MESSAGE

It gives me pleasure to know that the Directorate of Economics & Statistics (Statistical Cell) Chandigarh Administration is bringing out the 17th edition of "The Statistical Abstract".

2. I am sure that the data covered in this publication shall be of great help to the people from all walks of life as it has reliable, extensive and comprehensive statistical data on different socio-economic sectors of the economy of the Union Territory, Chandigarh.

3. I congratulate the officers and officials of the department concerned, for bringing out the publication in record time.

[General (Retd.) S. F. Rodrigues,
PVSM, VSM]

FOREWORD

This Statistical Abstract is published annually by the Directorate of Economics and Statistics (Statistical Cell), Union Territory, Chandigarh.

2. The scope and coverage of the present publication has been enlarged by introducing some new tables and improving upon the old ones. The abstract goes a long way in equipping the users with up-to-date information on developments taking place in various socio-economic sectors of the Union Territory. I am confident that administrators, managers and those who are engaged in research and socio-economic analysis, as well as the general public, will find it useful.

3. I appreciate the efforts made by the staff of the Directorate of Economics and Statistics (Statistical Cell) in bringing out this publication.

PREFACE

The demand for adequate and reliable statistics has been ever growing. The Directorate of Economics and Statistics (Statistical Cell) Union Territory, Chandigarh has therefore been compiling and publishing the "Statistical Abstract" annually. The present issue is the 17th in the series.

2. The data covered in this publication is extensive and touches upon almost all the Socio-Economic aspects. Efforts have been made to make it as up-to-date as possible. To enhance the utility of the Abstract, some new tables and graphs have been added and improvement has been made on some existing tables by adding new sub-tables. The "Statistical Abstract" presents reliable and comprehensive statistics pertaining to various aspects of the economy of Union Territory, Chandigarh.

3. It is an indispensable guide and reference for researchers, academicians, administrative executives, government and non-governments organisations executives, entrepreneurs, students and others.

4. I am grateful to various Heads of Departments of the Union-Territory, Chandigarh, for extending wholehearted co-operation in providing necessary information in time.

5. I would be grateful for any suggestions for the improvement in the scope, layout and utility of this publication.

(S.K. SANDHU)

CHAPTER-1

INTRODUCTION

1.1 BACKGROUND HISTORY OF CHANIDGARH

Chandigarh, the dream city of India's first Prime Minister, Sh. Jawahar Lal Nehru, was planned by the famous French architect Le Corbusier. Picturesquely located at the foothills of Shivaliks, it is known as one of the best experiments in urban planning and modern architecture in the twentieth century in India.

Historical Background

Chandigarh derives its name from the temple of Goddess "Chandi" (the goddess of power) located in the area and a fort or "garh" lying beyond the temple.

The city has a pre-historic past. The gently sloping plains on which modern Chandigarh exists, was in the ancient past, a wide lake ringed by a marsh. The fossil remains found at the site indicate a large variety of aquatic and amphibian life which was supported by that environment. About 8000 years ago the area was also known to be a home to the Harappans. (Source: www.citco.nic.in)

Since the medieval thru' modern era, the area was part of the large and prosperous Punjab Province which was divided into East & West Punjab during partition of the country in 1947. The city was conceived not only to serve as the capital of East Punjab, but also to resettle thousands of refugees who had been uprooted from West Punjab.

In March, 1948, the Government of Punjab, in consultation with the Government of India, approved a 114.59 sq. kms. tract of land at the foothills of the Shivaliks as the site for the new capital. The location of the city site was a part of the erstwhile Ambala district as per the 1892-93 gazetteer of District Ambala. The site was selected by Dr. M.S. Randhawa, the then Deputy Commissioner of Ambala. Before the new city came up, the original site had about 59 villages (Singh *et.al.*, 1998). The foundation stone of the city was laid in 1952. Subsequently, at the time of reorganization of the state in 1967 (01.11.1966) into Punjab, Haryana and Himachal Pradesh, the city assumed the unique distinction of being the capital city of both, Punjab and Haryana while it itself was declared as a Union Territory and under the direct control of the Central Government.

