CHAPTER-I DISTRICT PROFILE.

General and Physical features :

I. Location:

Jorhat district is a part of the upper Brahmaputra plain of Upper Assam (in North-East India). Its landmass extends between $26^{9}5'N - 27^{9}5'$ north latitudes and $93^{9}E - 94^{9}5'$ east longitudes of the earth. The maximum extension of Jorhat district is from east to west 101 Km and north to south about 60 Km.

II Boundaries:

The southern side is bounded by State of Nagaland. The districts of Sonitpur and Lakhimpur lie to the north of the Jorhat district. Its eastern side is bounded by Sibsagar district. To the west lie Golaghat district.

III. History :

The present district of Jorhat was formerly a sub division of the district of Rongpur (Sibsagar at present) Jorhat was declared as a sub division on 15th Feb 1869 when major A E Camp Bell was the Deputy Commissioner of the district. Jorhat became a full-fledged district in the year 1980. It is with a total land area of 2859.3 sq. K.M. And with two Sub-division Jorhat and Majuli Historians have established that the name Jorhat emerged from two 'hats' or weekly bazars ' Machar hat' and ' Choki hat '.' Macharhat ' to maintain its own identity as a market place even today while 'Choki hat' has turned to be a residential place in later period .Jorhat was the last capital of Ahom kings, shifted from trouble torn Rongpur to Disoi-Bahar (Jorhat) in the year 1794 by the last Ahom king 'Swargadeo Gaurinath Singha ' and continued to be the capital till the end of the rule. Formerly Jorhat was not a place of importance. It was known as 'Disoi Bahar' (temporary resort) covered with dense forest infested with wild animals. Swargadeo Pratap Singha and Swargadeo Rajeswar Singha wished to turn this area to an ideal township in their own times but could not turn this place to 'Hostinapur'(the proposed name of the township by Swargadeo Pratap Singha) . The place Jorhat had come to focus and became a place of importance only when it became the capital of the Ahom kings. The stream 'Disoi' was dug and made to flew by the new capital, the very stream is now known as river 'Bhogdoi'. Shifting of the capital resulted in the migration of skilled and professional people to Jorhat .But during those days Ahom kings had to spend most of their times in and finally the fighting Burmese invaders. Burmese invasion touched badly the economy for which the Ahom rulers could build only a few monuments in Jorhat. Construction of some tanks and a few roads were among the note worthy monuments of those days. Assam came under the control of 'East India Company' in 26th Feb 1826 .David Scott took charge of Upper Assam he was followed by commissioner Robartson. Richards became the first Junior commissioner in charge of eastern Assam with H.Q at 'Rongpur'(Sibsagar) He shifted the district H.Q to Jorhat in1828 AD. He was followed by Lt Cornel Cooper. Then came John Bryan Neuville. But the British rulers had failed to rule Upper Assam peacefully for which in 2nd march 1833 Purandar Singha was made the king of Upper Assam with the capital at Jorhat with an engagement that the king was to pay an annual tribute of Rs. 50,000/- to the British government. In October 1938 Purandar Singha territory was brought under the company for his failure to pay the tribute and granted a pension of Rs 1000/- to the royal family which the king refused to accept. The rulers divided the territory into two

districts Sibsagar and Lakhimpur.. This time Sibsagar again became the HQ of the district of Sibsagar. In 1839 Jorhat became a sub-division of Sibsagar district while Brody was the ruler of the district. But Official declaration was not done. In 15th On 1st April Feb 1869 Jorhat was declared as a sub-division of Sibsagar district. 1912, Remfield Phular (known as Phool Sahab) governor of East Bengal and Assam shifted the district HQ to Jorhat. Discovery of tea plants in Assam made the British interested towards this state and they started cultivating tea in large scale .Jorhat became the center of the tea industry . In 1911 they established the Tocklai Tea-Research Experimental center. They also established the Gymkhana club to meet with the recreational needs of the planters and to hold informal discussion on professional problems. By way of tea plantation there came a major change in political, social and economic life of Jorhat, with the development of Jorhat as the center of the tea industry and the consequent improvement of transport and communication. People from different parts of India began to come over here. People from Orissa Madhya Pradesh and Tamilnadu came as tea garden labours . Marwaris came as traders and bankers to the tea garden. The first Marwari merchant to construct Borgolai the first Marwari farm by purchasing bricks from British rulers obtained from the dilapidated royal palace which perhaps the only brick structure constructed by the Ahom kings in Jorhat some where near the present court building The present court building was constructed in 1911. This is in the way one development followed the other in all directions. Educational and literary activities people of Jorhat conscious about their socio-economic and political made conditions. Then there came the Second World War in 1939. In later 1939 a team of Royal Indian Air force officials requisitioned the waste land of Rowriah Tea Estate and its surrounding area and built the air port with sheer manual labour. The first United States air force plane landed there in early 1940. The runway was lengthened and surfaced with PSP (pierced steel plates) for heavy aircrafts. Dakotas, Fighters and twin boomed lighting fighters were seen moving in the air creating panic to the simple and ignorant masses. It became full-fledged airport on 1st Aug 1952. further the main roads were widened and graveled constructed a steamer Ghat at Neemati along with the connecting road from Jorhat town to which waterway through Brahamaputra.

Jagganath Baruah (B.A.Jagganath) was the first graduate of Jorhat and Krishana Kanta Handique was the first Vice-Chancellor of Gauhati University, Assam.Both scholars were the inhabitant of Jorhat district.

- IV. Date of Establishment 1980.
- V. Area 2859.3 Sq. Km.
- VI. Administrative Divisions 1. Jorhat, 2. Majuli, 3. Titabor.

VII. Topography

The whole region has a general slope from south to north. The direction of flow of the river (Bhogdoi) very well points to the foothills of the Nagaland. It is highly undulating in nature. On the basis of the physiographic characteristics, the district may, therefore, be divided into three major physiographic regions: (i) the foothill regions, (ii) the middle built up plain region, (iii) the low-lying flood plain region.

The *foothill region* adjacent to the Naga hills and estimated width of this region is about 5 to 6 Km. And lies from the hills up to the 110 meters contour line towards the

plain. The foothill region is high and covered with dense forest. The higher ground is sometimes occupied by tea plantation.

The *middle built up plain* extends from Jhanji to the river Kakodonga. The average width of this region is about 20 Km. The region lies between 110 and 9 meters contour lines. The region slopes down gradually from the south to the north at an average gradient of 1m/Km. This is made up entirely by the aggradational work of river Brahmaputra and its tributaries (Bhogdoi, Puthinadi, Teok, Jhanji, Kakajan and Kakodonga). The population is very dense. Tea, rice and sugarcane are produced abundantly and lines of transports and communication as also towns and service centre are well developed here.

To the south of the *built up plain* the bank of the river Brahmaputra there lies stretches of low lying area ranging in wide from 5 Km. to 12 Km. in its different parts. This region represented flood plain of Brahmaputra. The area is below 90metre altitude. The river of the Brahmaputra annually inundates it during rainy season. The region is full of marshes and swamps created partly by water logged natural depression and partly by the shifting lower courses of the southern tributaries.

A special part of the flood plain region is the Majuli Island, the greatest Riverine Island of the world. The northern branch of Brahmaputra, which bounds the island, is known as Lohit Kharkatia suti. It is a pearl shaped island with an area of 924.6 Sq. Km. and average width about 10-12 Km. and length about 70-90 Km. The island can be well included in the flood plain region for most of it is inundated during high summer floods.

VIII. Natural drainage -Brahmanutra Bhoodoj Kakodonga Kakajan Teok Tuni Lonly the rive

Brahmaputra, Bhogdoi, Kakodonga, Kakajan, Teok, Tuni [only the river of Majuli]

IX. Population pattern

Total population of Jorhat district 1009197persons(according to 2001 Census). Among them 530240 male and 478957female. The rural population 838549 persons and 439282 male and 399267 female. The urban population 170648 persons. Among them 90958 are male and 79690 female

X. Economic Conditions of the People and Occupation Pattern.

Agriculture-

Tea and Paddy are the main agricultural crops of the district. Other crops are Mustard oil, Sugar, Peas, Potato and vegetables are pre-dominant.

Livestock -

Livestock farming are very rare. Local base farming (Mahals) are available in different places in the district. One government Frozen Semen production situated in Kaliapani block of Jorhat.

Industries-

Various cottage industries were there in the Pre-British period in Jorhat. There were professionals jewelers and black smiths in different places of Jorhat .Tea manufacturing industries are available in different places of Jorhat district which providing a lot of engagement. Cotton ,Eri-muga and silk weaving industries are also pre-dominant. Bakery and other manufacturing industries are other important industries of the district. Present status of industries of Jorhat district:

1.Registered factory-2012.Registerd industries-237.3.Industrial estate-1.4.Commercial estate-3.

_

XI. Rural development

Above 80% population are inhabiting in the rural area DRDA imparting important role for the development of the district. Through the RPRS, SSA,PMGY, National savings schemes Government are trying to decentralized the schemes.

(XIII) Literacy

Out of total 1109197 lakhs population 689414 lakhs are literate and 3,11,783 lakhs are illiterate. The overall literacy rates of the district has increased from 65.51 % in 1991 to 77.91% in 2001. In terms of literacy the district stands at first rank amongst the 23 district of the state .It is higher than the state average. The female literacy rate of the district is $\underline{72.54\%}$ which is higher than the state average .In terms of female literacy rates the district position is first.

The literacy rates of Urban population is higher than the rural population .

Table 2.29: Teachers Position in Govt./Prov. Upper Primary Schools

In the table no. 2.29 shows that the total sanctioned post of teachers are 2144 out of which teachers in position are 2004 at UP level. And total vacant post of teachers are 140. Among the teachers of 2144, there are 1481 (73.9%) teachers are trained.

CHAPTER III : PLANNING PROCESS

Universalisation of elementary Education for 6-14 years old children is now a fundamental right. This means that the government and the people must ensure that all children in this age group receive quality education up to middle school level Sarba Siksha Abhijan a programme with clear time frame and target has been viewed as an opportunity for academic UEE.

To achieve this elusive goal a large number of human resources were mobilized for ensuring a participative and contextual planning. The services of education officials and additional manpower were utilized as per the details given below.

| SI. No | Name of the block | Number of DRP | Number of BRP | Number | of |
|----------------|-------------------|------------------|---------------|------------|----|
| | | | | Village | |
| | | | | Volunteer. | |
| 1 | East block | 4 | 74 | 1056 | |
| 2 | Central Block | 4 | 70 | 662 | |
| 3 | Jorhat Block | 4 | 62 | 984 | |
| 4 | Titabor Block | 4 | 101 | 924 | |
| 5 | Majuli Block | 10 (remote area) | 99 | 2128 | |
| 6 | North-west Block | 4 | 60 | 800 | |
| District Total | | 29 | 466 | 6554 | - |

A. Key Resource Persons Training at State Level:

The planning process has initiated with the launch of pre-project activities in the month of February' 2002 when a 9 member strong key resource persons attended a 3 day state level training programme at IIE, Guwahati from 11th February to 13th February 2002.

List of officials attended the training programme is given at annexure—Table I.I.

After completion of the State level Training, meeting of District Board of Education was held on 25th February and Educational functionaries meeting was held on 28th February 2002.

B. District Resource Persons Training at Zonal Level:

The second important milestone of the pre-project activities was the conduct of District Resource Persons (DRP) training at Zonal level. In order to minimize the transmission loss the DRP's training was conducted at zonal level by combining the DRP's of Jorhat, Golaghat and Sibasagar district at Post Graduate Training College, Jorhat from 4th March to 6th March' 2002. This has ensured the conduct of the training jointly by the State Resource Persons and the respective KRP's. The staggering of the Training schedule by one to two days has also ensured the presence of Mission Director D. Jhingran I.A.S in all the venues who was the main source of inspiration.

There were 4 DRP's in all the 5 blocks except in Majuli which being a remote area additional 5 DRP had to be allotted. Altogether 29 nos. DRP attended in the training programme .The DRP of Sibasagar and Golaghat district also attended in the training programme.

List of District Resource Persons attended the training programme is given at annexure-i Table i.II.

C. District Resource Persons Planning Meeting at District Level:

After the training of DRP's two day planning meeting of DRP's was held at district level on 8th and 9th March, 2002.The agenda of the Planning meeting was extensive and covered following points:

- Assessment of Additional BRPs required for Tea garden & Remote areas
- Preparation of block wise sets of materials and distribution of materials to BMC offices
- Review of scheduled major works
- Preparation of a final chart showing the allocation of blocks & GPs for each DRP
- Finalisation of block wise dates and venue for BRPs Training & information to be given to all concerned.
 - Allocation of DRPs against each block level training venues
 - Preparation of plan for supervisory visits of DMC, ADMC, BMC and other department officials
 - Arrangements to be made for BRPs training.
 - Allocation of villages and Tea Garden Divisions to BRPs.
 - Discussion on session plan of BRPs & Volunteers training
 - Finalisation of dates and venues for GP level meetings
 - Distribution of Materials
 - Assessment of additional materials if any required and submission of requirements to Mission for the same.
 - Activity wise requirement of fund and arrangements made for transfer of fund from DMC to BMC & BMC to BRP
 - Opening of BEEOs bank account & decision to transfer Rs.25000/- to each BEEO/BMC immediately at the end of the planning meeting
 - Also prepare fund requirement for next 1 month for transfer of fund from state office for DMC and each BMC offices against specific activity and proposed implementation schedule.
 - Arrangements made for tea gardens, forest and other remote areas
 - Assessment and identification of the additional manpower for DMC & BMC office.

At the end of the district level planning meeting, DRPs were deployed to different blocks and assigned 2-7 GPs to each DRP. Besides 479 nos. of BRP were selected at the ratio of 2:1 per village except TE division, remote and problematic forest village.

The DRP wise allocation of GPs, villages & BRP is given below:

| SI.No | Name of the DRP | Name of the Block | No of GP allotted | No of Villages within the allotted GP | No of BRP |

E. Block Resource Persons Planning Meeting at Block Level :

S

After the BRPs training one day planning meeting was held with the BRPs.

In the planning meeting along with other points the schedule of field level activities was finalized. Accordingly the field activities were executed as per the schedule and targets achieved given below:

Similar to the line of DRPs Planning Meeting, planning meeting of BRPs were also held.

| SI. No | Tasks |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. | Visiting the assigned GP for giving information for the GP level General Meeting |
| 2. | Acting as RP in the first meeting in the assigned GP |
| 3. | Submitting the report of the meeting to BMC |
| 4. | Visiting the assigned two villages for giving information for the Gaon Sabha Meeting |
| 5. | Acting as RP in the first Gaon Sabha Meeting of each of the 2 villages |
| 6. | Preparation & sending of the reports of Gaon Sabha Meeting to BMC |
| 7. | Training of village volunteers at GP level |
| 8. | Visiting villages during survey |
| 9. | Undertaking sample checks of at least 10 sample household schedules during the process of collection & after they have been received from villages and affixing signature on the body of the formats. In case of mistakes getting them corrected or re-collected. |
| 1 0. | Compilation of survey data as per format 9 and 10 of the two villages |
| 11. | Conducting group discussion in the assigned villages |
| 12. | Conducting interview of teachers of the schools of the assigned villages |
| 13. | Ensuring timely collection of reports from fields. |
| 14. | Compilation of village survey GP wise and block wise at block level under the supervision of DRP |
| 15. | Ensuring the smooth functioning of all village volunteers of the two assigned villages. |
| 16. | Acting as RP in the village level meetings for constitution of VEC and sharing of survey findings |
| 17. | Filling up the format for approval of VEC/GPEC available at BEEO/DI office |
| 18. | Getting approval of BEEO/DI for membership of VEC and GPEC and handing over |
| | the approval copies to VEC/GPEC |
| 19. | Conduct of First Meeting of Village Education Committee and submission approval |
| | of VEC from BEEO to the Member Secretary |
| 20. | Assisting VEC in preparation of Village Education Register (VER) |

The BRPs were entrusted with the following field level Tasks:

F. Meeting of Gaon Panchayat Functionaries at GP Level :

A public meeting was conducted in each GP. GP President, Secretary & Members, Gram Sevak's/ Sevika's, ANM workers, AWW workers, Head Teachers /Masters /Principals of schools, SI of Schools of that area, Retired Teachers, Gaon Burha's of the concerned GP area were invited to participate in the meeting.

Altogether 111 Gaon Panchayat level meetings were held during March' 02 in which total 40-80 people participated in each meeting.

| Number | of | GP | level | Period | during | which | the | Total participants |
|---------|----|----|-------|---------|-----------|-------|-----|--------------------|
| meeting | | | | meeting | j s was h | eld | | |
| 111 | | | | March' |)2 | | | 40-80 |

The concerned BRPs visited the GP area for giving information to the participants to attend the meeting. Formal Invitation letter signed by the BMC or concerned DI was given to the participants and also leaflet were pasted in the public places. The concerned BRPs ensured that the participants have received the invitation letters.

MP/MLA/PRIs of that area were specially invited to participate in the meeting and inaugurate the meeting.

If the attendance of the meeting was found poor, the meeting was postponed and held within next three days.

The major agenda of the meetings were:

- Overview of Educational Status in the GP
- Issues of the GP which effects Elementary Education
- Aims, objectives & targets of SSA
- Outline of pre-project activities to be conducted at village level

The procedures for the conduct of meeting and reporting format of the meeting were included in the BRPs training manual. Printed reporting formats were supplied for reporting of the meeting.

| Number of GP level | Period during which the | Total participants |
|--------------------|-------------------------|--------------------|
| meetings held | meetings were held | of the meetings |
| 124 | Month of April'2002 | 12186 |

G. Gaon Sabha Meeting:

In each village a general public meeting was held twice for appraisal, awareness and constitution of VEC.

