ADMINISTRATIVE STRUCTURE CHANDIGARH ADMINISTRATION

The Union Territory Administration is headed by the Administrator who is appointed by the President of India under Article 239(2) of the Constitution of India. The Administrator is assisted by the Adviser to the Administrator, who is an IAS officer of the AGMU cadre. He is assisted by three Administrative Secretaries and a number of IAS, IPS, PCS and HCS officers. The Adviser oversees the day-to-day administration. The powers to legislate vest with Parliament. The nodal Ministry for the Union Territory, Chandigarh is the Ministry of Home Affairs. Being a Union Territory without a legislature, the entire plan and non-plan expenditure is met directly from the Consolidated Fund of India. All its income goes directly to the Consolidated Fund of India. Therefore, a single demand covering all functions of the Administration is presented to Parliament as a part of Demands for Grants of the Ministry of Home Affairs.

The Union Territory, Chandigarh comprises of one Parliamentary Constituency and one District. The Municipal Corporation in Chandigarh came into existence in May, 1994 under the Punjab Municipal Corporation Act, 1976 (as extended to Chandigarh) by an Amendment Act of 1994. An elected Mayor heads the Corporation. The Commissioner, Municipal Corporation looks after the general administration of the Corporation.

There are a number of Boards and Corporations under various departments in Union Territory, Chandigarh. However, two of the more important Corporation/Boards are the Chandigarh Industrial & Tourism Development Corporation (CITCO) and Chandigarh Housing Board (CHB) to look after the promotion of industries, tourism and housing respectively.

CHAPTER-I

INTRODUCTION

I.1 BACKGROUND HISTORY OF CHANDIGARH

Chandigarh, the dream city of India's first Prime Minister, Sh. Jawahar Lal Nehru, was planned by the famous French architect Le Corbusier. Picturesquely located at the foothills of Shivaliks, it is known as one of the best experiments in urban planning and modern architecture in the twentieth century in India.

Historical Background

"Chandigarh derives its name from the temple of "Chandi Mandir" located in the vicinity of the site selected for the city. The deity 'Chandi', the goddess of power and a fort or 'garh' laying beyond the temple gave the city its name" (Chandigarh-The City Beautiful).

The city has a pre-historic past. The gently sloping plains on which modern Chandigarh exists, was in the ancient past, a wide lake ringed by a marsh. The fossil remains found at the site indicate a large variety of aquatic and amphibian life which was supported by that environment. About 8000 years ago the area was also known to be a home to the Harappans. (Source: www.citco.nic.in)

Since the medieval thru' modern era, the area was part of the large and prosperous Punjab Province which was divided into East & West Punjab during partition of the country in 1947. The city was conceived not only to serve as the capital of East Punjab, but also to resettle thousands of refugees who had been uprooted from West Punjab.

In March, 1948, the Government of Punjab, in consultation with the Government of India, approved a 114.59 sq. kms. tract of land at the foothills of the Shivaliks as the site for the new capital. The location of the city site was a part of the erstwhile Ambala district as per the 1892-93 gazetteer of District Ambala. The site was selected by Dr. M.S. Randhawa, the then Deputy Commissioner of Ambala. Before the new city came up, the original site had about 59 villages (Singh *et.al.*, 1998). The foundation stone of the city was laid in 1952. Subsequently, at the time of reorganization of the state in 1966 (01.11.1966) into Punjab, Haryana and Himachal Pradesh, the city assumed the unique distinction of being the capital city of both, Punjab and Haryana while it itself was declared as a Union Territory and under the direct control of the Central Government.

Geology

The Union Territory of Chandigarh is located in the foothills of the Shivalik hill ranges in the north, which form a part of the fragile Himalayan ecosystem. It is occupied by Kandi (Bhabhar)

in the north east and Sirowal (Tarai) and alluvial plains in the remaining part. The subsurface formation comprises of beds of boulders, pebbles, gravel, sand, silt, clays and some kankar. The area is drained by two seasonal rivulets viz. Sukhna Choe in the east and Patiala-Ki-Rao Choe in the west. The central part forms a surface water divide and has two minor streams. The stream passing through the central part is called N-Choe and the other is Choe Nala which initiates at Sector 29.