Basic Statistics

The basic geographical and demographic profile of Chandigarh is as under:

Area	114 sq kms (+25.42 sq kms additional hilly catchment area declared as Wildlife Sanctuary)
Longitude	76° 47' 14E
Latitude	30° 44' 14N
Altitude	304 – 365 meters above MSL with 1% drainage gradient
Annual Rainfall	111.4 cm/year average
Monsoon	July – September
Temperature	Winter Min. (Nov-Jan) 4°C–14°C Summer Max. (April-July) 37°C – 44°C
Prevalent Winds	From the North West to South East in Winter and reverse in Summer.
Total Villages	24 (As per 2001 Census)
Inhabited	23 (As per 2001 Census)
Un-inhabited	1 (As per 2001 Census)
Panchayats	17 (of 18 Villages)
Population (2001 census)	9,00,635
Density of population/sq. km.	7,900
Birth Rate (per 1000)	21.17
Death Rate (per 1000)	10.01
Infant Mortality (per 1000)	45.60
Sex Ratio (females per 1000 males)	777
Decennial Population Growth	40.33%
Literacy Rate	81.9%

Geology

The Union Territory of Chandigarh is located in the foothills of the Shivalik hill ranges in the north, which form a part of the fragile Himalayan ecosystem. It is occupied by Kandi (Bhabhar) in the north east and Sirowal (Tarai) and alluvial plains in the remaining part. The subsurface formation comprises of beds of boulders, pebbles, gravel, sand, silt, clays and some kankar. The area is drained by two seasonal rivulets viz. Sukhna Choe in the east and Patiala-Ki-Rao Choe in the west. The central part forms a surface water

divide and has two minor streams. The stream passing through the central part is called N-Choe and the other is Choe Nala which initiates at Sector 29.

Climate

Chandigarh falls under Koeppen's Cwg category i.e. it has cold dry winter, hot summer and sub tropical monsoon. Evaporation usually exceeds precipitation and the weather is generally dry.

The area experiences four seasons: (i) Summer or hot season (mid-March to Mid-June) (ii) Rainy season (late-June to mid-September); (iii) Post monsoon autumn/transition season (mid September to mid-November); (iv) Winter (mid November to mid-March). The dry spell of summer is long but with occasional drizzles or thunder storms. May and June are the hottest months of the year with mean daily maximum & minimum temperatures being about 40°C & 25°C, respectively. Maximum temperatures can rise up to 46°C. Southwest monsoons with high intensity showers commence in late June. The weather at this time is hot and humid. The variation in annual rainfall on year to year basis is appreciable i.e. 700 mm to 1200 mm. The 20 year average rainfall for Chandigarh is 1100.7 mm. January is the coldest month with mean maximum and minimum temperatures being around 24°C and 1.8°C respectively. Winds are generally light and blow from northwest to southeast direction with exception of easterly to southeasterly winds that blow on some days during the summer season.

The Master Plan of Chandigarh

Le Corbusier conceived the master plan of Chandigarh as analogous to human body, with a clearly defined head (the Capitol Complex, Sector 1), heart (the City Centre, Sector 17), lungs (the leisure valley, innumerable open spaces and sector greens), the intellect (the cultural and educational institutions), the circulatory system (the network of roads, the 7 Vs) and the viscera (the Industrial Area). The concept of the city is based on four major functions : living, working, care of the body and spirit and circulation. Residential sectors constitute the living part whereas the Capitol Complex, City Centre, Educational Zone (Post Graduate Institute, Punjab Engineering College, Panjab University) and the Industrial Area constitute the working part. The Leisure Valley, Gardens, Sector Greens and Open Courtyards etc. are for the care of body and

spirit. The circulation system comprises of 7 different types of roads known as 7Vs. Later on a pathways for cyclists called V8 were added to this circulation system.

The Capitol complex comprises three architectural masterpieces: the **Secretariat**, the **High Court** and the **Legislative Assembly**, separated by large piazzas. In the heart of the Capital Complex stands the giant metallic sculpture of The Open Hand, the official emblem of Chandigarh, signifying the city's credo of "open to give, open to receive".

The city centre (Sector 17) is the heart of Chandigarh's activities. It comprises the Inter-State Bus Terminus, Parade Ground, District Courts, etc. on one hand, and vast business and shopping center on the other. The 4-storey concrete buildings house banks and offices above and showrooms / shops at the ground level with wide pedestrian concourses. The Neelam piazza in the center has fountains with light and water features. Proposal to set up an eleven storey building in Sector 17 is in the offing. Sector 34 is another newly developed commercial sector.