Altogether 782 nos. of Gaon Sabha meetings were held during March' 02 to April ' 02 in which approximately 211660 people participated and village volunteers were identified.

| SI | Name | of | the | Number | of | Period | during | Total | |
|-------|----------|-------|-----|---------|-------|----------|----------|--------------|----|
| No | block | | | Gaon | Sabha | which m | neetings | participants | of |
| | | | | meeting | | were he | ld | the meeting | |

| 2 | Central | Bloc | ck | 93 | | 2-4th Ap | oril | 2000 | |
| 3 | Jorhat E | Block | ĸ | 124 | | 1-5 Apr | iľ02 | 4960 | |
| 4 | Titabor | | | 125 | | 1-3 Apri | ľ02 | 6500 | |
| 5 | North Ea | ast | | 100 | | 4-6 mar | ch'02 | 2300 | |
| 6 | Majuli | | | 210 | | 11-13 A | pril'02 | 3400 | |
| Total | | | | 782 | | | | 21660 | |

For giving wide publicity following means were adopted:

- Distribution of leaflet giving date, venue and agenda of the meeting
- Distribution of leaflet signed by Chief Minister and Education Minister of Assam
- Pasting of the leaflets in public places

- Announcement of the meeting in the local market
- Visit of the BRP to the homes of elder persons of the Villages for individual invitation.
- Visit of the BRP in schools. In schools the BRP will invite the teachers individually and distribute leaflets to the students for pursuing their guardians to attend the meeting.
- In case tea gardens the BRP also met the Garden Manager, Welfare Officer and representatives of the labourers and request their participation in the meeting
- In case of forest villages the BRP also met the Forest Department Officials viz. Forester, Ranger and request their participation in the meeting
- Special appeal to the mothers, Voluntary Agencies, Club, Mahila Samity of that area to attend the meeting

In order to make effective and ensuring much participants in the meeting, a target of minimum number of attendance of the meeting was fixed 100 for large village & 80 small villages. Significant proportion and not less than 30 percent of the women must present in the meeting. If the participation is less than this the meeting would have to be postponed and organsied within 2 days. Participants must include Guardians, Teachers, Elder village persons, representative of NGOs, Mahila Samity, Panchayat Members, mothers, local unemployed youths, Student representative etc.

Concerned BRP of the village conducted the meeting. In this meeting the village volunteers were selected by the villagers themselves for conducting the House to House Survey.

The proceedings of the meeting were recorded in a register supplied by the Mission. This register will now be used as Village Education Committees Meeting register.

The procedures for the conduct of meeting and reporting format of the meeting were included in the BRPs training manual. Printed reporting formats were supplied for reporting of the meeting.

H. Training of Village Volunteers at GP level

A 3-day training of village volunteers who were selected in the Gaon Sabha meeting was held for conduct of survey work. The training was provided by the BRP at GP level. The training was staggered to ensure the presence of concerned DRP for at least one full day of the training. Altogether 6482 village volunteers were trained in 782 venues.

| SI No | Name of Block | Number of training venues | Period during which training was held | Total nos. of village volunteer. |
|----------|---------------|---------------------------|---------------------------------------------|----------------------------------------|
| 1 | East | 130 | 22 nd -24 th April,02 | 1056 |
| 2 | Central | 93 | 2 nd -4 th April,2002 | 662 |
| 3 | Jorhat | 124 | 2 nd -4 th April,2002 | 984 |
| 4 | Titabor | 125 | 2 nd -4 th April,2002 | 852 |
| 5 | North East | 100 | 13-24 th May,2002 | 800 |
| 6 | Majuli | 210 | 6 th -8 th April,2002 | 2128 |
| | | 782 | | 6482 |

On the last day of the training, the concerned DRPs/BRPs finalised the schedule of all fieldwork including the day of the survey sharing meeting and constitution of VEC.

I. Micro Planning, School Mapping and Other Village Level activities:

A detail micro planning and school mapping exercise was undertaken in each habitations, villages and tea garden divisions by the BRPs with the help of identified and trained village volunteers. The objectives of this exercise was to:

- Find out educational status of children including those going to school and those who are out of school
- Find out the existing educational institutions in the village.
- Finding out the peoples' view on functioning of these educational institutions.
- To find out whether there is any specific deprived groups/areas.
- To identify child labour and disabled children if any in the village

The activities conducted in sequential order are described below:

J. Village Mapping And Listing Of Resources:

The village volunteers carried out this exercise: The BRP remained present during the exercise to assist and guide the group.

In Tea Garden a reas, e ach *L ine* was considered as a habitation, and each *Division* was considered as a village.

The Village Volunteer Group fixed up a date for a general meeting of Community Members covering representatives from all the habitations at a central place, (preferably in schools premises), and completed the following activities through extensive group discussions and sharing. This exercise comprises of the following activities:

- A village map showing specifically the habitations, educational institutions, isolated/remote habitations to have an overall picture of the village
- Listing of all names of Educational Institutions
- Distance listing of schools with respect to three stages of schooling viz. Primary Stage, Upper Primary Stage, and High/Higher Sec Stages.
- Listing of households' habitation wise.
- General information of the Village.

K. House To House Survey

After completion of the above activities the village volunteers carried out the work of door to door survey for collection of information of every child. The BRP remained present during the exercise to assist and guide the volunteers group.

Following information of every child was captured in a well-designed format. For each household one format was used.

Name of the Family Head, his/her educational status, caste, mother tongue, occupation.

Above 14 years gender wise total members of the family by literacy status, Name of the child, his her sex, age, educational status, name school or other institutions wherein he/she is studying, whether he/she is physically handicapped and nature of disability, whether he/she is child Labour and reason of child labour, if dropped out or never enrolled reasons of drop out or never enrollment.

Habitation Wise the entire household formats were tagged together for the village for compilation & on ward submission.

L. Collection Of Information On Religious Madrassa/Tols/Moths

A lot of children attend in these types of full time institutions wherein only religious teaching takes place. In order to capture the information of all these children a format was designed and information from each of such institutions were collected by the BRPs.

M. Collection of Information On Venture, Private Schools

In order to have a comprehensive picture of all types of institutions the DISE format was simplified and administered in Venture & Private Schools by the BRPs.

N. Compilation of House-to-House Survey Results

The BRPs compiled the survey results as per instruction given in the training manual and use the printed formats. He/she took help of the village volunteers while doing so.

Following guideline was followed for collection, compilation & submission of formats:

The BRP undertook sample checks of at least 10 household schedules (Format 6) of the two assigned villages during the process of collection of formats. On his satisfaction he put his/her signature on the body of the formats. In case of mistakes the BRP got the format corrected or re-collected. The BRP had specifically checked that information for all the households (listed at Format 4) have been collected.

DRP also undertook sample checks of at least 5 household schedules of at least 10 villages of his/her GPs during the process of collection & certify the correctness of the entries and affix signature on the body of the formats. In case of mistakes the DRP will get them corrected or re-collected

On ensuring the complete collection and sample checks the BRP sat together with the village volunteers and make habitation wise bundle of the Format 6 and start compiling household wise information as per format 9. After completing the compilation as per format 9 the format 10 will be compiled. The DRPs visited villages during the compilation process.

After completion of the compilation the BRPs submitted the formats to the concerned DRPs on a specified date. Before submission, the BRPs checked specifically whether any format was missing or not, whether all formats have been signed by them or not, whether any major inconsistency is there or not etc.

The DRPs fixed a common date for receiving of the formats in the block in a specified venue and scrutinized the same with the assistance of the concerned BRPs. GP wise compilation as per format 10 was also be done at the same time.

The DRPs checked specifically that whether any format is missing or not. Whether all formats have been signed by the BRPs or not, whether any major inconsistency is there or not etc.

DRPs put his/her signature on the formats and make GP wise bundle and submit to the concerned BMC with forwarding letter and his her comments if any in separate loose sheet.

All the formats that is except Format 6 to be submitted to the DRPs have been signed by the BRPs

BRPS RETAINED THE FORMAT NO. 6 WITH THEM TILL THE FORMATION OF VEC AND SUBMITTED TO THE MEMBER SECRETARY OF VEC AFTER THE CONSTITUTION OF VEC

O. Group Discussion:

Group discussion was one of most important pre-project activity. One group discussion was conducted in every village. Separate group discussions with women were organized in such villages wherein due to certain socio-religious reasons women do not participate meetings with male folk.

The Block Resource Person with the help of village volunteers will conduct the group discussion

Following questions were discussed in the group discussion:

- Functioning of the school
 - Opinion of the Teachers of the school
 - (Regularity, teaching, behaviour with children)
- Problems in the functioning of the schools
- School Management Committee
- Appropriateness of the school Calendar
- Suggestions for Improvement of the functioning of schools
- Irregular children

•

- Children who are not enrolled in school(kind of families)
- Most disadvantaged group/ families in the village
- Measures to ensure that Children do not dropout and attend school regularly

| SI No | Name of the Block | e Number of Group discussion | Period during which the discussion were held | Total participants of the discussion. |
|----------|----------------------|------------------------------------|-------------------------------------------------------|---------------------------------------------|
| 1 | East | 130 | 1 st -20 th May,02 | 2600 |
| 2 | Central | 93 | 27-29 th April,02 | 4325 |
| 3 | Jorhat | 124 | 27-29 th April,02 | 2800 |

| 6 | Majuli | 210 | 5 th - 15 th June | 4200 |
| | | | | 19325 |

P. Holding of Interview of teachers:

In order to collect the opinions of the teachers' interview of teachers was also conducted as a part of pre-project activities. The BRPs conducted the interview of one Head teacher of LP school and one Head Master of Upper Primary School along with one other teacher from each school. So the BRP conducted interview of four teachers of the schools located in the village, which includes one Head teacher & one other teacher of one LP school and one Upper Primary Schools.

The teachers' opinion on following areas were sought:

- The problems in the functioning of the schools
- School Management committee
- School Calendar appropriate
- (schedule of holidays, examinations etc with reference to agriculture seasons, floods, local festivals etc.)
- The children who are not enrolled in school
- Irregular Children
- Improvement of children's participation
- Improvement of the functioning of schools

| SI No | Name of Block | Number of HT's interviews | Number of other Teacher interviewed. |

| 6 | Majuli | 529 | 350 |

Q. Constitution of VEC and Survey Sharing Meeting

Open meetings were conducted in every villages and tea garden divisions for constitution of VEC/TGEC. In these meetings the survey sharing and discussion on elementary education issues took place. The meeting also took note of the suggestions given by the villagers for improvement of education in the villages.

The concerned BRP convened the meeting. The volunteer Group, which had carried out the field level activities, informed about the date and venue of the meeting during the conduct of the survey. It was ensured that all the participants who had attended the first meeting are also properly informed

| SI No | Name of Block | No of total villages | No of total tea garden | No of VEC constituted | No of TGEC constituted | Period of constitution | Total participants |

R. Constitution of GPEC and survey sharing meeting

Open meetings were conducted in every Gaon Panchayat for constitution of GPEC . In these meetings the survey sharing and discussion on elementary education issues took place. The meeting also took note of the suggestions given by the villagers for improvement of education in the villages.

The concerned DRP convened the meeting. The BRPs informed about the date and venue of the meeting during the conduct of the survey. It was ensured that all the participants who had attended the first GP level meeting are also properly informed.

| SL No | Name of Block | No | of | No | of | Period of constitution | Total | |

S. First Meeting of Village Education Committee:

Though the training programme of BRPs covered the know how of the first meeting of VEC. And the details of the meeting was mentioned the BRPs training manual another one day orientation of the DRPs & BRPs was organized for the purpose. The DRPs training was conducted by State Resource Person and District In-charge and BRPs training was conducted by the DRPs.

The BRPs of the concerned villages attended the first meeting to assist the member secretary in conducting the meeting. The main agenda of the meeting was as below;

Besides a printed booklet regarding role & functions of the VEC and other allied aspects was also distributed to all the VECs.

With the constitution of VEC, TGEC & GPEC and holding of first meeting of VEC, TGEC the first phase of Pre-project activities and Preparatory planning exercise were completed.

The second phase of the Planning Process started with following activities:

T. Constitution of SMCs:

SMCs were constituted in each LP & Middle school in open meetings through the Resource Persons. For constitution of SMC the DRPs were trained at district level by the SRP and BRPs were oriented at block level by the DRPs. The DRPs also visited during the constitution along with other departmental officials. This has ensured a participatory formation of this important organ of schools.

| SI No | Name of | No of SMC | Period | of | Total no | o of |
|-------|------------|-------------|--------------|----|--------------|------|
| | Block | Constituted | constitution | | participants | |

| 6 | Majuli | 529 + urban | Aug-Sept,02 | | 15870 | |
| | - | | | | 59470 | |

U. Constitution of District Planning Team (DPT):

A 44 member District Planning Team was constituted under the chairmanship of Deputy Commissioner. The representative of District Administration, Rural Development, Social Welfare, NGOs and education department were included in the DPT. *The list of the members of District Planning Team is given at Annexure-I Table I.III*

V. Constitution and Training of District Core Team (DCT):

A 19 member small core group was constituted from amongst the members of the District Planning Team. The DCT was made responsible for actual production of the perspective plans with the help of DPT & BPT members. Another task assigned to the DCT was to train and guide the other members of DPT & BPT.

Adequate measures were adopted to select such people especially in the district core team who would be able to work continuously for at least one month without bothering for holidays and odd hours and they have good analytical skills, writing abilities, and field knowledge.

The district core team was constituted with 19 members. The list of the members of DCT is enclosed at Annexure-I table I.IV

District Core Team Members attended 6- day training on procedure of preparation of perspective plan at State Level from 7th to 12th July 2002.

After the State Level Training of DCT, the training of District Planning Team at district level & Block Planning Teams at Block Level have been organized where detailed discussions on preparation of district perspective plan were held.

Besides, two visioning workshops on community mobilization and quality/school improvement were organized at district level where all the DCT members /DPT members and some identified educational thinkers of different areas attended and share their thinking and experiences.

Special Study Teams were constituted for designing the functional area wise strategies.

The functional area wise findings have been shared and fine-tuned at the state level plan writing workshops from 2nd to 7th September' 2002.

CHAPTER-IV : EXISTING SCHEMES OF ELEMENTARY EDUCATION

1. Mid-day meal scheme:

It was started in the district in the year 1995. Year wise status of implementation of the scheme is mentioned below.

| Year | Items supplied | Quantity of items supplied | No. of schools covered | No. of children covered |
|------|-------------------|----------------------------|------------------------------|-------------------------------|
| 1995 | Rice | 13,967,570,04 | 729 | 49930 |
| 1996 | Rice | 1,712,442 | 729 | 50097 |
| 1997 | Nil | Nil | Nil | Nil |
| 1998 | Rice | 13,20,195 | 1567 | 88013 |
| 1999 | Rice | 21,12,312 | 1567 | 88013 |
| 2000 | Rice | 17847.35 | 1567 | 88013 |
| 2001 | Rice | 53,865,835 | 1567 | 88013 |
| 2002 | Rice | 20,06,025 | 1627 | 95525 |

1st started- 26 January 1985(T.G. area) and discontinued.

Implementation process: Items are received by the development block from FCI as allotted by the Deputy Commissioner. The block development officer distributed the rice to each school.

Implementation difficulties:

- 1). Carrying charge from development Block to respective school are not provided by the scheme.
- 2). Due to dilapidated roads some school does not received the meal in due time.

Operation Black Board

It was started in the district Jorhat in the year 1989. Year wise and component wise status of the implementation of the scheme is discussed below.

| SI | Year/Phase | Amount | Amount | No of | No of | schools | No of |
|----|-------------------------|-----------|-----------|---------|--------|---------|-------------|
| N | | received | spent | Teache | covere | ed | Schools to |

| 11 | 2000 | Nil | Nil | Nil | Nil | Nil | 50 Nos. ME |
| 12 | 2001 | Nil | Nil | Nil | Nil | Nil | 40 Nos. ME |

<u>Implementation process</u> : The teaching learning materials were supplied by the higher authority and distributed by the DEEO among the schools through the concerned D.I of schools /Block Elementary Education Officer.

Implementation difficulties:

There is no space or storeroom for storage of OBB materials in the office of the Dist. Elementary Education Officer, Jorhat that created difficulties in proper distribution. Due to the lack of proper building some items are damaged, some items are theft in various schools In Majuli block, majority schools have their OBB items damaged due to flood.

Construction of school under PMGY (Prime Minister Gramya Yojona)

| Name of block/LAC | No. of new schools constructed. | No. of additional classrooms constructed. | No of schools with drinking water facility | No. of schools provided with TL equipments. |

Construction of schools under MLA/MP Fund :

Majuli – The block received (1) @ Rs. 20,000/- for 12 schools (2) @ Rs. 1,00,000/- for 2 schools Titabar – The block received (1) @ Rs. 20,000/- for 12 schools

- East Block The Block received (1) @ Rs. 20,000/- for 12 schools (Teok) (2) @ Rs. 1 lakh for one schools.
- Jorhat (Mariani) The Block received (1) @ Rs. 20,000/- for 15 schools

N.W Jorhat - The Block received

(1) @ Rs. 20,000/- for 15 school

(2) @ Rs. 1,00,000/- for 3 schools

(3) @ Rs. 1,20,000/- for one school.

CHAPTER-V: SPECIAL FOCUS AREAS AND GROUPS

Background:

The group of people inhabited in TSP areas referring flood prone ,char, border, tea garden and Extea garden and forest areas may be termed as special focus group. As such, SC,ST,TG and Extea labour community, Char area people ,flood prone area people ,forest area community in Jorhat district are grouped as special focus group.

Identification of Special Focus Group Area:

After identification of the areas and specific issues of these special areas, we have tried to analyze the pinpointed problems as well as issues, which effects the schooling decisions & provisiors. The problems have been earmarked '*Common*' and 'Area Specific'. Some of the problems like remoteness, irregular functioning of schools, irregular attendance of teacher are common in the identified areas & some are unique for each of the areas. A detailed analysis of head-wise problems is appended below.

Tea Gardens

The gardens of the district are confronted with many problems like parental apathy, first generation learner. Irregular attendance of teachers & students, poor supervision & monitoring by the garden management & education department are same as other specialized areas. Unlike other districts of the state of Assam, all the schools in the tea-garden areas are Provincialised and managed by education department. The contribution of garden management is almost nil & stop-fatherly.

In addition to above, some other educational problems are highlighted below :

1st generation learner drop out : Most of the students of the garden schools are 1st generation learners. So, they do not get the essential family support for continuing education. The parents don't bother about their learning outcome, which sometimes resulted in poor achievement level of children.

Less Number of working days: In addition to the normal holidays which is already very high, the tea garden schools also does not function on some other days without being declaring as holidays. It is also seen that on market day even if school is normally functioning, the attendance of the children is very poor. The school does not function on weekly holidays of tea garden which is generally a school day as the children don't attend school.

Sibling care: The provision of crèches as per Assam plantation labour act, 1956 is not implemented in these garden. Sibling care is more prominent in tea garden areas & the girl children are more affected.

School timing: School timings is not according to the need of the school going children of the garden areas. The parents of tea garden start for garden work at 7-8 AM. But the school sarts at 10-00 AM. causing irregular & occasional attendance of children in the schools.

Socio-religious barrier & lack of educational environment at home : In case particular tea gardens the higher caste teacher & higher caste people don/t welcome the children of the garden community who are from lower cast. On the other hand, the children find it difficult to get themselves adjusted in those schools which are located in nearby villages inhabited by ceneral community people. This inhibition of these children leads to their irregular attendance & utimate withdrawal from the school. For Example, Chungi TE & Balijan T.E.