Climate

Chandigarh falls under Koeppen's Cwg category i.e. it has cold dry winter, hot summer and sub tropical monsoon. Evaporation usually exceeds precipitation and the weather is generally dry.

The area experiences four seasons: (i) Summer or hot season (mid-March to Mid-June) (ii) Rainy season (late-June to mid-September); (iii) Post monsoon autumn/transition season (mid September to mid-November); (iv) Winter (mid November to mid-March). The dry spell of summer is long but with occasional drizzles or thunder storms. May and June are the hottest months of the year with mean daily maximum & minimum temperatures being about 37°C & 25°C, respectively. Maximum temperatures can rise up to 44°C. Southwest monsoons with high intensity showers commence in late June. The weather at this time is hot and humid. The variation in annual rainfall on year to year basis is appreciable i.e. 700 mm to 1200 mm. The 20 year average rainfall for Chandigarh is 1100.7 mm. January is the coldest month with mean maximum and minimum temperatures being around 23°C and 3.6°C respectively. Winds are generally light and blow from northwest to southeast direction with exception of easterly to southeasterly winds that blow on some days during the summer season.

The Master Plan of Chandigarh

Le Corbusier conceived the master plan of Chandigarh as analogous to human body, with a clearly defined head (the Capitol Complex, Sector 1), heart (the City Centre, Sector 17), lungs (the leisure valley, innumerable open spaces and sector greens), the intellect (the cultural and educational institutions), the circulatory system (the network of roads, the 7 Vs) and the viscera (the Industrial Area). The concept of the city is based on four major functions : living, working, care of the body and spirit and circulation. Residential sectors constitute the

living part whereas the Capitol Complex, City Centre, Educational Zone (Post Graduate Institute, Punjab Engineering College, Panjab University) and the Industrial Area constitute the working part. The Leisure Valley, Gardens, Sector Greens and Open Courtyards etc. are for the care of body and spirit. The circulation system comprises of 7 different types of roads known as 7Vs. Later on a pathways for cyclists called V8 were added to this circulation system.

The Capital complex comprises three architectural masterpieces: the “Secretariat”, the “High Court” and the “Legislative Assembly”, separated by large piazzas. In the heart of the Capital Complex stands the giant metallic sculpture of The Open Hand, the official emblem of Chandigarh, signifying the city's credo of “open to give, open to receive”.

The city centre (Sector 17) is the central business district and is located in the heart of Chandigarh. It comprises the Inter-State Bus Terminus, Parade Ground, District Courts, etc. on one hand, vast business and shopping center on the other and the bank square at another end. The 4-storey concrete buildings house banks and offices above and showrooms/shops at the ground level with wide pedestrian piazzas. The Neelam piazza in the center has fountains with light and water features. Proposal to set up an eleven storey building in Sector 17 is in the offing. Sector 34 is another newly developed commercial sector.

Four blocks in Sector 34 are proposed to have 10 storey buildings to have offices, multiplexes and hotels. As per the new proposal each building will have its own style and will not conform to the grey look (source: Chandigarh Tribune – 1.6.2004).

LAND USE:

Tentative Land use details of Chandigarh (U.T.) as per Urban Complex Plan.

Sl. No.	Land Use	Area in Sq. Kms. (Approx.)
1	2	3
1	Sectors (1 to 56) Part of Sector 61 & 63	70
2	Industrial	5.75
3	Institutional	5.56
4	Defence	5.15
5	Railway Land	1.28
6	Manimajra	3.90
7	Reserved Forest/Forest	11.00
8	Rural Zones/Peripheral area	11.36
	Total	114 Sq.Kms.