At least three blocks in Sector 34 are proposed to have 10 storey buildings to have offices, multiplexes and hotels. As per the new proposal each building will have its own style and will not conform to the grey look (source: Chandigarh Tribune – 1.6.2004).

An 8 kms long linear-park, known as the Leisure Valley, runs through the city from its north eastern tip to its south-western end. The Rose Garden, Bonganwilha Garden, Shanti Kunj, Fitness Trail, Topiary Park, Terraced Garden, Hibiscus Garden, Garden of Fragrance, Garden of Annuals, Garden of Herbs & Shrubs, Champa Park, Botanical Garden, etc. all form a part of this green belt in the city, combining modernity with ecology.

One unique feature in the layout of Chandigarh is its roads, classified in accordance with their functions. An integrated system of seven roads was designed to

ensure efficient traffic circulation. Corbusier referred to these as the 7'Vs. The city's vertical roads run northeast/southwest (The 'Paths'). The horizontal roads run northwest/southeast ('The Margs'). They intersect at right angles, forming a grid or network for movement.

This arrangement of road-use leads to a remarkable hierarchy of movement, which also ensures that the residential areas are segregated from the noise and pollution of traffic.

Type of Roads	Functions/Names
V-1	Roads connecting Chandigarh with other cities like Ambala, Kharar and Shimla. They have dual carriage way, good tree plantation and distinctive central verge lighting. The Madhya Marg and Dakshin Marg are two roads which merge into V-1s leading to Kalka and Ambala, respectively.
V-2	They are the major avenues of Chandigarh, with important institutional and commercial functions running alongside. In Chandigarh they are identifiable as 'Marg's'. Madhya Marg, Dakshin Marg, Jan Marg, Himalaya Marg, Uttar Marg and Purv Marg are important examples.
V-3	They are the corridor-streets for fast moving vehicular traffic. A Sector is surrounded either by V-2 or V-3 roads.
V-4	Roads bisecting the Sectors with shopping complexes located along their southern edge.
V-5	Roads meandering through the Sector giving access to its inner lands.
V-6	Roads coming off of the V-5s and leading to the residential houses.
V-7	They are intended for pedestrian movement and run through the middle of the sectors in the green areas. A few examples are along the Jan Marg, in the Punjab University & Sector 15.
V-8	They are intended to run parallel with V-7s for the bi-cycles. Not properly developed, as yet.

Each 'Sector', or the neighbourhood unit, is quite similar to the traditional Indian 'mohalla'. Typically, each sector measures 800 metres by 1200 metres, covering 250 acres of area. Each Sector is surrounded by V-2 or V-3 roads, with no buildings opening on to them. Access from the surrounding roads is available only at 4 controlled points which roughly mark the middle of each side. Typically a sector is divided in four parts by a V-4 road running from east to west and a V-5 road running from north to south. These four parts are easily identifiable as A, B, C and D corresponding to North, East, South and West sides. However, sectors 1,2,3,4,5 and 6 have no Sub Sectors and sectors 7 and 8 have only three parts A, B and C (This is because they are developed according to the concept proposed by the first planner of the City Albert Mayer to give his concept some recognition). In case of Quardipartite Sectors, the houses from 1 to 1000, 1001 to 2000 to 2001 to 3000 and 3001 to 4000 are located in Sub Sectors A, B, C and D in clockwise direction. Though all the sectors are structured more or less similarly, but they have their own characteristics and individuality. Each Sector is meant to be self-sufficient, with shopping and community facilities within reasonable walking distance. The sectors of the city are numbered commencing from the northern most edge of the city with the highest numbers located at the southern edge. There is no sector 13 in Chandigarh, but the addition or subtraction of the number of any two consecutive sectors vertically amounts to 13 or its multiple (eg. Sec. 2 + Sec. 11 = 13, Sec.11 + Sec. 15=26, etc.) Though it is generally believed that No. 13 was left out due to superstition but records indicate that Sector 12 and 13 were demarcated initially as a cultural zone in the lower halves of Sector 10 and 11 but later removed to avoid confusion . However, later No. 12 was assigned to residual area at the edge of Sector 11 but No. 13 was left out in absence of

an appropriate area for its location. The location of Sectors 26, 27, 28, 29 and 30 is also somewhat anomalous. As per records, the phase-I of the master plan was up to Sector 25. Later the city was extended in the space available east of Sector 7, 19 and 20 and numbered 26,27, 28, 29 and 30.