Child labour & Addiction to liquor: The addiction to country liquor which is systematically in a chain reaction effecting the thought process of the tea garden community as a whole. Due to the perverted thought process of the parents, their major share of their minimum wages spent on alcohol consumption, leaving a scanty amount for educational expenses of the children.

The addiction to liquor also affects the decision of the parents to bring the better aspects of well being of their children.

The most evil affects alcoholic consumption is the birth of child labour, to get their livelihood, children are forced to go to work.

As like other focused areas some of the tea gardens have very poor infrastructure facilities. For example, Mejenga T.E. & Kheremia T.E.

Sex School Disabled Age-Never-Drop out Child Group aoina enrolled Labour 75 5-8 В 6909 3188 161 161 84 (years) G 5657 3823 186 225 159 Total 12566 7011 347 386 9-11 В 4630 1180 313 159 41 (years) G 2485 1575 322 235 66 107 Total 7115 2755 635 394 12-13 B 1582 44 797 349 162 (years) G 1176 225 27 1202 341 Total 2784 1973 690 387 71

TABLE below Shows the school going ,Never enrolled ,drop out ,child labour and disabled sex wise in <u>Tea Divisions</u> of Jorhat district.

Tea garden and Ex tea labour community are special focus group in Jorhat district. Further, the people inhabited in Nagaland border area and forest area can be easily placed under special focus group. These people are affected by devastating flood in every year. The community inhabited at Rankham leprosy village ,Tiru hills (Nagaland border) Sadhu chapori ,Banoria chapori,Sira chapori No5, Deuripam Gaon Garukhuti, Sakupara, Kalita chapori, Japai chuk,Kesai khuwa,Param chapari,Jabar chuk kathani,Tokor chuk,Gobindapur,Bonbari,No1 Lise chuburi in Majuli sub-division are placed under SFG.

Taking all the findings into consideration certain areas and groups have been identified for special interventions. These can be classified into two broad categories:

- Educationally backward groups or areas .
- Areas which are remote and with difficult accessibility.

District Status :-

The Table-1: Shows the Percentage of general and tea garden district and Titabor TG block head

| wise. | | | | | | |
|----------------|----------|-------------|----------|------------------|--|--|
| Head | District | TG district | TG block | TG girls (Dist.) | | |
| School Going | 80.27% | 60.10% | 45.91% | 52.96% | | |
| Never enrolled | 12.75% | 31.40% | 47.40% | 37.31% | | |
| DropOut | 4.31% | 7.44% | 6.52% | 9.10% | | |
| Child Labour | 1.41% | 3.10% | 2.63% | 3.88% | | |
| Disabled | 0.61% | 0.90% | 1.10% | 0.01% | | |

N.B.:TG Block indicates the TG Titabor Block

Educationally backward groups and areas .

A Tea-Garden & Ex-tea Tribe inhabiting areas:-

The total number of school age children between 6-14 years aged group is 17,380(20.78% of the district child population). As per H to H survey data collected during April 2002. Out of 37,380 child population in the tea divisions 22,465 are enrolled in school(60.10% only)where general district Percentage is 80.27.

1,672(7.44%) No. of children dropped out (district rate is 4.31%) from the school and 11,739(31.40%) are found never enrolled. Out of 1,672 dropped out 849(9.10%) are girls drop out. In case of child labour the No. of child labour is 1167(3.10%) out of which girls are 685(3.88%). There are 177 are girls disabled in TG area. It may be focused that only 45.91% is enrolled in TG areas and 47.40% is still unenrolled in Titabor TG block which is border block of the district.

B. Areas which are remote and with difficult accessibility

B1. Border and Forest Villages:

The inter-state border with Nagaland has a long range covering 101 Km length. Almost all the border areas are remote and hard to reach having no transportation facilities. People belongs to these areas are very poor and educationally backward. Right from Janji river of the district border hills, Gabharu, Pithakhowa, Mogroi, Naginijan, Balijan, Morongial, Nagajanka, Disoivalley, Bahani, Band archaliha, Paninora, Swanapur , Bhagyalakhsmi, Gaharichowa, Medelssssuwajan, Bekajan, Panikheti on the edge have go much so difficulties.

The people of these area faces so much so hard ship and somewhat fear arises out of robbery, etc, from distant border. These areas deserve some special facility and treat as focus area.

Remote and Isolated and Border dispute: All the forest villages both revenue and reserve are remote & some are isolated and also some are remote & isolated. Some of the forest villages are in the inter-state border & are affected for ongoing territorial disputes between Assam & Nagaland. This is an acute problems of the villages. As for example in Majuli sub- division, the extreme & worst situations, the inhabitants forced to become nomadic leaving their hearth & home for fear of lives not to speak of education.

Insurgency Problem: 17 nos of forest and reserve forest villages are under threat of insurgency problem. The nature & dimensions of insurgency problems are peculiar to these a reas. Some villages are used as hideouts for anti-socials. Looting and Kidnapping also happen now & then which also affects regular functioning of schools along with the life & property of the people.

Communication Problem : These areas are hilly and no-proper communication as well as public transportation. Most of the forest villages are almost un-approachable by the common means of transportation. Thus resulted aloofness of the residing to irregular attendance of teacher & students.

Lack of Proper Source of Earning: Inhabitants of the area have poor source of earnings. Absence of regular earning source resulting poverty & living below poverty line. Poverty in most occasions in these areas affects the schooling decisions.

Irregular attendance of the teacher: The absence of any conditions or norms for recruitment of local people as teachers resulted in the placement of teachers from the other distant areas. Taking the excuse of the absence of public transportation and remoteness some of the teachers are

reported to be irregular. Besides, the punishment posting of some of the teachers in those areas made them more reluctant). Also some of the willing teachers are unable to attend school regularly due to non-availability of transportation facilities. The teacher who even intents to stay could not do so because of insurgency problem and non-availability of rented house.

Parental apathy & no value to education: The irregular functioning of schools & poor living conditions has in most cases brought to parental apathy & no value to education.

Child labour, irregular attendance of Children & high rate of never enrolled: The so-called child labour has its unique features in these areas. The most children don't go for other work but most of them are involved for 3-4 months at a stretch in a year for collection of particular forest products, which is fetched by their parents. The parent earns their whole year livelihood; therefore they take their wards with them for additional bucks.

In the agricultural season, the children also accompany their parents for agricultural works. As a result, the children even who are enrolled in schools remain absent & most them never go back to school again.

Health Hazards: Another acute problem of this area is the epidemic of diarrhea & Malaria which adversely affects the regular attendance of the teacher & students alike. The medical check-up and treatment of such diseases are few and far between.

Lack of Supervision & Monitoring: The final most important factor which is specific to this area is poor supervision & monitoring by the department because of remoteness & transport bottlenecks.

Poor-Infrastructural facilities: Most of the schools of the Forest villages are building less and in dilapidated condition.

B2 Difficult areas in Majuli sub-divisions

Majuli generally known as the biggest river island in the world. Majuli sub-division in Jorhat district itself an educational block. It is annually a ffected by devastating flood. It is surrounded by the Brahmaputra and the Luhit. As such Majuli is a flood prone area. In Majuli the total No. of school age children is 34,893 between 6-14 years age group of the district total, as per H to H survey data of April 2002. Among them 30,607 are enrolled in school and 1098 have dropped, 2013 is found to be never enrolled. Out of 1098 children 540 are girls drop out.

The Strategy

In considering of all the problems & the issues thereof and keeping in mind the topographical and demographic situation of the district, the following strategies have been identified for special interventions.

General

- Creating a Task Group at district level to oversee SFG/SFA coverage
- Provisioning of additional RPs to concentrate on SFG area issues.
- Forming sub-groups in DACG and BACG entrusting concentrated academic support to SFGs/ SFAs, including academic supervision and monitoring.
- Specially and contextually designed community mobilization activities would be initiated during initial year.

For remote and difficult accessibility areas

- Emphasis will be on intensive and continuous supervision and monitoring in the SFG areas all through out.
- Flexible norms in regard to use of vehicle, TA/DA rates and monthly visit targets for functionaries for these areas would be set.
- Special Allowances for teachers placed in the remote and difficult areas has been proposed.
- The Task Group for SFG interventions will be constituted on the basis one R P per 20 villages (identified as Special Focus Group / Area) per block basis. The ADMC will be the over-all in-charge for SFG interventions in the district. A separate fund allocation will be provided for intensified supervision & monitoring as well as certain context-specific interventions. Each component will, of course, keep budgetary provisions for SFG interventions on the basis of well-defined strategies. The Task Group will ensure that all components have given special attention to these groups/areas. A pool of Field Mobilisers for SF areas will also be developed.

District specific Strategies:

Tea Garden areas:-

- Community mobilization with the help of line Sarder of the laboures ATTSA Tea management, MG, SHG and local leaders.
- Convening meetings, Discussions on the issues of children specially guards who are involved in sibling care in domestic works/wage earner etc.
- Conduct back to school camp (residential) for adolescent girls.
- Presenting documentary in specific interval.
- Monitoring the school children for regular schooling specially in case of drop out and unenrolled.
- Improvement of infrastructure facilities in schools for equitable learning facilities.
- Health care should be taken regularly.
- Initiatives for child labour issue

Forest and Border area:

- Contact target group discussions.
- Community monitoring.
- Orientation problem for VEC/TGEC members.
- Community based organization, health care .
- Alternative arrangement to ensure universal enrolment

C. Majuli Sub-division:

- Floating and mobile school will be opened for isolated and remote areas.
- Community motivation.
- Regular health care
- Provide Special incentive to teachers who serving in remote areas.
- Formation of local core group.
- Formation of special task force for visiting the remote areas.
- Orientation programme for religious leaders.
- Strengthening SMC/VEC/GPEC members etc.

Specific intervention for difficult areas:

| What | Why | How |
|---------------------------------------------------------------------------------------------|------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| 1. Communication linkage amongst school, community and administration be developed | | Activating SMC, VEC and GPEC |
| 2. Strengthening of local community & NGO's | For academic support to schools and resource support. | Orientation of PRI members and NGOs |
| 3. Supervision and guidance by BACG | Teacher empowerment and quality improvement. | Orientation of BACGs by DACG |
| 4. Activity support to MGT Schools and schools with high PTR | | BACG to take initiation. |
| 5. To minimize the language problem in class- room transaction. | | Teacher rationalization with at least one teacher who can communicate the local language of children. |
| 6. Flexible school timing based on local specific problem/needs. | convenient for school children. | Proper discussion with PRI, community & the administration. |
| 7. Holidays to be restructured matching the local specific needs. | do | do |
| 8. Provide Tent schools in flood prone areas of Majuli. | To maintain the regularity in running of schools even in flood season. | Supply of tents and infrastructure to flood prone area school. |
| 9. Specific efforts for school community linkage. | To get full community participation in school improvement. | Organising meeting at GP level and Block level and organizing training. |

Following Activities have been budgeted under different functional areas

Plan for Special Disadvantaged Areas

- Enhanced mobility cost
- NGO mobilisation
- Engagement of Community based RP for special areas & group
- Community based RPs 1 in each block
- Special mobilsation campaign
- Special intervention for educationally disadvantaged minority area
- Intervention for urban disadvantaged children
- Declaration of 100% UEE block

Inputs to Religious Madrassa for introduction of formal curriculum

- Meeting with Religious Leaders, Educational Functionaries & Panchayat Functionaries at district level & other mobilisation activities
- Introduction of formal curriculum in religious institute.
- Library grant
- 20-day Training of Additional Teachers

CHAPTER -VI FUNCTIONAL AREAS WISE STRATEGIES & INTERVENTIONS

6.1 **Coverage of out of School Children of Unserved Habitations**

Introduction:

Elementary Education for children between 6-14 years of age is now a Fundamental Right. Under Sarba Siksha Abhijan (SSA), all children are to be enrolled in a Formal School or an Alternative School within 2003.

As a first step to ensure Universal Elementary Education, we have to ensure universal physical access viz. availability of schooling facilities within a reasonable distance. Under SSA (and EGS & AIE) it has been provided that there should be school / alternative school within 1 KM of every habitation.

Many states are already implementing specific interventions to provide access to un-served habitations viz. Education Guarantee Scheme (EGS) of Madhya Pradesh, Rajiv Gandhi Swarna Jayanti Pathsalas (RGSJP) of Rajasthan, Sishu Siksha Karmasuchi Project (SSK) of West Bengal, Community/Maabadi schools in Andhra Pradesh etc.

In Assam, the problem of physical access is limited, but needs to be addressed quickly, if we are to move quickly towards UEE.

Objectives:

To achieve universal physical access, 'Amar Parhashali's or alternative schools would be set-up in the un-served habitation, which would provide education of equivalent level as that in formal schools.

The EGS will be a part of the overall District Elementary Education Plan (DEEP)

Status :

The House to House Survey conducted during April 2002 in Jorhat district reflects that there are 17201 number of out of schools children in the district and out of these figure 9723 Number of children are leaving in 181 number of habitations having no primary formal school (Govt./Provincialised/ventures/private schools) within a walkable distance of 1.5 KM.

| | | No. | | | n-served | Total No. of | |
|---------|-------|-----|---------|---------------|---------------------|---------------|----------|
| Block | Area | of | | with distance | | Out of School | |

<u>Table : 6.1.1 Un-served Habitation wise Child Population</u> (Minimum 25 Out of school children)

Problem and Issues :

General:

- Physical access is the major constraints of these areas.
- Communication specially in the areas like forest, isolated hills, border areas.
- Parental awareness towards education of their wards.
- Adult illiteracy and parental apathy.
- Children assisting their parents in different household works as well as in agricultural field, village base cottage industries, fishing etc.
- Child labour mostly engaged in da8ily waged labour, household labour, tea stall/ shops/garage and in daily market etc
- Lack of health among most of the communities often suffers from skin disease, malaria dysentery etc.

Specific Problems and issues:

Tea – Garden areas:

- Sibling care
- Child labour
- Alcohol addiction
- Lack of co- ordination between garden management and labour community.
- Lack of infrastructure facilities
- Home and school language differs. Local lingua- franka is Mishing, Deori, Tai, Tea garden languages but the children have to read Assamese medium

Forest and border areas

- Segregated households
- ✤ Insurgency
- Children are also engaged in collection of minor forest products along with their parents / guardians.
- Mobility in those areas itself is a problem.
- In case of children living in encroached forest areas, often have to shift from one place to other because of eviction etc.
- People are of different ethnic groups having different cultures and languages.

Flood prone areas

- During summer most of the areas are submerged for a longer period
- Isolated due to lack of communication facilities.
- Shifting of families during flood time.
- Ill health of children due to epidemic diseases caused by flood.
- Loss of schooling days.

Overall Frame Work :

The 'Amar Parhashali' would cover children in the age group of 6-14 years. However, "children with minor disabilities upto the age of 18 years could be included complying with the Persons With Disabilities (Equal Opportunities, Protection or Rights and full Participation Act 1995)."

The 'Amar Parhashali's would be completely managed by the Village Education Committee (VEC) or Tea Garden Education Committee (TGEC). The Axom Sarba Siksha Abhijan Mission Sarba Siksha Abhijan Mission would provide assistance to the VEC/TGEC for running of Amar Parhashalis. This committee could be routed to the VEC/TGEC in two ways :

Directly by the Axom Sarba Siksha Abhijan Mission.

Through Voluntary Agencies who would receive financial support from Axom Sarba Siksha Abhijan Mission.

In both cases, 'Amar Parhashali' would be implemented as a part of overall district plan of UEE which will be supported under SSA.

Strategies :

- 1. The EGS would be implemented as an integral part of SSA. Hence, the structure and personnel for supervision of '*Amar Parhashali*'s would, therefore be a part of the Mission.
- 2. Under SSA every district would prepare a District Elementary Education Plan (DEEP), which would include a range of interventions for School improvement, recruitment of teachers, quality improvement etc. along with interventions for ensuring education of "out of school" children. All VA proposals would also form part of the district level EGS proposal. The VA proposals would be approved by state EGS Grant-in-Aid Committee.
- These EGS interventions would be funded directly under SSA. The total budgetary allocation under District Elementary Education Plan (DEEP) for both State and VA run EGS proposals would be within a limit of 25% of the overall DEEP budget.
- 4. During initial years (2002-03) the 'Amar Parhashali's (EGS school) would run for class-I & II only. But, if in any place, class III/ IV drop out children are found then in those areas provision would be kept for higher classes.
- 5. The 'Amar Parhashali's (EGS school) would use the Formal Curriculum and Formal Textbooks used in Primary Formal Schools.
- 6. The 'Amar Parhashali's (EGS school) would run for a period of minimum 4 (four) hours during day time.
- 7. The 'Amar Parhashali's (EGS school) would receive the incentives which are specifically meant for primary provincialised/government schools, viz.
 - School infrastructure grant of Rs. 2000/- per annum.
 - Mid-day meal facilities (as per government norms)

Eligibility :

1. The habitation must be an un-served area i.e. having no primary formal school within 1 Km. radius. The primary formal school means, the primary schools using formal curriculum recognized by state Government/Boards/Organisations. These primary formal schools are may be of any type, viz, government/provincialised schools, private and venture schools etc.

2. For Tea Garden areas the provisions of 'Assam Plantation Labour Rules (APLR), 1956' clearly state the responsibility of the garden management providing educational facilities (primary schools). "Every Employer shall offer children between the age of 6 and 12 in his plantation exceeds 25, provide and maintain a primary school or schools for imparting primary education within a distance of 1 mile from the place where the workers resides. [Sec – 14, Rule 52 and 57 (A) – Pg. 20 & 21]

2. 1. 'Amar Parhashali's (EGS schools) will be supported in tea gardens where necessary under SSA only if considered decision is reached between the State Government and the Tea Garden Management about the discharge of responsibilities under the APLR, 1956).

3. The minimum number of 'out of school' (not enrolled in any school) children in the age group 6-14 years should be 40 for general areas (plains)

4. In case of Tea Garden, SC, ST, Reserve Forest & Border areas, Isolated Char & Hill areas the minimum number of 'Out of school' (not enrolled in any school) children must be at least 25 in the age group of 6-14 years.

Prioritization :

- 1. Priority will be given to support to VEC/TGEC for running of 'Amar Parhashali' in Reserve Forest areas, International and Inter-state Boarder areas, Char areas and Tea Garden areas.
- 2. Priority will be given to areas of where the number of 'out of school' children in 5-9 age group exceeds 25. While supporting VECs/TGECs to run 'Amar Parhashali's' preference will be given to habitations which have a highest number of 'un-enrolled' children.
- 3. Priority will be given for habitations from where nearby Primary Formal School is at least 1.5 KM away. Based on micro planning and after approval of State Level Mission Authority each Deputy Commissioner shall notify list of unserved habitations where VECs could propose setting up of Amar Parhashalis.

