbered and 'D' is prefixed to Sl. Number, which stands for 'District'.

It is pertinent to mention here that for the facilitation of the reader the identification number of each national table contained in this report has been changed and serialised as Table 1, Table 2 and so on, whereas, on the website the computerised output of the tables have the identification number used in all through the computerisation process. The title of the tables are exactly the same at both places. Therefore, for the help of the user of this report, the correspondence between the table numbers given in this report with that table numbers given on the website [www.7thsurvey.ncert.nic.in](http://www.7thsurvey.ncert.nic.in) is given in Annexure 9.

## CONCEPTS AND DEFINITIONS

Some important terms used in the 7<sup>th</sup> AISES are given below:

### 1. Urban Area

All areas which were identified as 'urban' at the time of the Census 2001 or subsequently notified to be so are to be treated as urban.

### 2. Rural Area

Areas that are not urban shall be treated as rural.

### 3. Community Development Block (C.D. Block)

C.D. Block connotes 'the Block under the community project administration'. In this survey the C.D. Block (not educational) is the lowest administrative and planning unit for organisation of fieldwork and tabulation of data. In states where the scheme of Community Development Blocks is not in vogue, the administrative sub-division of a district, like Tahsil/Taluk/Mandal or their equivalent will be the unit for the purpose of this survey.

### 4. Village

Village refers to **revenue village**, which has definite surveyed boundaries. The revenue village may comprise several hamlets but the entire village will be treated as one unit for presentation of data. In the unsurveyed areas like settlements within the forest areas, each habitation area with locally recognised boundaries within each forest range officer's area will be treated as a separate village. A village with no population is to be termed as *Bechirag* or 'deserted' or 'uninhabited'.

### 5. Rural Habitation

- (a) A habitation is a distinct cluster of houses existing in a compact and contiguous manner; with a local name; and its population should not be less than 25 in plain areas and not less than 10 in hilly/desert/sparsely populated areas. In case there exists more than one such cluster of houses in a village, they will not be treated as separate habitations unless the convenient walking distance between them is more than 200 meters.
- (b) Any habitation with population less than 25 in plain areas or with population less than 10 in hilly/desert/sparsely populated areas may not be given a separate status of a 'habitation' and its population be included in the nearest habitation of the same village. **But this condition will not apply to a village with one habitation only.**
- (c) A village may have one or more than one habitation, except when it is a deserted/*Bechirag* village

### 6. Distance of a School from Rural Habitation

The **distance** between a habitation and a school is the convenient walking distance between the central point of the habitation and the school.

## 7. Recognised School

A recognised school is that in which the course(s) of study followed is/are prescribed or recognised by the Government (Central/State) or a University or a Board constituted by law or by any other agency authorised in this behalf by the Central or State Government and which satisfies one or more of the authorities, e.g. Directorate of Education, Municipal Corporation/Committees, Board, etc., with regard to its standard of efficiency. It runs regular classes and sends candidates for public examination, if any.

## 8. Unrecognised School

An unrecognised school is that which is not recognised but running regular classes on the pattern of recognised school. This does not include coaching centres.

## 9. Alternative Schools (AS)

Schools set up in unserved habitations (with no schooling facilities within one km) under the Education Guarantee Scheme (EGS) component of the EGS&AIE Scheme to provide education to out of school children are termed as **Alternative Schools**. EGS schools in the States of Madhya Pradesh, Orissa, Uttar Pradesh; Maavadi in Andhra Pradesh; Multi-grade learning centres in Kerala; Shishu Shiksha Karamsuchi Kendras in West Bengal; Contract schools in Maharashtra; Rajiv Gandhi Swarna Jayanti Pathshalas in Rajasthan are some of the examples of Alternative Schools.

## 10. Alternative & Innovative Education (AIE) Centres

The centres set up for very specific, difficult groups of 'out of school' children for mainstreaming or otherwise, under the AIE component of the EGS&AIE scheme, are termed as Alternative & Innovative Education Centres. Some of the examples of AIE Centres are seasonal hostels for migrating children, condensed/ bridge courses/ back to school camps for mainstreaming out of school children and to achieve competencies appropriate for their age in a short period, residential camps/drop-in centres for street and slum children.

## 11. Education Volunteers

The persons appointed for teaching in Alternative Schools/AIE Centres on a fixed remuneration are called Education Volunteers (EVs).

A school having classes up to V will be termed as **Primary school**.

A school having highest class either VI, VII or VIII will be termed as **Upper Primary school**.

A school having highest class either IX or X will be termed as **Secondary school**.

A school having highest class either XI or XII will be termed as **Higher Secondary school**.