Though educational, cultural and medical facilities are spread all over the city, however, major institutions are located in Sectors 10, 11, 12, 14 and 26.

The industrial area comprises 2.35 sq kms, set-aside in the Master Plan for non-polluting, light industry on the extreme southeastern side of the city near the railway line, as far away from the Educational Sectors and Capitol Complex as possible. Of this, 136 hectares was developed in the first phase. In the event of expansion, creation of an additional industrial area in the southern part of the city was envisaged. While the Industrial area is directly connected to the civic centre by a V-3 road, a wide buffer of fruit trees was planted to screen off this area from the rest of the city. Architectural controls have been established regarding site coverage and materials of construction, ultimately requiring all plans to be formed in consultation with the Capital Project Office. A maximum site coverage up to 50 per cent is allowed with 2.5 percent of the space permitted to be used as quarters for essential staff. In Sector 30, which is sufficiently close to the Industrial Sector, multi-storeyed buildings for providing suitable tenements for the workers have been developed. Besides Industrial housing is also provided in sectors 28 and 29.

Tree plantation and landscaping has been an integral part of the city's Master Plan. Twenty six different types of flowering and 22 species of evergreen trees (Singh *et. al.*, 1998) have been planted along the roads, in parking areas, shopping complexes, residential areas and in the city parks, to ameliorate the harsh climate of the region, especially the hot and scorching summers.

Population Growth in the City

Chandigarh was planned for a finite population of half-a-million. In Phase I, 36 sq km of land was acquired by the city administration for construction of 30 sectors. Land for seventeen additional sectors (Sector 31 to 47) was acquired and developed during the second phase to cater for a population of 350,000.

The predominance of 3/4 storey apartments in the second phase provide for higher population dimension. However, Chandigarh has now grown beyond its planned capacity. Hence, development in the third phase has started in sectors 48 and beyond. Demographic data indicate that between 1961 and 1971, the population increased by 144.59 percent, one of the highest for urban areas in India. According to 1981 census, it grew by another 75.55 percent, followed by 42.16 percent in 1991 and by 40.33 per cent in 2001 (with a total population of 9,00,635). By 2021 the population of Chandigarh is projected to be around 19.5 lacs (at current rate of growth) almost four times for which it was originally built (Fig. 1.1).

Figure 1.1 : Population trend in Chandigarh from 1961 to 2021.

Villages & Slum areas

At present there are 18 villages namely Kaimbala, Khuda Alisher, Khuda Jassu, Khuda Lahora, Sarangpur, Dhanas, Dadumajra, Maloya, Palsora, Kajheri, Hallomajra, Behlana, Raipur Khurd, Raipur Kalan, Makhan Majra, Daria, Mauli jagran and Kishangarh. Four villages i.e. Badheri, Butrela, Burail and Attawa are now under the Municipal limits of Chandigarh and are under the control of the Municipal Corporation. In addition, according to a survey by Labour department and Department of Food & Supplies, 14 unauthorized slums namely, (1) Ambedkar colony (2) Gursagar Bhattal colony (3) Kabari colony (4) Kalyan colony (5) Kumhar colony-25 (6) Labour colony-4 (6) Labour colony-5 (8) LBS colony (9) Madrasi colony (10) Nehru colony (11)

Rajiv colony (12) Sanjay Labour colony (13) SBS Mauli Jagran and (14) Shahpur, exist in/around the city with population of about 70,000.

Areas of Interest

Chandigarh is famous for its architecture and landscaping world over. It combines elegant architectural forms with wide tree-lined avenues, green belts and gardens and is hence referred to as the 'City Beautiful'.

Green open space comprise about 8 sq kms out of 114 square kilometers of the capital project area. Major open areas include the Leisure Valley, Sukhna Lake, Rock Garden and many theme gardens like, Rose Garden, Botanical Garden, Terrace Garden, Fragrance Garden, etc. In addition, the sectors are vertically integrated by a green belt oriented in the direction of the mountains.