Pre Conditions :

A. Micro planning :

Conduct of micro planning exercises, including House-to-House Survey and identifying the specific age group children who are still unenrolled and mapping of schooling facilities would be a pre-requisite for EGS school.

This would also be applicable for VA run EGS proposals also. The VAs have to ensure that the proposal is based on the findings of the micro-planning exercises or House-to-House Survey.

B. Community demand :

- The respective community could articulate its 'demand' for setting up of an 'Amar Parhashali's (EGS school) with a request in writing to the Block Level SSA Mission Office through the VEC on a prescribed format.
- The proposal should include the list of 'Un-enrolled' children in the age group 5-9 & 10-13 years in that habitation. (Annexure 4) on the basis of habitation based Micro-Planning exercise or House to House Survey.
- The community also should commit to get all the children (included in the list submitted by VEC a long with p roposals of 'Amar Parhashali') enrolled in the 'Amar Parhashali'. They have to provide suitable accommodation for the school and to ensure regular supervision of the 'Amar Parhashali'.

The proposals would need to clearly indicate that community mobilization and consultation has been undertaken in all the habitations.

The VAs during submission of EGS proposals have to ensure that mobilization of the community would be done in all habitations.

C. Guarantee :

Once the proposal for assistance to VEC/TGEC for running of 'Amar Parhashali' has been approved by the State Level Committee, the Axom Sarva Siksha Abhijan Mission (ASSAM) will

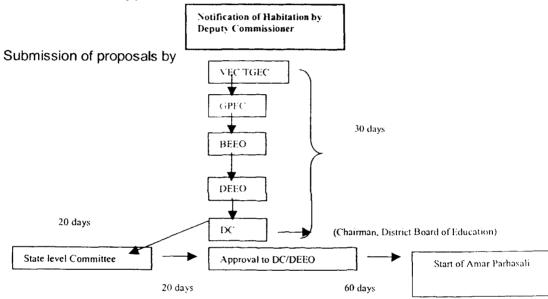

ensure that the assistance for running of 'Amar Parhashali's would be provided to VEC/TGECs within a period of three months from the date of approval of proposal and after providing all necessary inputs.

If at any point of time it becomes clear that any information provided by the VEC/TGECs are incorrect and the 'Amar Parhashali's hould not be supported as per the EGS camp. Then the financial support to VEC/TGEC could be suspended under the SSA.

Process of approval :

Once unserved habitations are notified by the Deputy Commissioner, the VEC & GPEC have to follow due process in sending their demands. The process is attached below:

D. Procedure for approval :

E. Selection of Siksha Mitras (Education Volunteers) :

The Siksha Mitras would be selected by the concerned VEC through a process. The VEC would advertise locally for engaging an Siksha Mitras in the 'Amar Parhashali' of the concerned habitation. The advertisement must enclose the notification issued by Deputy Commissioner for setting up an 'Amar Parhashali' against the specific habitations. The process of selection of Siksha Mitras can be initiated only after the approval of the Deputy Commissioner/DEEO for and 'Amar Parhashali' has been communicated to the VEC/TGEC (on receipt of approval of State EGS committee).

A. Qualification :

- The minimum educational qualification of the candidate who would apply for Siksha Mitra must be a Higher Secondary School Leaving Certificates Examination (HSSLC) pass or equivalent from a recognized board/organisation.
- The candidate with Pre-Service Teacher Training would be preferred.
- Preference would be to woman candidate with requisite qualification.

B. Who can apply :

The candidate, who will apply for Siksha Mitra, must be from the concerned Gaon Panchayat area and have adequate knowledge of local language and communities.

C. Selection committee :

The selection committee would comprise of all the VEC/TGEC members

D. Selection Process :

The concerned VEC would check, scrutinize and short-list the candidates according to merit (i.e. marks obtained in the HSLC) Examination. The VEC would give first preference to the candidate with the highest marks in the HSSLC examination with PST training.

Role of community :

- The VEC/TGEC would engage the Siksha Mitra as identified by selection committee in the EGS school on Contract Basis. The contract can be signed between VEC/TGEC & Siksha Mitra in a prescribed Agreement Paper only on successful completion of the 30-day induction level training programme.
- The Agreement Paper must have to clearly state that the contract will valid for a period of 10 months only.
- The VEC/TGEC would evaluate the performance of the Siksha Mitra after completion of 10 months period and would decide whether the same person would continue for a nother "Academic Session" or go for a fresh selection.
- The VEC/TGEC would receive assistance from the District/Block Level Mission office for running of 'Amar Parhashali'
- The Siksha Mitra will have no claims whatsoever for continuation beyond the contract period or adjustment elsewhere in case the 'Amar Parhashali' is closed down for some reason by the VEC or the ASSAM districtwise support to the VEC/TGEC for these purpose.
- The Siksha Mitra can be removed by a resolution of the VEC/TGEC to be approved by atleast 2/3rd of the members. The resolution can be taken only on the grounds of non-performance or poor performance of duties as Siksha Mitra in the 'Amar Parhashali'.

Training of Siksha Mitra :

a) Induction level training

The Siksha Mitras would have to undergo an induction level training for a period of 30 days immediately after selection by the VEC to engage them in '*Amar Parhashalis*'. The VEC sign the contract of engagement with the Siksha Mitra on his/her successful completion of training.

Need Based Training/Refresher Training:

- The Siksha Mitra would receive 15 20 days refresher training before starting of a new Academic session.
- The Siksha Mitras (Education Volunteers) working in 'Amar Parhashali's run by Voluntary Agencies would also need to receive similar training.

Teaching Learning Materials (TLMs)

The Amar Parhashalis would be provided appropriate Teaching Learning Materials to help in the multi grade, multi level situation.

Academic Evaluation of learners :

- A proper system of E valuation would ensure a continuous process of evaluation of the learner. The monthly evaluation format would be maintained for each learners and necessary remedial measures would need to be taken to improve the achievement level of the learners.
- In addition to it, cluster resource centre co-ordinator would also evaluate the performance of the learners two times in a year, viz. half-yearly and annually. The system of evaluation that is prevalent in the state for class - IV would be applicable in case of 'Amar Parhashalis'.
- Older learner may achieve the required level of impotencies of a particular class/grade within 5/6 months, such learners would appear in a test at any time of the year and promoted to immediate next class/grade if they qualify.

Testing, Certification and Mainstreaming:

- A system of testing and certification of the children studying in 'Amar Parhashall' would be evolved to ensure the accurate assessment of achievement level of a learner. The certificate would be issued to all learner after completion of class IV duly signed by a Resource Teacher/ CRCC/SI of schools
- The children after completion class IV curriculum would be evaluated through the process exactly similar to the system used in Primary Formal School.
- A system of Certification would be developed for the learners who wish to join a Primary Formal School either during or at the end of any Academic Session. The certification by the Siksha Mitra of the Amar Parhashali and countersign by Educational administrators would be considered adequate by the Head Teacher of the Formal School for admitting the student to a particular grade.

Support System :

Academic support :

- DIET & MISSION functionaries of Block and Cluster level will provide regular academic support to the EGS School.
- Regular Monthly Review meetings will be held at Cluster level for Siksha Mitras.

Supervision & Monitoring :

- State educational functionaries and Mission functionaries will regularly supervise the EGS schools.
- Follow up actions will be taken on the basis of field feedback.

Cost of 'Amar Parhashali's (EGS school):

The overall ceiling of financial support to VECs/TGECs for primary level '*Amar Parhashali*'s (EGS schools) would be Rs. 745/- per year per learner. The ASSAM may also run certain Innovative Alternative Schools. The maximum ceiling of cost may be Rs. 3000/- per learner per year in case of Innovative Proposals viz. Residential '*Amar Parhashali*'s etc. This is to be considered only in rare cases where there is a need for such a facility due to remote, dispersed habitations or frequent shifting of families.

The overall assistance to VA would also be the same for primary level. For VAs a management cost for supervision and monitoring would be made available as per guidelines of EGS and AIE scheme. For supervision and monitoring of '*Amar Parhashalis*' run directly by VECs/TGECs, SSA Mission Directly would make arrangements.

However, this may be modified as per requirement with the condition that the payment to the Siksha Mitra out of the fund placed under the VEC/TGEC should not exceed Rs. 1000/- per month.

The total assistance to VEC/TGEC per year for running of 'Amar Parahashali' would be as follows:

Assistance to VEC/TGEC

| SI. No. | Item | Costing of Primary level Amar Parhashali (EGS schools). |
|------------|--------------------------------------------------------|------------------------------------------------------------|
| 1. | Honorarirum of the Education Volunteers | Rs. 1000/- P.M. (for 10 months) |
| 2. | Teaching Learning Material equipment in the EGS school | Rs. 1100/- per Amar Parhashali |
| 3 | Contingency | Rs. 100/- Per month |

Support from Mission for running of Amar Parhashali

| SI. | Item | Costing of Primary level Amar |
|-----|---------------------------------------------|-------------------------------|
| No. | | Parhashali (EGS schools). |
| 1 | Training of Education Volunteers | Rs. 1500/- P.A. |
| 2 | Teaching Learning Materials for the Learner | Rs. 100/- Per Learner P.A. |

Supervision & Management Cost would be Rs. 100/- per Learner Per Year.

Specific area Strategy

1.Community Mobilization for 'Thinly Populated/ Scattered Area' :

Residential EGS schools :

Some specific interventions are to be taken for low population density or areas or scattered areas to provide access to the children of those un-served habitations through 'Residential EGS school'. The minimum number of children to be enrolled in an EGS school (AP) will be 40. The preference will be given for the girl child.

Community will be mobilized to send and retain their children for Residential EGS School. Providing academic support as well as maintenance and logistic supports will facilitate the schools. The local community and the educational administrators, Mission functionaries will be responsible for monitoring and management of the residential EGS schools.

2. EGS Schools with Upper Primary Sections:

Under SSA, 50 nos. of EGS schools with Upper Primary sections will be started in the Special Focus Group (SFG) areas like Tea Garden, Boarder, Forest, Isolated Char and Hill areas. Around 2,000 out of school children of age group 10-14 years will be covered under Upper Primary EGS schools. There will be 2 Siksha Mitras for every Upper Primary EGS school. There schools also will be run by the VEC. The financial assistance will be provided to the VEC by the Mission for running of EGS schools. Total cost per learner per year for Upper Primary sections will be 1,200/per annum. The norms for functioning of EGS school with Upper Primary section will be same as that of EGS schools with primary sections.

3. Special Intervention for Children of Religious Institutions :

There are some religious institutions where the children having access to religious curriculum only. For those children, special inputs on formal curriculum will be provided to the identified religious institutes

The religious leaders, organization's head will be oriented and motivated towards the needs of formal education for the children of religious institutions.

Trainings will be provided to the 'Jonabs/ Moulanas' of identified religious institutions on formal curriculums, teaching learning practices etc.

4. Special Intervention for 'Different Linguistic Groups' :

Translation and adoption of TLMs training modules and other relevant materials should be developed and print for different linguistic groups as per need.

5. Special Intervention for 'Isolated Areas' :

Contact programmes will be organised to motivate the community to send and retain their children in nearby EGS or formal school. Also children level motivational programmes will be conducted time to time.

6.2 Coverage of Out of School children of Served areas

In our society we find that there are a large number of children in age group 6 to 14 years have not enrolled their names in formal schools running in their locality for many socio-economic reasons. Sometimes it is also found that some children of that age group were enrolled in schools but could not continue studies due to many a reason. Keeping in mind, the SSA has planned for starting of Bridge Courses of different duration for those out of school children of served area with an objective of mainstreaming of children in formal schools. Thus Bridge Course is the only way to enter into formal school and thus, helps to achieve the goal of UEE.

Our Goal:-

- Main streaming all the children who are out of school in the age group 7-13 years.
- Facilitating the children to acquire maximum learning in a minimum period.
- Retaining all children after mainstreaming.
- Supporting to achieve the targeted level of learning in stipulated period of time.

Before entering into the details of problems, strategies and interventions, let us have a look at present status of the District.

Present Status

Table: 6.2.1 Block wise out of school children (5-13 years age group)

| Titabor Jorhat | 851 659 | <u>517</u> 411 | 352 256 | 1721 1327 | 203 158 | 212 164 | 436 338 | 869 667 |

Problem and issues in Served Area : Block wise Focus Group.

Tea garden, Ex tea garden, Char, Border area, Forest area, Riverine, Hilly, SC/ST area.

Problem and Issues in Served Area

General Problem:

- a. Lack of awareness among the parents and guardians of the children.
- b. Lack of academic support at home specially incase of first generation learners.
- c. Difference between home and school language.
- d. Poverty and need to intent support in household activities like sibling care.
- e. Non-functioning of school leads to dropout
- f. Socio-religious barrier leads to never enrolled specially incase of girl child

Specific Problems

Tea Garden:

- 1. Language problem that is ,difference between home & school language
- 2. Lack of cooperation between tea garden management and community.
- 3. School timing is not supporting the children to attend school during plucking season.
- 4. Addiction to liquor which effect in the home environment resulting absenteeism and dropout.
- 5. Child labour.

Border/Forest area.

- 1. Insurgency problem
- 2. Lack of communication of all sorts
- 3. Lack of infrastructure facilities.
- 4. Language problem(school & home differs).Inadequate facility of medium schools.

Strategy.

Community mobilization -

- 1. Create awareness among the community/parents/ZPC members/AP members/VEC/TGEC/GPEC/NGO and elected peoples representative
- 2. Educational functionaries of all level & other relevant agencies.
- Formation of Dist. Level Task Force comprising off educational functionaries from dist. & block level, Panchayat members, NGO, Dept. of social Welfare etc. to mobilize the community.
- Formation of Block level Task Force comprising of educational functionaries from block & cluster level , NGO, GPEC, VEC etc.

Teaching learning practices:

(a) A group RP's will be trained to raised the quality of BC centers learning.

- i. Various types of training like introductory and refresher training for AC and HT's.
- ii. Training for the workers of religious institution (Madrassa, Moth).
- iii. TLM will be provided to each BC centers
- iv. After completion of course certification and mainstreaming of BC learner will be done properly by giving financial support to AC of BC centers(@ Rs. 50/- per learner in two phases).
- v. Monitoring supervision and follow –up will be done by BRCC, CRCC and other educational functionaries and VEC /TGEC/ SMC/GPEC.
- vi. Exposure visit of AC, HT and VEC members will be under taken.
- vii. Grant- in -aid will be given by Mission to willing voluntary organization that intend to run BC centers.
- viii. Documentation of the whole process will be done for future modification and alteration.
- ix. Translation, adaptation and development of group specific material for various language group of the district.

Different categories of Bridge Course

1. Short term bridge course for the age group 7 – 8 years for 45 days to 90 days.

- Motivate parents to enroll children for the short term bridge course through contact programme.
- Motivation camps for children to attract them towards school education.
- Opening bridge course center through community support as an extent part of FPS.
- Condensed curriculum to be used with relevant TLM.
- Certification of children after completion of the curriculum by the HT of the FPS and mainstreaming into FPS.

It is envisaged that various circumstances in which children find themselves often deter them from achieving to their full potential. To help them improve their achievement levels remedial teaching is necessary. This could be done after school, during holidays with the help of academic coordinator.

2. Long term bridge course for the age group 9 – 13 years for 8-12 months.

- For 12- 13 years aged group children who were engaged in various works will be covered under residential bridge courses
- For 5 13 years aged group children who were only studying in religious institute like Maktab, Madrassa (Long term bridge course for 6 12 months)
- Motivate parents to enroll children through contact programmes.
- Motivation camps for children to attract towards school education.
- Opening the camps through community support as extended part of FPS.
- Condensed curriculum to be used with relevant TLM
- Certification of children after completion of the curriculum by the HT of the FPS and mainstreaming into FPS.

Residential Bridge Course for Adolescent Girls

To focus of this motivational/preparatory centers apart from including the girls into the formal system would be to also impart life oriented and gender sensitive education. These learners apart from reading and writing would get information regarding ;legal aid, health care, environment and women's issue.

Bridge Course for children of migrated families:

Short-term bridge course at seasonal community hostels

Converting the houses of the migrants into hostels to be managed by the community. Provision to be made for boarding, lodging, coaching and care of children who stay back and continue in schools when the parents migrate.

- Short-term bridge course at the place where the people migrates
- Remedial teaching will be undertaken at that place by the AC.

Short-term bridge course for children of migrated families.

Organising condensed bridge course for the children on their return to their village to make up for the schooling time lost during the period of migration.

Over all frame works

The Bridge Course Centres are extended part of formal school to provide access to the out of school children of served areas. These centres are run by VEC/SMC, for which they would receive financial assistance from the mission. Also Grant in Aid would be provided to the selected NGO's to run BC's.

Strategies

Bridge Courses would be implemented under EGS/AIE Scheme. Every district would prepare a district elementary education plan(DEEP) which would include a range of intervention for school improvement, engagement of AC's, quality improvement along with intervention for mainstreaming and retention of children.

All VA proposal would also be a part of district level BC proposals which would be approved by state EGS Grant in Aid committees.

During initial years BC's will be run for 7 – 8 years children only targeting to mainstreaming them in class 2 and 3.

In subsequent years the different BC's will run for 9 - 13 years age group child of 2 - 12 months duration.

Only a few member of age group 5-6 years old will be enrolled directly in formal schools. For those age group children motivational activities will be undertaken at village level for a period of 10 – 15 days.(In 2/3 phases).

Eligibility

The minimum number of out of school children in the age group should be 30 or above for opening of one BC Centre. Before starting of a BC the spot verification will be conducted.

Selection Procedure

The AC would be selected by the concerned VEC thro a process. The VEC would advertise locally for engaging a AC in the BC Centres of the concern habitation. The advertisement must be enclose the notification issued by DC for setting up BC Centres against the specification habitations. The process of selection of AC can be initiated only after the approval of the DC/DEEO.

Training

- Training on motivation camp
- Training on academic package for AC.
- Training of different duration depending upon the term of BC.
- Training on evaluation and mainstreaming of BC learners by AC.

TLM

The BC centres would be provided appropriate TLM to help in the teaching learning situation.

Academic evaluation of learner

- Pre testing of BC learners will be conducted to identify the level of learning
- Final Evaluation will be conducted before mainstreaming.

Mainstreaming and Certification

• The HT of identified school will be responsible for day to day support to the BC Centre evaluation and remedial teaching of BC learners.

