## **PREFACE**

Education is a process of enlightenment and empowerment through which individuals are able to secure a better quality of life. The Universal Declaration of Human Rights has asserted that "every one has a right to education" irrespective of caste, creed, sex and economic status.

Considering its responsibility, the government of Andhra Pradesh realises its paramount duty to guarantee the realisation of this right of the child. Vision 2020 of Andhra Pradesh states "Andhra Pradesh will not be just a literate but a knowledge society capable of meeting the challenges posed by the 21<sup>st</sup> century".

In consonance with its commitments to child's "right to education", and the goal of Swarna Andhra Pradesh and the objectives envisaged in vision 2020, the government of Andhra Pradesh has taken up certain pioneering initiatives such as DPEP, establishment of School Education Committees, Village Education Committees, Mandal Education Committees, Maabadi and Open Schools to provide access to Primary Schools, and to provide quality primary education for all and to improve enrolment and retention rates and to reduce dropout rates in the process of achieving Universalisation of Elementary Education which has been accepted as a national goal.

The impact of all the initiatives can be measured only through a valid and reliable data flow through Educational Monitoring Information System and Quick Tabulation schedule on the said parameters from the Institution level to the State and National Levels and by developing key educational indicators for an objective assessment of the utility of the programmes launched and the reorientation of the programmes to increase their effectiveness. In this context it is needless to mention the importance of publication and dissemination of data collected in a more suitable and purposeful manner to enable the educational planners and administrators at different levels to plan, implement and monitor their activities in a more befitting way.

I am quite sure that this publication will be of substantive use and functionally relevant to the functionaries of numerous departments, programme specialists, researchers and others working in the area of Educational Planning and Management of School Education.

## 2. LITERACY:

2.1 The Elementary Education System of India has expanded into one of the largest in the world. The country also possesses the dubious distinction of having the world's largest number of out-of-school children (22% of the global total) and adult illiterates (30% of the global total population).

The literacy rates have increased steadily in the past 4 decades, but A.P. still lags behind as an Educationally Backward State with 44.09 literacy(1991 Census). The 53<sup>rd</sup> round of National Sample Survey shows an increase in the country's literacy from 52% in 1991 to 62% in 1997. However the position of the State is not encouraging. The comparative literacy rates of Southern States in 1991 Census and 53<sup>rd</sup> round of National Sample Survey, 1997 are given below.

**Table 13 – Gender-wise Literacy Rates in 4 Southern States in 1991 Census and National Sample Survey – 53<sup>rd</sup> Round, 1997**

The low rate of increase in adult literacy and high number of unenrolled children in primary stage are growing concerns of the State.

#### 4. ENROLMENT:

4.1 Type-wise Enrolment and Stage-wise enrolment are included in this publication. Enrolment by type includes enrolment in all stages in that type of school. District-wise and Type-wise enrolment is given in Tables 4.11 to 4.25 whereas Stage Enrolment is given in Tables 6.11 to 6.25. The total enrolment at Primary Stage during 1959-60 to 1999-00 increased by 3.25 times, while the girls enrolment increased by 4.15 times. At Upper Primary Stage the increase in this period is 7.3 times, while that of girls is 14 times. At the Secondary and Higher Secondary Stages, the total increase is by 6.8 times and that of girls by 17 times. It may be seen in the following table that enrolment in all stages have been increasing steadily from 1959-60 to 1999-00.

The decline in the Higher Secondary stage in 1979-80 is due to the change of pattern and introduction of Intermediate course.

4.2 Gender disparity is quite evident in Upper Primary and Secondary Stages. Though the participation of girls has increased steadily over the time, the percentage of girls are still below 50% at all stages of education.

1999-00	39.42	41.23	40.28	56.21	60.68	58.29

In spite of marked increase in enrolment the number of children dropping out of the system are still alarmingly high. Out of every 100 children enrolled in Class I only 60 are completing Class V. Further only 42 children are completing Class VII.

6.7 The drop-out rates in Classes I – V and I – VII in 1995-96 to 1999-00 are given below.

1999-00	39.42	41.23	40.28	56.21	60.68	58.29

There is a declining trend in the dropout rate from 1998-99 to 1999-00 in general and also in respect of girls both in primary and upper primary stages of education.

## ***Definitions***

### ***Gross Enrolment Ratio:***

The Gross Enrolment Ratio relates to total enrolment at a particular stage, regardless of the age of those enrolled, to the population, which according to the rules should be enrolled at this stage. It is defined as the percentage of enrolment in Classes I to V and VI to VII to the estimated children in the age-group of 6 – 11 years and 11 – 13 years respectively. The Gross Enrolment Ratio may cross 100% because of inclusion of over-age and under-age children.

The Gross Enrolment Ratio is calculated as follows:

$$\text{Gross Enrolment Ratio} = \frac{\text{No. of Students in Primary/Upper Primary Stage}}{\text{No. of Children in 6 – 11/11 – 13 age-group}} \times 100$$

### ***Drop-out:***

Rate of Drop-out has been defined as percentage of the number of children to total enrolment dropping out of the educational system in a particular year.

Drop-out Rate is calculated as follows:

$$\text{Drop-Out Rate from Class I to V for the Year 1999-00} = \frac{\text{No. of students enrolled in Class I in 1995-96} - \text{No. of students in Class V in 1999-00}}{\text{No. of students enrolled in Class I in 1995-96}} \times 100$$

$$\text{Drop-Out Rate from Class I to VII for the Year 1999-00} = \frac{\text{No. of students enrolled in Class I in 1993-94} - \text{No. of students in Class VII in 1999-00}}{\text{No. of students enrolled in Class I in 1993-94}} \times 100$$

This ratio does not take into account repeaters and children who enter the system after Class I.