In the Urban Complex Plan approx. 8 sq. kms. Area comprising of Sectors 48 to 56 and part of Sector:61 and 63 was earmarked for developing the third phase sectors. Now, it is felt that a stage has been reached where no amount of stringent regulations and legislation can check this phenomenon of unplanned urbanization of the periphery, given the quality of life and opportunity of employment that the Chandigarh Urban Complex offers. It would, therefore, be necessary to recognize these ground realities and accordingly undertake a planned low-density development of the periphery in U.T. Chandigarh and the neighbouring States. Consequently, it is being realized that there is need to prepare Perspective Plan for 11.36 sq. kms. of area (which was earmarked as rural zone in the urban complex plan) as low density development.

Park Areas:

Ample areas have been provided in the master plan of the Capital for parks. Out of a total area of 20,000 acres acquired for the first phase, about 2000 acres are meant for development of parks.

Ornamental Shrubs, trees, water features, artificial lake has been created in the garden. The garden has also with campus lights. Beautifully landscaped, by providing earth mounds which has been planted with ground covers in different patterns.

One unique feature in the layout of Chandigarh is its roads, classified in accordance with their functions. An integrated system of seven roads was designed to ensure efficient traffic circulation. Corbusier referred to these as the 7'Vs. The city's vertical roads run northeast/southwest (The 'Paths'). The horizontal roads run northwest/southeast ('The Margs'). They intersect at right angles, forming a grid or network for movement.

This arrangement of road-use leads to a remarkable hierarchy of movement, which also ensures that the residential areas are segregated from the noise and pollution of traffic.

Type of Roads	Functions/Names
V-1	Roads connecting Chandigarh with other cities like Ambala, Kharar and Shimla. They have dual carriage way, good tree plantation and distinctive central verge lighting. The Madhya Marg and Dakshin Marg are two roads which merge into V-1s leading to Kalka and Ambala, respectively.
V-2	They are the major avenues of Chandigarh, with important institutional and commercial functions running alongside. In Chandigarh they are identifiable as 'Margs'. Madhya Marg, Dakshin Marg, Jan Marg, Himalaya Marg, Uttar Marg and Purv Marg are important examples.
V-3	They are the corridor-streets for fast moving vehicular traffic. A Sector is surrounded either by V-2 or V-3 roads.
V-4	Roads bisecting the Sectors with shopping complexes located along their southern edge.
V-5	Roads meandering through the Sector giving access to its inner lands.
V-6	Roads coming of the V-5s and leading to the residential houses.
V-7	They are intended for pedestrian movement and run through the middle of the sectors in the green areas. A few examples are along the Jan Marg, in the Punjab University & Sector 15.
V-8	They are intended to run parallel with V-7s for the bi-cycles. Not properly developed, as yet.

Each 'Sector', or the neighbourhood unit, is quite similar to the traditional Indian 'mohalla'. Typically, each sector measures 800 metres by 1200 metres, covering 250 acres of area. Each Sector is surrounded by V-2 or V-3 roads, with no buildings opening on to them. Access from the surrounding roads is available only at 4 controlled points which roughly mark the middle of each side. Typically a sector is divided in four parts by a V-4 road running from east to west and a V-5 road running from north to south. These four parts are easily identifiable as A, B, C and D corresponding to North, East, South and West sides. However, sectors 1,2,3,4,5 and 6 have no Sub Sectors and sectors 7 and 8 have only three parts A, B and C (This is because they are developed according to the concept proposed by the first planner of the City Albert Mayer to give his concept some recognition). In case of Quardipartite Sectors, the houses from 1 to 1000,