A system of certification would be developed for the learner who wish to join a formal school during any academic session. The certification by the HT of the concerned BC and counter signed by educational administrator would be considered adequate by the HT of the formal school for admitting the student to a particular grade.

Bridge course for urban area

Coverage for Urban Deprive Children under SSA

Status -

Bridge course for urban areas

| Total | 123,033 | 8,733 | 1,732 | 58 |

Initiatives need to be launched in urban areas that the children out of school(drop- out and never enrolled), street children, children of sex workers and children of migratory communities.

As this new area for SSA, we need to plan for interventions based on the data of urban population figures of census 2001 and results of the urban survey that would be coming shortly.

2. Strategy:

A. General : As of now there are three major strategies that can be adopted for urban areas. They are opening new school where access is the problem, running Bridge course to mainstream children who have dropped out of school, and running early childhood care centers for children under the age of 6. To cover out of school children, Bridge course would be started. At the same community mobilization needs to take is to ensure mainstreaming and retention of children in the formal school. Also in areas where access is a problem EGS may be run by NGOs based on the guidelines that have been by the MHRD.

B. Strategy: Strategy for the first year could include identification of NGOs who are working in the area. This should be done with special reference to their capacities, manpower availability, infrastructure and grass root reach. This would necessarily be followed by an orientation of these NGOs to issues of elementary education with regard to these deprived urban children. A Memorandum of Understanding may be signed with these bodies as to the packages that they would provide to the SSA in the district.

C. Issues specific towns would be identified to facilitate specific interventions.

3. Structure:

For the implementation of these activities the formation of District Resource groups and Town Resource groups who would work actually for the cause of these deprive children thought of. An urban cell would be set up to look after urban initiatives. The member of TRGs would be comprised of representatives of civil administration, Mission functionaries, Municipal bodies, social welfare dept., NGOs etc

6.3 Community Mobilization and Participation:

ASSAM is an effort to universalize elementary education by community ownership of the school systems through effective decentralization. The notion of ownership precisely stands for the development of the sense of belongingness in the mind of the community as one of the partner in educational planning and management in a particular locality.

Until and unless the community is involved in the process of UEE, we cannot attain the goal of UEE. As such community must be mobilized and involved in such an extent, so that it can utilize its efforts for improvement of education. Towards community ownership, a number of phases are to be taken, such as:

- Mobilizing the community to get involved.
- Involving the community to participate (mostly under facilitation).
- Convincing (motivating) the community to participate spontaneously.
- Taking up initiatives on their own.
- Development of sense of belongingness in other words-community ownership.

Aspects of Community Involvement in UEE:-

The following aspects of community involvement in UEE will be local concerns in a progressive manner in Jorhat district.

- Increase demands for elementary education.
- Working with government in partnership for better education in the form of participating in planning, implementation, monitoring, etc.
- Developing self-help capacity to sustain initiatives.

Formation of Community Based Organizations

For mobilizing the community to get involved leading to participate spontaneously as well as to develop the sense of belongingness, i.e. community ownership, the Community Based Organisation in the form of SMC,VEC,TGEC and GPEC have already been formed .The WEC ,MGs, PTA and MTA have to be constituted in Jorhat district in a phase manner.

The Table showing the number of SMC, VEC, TGEC, WEC and GPEC along with its total number of members in Jorhat district.

| No. of SMC | No. of SMC members. | No. of VEC. | No of VEC members | No. of TGEC | No. of TGEC members | No,of WEC | No. of WEC members | No. of GPEC | No. of GPEC members | Total (Committe: 2931 |
|------------------|---------------------------|-------------------|-------------------------|----------------|---------------------------|--------------|--------------------------|----------------|---------------------------|-----------------------------------------|
| 1891 | 17019 (189x9) | 788 | 14184 (788x18) | 117 | 2106 (117x18) | 24 | 432 (24x18) | 111 | 1887 (111x17) | Total Committe: members. 35628 |

Power, Functions and duties of SMC, VEC, TGEC, WEC and GPEC:

The detail power and functions and their duties are indicated below:

To conduct H to H survey, Micro planning and School mapping and to maintain up-to date Village Education R egister (VER) regularly with n ames of s chool going and n on-school going children.

- Plan for UEE for the village for all 6-14 years age group children.
- Assess the adult literacy needs of the village and take all over responsibility for achieving UEE.
- Receiving grants provided by the education department, Assam, SSA and other bodies and to distribute among the member-schools and EGS schools as per guideline provided. To keep the records of bank account and expenditures and to get these audited regularly.
- To mobilize fund with own-initiative and utilize fund for improving educational status of the village including improving school infrastructure.
- To keep, close contact with and to extend co-operation to standing committees of the GP and other development bodies and to undertake welfare activities for children as well as adults.
- To act as the linkage forum between the GPEC and SMC.
- To watch on the functioning of the school and apprised problems relating to school building, teachers etc to higher authority.
- To generate and sustain a wareness of p arents/guardians for e nrolment of children and regular attendance and other institutions.
- To facilitate participation of community and bring about community ownership of the school and other educational /literary centers. To make use of free voluntary labour of the community for the development of schools and other institutions.
- To keep close contact with SMC.
- To hold VEC meeting regularly.
- VEC will take part in various activities of elementary education from time to time.

To sum up, the VEC,TGEC ,WEC ,SMC,GPEC will perform all activities related to educational development in the village /Ward/TG divisions etc. Besides all the committee will also act as a driving force in all developmental activities ,like holding awareness camp ,enrollment drive ,check drop out, attendance of teachers, on health awareness ,retention drive, sanitation, equip mental up gradation, quality improvement etc.

Need of TGEC in Jorhat District:

There are 117 Divisions of TG in Jorhat district where the impact of Elementary Education is not satisfactory. This is due to low enrolment, lack of retention system, high drop out and above all, there is no co-ordination between govt. and tea garden authorities to bring out the child labour and disabled to the functional institutions.

| Age group | sex | School | Never | Drop out | Child labour | Disabled |
|-------------|-----|----------|----------|----------|--------------|----------|
| | | going | enrolled | | | |
| 5-8 years | В | 6909 | 3188 | 161 | 161 | 75 |
| | G | 5657 | 3823 | 186 | 225 | 84 |
| | Т | 12566 | 7011 | 347 | 386 | 159 |
| 9-11 years | В | 4630 | 1180 | 313 | 159 | 41 |
| | G | 2485 | 1575 | 322 | 235 | 66 |
| | Т | 7115 | 2755 | 635 | 394 | 107 |
| 12-13 years | В | 1582 | 797 | 349 | 162 | 44 |
| | G | 1202 | 1176 | 341 | 225 | 27 |
| | Т | 2784 | 1973 | 690 | 387 | 71 |
| | | 22465 | 11739 | 1672 | 1167 | 337 |
| _ | | (60.10%) | (31.40%) | (7.44%) | (3.10%) | (.90%) |

It is revealed in the above tale that the rate of school going children is 60.10% against the district (general area) rate 80.27%, never enrolled rate in tea-divisions is 31.40% against district general area rate 12.75%. The dropout rate in TG district is 7.44% against district rate 4.31% and child labour rate in TG areas is 0.90% against general district rate 0.61%

<u>Table</u> shows that the total number of child population, girls population ,school going ,never enrolled, dropout, child labour and disabled in TG division in Jorhat district.(Age group-5-13).

| Total child population in TG division. | Girl child population. | Total school going girls. | Never enrolled. | Dropout | Child Labour | Disabl e. |
|-------------------------------------------------|---------------------------|---------------------------|--------------------|--------------------------|-----------------|--------------------|
| 37,380. | 16,324.(43.67 %) | 8039(49.25%) | 6574(40.27 %) | 8 49(10.56%) | 685 (4.20%) | 177 (1.08 %) |

The table reveals that total number of child population in TG district of Jorhat is 37,380 out of total child population 16,324 are girls and out of it only 8039 enrolled in school between 5-13 age group. There are 6,574 children out of school 849 are dropout from the school and there are 685 and 177 girls who are child labour and disable .The percentage of all these are shown side by side. It is a great constrain in the development of elementary education in Jorhat district. As such, their need to mobilize /involve the TG labour community and Ex-TG labour tribe with full participation in SSA plan in the shape of TGEC for implementing the SSA plan and programmes .For mainstreaming these children SSA in Jorhat district constituted TGEC under SSA banner for programme implementation.

The diverse ethnic and geographical configuration of the district of Jorhat where the programme is being implemented specific groups, such as the tribals, inhabitants of Riverines and tea garden areas will be targeted for special or focus interventions. These groups who apparently live under conditions peculiar to them have been called the Special Focus Groups (SFGs) under the programme and will have activities alternatively designed for them. (SFG areas identification specially mentioned under sub-chapter SFG).

Strategies for Community Mobilization in general and Tea garden Areas:

- Campaigns, awareness building for community mobilization and participation in the management of schools.
- Making Parent Teacher Associations functional and improving school-home links.
- Frequent visit of community/parents to the school and enquiring about the quality of the child education and school facility.
- Capacity building of community management structure, i.e school committee, MGs,TGEC,GPEC,VEC,etc for their participation in school matters by way of orientation, exposure visits, sharing sessions, etc.
- Convergent between various SHGs for the education of all the children in the age group 6-14 years simultaneously.
- Awareness building and sensitization of community on child labour and their educational issues.
- Conduct of back to school camp habitation based alternative schools exclusively for the girls of TG and Ex-TG labour community.
- Improved classroom environment to provide equitable learning opportunities.
- Special focus on deprived pockets, such as remote tribal areas, urban slums, tea gardens, etc.
- Developing forum of women teachers to take up awareness campaigns on girls education specially TG divisions and low female literacy villages in general areas.
- Special focus campaigns for education of girls, of ST,SC and OBC areas by sensitizing women groups and other SHGs.

Following Specific Activities have been budgeted under the plan

Training for VEC, TGEC, WEC, GPEC and SMC members

2-day training of VEC/TGEC/SMC members at GP level 3-day Trg. of RPs at Block level 3-day Trg. of RPs at District level 2-day training of GPEC members at block level 3-day Trg. of RPs at District level

Implementation of VER

8-day Training of RPs, CRCCs & RTs on VER implementation at block level Implementation of VER in General area Implementation of VER in Remote Areas Updating of VER in General areas Updating of VER in special areas village

Enrollment Drive

1-day orientation for VEC vice president, MS, SMC President and Gaon Burah at cluster or GP level on enrolment drive 2-day Block level RP training 2-day District level RP training

Traveling cost for RPs (4 day) for General areas during actual drive Traveling cost for RPs of Observation of Enrolment drive (4-day) for Special areas Observation of enrollment drive at village level by the VEC/SMC

Regular meetings

Monthly VEC /TGEC WEC/SMC meeting Monthly GPEC meeting Bi monthly GPEC presidents meet at block level Half yearly general meeting for all VEC,TGEC.WEC, SMC and GPEC at GP level Quarterly SMC President meeting at GP level

Regular Grants for the schools

School Maintenance Grant School Infrastructural Grant

Capacity building for PRIs

Exposure visit of PRI members

Reconstitution of VEC, TGEC, WEC and GPEC

Reconstitution of SMC

Gradation of SMC, VEC, TGEC, WEC and GPEC

6.4 **Quality Improvement**

Providing quality education is an important condition of UEE and is the most challenging constituent.

A (Access) → E(enrollment) → P(Participation) → Q(Quality)=Learning. P(Participation)+Q(Quality)=Achievement

The demand for Primary education from community has increased since 93rd amendment of the constitution, which has made elementary education compulsory for all children of the age group 6 to 14 years. SSA has set the target for drawing up detailed plans to achieve universal elementary education by the targeted year 2010. The entire effort is now centered to cater to the enlarged size of enrolment ensuring quality and retention and also accountability on the part of stake holders at this compulsory level of education. It is a challenge to existing educational machinery. One way ahead may be the sharing the responsibilities among the state, local bodies to achieve communityowned quality education in elementary level. Improving the quality of education in our state implies more than an emphasis on expanding current systems of education. It demands a profound modification of basic education in the light of present focus on child as an active subject who participates in his/her learning process. A shift of emphasis from transmission of information to an emphasis in comprehension and social construction of knowledge may be taken in to consideration. Schools will have to bear the evidence of change in all the related aspects -Curriculum, text book, teaching learning materials, method, training, supervision and monitoring, research and community participation and evaluation.

The planning team in district and block level interacted with parents, community members and teachers on the different aspects of pedagogy and finally arrived at a common consensus on the issues, their constraining factors, strategies and interventions for quality and school improvement.

Our Basic principles that underscore the pedagogical interventions:

Each school is a unit of change.

Change cannot be transplanted but can be inducted into the system inducing demand in targeted customer.

Basic strategies before us.

Advocacy, social mobilization, community participation and stimulation of demand for quality education must be promoted.

Organization of planning, management and monitoring mechanism at local level must be groomed. Specific programme for out of school children and schools in disadvantaged areas.

Children learning skills must be improved in Ka sreni, class L.

Schools must be adapted to good practices gradually.

Status :

Problems & Issues:

(1) School Infrastructure :

- Existence of schools having no building;
- Existence of schools having building in dilapidated condition;
- Building having no walls, doors and windows;
- Over crowded classrooms;
- Lack of drinking water facilities;
- Having no sanitation/ toilets;
- No furniture / sitting arrangement;
- Having no electricity;
- Having no black board/ TLW/ Learning corner/ Library.
- Having no play ground.
- Having no approach road.
- Affect of instructional days by flood in flood prone areas;

TEACHERS:

- Existence of Single Teacher Schools;
- PTR is not in proper order;
- Existence of un-trained teachers;
- Lack of pre-service training;
- Recruitment of poor quality teachers;
- Teachers are not aware of learning out come;
- Teachers inability to communicate local dialect;
- Irregular payment of teacher's salary;
- Teachers are not given in-service training- Upper Primary Level;
- Single & Double teacher schools run without academic support;
- Teachers coming from distance places to attend schools (Hilly areas);
- Teachers' indifference towards community;
- Lack of community participation in TLP;
- Absence of Teacher-Parent contact;
- Teacher's un-equal attention to pupil;
- Teachers' irregular attendance;
- Lack of proper supervision, monitoring and support.

ENROLMENT

- Irregular attendance of children;
- Affects of schools by flood;
- Existence of child labour:
- Non-availability of textbook in time;
- Non-implementation of academic calendar;
- Affect of instructional days by holidays which are not important to the locality;
- Confusion of list of holidays published by state and local department.
- Time table and scheme books are not enforced;
- Parental apathy. Absence of parent-teacher linkage;

- High rate of drop-out and non starter.
- Poor enrolled children, school timing is not suitable in all cases.

CURRICULUM, TEXT BOOK & TEACHING LEARNING PROCESS :-

- Absence of activity based joyful text books;
- Monotonous teaching learning process. TLMs are not prepared and used as per specifications;
- Ignorance of non- scholastic areas;
- Difference of quality education in private and public schools;
- Defective evaluation system.
- Absence of curricular strategy for multi-grade teaching situation.
- Text materials offering less scope for local adaptation.

SUPERVISION & MONITOING (S&M) :-

- Less importance on Supervision & Monitoring by educational functionaries;
- Lack of special supervising staff for remote, forest and isolated areas;
- Want of special incentive to supervising staff for remote and focused areas;
- Lack of special strategy for problematic areas;
- In-adequate supervising staff;
- Engagement of supervising staff to other administrative activities;
- Un-even distribution of schools to inspecting staff for S&M works.

Here, a picture of distribution of schools to the departmental inspecting staff be looked into :-

|] | No. of | Schoo | IS | No. of | Ratio | Remarks |
|------------|--------|-------|-------|---------------|-------|-----------|
| Block | L.P | U.P | Total | Inspecting | | |

School Inspecting Staff Ratio

SCHOOL COMMUNITY LINKAGE: -

- Community thinks that the school is not their own;
- Lack of parent teacher co-ordination;
- Non functioning SMC;
- Teachers in-different to the community'
- Socio-cultural barrier.

PROBLEMS OF SCHOOLS IN SPECIAL FOCUSED AREAS :-

- Lack of communication for S&M;
- Threatening environment/ present status of law & order;
- Language problem;

- Non availability of local teachers;
- Socio-cultural barriers;
- Flood Prone Area
- Schooling facilities are disturbed in flood prone areas (Majuli).

Strategies and interventions:

The district planning team has sorted out the strategies followed by some interventions in different dimensions to find out the problems that impede in the way of quality / school improvement.

A. Community involvement in school

- Constitution of community based organization and other forces.
- Linkage between community based organization and PRI.
- Development of mechanism for regular and effective contact with parents and community.
- Orientation of various functionaries.
- Making school level planning more a way forward to village level planning.
- Involvement of community in quality improvement.

B. Better school supervision and academic support.

- Establishment of coordination and resource base at Block and cluster level.
- Convergence of administrative and academic functionaries.
- Development of effective feed back system.

C. School development plan.

- Gradation to judge the internal efficiency of school.
- Gradation of GP on the basis of the school grade.
- School base planning and gradation demand for school improvement.
- Building of social acceptance to new in innovative.

D. Teachers motivation and training

- More emphasize upon Ka-Sreni and class 1.
- ✤ Adoptions of whole school approve.
- Contact support to teacher.
- Practice oriented training.
- Co-learner between curriculum, textbook, teachers training and class room situation.
- Integrating disable children in maintained school
- Proper use of TLM grant through TLM list and training
- Special focus for school with limited resources.
- Formation of teacher resource group at cluster level.
- Growing the CRC as an in service training center for the teacher.

E. Pupils evaluation

- ECE for giving addition limited support.
- Adequate reporting and sharing with parents about child performance.
- Public examination for terminal grade.
- Standardized tools for uniform evaluation.

F. Support to schools with special problem

- Special intervention for identified pockets (SFG).
- Strengthening of teachers.
- Supply of materials.
- Supervision of monitoring.

G. Innovation

- Special package for early language development in Monograde school
- Special package to M.G.T. school

Specific Strategies undertaken

Preparation and use of Teaching and learning materials:

Core teaching learning materials required for each lesson of the text book will be identified and will be printed in the form of a book. Each school will receive this list and plan for preparation of TLM. Teacher grant will reach the schools before academic tear starts and TLM will be developed in the first 10 days of the first month of the academic year. For these the teacher will receive special training on how to prepare material and how and when to use these. This will be followed by monthly preparation of TLM in the regular teacher meeting. This will be a regular feature in every new academic year. There are some TLMs which can not be developed by teachers easily, Particularly in Class I and II lot of s uch materials are to be developed. S uch materials will be provided to schools. In case of Schools with limited facilities, (MGT, over crowded class room, Tea garden s chools. Flood p rone a reas etc.) T LMs will be provided. The teacher will have to use TLMs by following a daily action plan which is related to lesson plan. Monthly activity plan and scheme book. in case of Multigrade schools and schools in disadvantaged areas, this planning will be built into the package provided. However , the teacher will get full liberty to develop new TLMs as per local need. The DACG and BACG members will review the use of TLMs in all the schools covered by them.

