# FOREWORD

For making realistic and cohesive career choices a direct/ positive correspondence between the aspirations and abilities is imperative. Besides this the knowledge about the avenues available also play a vital role.

For assisting our potential work force in making right and appropriate career choices/decisions, Education Department of U.T CHD has set up Guidance & Counselling Department to provide information about different careers, educational & training facilities available in India. Besides providing information service, it also provides testing service for recognising one's aptitudes, abilities and interests. In our endeavour to disseminate upto date information, we collect and compile information from all medias and sources.

It is my great pleasure to present the first edition of this handbook on **"Medical Education (M.B.B.S.) after Plus two in India"**. The booklet has been written to provide the information about Educational facilities in Medical Education (M.B.B.S.) in India after + 2.

The information given includes the name of the Institutions, eligibiliy conditions, entry qualifications, age, details of the test, admission norms, seats and reservation of seats.

I hope the publication will be well received by its consumers. The information given is exhaustive hence there is a likelihood of its revision at one place or other, therefore it should be checked from the original sources. The information is on broader lines and should not weigh to its exactness. We will welcome suggestions for improving the contents from all corners.

Director

State Institute of Education-cum-D.P.I (s)  
Chandigarh Administration, Chandigarh.