1001 to 2000 to 2001 to 3000 and 3001 to 4000 are located in Sub Sectors A, B, C and D in clockwise direction. Though all the sectors are structured more or less similarly, but they have their own characteristics and individuality. Each Sector is meant to be self-sufficient, with shopping and community facilities within reasonable walking distance. The sectors of the city are numbered commencing from the northern most edge of the city with the highest numbers located at the southern edge. There is no sector 13 in Chandigarh, but the addition or subtraction of the number of any two consecutive sectors vertically amounts to 13 or its multiple (eg. Sec. 2 + Sec. 11 = 13, Sec. 11 + Sec. 15=26, etc.) Though it is generally believed that No. 13 was left out due to superstition but records indicate that Sector 12 and 13 were demarcated initially as a cultural zone in the lower halves of Sector 10 and 11 but later removed to avoid confusion . However, later No. 12 was assigned to residual area at the edge of Sector 11 but No. 13 was left out in absence of an appropriate area for its location. The location of Sectors 26, 27, 28, 29 and 30 is also somewhat anomalous. As per records, the phase-I of the master plan was up to Sector 25. Later the city was extended in the space available east of Sector 7, 19 and 20 and numbered 26,27, 28, 29 and 30.

Though educational, cultural and medical facilities are spread all over the city, however, major institutions are located in Sectors 10, 11, 12, 14 and 26.

The industrial area comprises 2.35 sq kms, set-aside in the Master Plan for non-polluting, light industry on the extreme southeastern side of the city near the railway line, as far away from the Educational Sectors and Capitol Complex as possible. Of this, 136 hectares was developed in the first phase. In the event of expansion, creation of an additional industrial area in the southern part of the city was envisaged. While the Industrial area is directly connected to the civic centre by a V-3 road, a wide buffer of fruit trees was planted to screen off this area from the rest of the city. Architectural controls have been established regarding site coverage and materials of construction, ultimately requiring all plans to be formed in consultation with the Capital Project Office. A maximum site coverage up to 50 per cent is allowed with 2.5 percent of the space permitted to be used as quarters for essential staff. In Sector 30, which is sufficiently close to the Industrial Sector, multi-storeyed buildings for providing suitable tenements for the workers have been developed. Besides Industrial housing is also provided in sectors 28 and 29.

Tree plantation and landscaping has been an integral part of the city's Master Plan. Twenty six different types of flowering and 22 species of evergreen trees (Singh *et. al.*, 1998) have been planted along the roads, in parking areas, shopping complexes, residential areas and in the city parks, to ameliorate the harsh climate of the region, especially the hot and scorching summers.

Population Growth in the City

Chandigarh was planned for a finite population of half-a-million. In Phase I, 36 sq km of land was acquired by the city administration for construction of 30 sectors. Land for seventeen additional sectors (Sector 31 to 47) was acquired and developed during the second phase to cater for a population of 350,000. The predominance of 3/4 storey apartments in the second phase provide for higher population dimension. However, Chandigarh has now grown beyond its planned capacity. Hence, development in the third phase has started in sectors 48 and beyond. Demographic data indicate that between 1961 and 1971, the population increased by 144.59 percent, one of the highest for urban areas in India. According to 1981 census, it grew by another 75.55 percent, followed by 42.16 percent in 1991 and by 40.33 percent in 2001 (with a total population of 9,00,635). By 2021 the population of Chandigarh is projected to be around 22.26 lacs (at current rate of growth) almost four times for which it was originally built (Fig. 1.1).

Figure 1.1 : Population trend in Chandigarh from 1961 to 2021.