Various structures such as the Government Museum and Art Gallery, Museum of Evolution of Life and Fine Arts College have come up in the leisure valley forming the cultural zone of the city.

Sukhna Lake, a major tourist attraction, was constructed in 1958 across Sukna choe and was planned as an integral part of master plan of the city. The lake spreads on the foothills of the Shivalik mountain range. The reservoir of the lake is in the shape of a bean seed bounded by a 12.8 m high rock fill earthen dam. The total catchment area of the lake is 42.07 sq kms, of which 34.42 sq kms falls in the Union Territory of Chandigarh (including 25.42 sq km newly acquired area) and 7.7 sq km which falls in the state of Haryana. This additional area is prone to erosion.

Rock Garden, another tourist attraction, is the creation of Nek Chand and is built with municipal waste. It expresses the fragility of the environment, the need for conservation of the earth's natural resources, the importance of balancing industrial development and sound environmental practices.

The Zakir Rose Garden, spread in an area of over 0.12 sq km of land, is Asia's largest Rose Garden with 50,000 rose bushes of 1600 different varieties of roses.

CHAPTER 2

AREA AND POPULATION

This section includes abstract of available data on area and population of the Chandigarh according to different censuses. The concepts and definitions used in the 2001 census are given below:

Work:

Work was defined as participation in any economically productive activity. Such participation was physical or mental in nature.

Main Workers:

Main Workers were those who had worked for the major part of the year i.e. who were engaged in any economically productive activity for 183 days or more during the year.

Marginal Workers:

Marginal workers were those who did not work for a major part of the year, i.e. those who worked for less than 183 days in the year.

Workers:

Non workers were those who had not worked any time in the year.

Household:

A household is a group of persons who commonly live together and take the meals from common kitchen unless the exigencies of work prevented any of them from doing so.

Literates:

A Person who can both read and write with understanding in any language.

II-Area and population

This section contains data on population of Chandigarh according to different census from 1961-2001, Decadal Growth rate of population during 1901-2001, India and Chandigarh, Population by residence and Sex Ratio 1901-2001, Sex Ratio of total Population and child Population 0-6 age group-1971-2001, Rural & Urban Area in Sq. Kms., Trends of Urbanisation 1971-2001, Number of Literate Population and Literacy Rate by Sex, Scheduled Castes Population, Category-wise Distribution of workers, Village-wise & Ward-wise Population, Scheduled Castes Population, Sex-Ratio, Literate and Literacy Rate, Percentage of total workers, main workers, marginal workers and non-workers to Population-Chandigarh 2001 U.T. 1991 and 2001, Total Population of India, States, U.T. Chandigarh by Sex, Sex-Ratio and Literacy Rate, Distribution of the Disabled by type of disability, Sex, Economic status and residence-2001, Population according to Religion and Projected Population by Sex from 2001-2026 (As on 1st October).

II-AREA AND POPULATION

Table No. 2.1 Population of Chandigarh from 1961 to 2001 (census figures).
(Chandigarh was established in 1951).

Year	Total	Males	Females	Decennial Rate of Growth
1	2	3	4	5
1961	119881	72576	47305	-
1971	267251	147080	110171	+114.59
1981	451610	255278	196332	+75.55
1991	642015	358614	283401	+42.16
2001	900635	506938	393697	+40.33

Population Graph of Chandigarh 1961-2001

II-AREA AND POPULATION

CHAPTER 3

CLIMATE AND RAINFALL

This section contains data on Temperature (In degrees Celsius), Humidity and Rainfall (millimeter).

Rainfall is recorded by the India Meteorological Department. Daily rainfall is recorded at 0830 hours everyday. The amount is the total rainfall for the preceding 24 hours ending at 0830 hours of the date of Measurement.

Temperature and Humidity is recorded at 0830 hours IST and at 1730 hours IST.

III-CLIMATE AND RAINFALL

CHAPTER 4

AGRICULTURE

Area according to Village Papers: It is according to village papers and is based on returns of area prepared by village staff for revenue purposes in the Chandigarh whereas area by professional survey is worked out by the Surveyor General of India. There is some difference in the two sets of figures because of different methods adopted by them.