A check towards repetition and dropout:

The most seriously deprived repeaters attend schools with untrained teachers who are busy with the average pupils and have limited learning materials. In order to help these teachers, special package will be provided with both academic and material and strategy support. In case of other schools, the teacher will keep note of absentees, slow learners or other wise deprived student and give them extra support. Support measures will be discussed and planned in meetings with VEC, SMC, Mothers group, Teacher meet and all other meetings in the line. Children's progress will be reported to parents regularly.

Early language development in class I and Class II will receive high priority, Necessary learning materials like work sheet, unit test papers, child profile will be provided. Teacher training will be directed towards assisting slow learners. Student Government and Mother group will be strengthened to help the students of class I&II.

Check towards frontal teaching and rote memorization.

Sitting pattern will be changed from row to group type. Instead of benches and desk, learning table will be made from infrastructure grant and community contribution.

Different types of Group activities will be included in the lesson plan to help children think, share, argue and come to a consensus. Lot of project works with community will be provided to apply acquired knowledge /skill in real situation. Unit test papers also will keep elements of group activities so that teachers find it relevant.

Teacher Motivation and Accountability

Reforms and innovation will not take extra time from teachers as inputs will be introduced gradually and keeping in view the limitations. No teacher will be left alone to shoulder the responsibility of changes. The gap between theory and practice will be reduced by helping the teacher to do learning to do material and how to link with others. The trainers are required to practice the theory in practical situation before they go for demonstration. Class room change will be a shared responsibility – Govt. functionaries, facilitators, field activists and parents. Gradation

of schools will review the indicators of internal efficiency of schools – completion rate, attendance rate, achievement rate, community participation and children' participation in learning. This will help take up special corrective measures as backward areas will be identified

School based planning for internal efficiency of the village level institution.

The school will be the unit of change; the efforts towards improving quality will be conversed to draw resource support from community. The issues like absenteesm dropout, slow learners, change of desk into learning table, mid day meal etc will be converted into actionable plan where the members of community will receive an opportunity to participate in the execution of activities. Thus a school level plan will emerge and priorities will enter the cluster and block level planning. This will set the trend for planning at the grass root level. This will influence all interventions in the Gaon Panchayat level.

Special School improvement programme

Special package for school level learning improvement will be launched in all the districts keeping in view the involvement community in teaching-learning process and also a ttacking the quality issues related to development of higher order of thinking in children. This particular strategy is expected to rejuvenate the entire teaching-learning process in schools where quality is not ensured.

Pupil's evaluation:

Continuous and comprehensive evaluation will be in the center of supportive mechanism to help the learners. The number of Unit tests will be reduced and specified and proportionate weight age will be accorded in relation to terminal examinations.

Each unit test findings will be recorded and discussed thoroughly with co-teachers and in the monthly meetings. Remedial measures will be discussed down the line of academic support structure and support will be provided through DIET, BRC and CRC. Core questions related to learning points will be discussed in length in the meetings and a list of core questions along with different types will be provided to CRCs /schools so that the teacher can set questions with a uniform pattern in mind. Answer sheets will be kept properly so that parents and student can see the mistakes committed previously. Both scholastic and non scholastic achievement will be assessed and students performance will be counted in gradation of the school.

School with limited facilities

Multigrade schools and schools having Ka-Sreni will be given special attention.

Multi grade Teaching package to single and double Teachers school. Special Training of Teachers. Preparation and introduction of learners book. Supply of TLM. Engagement of community Teachers in multigrade schools.

Special academic support to problem packets—Remote/Forest/Tea Garden and Isolated areas.

There are schools located in some difficult areas of the district, which need special academic support to coup up the situations. The remote area, forest area, flood prone areas and isolated areas have their own problems, which are not similar to other general areas. Our aim is to give more academic support to the schools located in these areas.

Supervision & Monitoring (S & M): District Academic Core Group.

- 1. The District Academic Core Group Includes the following.
 - 2. Principal ,DIET.
- 3. District Elementary Education Officer.
- 4. Inspector of Schools .
- 5. Asstt. Inspector of Schools.
- 6. Deputy inspectors of Schools.
- 7. Principal .Normal School.
- 8. Principal, Basic Training Centre.
- 9. Block Elementary Education Officers (all).
- 10. Faculty members of DIET.
- 11. Sub-Inspectors of Schools (all).
- 12. Block Resource Centre Co-ordinators (all).

The DACG may co-opt 2 (two) additional members having experience in academic work at Primary and Upper Primary level – one from primary and other from composite school (upper primary).

Roles and Responsibilities of DACG :

The DACG is the apex district level body for quality and school support/ supervision.

The DACG will meet once in a month to review and finalise the action plans of the BACGs.

The DACG prepares action plan for the joint as well as individual support visits to schools for the next month.

Each of the members of DACG undertakes individual visits to schools and members undertake a joint visit once in a month also,

The DACG identifies academic problems and issues and take corrective actions at various levels . The school/classroom observations reports are analyzed in detail.

The DACG Will assign specific tasks to smaller groups of its members or involve additional persons.

Another important assignment to each DACG member is to adopt a school (a school with limited facility) to make it a model school.

The convener of the meeting (Principal DIET or BTC as the case may be) maintain the records of the meetings and also take follow up actions on the discussions.

Block Academic Core Group (BACG) :

The BACG shall comprise the following:

The BEEO/ BRC coordinator.

.

The DIET faculty in-charge of the Block

The sub Inspectors of Schools (Concerned Block).

The Cluster Resource Coordinators.

The Inspector of Schools will nominate one member for each BACG.

Roles and Responsibilities of BACG:

The BACG is the apex Block level body for quality improvement and school support/ supervision. The BACG meet once in a month.

The BACG reviews the reports of field visits and main academic and administrative action points emerging out of the visits to schools.

The BACG prepares its action plan for the next month and present the same to the following DACG meeting.

Each members takes individual visit to schools. and adopt a school every year. The BACG members attend CRC level teacher meetings on a regular basis. The BACG meeting is convened by the BEEO and S/he maintains all records of the meetings and also initiate follow up action on the discussion.

Strategy of this information and feedback linkage:

| State level - | State Academic Core Group - | Monthly Meeting. |
|------------------|--------------------------------------------------|------------------|
| District level - | District Academic Core Group- | Monthly meeting. |
| Block level - | Block Academic Core Group - | Monthly meetings |
| Cluster level - | Monthly Teacher meeting. Monthly VEC meeting. | |

Role and functions of Block Resource Centre.

In the BRC, the BRCC along with 6 Resource Teachers (Upper Primary Level) will run the center. The resource teachers for the Upper Primary level will be drawn from the teachers teaching High and Higher Secondary Schools and the two resource teacher for the Primary Level will be drawn from LP/UP school teachers.

a). The BRC will keep all relevant data of the block for ready reference .

b). Regular meetings of different components will be held in the BRC.

The BRC is also a training center for field level functionaries.

Major role of BRC coordinator

- ✤ As a co-ordinator.
- ✤ As a planner.
- ✤ As a Trainer.
- ✤ As a supervisor.
- As a practitioner of good practices.(Adopted school)

Role and Functions of Cluster Resource Centre.

- In the CRC, one teacher will be Co-ordinator.
- The CRC is a regular training center for Teachers.
- It acts as the planning center also.
- All relevant data are kept and regularly updated.
- Paying regular visits to school.

Role and functions of Cluster Resource Centre co-ordinators.

- The CRCC co-ordinates monthly teacher meeting.
- The CRCC undertakes teaching in the schools of the Cluster.
- The CRCC reviews the progress of activities implemented in the cluster and reports it at BACG regularly
- The CRCC carries back the remedial proposals / measures discussed in BACG to teachers.
- The CRCC will adopt a school from the Cluster and convert into a Model school every year.

District Institute of Education and Training & Basic Training Centre. Role and Responsibilities:

Besides imparting regular training (PSTE and In service), the DIET will perform the following tasks.

- 1. Regular analysis of data and review of field level interventions to know the strength and weakness.
- 2. Orientation of field level Resource persons. (Support to Block and Cluster)
- 3. Taking up studies and evaluation of important interventions.
- 4. Development of training modules/ papers and also reading materials.
- 5. The faculty members will work in Lab schools to verify the effectiveness of strategies to be implemented in schools.
- 6. Lateral linkage to other DIETs.

The Coordinator DACG will present a comprehensive report to the Monthly SACG meeting, Alternatively one BACG of a District along with the DACG coordinator will take part in the monthly SACG meeting.

Thus this structure is directed towards strengthening of internal efficiency of the academic and supervision system by allowing each member to groom his/her potential as resource person making them accountable and bringing about mutual convergence among the stakeholders in planning and execution.

Special Interventions:

To ensure quality education is a major goal of SSA. Hence, strengthening academic support system is a pre-requisite. In this respect, DIET/Normal school will have to take the lead. The major training institutions are accumulated only in Jorhat sub-division. But in case of Majuli the greatest river island in the world there is only one BTC that too is with poor infrastructure and shortage of academic staff. There are only 3 number of instructors with an in charge principal. Therefore in Majuli existing BTC must be ugraded with proper building infrastructure and academic staff in order to cope up the present requirements.

| SI No. | Name of the institution. | Place. | Total. |
|--------|--------------------------------------|-------------------|--------|
| 1 | Normal School | Jorhat | 1 |
| 2 | BTC | Raunapara(Majuli) | 1 |
| 3 | DIET | Titabor, (Jorhat) | 1 |
| 4 | SIE | Jorhat, | 1 |
| 5 | B.Ed. colleges | Jorhat. | 2 |
| 6 | Pre-Primary Teacher Training Centre. | Jorhat. | 1 |

Number of training institutions in the district Jorhat.

The total number of training Center/Institutions is 7.

The sharing of experiences amongst training institutions will help in identifying local resource persons.

6.5 Research & Evaluation

OBJECTIVES

- To initiate, promote and direct programme and activities designed to testing about expected changes in achieving Universal Elementary Education through research and innovation.
- To promote quality in research having relevance to the project SSA.
- To provide and develop leadership in educational research
- Situational analysis and appropriateness of any interventions.
- To take such measures as are necessary for any midterm correction can be known from evaluation.
- To disseminate research findings and to promote their implementation in the educational system.
- To promote activities in the development of leadership and expertise in research.

Research work on pedagogical analysis and appropriateness of interventions is a very important component. The progress towards objectives and measures to be taken for any terminal corrections can be well understood from evaluation.

With a view to ensure successful implementation of plan and programme of SSA, the institutions and individuals will be encourage to conduct studies in primary level.

At district level the focus will be on conduct of Action Researches by the teachers and other educational functionaries and the project people like Resource Teachers, BRCC, CRCC.

Besides, following studies will be undertaken by Teacher Training Institutes, B.Ed Collages and other institutions The following are the major areas of Research & Evaluation co-insides the SSA activities, particularly at district level, which are proposed to be taken-up.

- Student's achievement test (Base line, mid-term and terminal);
- Teacher's diagnostic tests;
- Social assessment study.
- Studies on district specific issues like education in special focus areas viz. tea garden, educationally backward areas etc.
- Studies on classroom situation and other school related issues;
- Comparison in management between government & private schools.
- Educational status / back ward ness of tribal / girls / SC / Minority / slum dwellers.
- Educational facilities to disadvantage group.
- Role of VECs in uplifting educational status of back wards sections
- Problems of handicapped / disabled children.
- Role of PTA / Mother groups in education of children.

Evaluation of different programmes, interventions b oth in-house and third party is another major agenda under this component. Some of the specific areas on which evaluation studies will be undertaken is given below:

- Use of grants to school.
- Functioning of DACG/BACG
- Effect of mobilisation activities.

- Motivation strategy for out of school and working children.
- Impact of SSA in enrolment & Attendance..
- Functioning of village education committees & school management committees
- Evaluation of managerial structures and processes.
- Appraisal of school management.
- Monitoring & Evaluation of assistance to VEC.
- Teacher training and its effectiveness on teachers motivation and knowledge
- Longitudinal study to access impact of the programme (SSA) on Class room transaction, community participation etc.
- New teaching and learning methodology its impact on children's achievement.
- Gender based teaching and learning materials and its impact on children.

Major Strategies

- The strategy would be to empower the Teacher Training Institute to handle the research and evaluation related activities. Faculties of the training institutes and some selected Resource Teachers and other interested individuals will be trained at state level. The aim is create a pool of resource people at district level. These pool of Resource Persons will be utilised for training of educational functionaries, teachers and CRCCs for conduct of Action Researches regularly on classroom, school and community related practical issues and problems.
- The institutions and NGOs will be assigned to carry out bigger studies and specifically the evaluation studies.
- Another major strategy for promotion of research in elementary education will be to share the findings of conducted studies with the stakeholders and midcourse correction of strategies based on the acceptance and implementability of the suggested measures of research findings.

6.6 Management Information System

For successful implementation of any time-based programme, collection and dissemination of information and feedback play a crucial role. The Management Information System Unit in SSA will be set up to provide information support to all levels of management for planning and decision making. A silent feature of the progressive plan of MIS would be to provide information support to the Education Planners and Departments. The motto is to bring about a total change in collection and dissemination of educational statistics.

Background – Why Monitoring and the Management Information System?

Management Objectives and Functions

In a view to improve the quality and effectiveness of educational planning and management a variety of data is required in a form that conforms to the requirements of user agencies operating at various geographical and administrative hierarchies. Due to wide geographical dispersion of institutional network representing a variety of school locations and endowments, the complexity of the multi-level decision-making process and control mechanisms increases.

One of the major challenges facing the education sector is the design and management of consistent, efficient and functional information. The task is further complicated as least priority is given to the development, maintenance and modernization of information systems. As a result the outcome is a dysfunctional system of information flows characterized by inadequate coverage, time delays, poor quality land having little relevance to the ground level realities.

It is a common observation that the vital statistics required for day-to-day decision making are either missing or may become available only after the critical decisions are made. Therefore the pay-off from an improved, consistent and timely availability of data on key and simple indicators of educational health can be enormous as :

- It will not only provide the right type of signals to educational administrators and
- It will help in more sharply focusing the scarce resources for areas/activities where these are most needed.

The cost of implementation and sustaining the information system pays for itself as the benefits start following in immediately and are immense as compared to the initial cost of setting it up.—THE innovative EMIS

Managing a development project is a complex task. However, the basic core of a manager's

work program should include

- (a) development of activities and delivery systems, and determination of the required inputs and outputs;
- (b) preparation of work plans and schedules;
- (c) determination of the precise responsibilities of various organizational units and supervision of their performance;

- (d) maintenance of detailed records of physical and financial performance and establishment of measurable performance indicators;
- (e) monitoring of the project environment so that implementation can be facilitated of adjustments made; and
- (f) preparation of periodic reports to responsible central agencies and institutions.

Monitoring is then a tool that a project functionary (or functionaries) uses to help him carry out his/her functions.

Efficient management requires sound monitoring. Conversely, monitoring cannot be fostered and its integrity protected if the management structure is unsound or the managers ineffective.

Benefits and Role of a Monitoring System

A good monitoring system can provide many benefits to project management. These include

- (a) identifying targets and objectives for project implementation,
- (b) maintaining easily retrievable records of project implementation which can later be used for evaluation,
- (c) identifying problems encountered by the project, and
- (d) providing readily available analyses for decision-making.

In addition, the project and supervision missions can greatly benefit from a suitable combination of comprehensive and shorter issue-oriented, accurate, and timely progress reports. These reports reduce the time needed for data gathering, enabling maximum concentration on problem-solving and technical assistance, as required in *Project Supervision*.

A monitoring and evaluation unit is necessary to carry out the monitoring function, which depends upon the complexity and scope of the monitoring function and the extent of evaluation requirements. The responsibility for organizing, maintaining, and using a regular flow of information throughout implementation will be included specifically in the terms of reference of the project functionaries.

The need for a separate administrative unit for monitoring will be greatest in the Mission, where project objectives (especially social and institutional) are innovative and/or complex, or in projects with multiple components. Such a unit will be created, and will be integrated into the management structure, since its purpose is to serve the information needs of the implementing agency. The range of the information system and the scale of the monitoring process will be consistent with the staff and financial resources available and will be sustainable as a feature of management procedures within the Mission.

The Role of a Management Information System

Scope. A good management information system (MIS) will contain the necessary data on project activities proposed under implementation. A good monitoring system will also collates and analyses these data regularly and quickly, and communicates pertinent information to project management at all levels. The information covers four areas :

- (a) procurement and physical delivery of goods, structures, and services, and the costs incurred;
- (b) use of the structures and services by the project beneficiaries and their initial reactions;
- (c) reasons (social economic) for unexpected reactions by the project beneficiaries, when these are revealed by the information obtained in (b) or through other sources; and
- (d) measurement of output indicators such as productivity gains to the extent that these can be measured during implementation. Projects in different sectors will call for different emphases among these four areas, with infrastructure projects focusing more on physical and financial implementation, and service projects emphasizing the reactions of the intended beneficiaries from the outset.

Design. Design of the information system and its use for monitoring progress requires identification of the primary users, quantification of project objectives, and selection of a minimum core of quantitative and qualitative indicators for monitoring progress towards these objectives. There can be no standard list of indicators, since indicators are project-specific, time-dependent and will be decided upon in consultation with Project functionaries.

From this basis, District MIS Unit. responsible for carrying out monitoring, will establish the frequency and timing of data collection, analysis, and sharing. All sources from which relevant data may be obtained without additional surveys will be reviewed, including both project staff reports and sources outside the project. Gaps in the information system will be supplemented by specific data collection. Annual monitoring work plans specify the data to be collected; when by whom, and how will be analyzed; and to whom information will be reported. These work plans will aim at simplicity and remain sufficiently flexible to allow additional diagnostic studies to be carried out at short notice.

Two major tools of MIS will be the Project Management Information System (PMIS) and Educational Management Information (EMIS).

The PMIS essentially will serve as a progress-monitoring tool. The main objectives of the PMIS are to: -

- Track the progress of delivery of project inputs
- Monitor the fund movement
- Monitor the physical progress of the project activities
- Provide project performance indicators which help the project authorities to take corrective steps for smooth implementation of the project

It will monitor the trends in key project areas such as civil works, appointment of teachers, training of personnel, completion of studies, release of funds, expenditure and disbursement claims. The software will also generate quarterly progress reports. Constant efforts will be directed upon for improvement the PMIS such that its efficiency in data generation is enhanced.