VILLAGES & SLUM AREAS

At present there are 13 villages namely Kaimbala, Khuda Alisher, Khuda Jassu, Khuda Lahora, Sarangpur, Dhanas, Behlana, Raipur Khurd, Raipur Kalan, Makhan Majra, Daria, Mauli Jagran and Kishangarh. Nine villages i.e. Badheri, Butrela, Burail, Attawa, Hallomajra, Kajheri, Palsora, Maloya and Dadumajra are now under the Municipal limits of Chandigarh (in 2006) and are under the control of the Municipal Corporation. In addition, according to a survey conducted by the field staff of the office of Estate Office, U.T. Chandigarh there are 18 colonies namely, (1) Madrasi colony (2) Labour colony-5 (3) Labour colony-4 (4) SBS Mauli Jagran (5) Ambedkar Colony (6) Sanjay Labour Colony (7) Kabri Colony (8) Kumhar Colony (9) Janta Colony (10) Rajiv Colony (11) Shahpur Colony (12) LBS Colony (13) Kalyan Colony (14) Nehru Colony (15) Majdoor Colony (16) Pandit Colony (17) Kuldeep Colony (18) Gursagar Bhattal Colony with 23346.

Areas of Interest

Chandigarh is famous for its architecture and landscaping world over. It combines elegant architectural forms with wide tree-lined avenues, green belts and gardens and is hence referred to as the 'City Beautiful'. Green open space comprise about 8 sq kms. out of 114 square kilometers of the capital project area. Major open areas include the Leisure Valley, Sukhna Lake, Rock Garden and many theme gardens like, Rose Garden, Botanical Garden, Terrace Garden, Fragrance Garden, etc. In addition, the sectors are vertically integrated by a green belt oriented in the direction of the mountains. Various structures such as the Government Museum and Art Gallery, Museum of Evolution of Life and Fine Arts College have come up in the leisure valley forming the cultural zone of the city.

Sukhna Lake, a major tourist attraction, was constructed in 1958 across Sukhna Lake and was planned as an integral part of the master plan of the city. The lake spreads on the foothills of the Shivalik mountain range. The reservoir of the lake is in the shape of a bean seed bounded by a 12.8 m high rock fill earthen dam. The total catchment area of the lake is 42.07 sq kms, of which 34.42 sq kms falls in the Union Territory of Chandigarh (including 25.42 sq km newly acquired area) and 7.7 sq km which falls in the state of Haryana. This additional area is prone to erosion.

Rock Garden, another tourist attraction, is the creation of Nek Chand and is built with municipal waste. It expresses the fragility of the environment, the need for conservation of the earth's natural resources, the importance of balancing industrial development and sound environmental practices.

1.2 CONCEPT NOTE ON RAJIV GANDHI CHANDIGARH TECHNOLOGY PARK (RGCTP).

Rajiv Gandhi Chandigarh Technology Park (RGCTP) provides world class integrated infrastructure necessary for the setting up of facilities/campuses by leading Technology Companies and other IT/ITES/BPO companies for the first time in this region. Chandigarh has traditionally been a city where not many multi-national companies had earlier set up their facilities and therefore a large number of professionals had left Chandigarh in the past for other cities, in search of high level employment. The level of educational facilities here had been much higher than the level of employment. Opportunities available, especially in the knowledge sector. North India, as a whole had lagged behind the southern States, and RGCTP is a major step in the direction of redressing that imbalance.

The development of RGCTP has been anchored by Infosys, which has completed its state of the art campus. DLF is also offering ready to use built up space and is already housing 22 IT Companies. These state of the art buildings is already providing directly employment to more than 5000 professionals. IT majors like Wipro, Bharti Airtel, Tech Mahindra alongwith 13 other companies are in the process of developing their respective sites allotted to them. A state of the art Entrepreneurs Development Centre is being established by the Administration for providing incubation space to young entrepreneurs. Apart from a Hotel cum Convention Centre, a Tech Habitat Centre is also under development on a 123 acre plot under PPP model, This project has been planned taking into consideration the logistic needs relating to the residential accommodation for the IT professionals who would be working in RGCTP.

This visionary project of the Administration was lauded by the Hon'ble Prime Minister of India, Dr. Manmohan Singh, when he visited Chandigarh for the inauguration of the Rajiv Gandhi Chandigarh Technology Park on 24 September 2005.