Area under Forests: This includes actually forested area on the lands, classed or administered as forests under any legal enactment dealing with forest whether State-owned or Private except in area not cadastrally surveyed. Area under forests given in this section does not tally with that of the Forest Department shown in the section on forest statistics owing to the fact that certain lands though no wooded, are taken as forest by the Forest Department while these are not treated as such by the Director Land Records, Chandigarh Administration.

Land not available for Cultivation: This includes absolutely barren and unculturable land like mountains deserts etc., which cannot be brought under plough except at exorbitant cost or land cover by buildings, roads and railways and water or otherwise appropriated for non-agricultural purposes.

Other Uncultivated Land excluding Fallow Lands: This denotes land available for cultivation either not taken up for cultivation or abandoned later on for one reason or the other and includes culturable waste, permanent pastures and other grazing land and lands under miscellaneous tree crops and groves.

Fallow Land: It denotes cultivable land which after abandonment remains uncultivated over long period called "old fallow", those kept uncultivated during the current year called "Current Fallows".

Net Area sown: It is the net area sown under crops, the area sown more than once during the year being counted once only.

Total Cropped Area: It includes total area covered with crops during the year. In case different crops are raised on the same land during the year, the same area is counted more than once.

Classification of Area.

Size Class of land holding.

Area and Production under Principal Crops.

Area and Production under different Vegetables.

Area and Production under different fruits.

Consumption of Chemical Fertilizers.

Tubewells in Chandigarh.

IV-AGRICULTURE

Table No. 4.1

Classification of Area.