EMIS will be a comprehensive software package to assess and monitor, on an annual basis, the educational scenario at the primary/upper primary stage through key educational indicators. The main objectives to have a state specific EMIS are to :

- Develop a framework for collection of educational statistics from recognized institutions imparting primary education
- Create a institution level computerized database at the district level
- Provide access to school level database to educational planners, administrators and researchers at district, state and national level and train them adequately to analyse and use the database for future planning.
- Provide a programmed solution for the SSA Mission to monitor the progress of education at the district/state and national level by monitoring key educational indicators.

Both PMIS and EMIS will be made operational from the project inception year in the District. The detailed analysis of PMIS and EMIS data already undertaken in DPEP districts has helped in identifying some areas of concern, particularly in terms of teachers' deployment, condition of school building and availability of equipment and facilities in schools. Using this database, it will be possible to compare the performance level of any two schools located in different locations of the GP/Village. Similar comparisons are possible at the block and district level itself. In addition to sharing of data with user agencies and stakeholders, it is also proposed to conduct sample checks by independent agencies so that the reliability of school data can be established. To encourage the use of PMIS and EMIS data in planning, management and monitoring, orientation programmes will be organized for educational planners and administrators.

The MIS Infrastructure.

A Programmer and two Data Entry Operators will manage the district unit.

MIS unit will be equipped with latest configured systems and peripheral devices. The complete integrated on-line and off-line system will facilitate the data and information browsing from various spheres of Mission structure as per the needs.

Capacity Building

مردد. مرتب

MIS Staff: The Programmers and Data Entry Operators of the district Mission Offices will be provided in-service training on all the latest updates both in Software and Hardware issues. Besides, the technical trainings of Software and Hardware, series of trainings will be conducted for the field level workers, block and district level officials, Stakeholders and State Level officials on usage of MIS as a whole. Following trainings are planned across the years:

- 1. Monitoring Records, sources of data for interim and terminal evaluations.
- 2. EMIS Data Capture Formats.
- 3. PMIS Data Capture Formats.
- 4. Various DCFs to be used for data collection and compilation.
- 5. Supplementary data collection and special studies taken from time to time.
- 6. Basics on use and analysis of raw data.
- 7. Analysing, Projecting and Disseminating of the derived indicators from the data.
- 8. Creating general awareness especially social and institutional awareness to share the truth in DCF.
- 9. Impact evaluation based on a yearly/time series analysis of data from areas in and outside the project.

Others : The BRCCs, CRCCs and HTs of all primary schools will also be provided training on collection and use of EMIS data. Various level sharing and dissemination workshops will also be a recurrent activity during the Project Period.

Major strategies

The educational database consists of school related information starting from the project inception will be maintained and refined. It will not only facilitate in assessing the progress of the project in various parameters but also help in monitoring school wise performance and progress across the years. Besides the unit will also develop and have large storage of information on project functioning areas and interventions.

The focus will be to identify the disadvantaged areas based on quantifiable data and indicators. Micro analysis of the already available 'Alokar Jatra' will be done to identify and monitor the disadvantaged areas. List of disadvantaged areas will be generated and updated regularly based on out of school children and other school efficiency indicators viz. improvement of GER, NER . completion rates and achievement levels etc. List of disadvantaged areas will include ranking of the schools, VEC, SMC falling in those areas. The list will be shared extensively.

Another major activity will be to update the already created Technical School Infrastructure Database. Yearly updation of the same will be carried out after initiation and completion first round of civil works activities.

It is also proposed to made extensive use of the already developed teacher database for rationalization and planning the teacher requirement on long-term perspective.

Attempts will be made for streamlining flow of information and also to ensure that a single

reliable database is created which can be used for effective educational planning.

Capacity building of field staff for collecting, disseminating and analyzing suitable information on School Information System as well as trend analysis of educational indicators.

Computerization, analysis of information and using it in the planning process and dissemination.

Besides following Major Archives will be Generated/Upgraded

- School Directory,
- Teachers Directory,
- Village and VEC Directory,
- ECE Centre and Workers Directory,
- EGS/BC Centre and Workers Directory,
- IED Centre and Workers Directory.
- Project Functionaries Directory,
- Financial and Physical Progress Information,
- Annual Work Plans & Budgets
- All other information for Project Monitoring.
- GIS Monitoring,
- IT Education in Schools,

• Educational Home Page,

Monitoring & Follow-up

• The networking of information-flow from habitation/school/institution to G aon Panchayat, Gaon Panchayat to Block, Block to District and District to S tate will be developed. The MIS In-Charge at the District will monitor the entire networking of flow of information from down the line to state.

Convergence

• Convergence with NICNET, CIC will be worked out for effective use of MIS Network. Similarly convergence will be established across the various directorates Director of Secondary Education, Directorate of Elementary Education, District and Block Mission Office.

Following Specific Activities have been budgeted under the plan

Setting up of BRC Setting up of CRC Supervision & Monitoring SCHOOL IMPROVEMENT PROGRAMME

- Institutional Capacity Building
- DACG Monthly Meeting
- School Support Visit
- Action Research & other research related programmes
- Workshop, Seminar & Capacity Building
- Documentation
- Provision for Community Teachers at Remote Area Primary Schools
- Provision for Community Teachers at Remote Area Upper Primary Schools

Training of teachers

- 8 days training of Lower Primary School Teachers
- 8 days training of Upper Primary School Teachers
- Training of K-sreni teachers

• 15-day District level workshop seminar

Evaluation

- Teachers diary (yeariy)
- Students progress card
- Conduct of Public exam for class IV and class VII (yearly)

Free Textbook to Children Gradation of School

6.7 Integrated Education For Disabled Children

Background:

Universalisation of Elementary Education cannot be achieved if the children, who have some physical, intellectual or emotional limitation, are excluded from the general mainstream of education.

SSA will ensure that every child with special needs, irrespective of the kind, category and degree of disability, is provided education in appropriate environment. SSA will adopt 'zero rejection' policy so that no child is left out of the education system.

Approaches and options: The thrust of SSA will be on providing integrated and inclusive education to all children with special needs in general schools. It will also support a wide range of approaches, options and strategies for education of children with special needs. This includes education through open learning and open schools, non formal and alternative schooling, distance education and learning, special schools, wherever necessary, home based education, itinerant teacher model, remedial teaching, part time classes, Community Based Rehabilitation (CBR) and vocational education and cooperative programmes.

The programmes funds interventions for integrated education of primary school going children with integrable and mild moderate disabilities. Five categories of disabilities covered under the programme are visual, hearing, orthopedic, and learning impairment and mental retardation.

STATUS

Present Status of the disable children in Jorhat district.

| | No. | 1 | No. of Disabled Children | | | | | | | | | | | | |
|--------------|-----|---------------|--------------------------|-------|----------------|-------|-------|-----------------|-------|-------|----------------|-------|-------|--|--|
| Block Name | GP | 5-8 Age group | | | 9-11 age group | | | 12-13 age group | | | 5-13 age group | | | | |
| | | Boy s | Girls | Total | Boy s | Girls | Total | Boys | Girls | Total | Boys | Girls | Total | | |

Table 6.7.1 Block wise & age wise number of disabled children

1. In Jorhat District 1104 children with special needs are found as per the house to house survey "ALOKAR JATRA". The disability are found in the following areas.

I. Visual.

II. Hearing.

III. Locomotor.

IV. Speech.

V. Mental retardation.

VI. Multiple disabilities.

VII. Cerebral palsy.

The actual picture will be found at the time of medical assessment.

Table no.1 shows the picture of children with special needs (Block Wise) while Table no -2 indicates the nos of disabled children in the tea garden area .It is clear from the Table-1 that highest no. of disabled children in Jorhat Block and minimum in North - West block. So special focus is to be given to the Jorhat Block.

Resources

- There are three special Institutions in Jorhat District namely
- Jorhat Blind School.
- Institute for deaf and dump Govt.
- PRERONA, Pratibandhi and sishu bikash Kendra.
- Moreover, in Prerona, there is provision of a training for 6 Months for the community people.
- <u>Other</u> ResourcesThe following Institution may be helpful for implementation of the IED at jorhat
- HERS-(Health, Education and Rehabilitation society)
- ↔ ONGC. Welfare section.
- ✤ LIONS CLUB
- ✤ Assam Tea planters Association.

Issues of Jorhat District

Most of The Parents are not aware of the education of disabled children particularly in backward areas.

Trained persons are not available according to the needs.

Lack of positive and sympathetic attitude of the community for the disabled.

It is seen from the above table that there are **1104** disabled children which is **1.24** % of the total Child population. It may be noted that actual number of disabled children is higher than the number found in the Survey.

From the block wise data it can be seen that Jorhat block is highest number of disabled children and North-West block is having lowest number of disabled children.

| Type of Resources | Yes/no |
|-----------------------------------------------------------|--------|
| District Regional Rehabilitation center of NPRD Scheme at | Yes |
| Medical College with trained professionals | |
| Civil Hospital with specialist Doctors | Yes |
| PHC | Yes |
| Dispensary | Yes |
| sub center | Yes |
| FW center | Yes |
| District Blindness Control Society | Yes |
| District Malaria Eradication programme | Yes |
| Health Department | Yes |
| Social Welfare Dept. | Yes |
| NGO 'S working with disability | Yes |
| Public Sector organisation like ONGC, OIL ,NRL , BRPL , | Yes |
| etc | |
| Govt. special school (Blind and Deaf & Dumb only) | Yes |

Table 6.7.2 Resource : District Special

Issues

- Lack of awareness on disability related issues
- Dearth of trained Personnel
- Misconception on abilities of the disabled
- Disadvantage areas
- Lack of proper publicity about IED.

THE MAIN OBJECTIVE OF THE PROGRAMME:

- To improve the enrolment, participation and retention of disabled children in general primary schools;
- To provide viable support services to general primary school teachers to make them understand the educational needs of all categories of disabled children in integrated setting.
- To enhance the competencies and skills of general teachers to meet the educational requirements of children with special needs.
- To instruct trained resource teachers, to assist general teachers in classroom management of children with special need by suggesting appropriate curriculum modification and educational intervention.
- To provide resource support to children with special education need in the form of resource room in the existing cluster resource center structure and a learning corner in the classroom.
- To develop instructional materials and suitable strategies for promoting the education of children with special needs through general school teachers.
- To supply aids and appliances to the disabled children for promoting learning in integrated setting.
- To mobilize the community to facilitate integration children with special educational needs as in regular schools.
- To enhance access by creating a barrier free environment (such as ramps, hand rails and special toilets) to suit the needs of children with disabilities.
- To improve the enrolment, participation and retention of disabled children in general primary schools;
- To provide viable support services to general primary school teachers to make them understand the educational needs of all categories of disabled children in integrated setting.
- To enhance the competencies and skills of general teachers to meet the educational requirements of children with special needs.
- To instruct trained resource teachers, to assist general teachers in classroom management of children with special need by suggesting appropriate curriculum modification and educational intervention.
- To designate the disabled as indifferently able.

SPECIAL AREAS

Majuli sub-division is one of the difficult nature sub-division of the Jorhat district. This subdivision is fully surrounded by the river Brahmaputra and the limit. It is the biggest river island in the world. This land has no direct linkage between other parts of the district. The internal communication of the island is disrupted by flood, erosion etc. n every year the disabled children detected from house to house survey is scattered in different small islands. So in this island a residential medical media is highly required. After proper identification such disabled mission may adopt such a centre for the future generation to.

STRATEGIES ADOPTED

- Survey
- Quantitative expansion

- Composite area planning
- Local specific approach
- Desegregated target setting
- School restructuring / reform
- Community school mobilization
- Convergence of all existing mechanisms services
- Establishing contract with the community
- Establishing contract with institutions
- Establishing contract with other functionaries and organizations
- Survey for identifications
- Assessment of disabled children
- Mobilization of resources
- Training and orientation
- Integration of children with special needs
- Facilitating conditions- organizational
- Facilitating conditions-pupils
- Facilitating conditions-classroom

MAJOR ACTIVITIES:

100

The following activities could form components of the programme:

Survey : survey was conducted to identify the number of children with disabilities , though it is expected to be higher than the projected figure, it is planned that survey will be conducted every 3 yrs . for re-verification and inclusion of unreported cases.

CORE GROUP (DRP): Resource groups will be constituted at district levels to undertake effective planning and management of the programmes in collaboration with PRIs and NGOs. An apex level resource group at the national level to provide guidance, technical and academic support to the children with special needs under SSA will be constituted Formation of a core team of district administration , health officials, social welfare, educational functionarles ,NGO'S will be constituted to initiate the activities. The group will be responsible for awareness and sensitization at different levels, planning ,problem solving, supervision & monitoring . Regular quaterly meeting of the group for the first 3 years and half-yeariy in the consequent five years and quateriy in the last year will be held to plan, strategies and build innovative activities for the programme. The core group will be dissolved and reconstituted every 3 years.

Awareness activities : Awareness amongst all sections from the district to village level of district functionaries, VEC, GPEC, SMC, HT,Teachers, mothers, parents and other family members, ICDS, AS workers etc. will be focused through meetings, seminars orientation, trainings to various groups. These awareness exercises are planned once for each year. except the final year when consolidation will be planned. The awareness activities will be conducted by NGO's, District core group, change agents of the community mobilization group.

Selection and training of Resource Persons and workers : To conduct the activities at district, block and cluster /panchyat level, persons will be selected and engaged to supervise and work with complete job chart drawn up at state level. The engagement TOR will be on 11months contractual basis and temporary. Inductiont Training of 10 days in the second year and recurrent refresher training every 6 months on need –based areas, such as, use, repair and maintenance aids & appliances, classroom management, IEP's etc. will be conducted for the above personnel each year except the final year. With the engagement of increased no. of workers on the 3rd year along with geographical expansion of coverage the same process will be followed. Intensive training courses on different kinds of disability is

also planned for some selected personnel. Exposure visits of the personnel for further training to Resource centers will be a form of in-service training and conducted each year for selected persons.

Honorarium to BRP's at block and IED workers at GP level : The temporary engagement of the personnel may be renewed on basis of performance report and an honorarium of Rs. 1000/- (one thousand) only P.M. to BRP and Rs. 700/- (Seven Hundred) only P.M. to IED workers will be paid.

Aids and Appliances : All children who are recommended at the assessment camp for requiring assistive devices will be provided with aids and appliances, obtained as far as possible through convergence with the Ministry of Social Justice and Empowerment, State Social Welfare and DRDA Departments, National Institutions or NGOs. This will be done after each assessment camp held annually except in the final year.

Aids Distribution camp & Follow-up: After the type of aids is determined for the children, the same will be acquired and distributed to the beneficiaries with training on use and maintainance of the aids. Regular follow-up measures will be designed to keep track of the use, repair and maitainance of the devices which will be conducted by the IED workers.

Early detection and identification : A concerted drive to detect children with special needs at an early age should be undertaken through PHCs ICDS, ECCE centers and other school readiness programmes, such as bridge course of AS. Identification of children with special needs should become an integral part of the micro-planning and household surveys. For this a training of the Ka –Sreni teachers , ECE/ICDS workers is planed in 2003—04 and also in every year till 2007-08.

Functional and formal Assessment : For each identified child, assessment camps by trained professionals of National and Regional Rehabilitation Centres will be carried out every year co-ordinated by the District Mission Office. A team of professionals will conduct camps at every block and recommend most appropriate placement for every child with special needs.

Educational Placement : As far as possible, every child with special needs will be placed in regular schools, with required support services. This will be an on-going activity

Convergence with all govt. and non-govt. agencies : Convergence with social welfare, health, rural development, national institutes ,rehabilitation centers, special schools, organizations working for the disabled, local s anghas, religious and c ommunity leaders, Mahila Samities will contribute to the success of the programme. Hence, networking with these organization at regular basis is an important feature of the plan.

Support Services and Resource support : Support services will be for both in-school and out-of-school children, like physical access, resource rooms (readiness centers will be opened if necessary to prepare children for formal placements) at cluster level, special equipment, reading material, special educational technique(STLM), remedial teaching, curricular adaption or adapted teaching strategies will be provided at district, block and GP level. This will be an on-going activity, as and when required and function will run throughout the year. Resource support will be given by teachers working with children with special needs. Wherever this option is not feasible, long term training of regular teachers will be undertaken.

Teacher training: Intensive teacher training will be undertaken to sensitize regular teachers on effective classroom management of children with special needs. This training will be

recurrent every year at block / cluster levels and integrated with the on-going in-service teacher training schedules in SSA. All training modules at SCERT, DIET and BRC level will include a suitable component on education of children with special needs. The activity expenditure will be booked in the Teachers Training (Quality) component of the plan.

Individualized Educational Plan (IEP): An IEP(casestudy) will be prepared every year by the teachers for every child every year with special needs in consultation with parents and experts. Its implementation will be monitored from time to time. The programme will test the effectiveness of various strategies and models by measuring the learning achievement of children with special needs periodically, after developing indicators.

Parental training and community mobilization: Parents of children with disabilities will receive counselling and training twice every year till final year on handling and management and basic daily life skills. Intensive advocacy and awareness programmes will form a part of strategy to educate every child with special needs. A component on disability will be included in all the modules for parents, VEC and community and conducted by trained parents, NGO's, District Core persons, BRP and IED workers ...

Strengthening of special schools: Wherever necessary, special schools will be approached for resource support like training, suprvision & moitoring on TOR basis. These organizations will be strengthened to obtain their resource support, in convergence with departments and agencies working in that area

Observance of World Disabled Day: The 3rd of Dec is observed as the World Disabled Day internationally. It is planned to observe this day in all levels –district, block, GP. A shishu mela will be organized with sports, music, art and other recreational activities for all children with involvement of the community at large.

Removal of Architectural Barriers: Architectural barriers in schools will be removed for easy access in convergence with civil work component. Efforts will be taken to provide disable-friendly facilities in schools and educational institutions. Development of innovative designs for schools to provide an enabling environment for children with special needs will also be a part of the programme.

Research: SSA will encourage research in all areas of education of children with special needs including research for designing and developing new assistive devices, teaching aids, special teaching material and other items necessary to give a child with disability equal opportunities in education.

Monitoring and evaluation : On going monitoring and evaluation will be carried out to fine tune the programme. Half yearly reports on all activities will be documented. For this, appropriate monitoring mechanisms will be devised at every level and field tested at regular intervals.

Girls with Disabilities : Special emphasis will be given to education of girls with disabilities.

As SSA adopts a "zero rejection " policy on education of children with special needs, no child will be left out of the education system. SSA plans to ensure that every child with special needs, irrespective of kind, category and degree of disability, is provided education in an appropriate environment.