Expansion of RGCTP-Phase III

Keeping in view the needs of the IT Industry and also in view of the interest shown by major IT companies, the tentative plan has been earmarked for the development of Phase III of the Rajiv Gandhi Chandigarh Technology Park. Unlike the Phase I and Phase II, there will be no sites for any Hotel, Mall or residential use in Phase III. The Administration has decided that the whole of Phase-III of the RGCTP covering 270 acres will be used for IT Industry area and there will be no space for any ancillary/adjunct activities. Out of the total area of 270 acres, it is estimated that 110 acres (40 % of the total area) would have to earmarked for roads, green spaces, parking etc. leaving 160 acres for the IT Industry. Taking into consideration that high end quality companies have been approaching the Administration, 3 sites of 30 acres each and 3 sites of 10 acres each will be earmarked for IT Companies which are eligible for Main Campus Sites as per the Chandigarh Technology Park Rules, 2006. Similarly, 4 sites of 5 acres each have been earmarked for Small Campus Sites and the remaining area has been earmarked for BTS sites. It is estimated that there would be around 20 BTS sites for 1 acre each.

Socio-Economic Benefits from RGCTP

The RGCTP has been planned keeping in view the aspirations for the citizens of the whole Region for getting integrated with the world community, Chandigarh has been promoted as a knowledge hub, which also includes the setting up of a world class IT Park. The main focus of

the establishment of RGCTP is to create employment for the youth of the Region apart from bring in investment, which would thereafter lead to software exports.

The setting up of IT Park has opened Chandigarh to national and multinational IT companies, which are bringing investment and employment opportunities to the Region. The development of the RGCTP has thus been planned in a holistic manner. Already more than 4500 professionals are working in RGCTP and an investment of more than Rs.650 Cr. Has poured in. Similarly it is estimated that once completed, Phase I and Phase II would provide direct employment to more than 30000 professionals, and an equivalent number would be directly employed in Phase III taking the figure of direct employment for RGCTP will cross Rs.6000 Cr and it is further estimated that the software exports from RGCTP will cross Rs.5000 Cr by the end of 2010.

The above numbers of more than 60000 direct employment will be further augmented by 3 times this number, as every single IT job created further creates 3 indirect jobs, and wherever the IT Industry has been establishment, the indirect employment has benefited all cross sections of the society, as the direct employment has to be technically skilled.

The following companies are now a part of the Rajiv Gandhi Chandigarh Technology Park (RGCTP):

CHAPTER 4

AGRICULTURE

Area according to Village Papers: It is according to village papers and is based on returns of area prepared by village staff for revenue purposes in the Chandigarh whereas area by professional survey is worked out by the Surveyor General of India. There is some difference in the two sets of figures because of different methods adopted by them.

Area under Forests: This includes actually forested area on the lands, classed or administered as forests under any legal enactment dealing with forest whether State-owned or Private except in area not cadastrally surveyed. Area under forests given in this section does not tally with that of the Forest Department shown in the section on forest statistics owing to the fact that certain lands though no wooded, are taken as forest by the Forest Department while these are not treated as such by the Director Land Records, Chandigarh Administration.

Land not available for Cultivation: This includes absolutely barren and unculturable land like mountains deserts etc., which cannot be brought under plough except at exorbitant cost or land cover by buildings, roads and railways and water or otherwise appropriated for non-agricultural purposes.

Other Uncultivated Land excluding Fallow Lands: This denotes land available for cultivation either not taken up for cultivation or abandoned later on for one reason or the other and includes culturable waste, permanent pastures and other grazing land and lands under miscellaneous tree crops and groves.

Fallow Land: It denotes cultivable land which after abandonment remains uncultivated over long period called "old fallow", those kept uncultivated during the current year called "Current Fallows".

Net Area sown: It is the net area sown under crops, the area sown more than once during the year being counted once only.

Total Cropped Area: It includes total area covered with crops during the year. In case different crops are raised on the same land during the year, the same area is counted more than once.