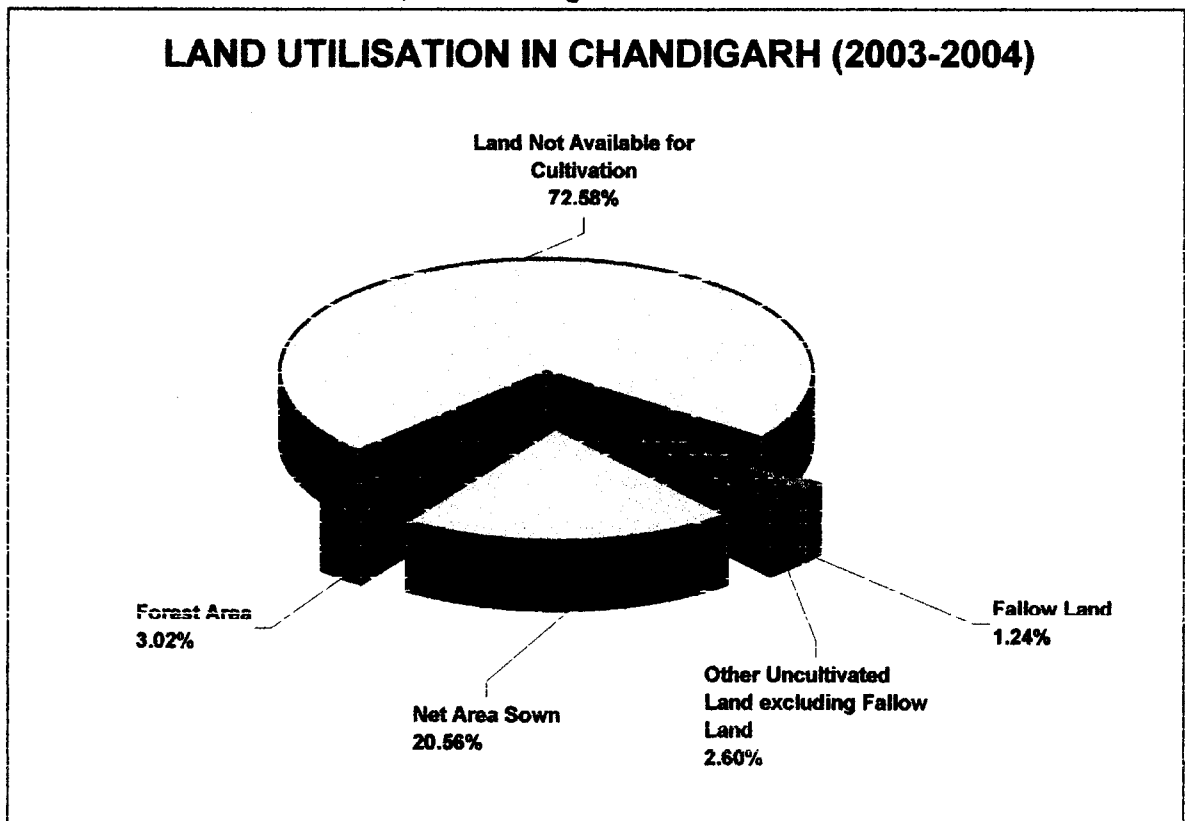

Year	Geographical Area (Sq.Kms)	Total area according to Village papers	Forests	Not available for cultivation	(In Hectares) Other Uncultivated land excluding fallow land

CHAPTER 7

MEDICAL AND HEALTH

Available information concerning Medical and Health Statistics in Chandigarh is shown in the tables under this section. The figures for the latest available year are shown in greater detail. Corresponding figures for the earlier year are also shown.

Birth rate, Death rate, and Infant Mortality rate (per thousand) Combined.

Medical institutions classified by Hospitals and Dispensaries.

Immunization Programme, Voluntary Sterilization Operations and Family welfare Programme.

Progress of Prophylaxies against Nutritional Anaemia in Chandigarh

VII-MEDICAL AND HEALTH

Table No.7.1

Birth Rate (Rural+Urban).

BIRTH RATE	
Year	COMBINED
1	2
2001	21.49
2002	20.98
2003	21.17

VII-MEDICAL AND HEALTH

Table No.7.2

Death Rate (Rural+Urban).