Activity for the year 2002-2003.

- Engagement of District co-ordinator
- Formation of Core Group.
- ✤ Meeting of Core Group.
- Awareness activities

- Orientation of District and Block educational functionaries(District Level)
- 1 day Orientation V.E.C./TGEC/ SMC at Cluster level.
- * 1 day Orientation of BRCC, CRCC, GPEC members at Block level .
- Selection of BRPs.
- Selection of IED workers

Following Specific Activities have been budgeted under the plan

- Meeting of Core Group (District level)
- Awareness Programmes
 - o For community members
 - o For Govt. officials
- Selection of IED personnel
 - o Selection of BRPs
 - Selection of IED workers
- Honorarium of RPs
 - o Honorarium of BRPs
 - Honorarium of IED Workers
- Training
 - o 10-day Induction Training of BRPs & IED workers
 - o 7-days Refresher Training of BRP & IED workers
 - 2-day Training of ECEC/ICDS Workers Ka Sreni teachers (for Early Detection)
 - o 2 day trg. Of EGS workers
- Medical Assessment Camp
 - o Aids and Appliances
 - o Ceremonial Distribution Camp
 - o Follow up on use, repair and maintenance
- Special Resource Support to Disabled Children
- Material Development(Print, Audio, Audio Visual, Case Study)
- Observation of World Disabled day as Sishu Mela
- Exposure visit of BRPs/IED Workers

6.8. ECE (Early Childhood Care and Education)

<u>INTRODUCTION:</u> The Sarva Siksha Abhiyan realizes the importance of Pre school learning and ECE and its role in improving participation of children in school. The early years are the most significant period in life. ECE aims at the total development of the child language cognitive physical, emotional, moral, social, aesthetical. ECE is the first stage in the process of education and serve as school readiness. ECE aims at promoting girl education by reliving the elder girl child from sibling care. ECE would help to solve the problem of drop out and retention without which UEE cannot be achieved.

Status:

The existing Ka-Sreni is functioning along with class 1. They do not have any fixed curriculum. The Textbook of class 1 is followed and the students sit together with the class 1. No special care or attention has been given to them. The Teacher teaching in class 1 deals with the students of Ka-Sreni. No separate Teacher has been appointed which gives an additional burden to the Teacher and worsens the pupil Teacher ratio (PTR).

| 8 | Ujani Majuli | Ujani Majuli | 1`35 | | |
| Total | | | 833 | | |

ISSUES: The Govt. of Assam has by a notification introduced Ka-Sreni has a Pre-primary level class in all the provincialised schools from the year 2000 for the age group 4-5 year old.

It has been observed that the Ka-Sreni have not been functioning as it should have been. Following issues have been identified.

- Inadequate space
- Improper sitting arrangement
- Unattractive classroom
- Unscientific method and not according to age
- Non-availability of curriculum
- Inadequate teacher
- Untrained teacher

- Inadequate TLM, Play items
- Not age appropriate TLM.

GOAL AND VISION: Early c hildhood c are and Education is a cknowledged as a crucial input and as a foundation for life long development. In our country it is also essential to goal of Universal elementary education.

Early childhood Education (ECE) refers to the age when the child may be in an institutional setting with specific educational objectives and aims to prepare the child for school. At this stage, ECE objectives are all round development in each and every domain in a balanced and harmonious manner.

In addition the ECE programme aims to

- Enhance the child's health and physical well-being
- Involve parent and community
- Avoid unnecessary burden on the child, and
- Give special attention to children with special needs.

The vision is to pave the way to attain Universal elementary Education.

STRATEGY: KA- SRENI

In Assam the Pre-primary section was not included in the formal school. The formal school starts from class 1 and the school going age starts from 6 years. The need for pre-primary schooling as school readiness was felt and Govt. of Assam through a notification introduced Ka-Sreni in all the provincialised schools for the 4-5 years old children.

KA-SRENI INTERVENTION:

- Ka-Sreni to be in implemented in all provincialised schools.
- To identity schools with more than 4 teachers.
- In schools having less than 4 teachers. Community workers are to be engaged. SMC is to identity. An amount of Rs 500/- to be paid to the worker by SMC from school development fund.
- Selection and training of the community worker.
- Infrastructure facility.
- TLM support.
- Curriculum.
- In schools having ICDS center in the same campus. The Angnawadi worker can be made to continue in Ka-Sreni. The timing can be adjusted with discussion with the social welfare department the worker is to be paid an additional amount of Rs 300/-(this is practiced in same state).

(ii) STRENGTHENING ICDS

Strengthening of the Integrated child Development Services (ICDS).

The ICDS, which was launched as a centrally sponsored scheme in 1975, is the largest ECCE programme in the country at present. Its packages of services includes

supplementary nutrition, immunization, health check-ups, referred services, non-formal pre school education for children below six years.

The early childhood or pre school education component of the scheme contains to remain one of its weakest areas. SSA realizes the importance of preschool training and early childhood care and its role in improving participation of children in schools. In order to facilitate a greater convergence with the ICDS services, effort to strengthen them in the area pre school education will be made.

- Limited no of ICDS centers are to be taken up experimented basis.
- The impact is to be analyzed and based on the impact. Further strengthening strategy to be taken.
- Thereby expansion to be done phase wise.
- One supervisor in 20 centers who is to be identified and engaged by SMC.

(iii) Setting up of ECCE centers

- Limited number of centers to be opened on pilot basis to serve a model.
- To be opened up preferably in non ICDS location (i.e. areas where there is neither organization center or Ka-Sreni)
- Universal habitation.
- Backward, remote and special areas.
- In Tea garden areas opening up of ECE centers in consultation with the Tea management should be done.
- In unserved areas can be setup with the EGS centers.

In all the above given strategy the following steps have to be followed

- Identification.
- Training.
- TLM
- Follow up action
- Refresher training

Table: 6.8.3 Nos. of TG, Flood affected, border, char, forest habitations

| Tea | Garden | Flood affected | Border | areas | Char | areas | Forest | areas | |

- Other Programme Activities

6.9 Media & Advocacy

Sarba Siksha Abhijan aims at creation of demand for primary education amongst the stakeholders on the one hand and supply of quality teaching on the other. In other words, the programme has the mandate to create an environment for improving the quality of primary education. As the programme has given a lot of emphasis on people's participation, it has become necessary that the massage of the programme be carried out to the mass through a media mix vehicle.

One of the major objectives of Sarba Siksha Abhijan is to create such a condition that new thinking, new practices on teaching learning and new concepts of education are accepted and welcomed by all stakeholders. All concerned with education system would include the teachers, the children, the education officials and the public representatives who are ultimate policy makers. Responsibilities are vested to Media unit of Sarba Siksha Abhijan , Assam to develop a suitable strategy with need based interventions in appropriate medium for this purpose. A media mix strategy has to be used effectively to continuously disseminate information and also to build a conducive environment for primary education and mobilize local stakeholders to participate in the programme.

The objectives of the media strategy are as follows:

- To raise the visibility of SSA as a national programme.
- To mobilize the opinion makers, legislator & other non-political social organization such as NGOs and other local bodies and ensure their active participation in the programme.

Strategies:

There are two systems of communications that need to be looked at: --

- Within the programme that target the community to address enrolment, retention
- And the others that targets policy makers, academicians and larger public.

In order to reach to the masses and grass root level functionaries like teacher, CRCCs etc. the popular media like, AIR, DD, Newspaper will be used.

Strategies will be like: --

- Identification of person to make a regular liaison between the DMC, Programme Officers, and BMC, BRC, CRC at grass root level and the media
- Preparation of yearly activity calendar and to distribute the same to all concerned.
- To make it confirm to invite the media personnel on important programme related occasions
- Monthly sharing workshop with target groups/NGO's/Institute etc about convergence with Govt. & Non Govt. institute.
- Publicity of SSA activities using DDK/AIR/DAVP.
- Production of films of narrow type like spot films, documentary, story based films etc relating to the various component of SSA and sharing & displaying the same to the state to grass root level.
- Production of audio materials, which include radio talks in other motivational topics and sharing the same to the masses.
- Conduct of case studies relating on various functional areas
- Documenting and sharing success stories through professionals
- Arrangement of mock exercise and recording the talks, discussion well ahead of time.
- Organising drama, seminar etc. on community participation at town and village level and to invite media for recording sharing with others.

Interventions:

Public Relation:

- Meetings and discussions will be organized at district, block, and Gaon Panchayat level and in the focus areas in collaboration with media personals and others involved in such activities.
- Press release of various programmes/workshop/meeting training along with performances of SSA will be released regularly.
- Radio talks on various programmes will be held.
- A glimpse on the various activities to be carried out since the inception of project.

Print Media:

- Press release of various programmes/workshop/meeting/training both in English and other languages will be published.
- SSA booklet, which includes SSA overview, outlines of the work done, will be produced in English, and in other languages in the initial stages of the programme.
- Yearly newsletter will be published and distributed to all the BRCC, CRCC, teacher, GPEC, VEC, SMC, Community representatives, PRI members and other related personal.

Electronic Media:

 Documentaries, stories, based on Girls Education, EGS, BC, ECE, Tribal Education Tea Garden, need of education, enrolment drive, community participation, short film of UEE and teachers participation will be produced. These films will be used as training materials. Video films show will be organized at the training programmes exhibition, Local Mela etc.

Field Publicity:

 It is proposed to organize Educational exhibitions by putting up stalls with posters, slogans, and displaying photograph in suitable places on different occasions. Printing materials for awareness will be distributed to the public and motivational VIDEO film will be screened describing the success of SSA.

Radio Programme:

- Radio is the most common & largely attended medium of Mass Communication in communicating the remotest & minor areas & targeted groups at a short span of time. Radio programme are chalked which include.
 - Interview/Radio talk
 - Discussion on multifarious issues of UEE, role & responsibility of teachers & community, SHG, BRCC, CRCC, educational administrators.
 - Discussion on ECE, AS, BC, IED, MG, Teacher training etc.
 - Child based programme.

Visit of Medla Persons to the district:

To popularize the SSA and for its social acceptance the media persons will be invited to project the several success stories and interventions, dissemination of information, creating of awareness and for spreading the message of primary education.

Following Specific Activities have been budgeted under the plan

- Information Booklet ٠
- ٠
- ٠
- Quarterly Press visit Publicity Campaign Other publicity measures Yearly News Letter •
- •

.

6. 10 School Infrastructure (Civil Works)

Introduction:

To ensure universal enrolment, retention/Participation and improvement of quality of education, provision of a good infrastructure with a good school building is a Pre-requisite.

District is proud to present the infrastructure status, which has been collected through a unique Technical infrastructure Survey. It is worth mentioning that the survey was conducted by sending engineers into the school. For every 50 schools one engineer was selected. The State Mission Office had provided the survey design and other technical support. The training of engineers and Computerisation of the survey data was also done at State Mission Office. The district is now in possession of the prioritized list of all schools for construction along with three photographs of each school.

Present Status:

The findings of Technical infrastructure survey report gives a clear Picture of the present infrastructure status of the district, which is not at all encouraging. Following tables explains the status of the district in terms of schooling infrastructure separately for primary and upper primary schools.

Hence, adequate priority is given on development of infrastructures.

It reveals from the above projected status of school buildings that Jorhat District has large number of building less and building not usable which requires new construction (..... nos.) for providing minimum access facilities. But, the budget provision for civil works is limited upto% of total budget of the district. Besides, scope of longer by phasing in many years is also not possible for achieving universal enrolment/retention within the targeted period. In this context may be mentioned here that most of the building less schools are situated in the remote, isolated, hilly, forest and backward areas for which enrolment of these schools are not so high and possibility of increasing rate in future is also not too high.

Considering all these factors, the cost norms for new construction/renovation/major repairing of school building are fixed as per following rate.

| a) New school building construction – b) New construction with some salvage materials | Priority-l | Rs. 2.50 lakhs |
|--------------------------------------------------------------------------------------------------------------------|--------------|-----------------|
| , 5 | Priority-II | Rs. 02.00 lakhs |
| c) Renovation- | Priority-III | Rs. 01.80 lakhs |
| d) Repairing & renovation | Priority-IV | Rs. 01.25 lakhs |
| e) Repairing & renovation | Priority-V | Rs. 01.00 lakhs |
| f) Repairing & renovation | Priority-VI | Rs. 00.80 lakhs |

| g) Additional Class-room | Priority-VII | Rs. 01.40 lakhs |
|--------------------------|---------------|-----------------|
| h) Additional Class room | Priority-XI | Rs. 01.50 lakhs |
| i) Major Repairing | Priority-VIII | Rs. 00.60 lakhs |
| j) Major repairing | Priority-IX | Rs. 00.50 lakhs |
| k) Major repairing | Priority-X | Rs. 00.40 lakhs |
| L) Repairs | Priority-XII | Rs. 00.30 lakhs |
| m) Minor repairs | Priority-XIII | Rs. 00.20 lakhs |
| | - | |

Major Issues:

- Large number of Building less schools. .
- Building in dilapidated condition.
- No school has boundary wall/fencing.
- Lack of drinking water facilities.
- Lack of sanitation/toilet facilities.
- Lack of other facilities

Strategies :

- Selection of schools as per need base. •
- Preparation of Plan Estimate on field verification by the technical personals.
- Collection of information regarding availability of local resources.
- Construction works to be done through school managing committee (SMC) and the village education committee (VEC).
- Ensure community involvement in the process of construction works with a view to develop sense of ownership.

Implementation Procedure:

There will be a separate civil works wing at District Mission Office to exclusively deal with the civil works related matters. The wing will have one District Project Engineer and one Junior Engineer for the district and one Junior Engineer for each of the four blocks.

All the works of construction will be executed through the Village Education Committee except the Construction of BRC building. Before the release of fund agreement will be signed with the VEC regarding the role and responsibilities and other aspects. The members of VECs will be trained on the basics of civil works by the concerned JEs. Besides a Civil Works Manual will be developed in Bengali.

Funds would be released in installments. There will three installments for major constructions and two installments for the minor construction valued less than Rs. one lakh. Second Installment would be released after the submission of the expenditure statement of at least 70% of the 1st installment. Similarly the third installment would be released after the utilization of the 70% of the 1st & 2nd installment. After completion of the construction the VEC will formally hand over the schools to the education department.

Supervision & Monitoring:

Monitoring and supervision part is a key component of civil works for proper implementation and timely completion of works in a qualitative manner.

Hence, provision for supervision and monitoring should be well planned.

Some outlines of supervision and monitoring are given below :

- Selection of schools on priority basis and as per norms of the SSA.
- Proper site verification through technical person.

| Priority-VII | Rs. 01.40 lakhs |
|---------------|-----------------|
| Priority-XI | Rs. 01.50 lakhs |
| Priority-VIII | Rs. 00.60 lakhs |
| Priority-IX | Rs. 00.50 lakhs |
| Priority-X | Rs. 00.40 lakhs |
| Priority-XII | Rs. 00.30 lakhs |
| Priority-XIII | Rs. 00.20 lakhs |

- As one of the aims of SSA is the involvement of community. So community based monitoring system will be put into place and for which proper training as regards technical know how to be provided to all SMC, VEC.
- District Project Engineer and J.E. will be deployed for constant visit to the site and to supervise the works for quality improvement and to give necessary guidance to the SMC, VEC so that the work proceed accordingly.
- The DMC will convene weekly review meeting along with the different blocks. DPE & JE for last week performance and to prepare a 15 days action plan.
- Over and above, third party evaluation will also be done.

In the event of VECs failure in carrying out the work as per specification, norms and time schedule warning will be issued to rectify the defects and to submit the utilization of fund. In ultimate cases provision has been kept for freezing of VEC accounts and completion of the work departmentally through Force Account.

Following Specific Activities have been budgeted under the plan

- Information Booklet
- Quarterly Press visit
- Publicity Campaign
- Other publicity measures
- Yearly News Letter

6.11 Project Management:

Sarva Siksha Abhiyan has not been considered as a separate project and therefore it will be implemented through the existing educational machineries. The implementation mechanism is described below:

District Level:

District Board of Education (DBE) under the chairmanship of Deputy Commissioner and participation of representatives of different development agencies, NGOs, teachers has been notified by the Government Assam. The DBE will perform the advisory role.

The District Elementary Education Office will perform the executive role. The District Elementary Education Officer (DEEO) will function as District Mission Co-ordinator (DMC) on ex-officio basis. Besides DEEO, two other officials viz. Deputy Inspector of Schools (DI) Head Quarter and Assistant Inspector of Schools have been designated as Associate District Mission Co-ordinator (ADMC) on ex-officio basis.

Keeping in view the additional workload and availability of existing manpower at the disposal of DEOO/DMC proposal for additional positions has been made. The detail requirement of additional position is given in the end of this chapter in tabular form.

Block Level:

Block Board of Education (BBE) under the chairmanship of an Educationist of the concerned and participation of representatives of different development agencies, NGOs, teachers has been notified by the Government Assam. The BBE will perform the advisory role for block level activities.

The Block Elementary Education Office will perform the executive role. The Block Elementary Education Officer (BEEO) will function as Block Mission Co-ordinator (BMC) on ex-officio basis. Besides to assist BEEO in handling specially the academic and other interventions Block Resource Centre will be set up in each block.

The Block Resource Centre will have six Resource Teachers for Upper Primary and two Resource Teachers for primary level.

Considering the availability of support staff in each block wise decision will be taken for placement of additional support staff.

From each block as per SSA norms Resource Teachers will be selected for deployment as Cluster Resource Centre Co-ordinator.

Cluster Level:

One Cluster Resource Centre (CRC) will be set up in every Gaon Panchayat. In some cases it has been proposed to set up CRC considering geographical barrier and number of schools. It has been kept in mind in one CRC there should not be more than 40 teachers and the distance between CRC and no school under the CRC is not more than 7 KM.

One Cluster Resource Centre Co-ordinator (CRCC) will be selected from amongst the existing LP/Middle School Teachers in every CRC.

The Gaon Panchayat Education Committee constituted during pre-project period will be involved in cluster level activities.

Village Level:

No Mission people will be there at village level. The Village Education Committee and School Managing Committees will implement the village level activities. amongst the existing LP/Middle School Teachers in every CRC.

Present staffing position Elementary Education Offices in the district is discussed below:

| SI. No. | Name of Position | No. of posts | Person in position |
|---------|--------------------|--------------|--------------------|
| 1 | DEEO | 01 | 01 |
| 2 | APO | 01 | 01 |
| 3 | Inspecting Auditor | 01 | 01 |
| 4 | UDA | 04 | 04 |
| 5 | LDA | 06 | 06 |
| 6 | Grade IV | 03 | 03 |
| 7 | SA | 01 | 01 |