DEATH RATE	
Year	COMBINED
1	2
2001	9.55
2002	9.91
2003	10.01

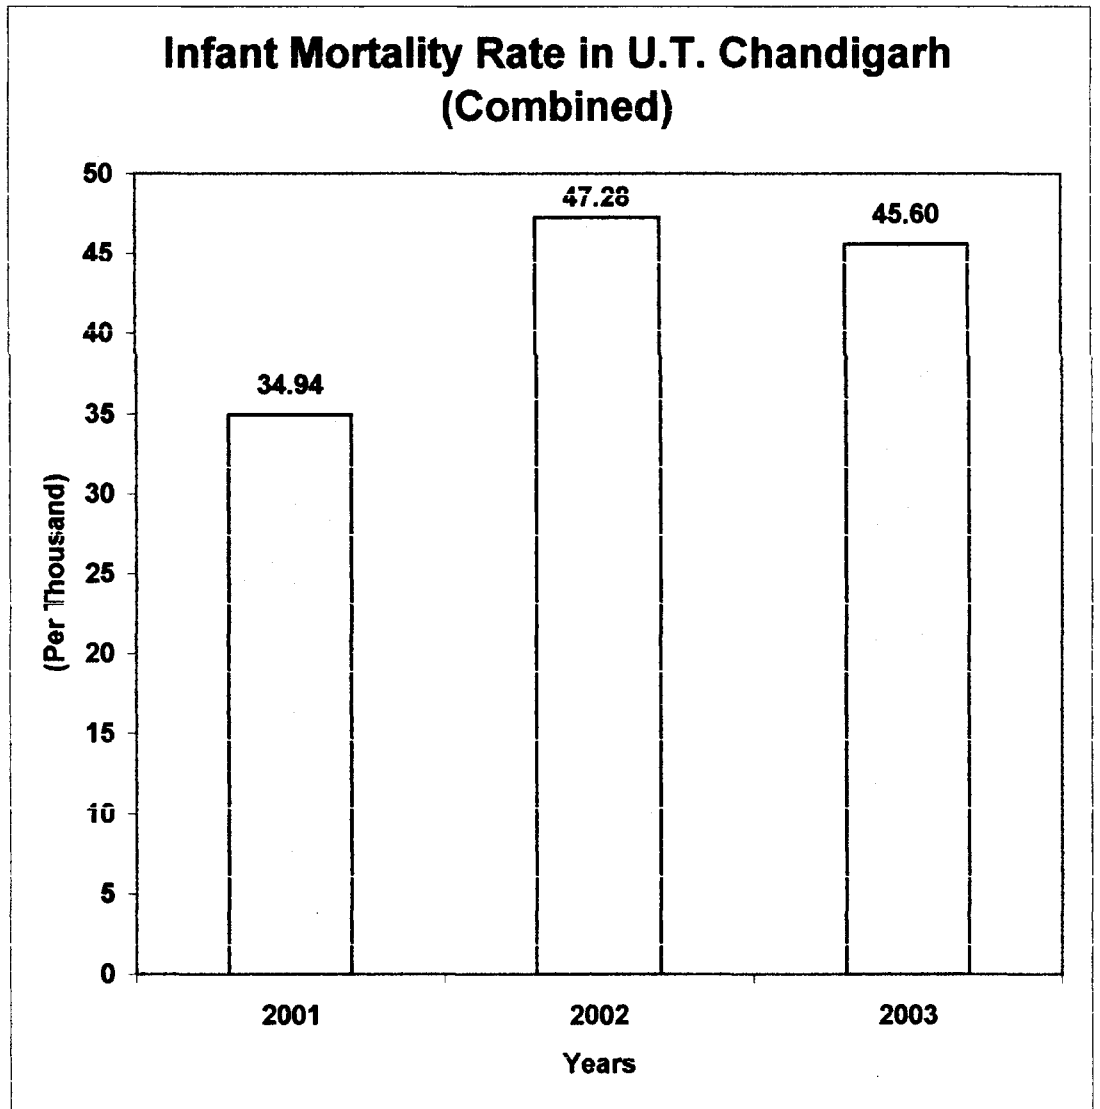

VII-MEDICAL AND HEALTH

Table No.7.3

Infant Mortality Rate (IMR) (Rural+Urban).

Thousand per annum.

INFANT MORTALITY RATE	
Year	COMBINED
1	2
2001	34.94
2002	47.28
2003	45.60

Note:

The Birth and Death rates are higher in Urban Area as compared to Rural Area mainly because of fact that the registration under the act is being done by the "Place of Occurrence" of events and vital rates are worked out accordingly.

CHAPTER 8

LIVESTOCK, ANIMAL HUSBANDRY AND DAIRYING

This Section contains tables regarding livestock fisheries and agricultural implements. Data regarding the number of livestock and poultry besides agricultural implements and fisheries collected quinquennially. The data are collected by engaging persons drawn from the different departments, corporations and compiled by the Animal Husbandry Department.

Population of Animal and birds according to Thirteenth, Fifteenth & Sixteenth Quinquennial Livestock Census, 1982, 1992 & 1997.

Veterinary Institutions & Other Staff.

Workdone in Veterinary Institutions.

Recognised Slaughter Houses and animal slaughtered therein.

Quick Results of Livestock population based on 17th Livestock Census (As on 5.10.2003)

Agricultural Implements & Machinery.

CHAPTER 9

INDUSTRIES

Year-wise breakup of total registered factories, registered working factories and workers employed therein under section 2m(i), 2m(ii) and 85 of the factories Act, 1948. Under section 2m factory means any premises including precincts thereof:

- (i) Wherein ten or more workers are working or were working on any day of the preceding twelve months, and in any part of which manufacturing process is being carried on with the aid of power or is ordinarily so carried on.
- ii) Wherein twenty or more workers are working or were working on any day of the preceding twelve months, and in any part of which a manufacturing process is being carried on without the aid of power, or is so carried on and does not include a mine subject to the operations of the Indian Mines Act, 1923, or a railway running school.

Under Section 85, the Chandigarh Administration is empowered to notify any factory not covered under the above two sections.

Production and employment of Manufacturing industries.

Information relating to working small scale industries.

Information relating to working large/medium industries in Chandigarh.

CHAPTER 40

STATE DOMESTIC PROUDCT

It contains data on Gross State Domestic Product (GSDP), Net State Domestic Product (NSDP), both at current and constant prices at factor costs by industry of origin at current prices and constant prices from 1993-94 to 2003-2004 which inter-alia contains these estimates for the year 2001-2002 (P), 2002-2003 (Q) and 2003-2004 (A) are advanced estimates based on the available data and trends. Besides this per capital income both at current and constant prices from 1993-94 to 2003-2004 have also been included therein.
