# Education in Gujarat Participation and 

## Expenditure

NSS $64^{\text {th }}$ Round
State Sample - Gujarat State (July 2007-June 2008)

Directorate of Economics and Statistics Government of Gujarat Sector-18, Gandhinagar

## PREFACE

The National Sample Survey Office (NSSO) conducted countrywide survey on 'Household Consumer Expenditure', ‘Employment-Unemployment and Migration particulars’ and 'Participation and Expenditure in Education' in its $64{ }^{\text {th }}$ round during July 2007 - June 2008. This report presents the results based on Schedule-25.2 ‘Participation and Expenditure in Education’ canvassed in this survey.

The major purpose of the survey was to study (i) the extent of use of educational infrastructure, as reflected in current attendance status of population in educational institutions, and of educational incentives received by students from the government or private sector and (ii) the magnitude and nature of private expenditure on education.

The data collected through this survey for the state sample has been analyzed and important results are presented here.

We hope that the report will be useful to the administrators, planners, researchers and those who are involved in the process of economic development of the State. Comments and suggestions on the report are welcome.

## Highlights

A survey on 'Participation and Expenditure in Education' was conducted in NSS $64{ }^{\text {th }}$ round (July2007 - June 2008). A sample of 13125 persons, from 1461 rural households and 1401 urban households spread over the state, was surveyed. Some of the key findings of the survey are given below:

## A. Literacy for different age-groups:

| Age Group | Rural |  |  | Urban |  |  | Rural + Urban |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |
| 5 \& above | 79.3 | 59.3 | 69.3 | 93.5 | 88.8 | 91.1 | 84.3 | 70.1 | 77.4 |
| 7 \& above | 79.3 | 58.7 | 69.3 | 93.4 | 88.8 | 91.1 | 84.3 | 69.8 | 77.2 |
| 15 \& above | 74.8 | 49.9 | 62.5 | 91.2 | 85.9 | 88.5 | 80.6 | 62.9 | 71.8 |
| All age | $\mathbf{7 0 . 8}$ | $\mathbf{5 4 . 0}$ | $\mathbf{6 2 . 7}$ | $\mathbf{8 4 . 6}$ | $\mathbf{8 0 . 7}$ | $\mathbf{8 2 . 7}$ | $\mathbf{7 5 . 7}$ | $\mathbf{6 3 . 7}$ | $\mathbf{6 9 . 8}$ |

## B. Distribution of persons of age 15 \& above by education level:

Percentage distribution of persons of age 15 \& above by completed level of education $28.2 \%$ were not literate, $27 \%$ were literates of level up to primary, $15.7 \%$ of level middle and remaining $29.1 \%$ were of level secondary \& above.

## C. Household profile:

Average household size: 4.5
(Rural- 4.9, Urban- 4.0)
Average no. of persons aged 5-29 per household: 2.1
(Rural- 2.2, Urban- 1.9)
Average no. of currently attending persons (age 5-29) per household: 1.1 (Rural- 1.1, Urban-1.1)

## D. Distance to schools having primary/ middle/ secondary level classes

97.2\% of rural households \& 92.4\% of urban households have school with primary classes within 1 km
98.5\% of rural households \& 99.2\% of urban households have school with primary classes within 2 km
81.1\% of rural households \& 97.5\% of urban households have school with middle classes within 2 km
$52.8 \%$ of rural households \& $90.8 \%$ of urban households have school with secondary classes within 2 km

## E. Current enrollment \& attendance status of persons in the age-group 5-29

About 53\% of the total population was in the age-group 5-29 among these persons:
$37.3 \%$ were not currently enrolled in any educational institution
5.4\% was currently enrolled but not attending
$53.2 \%$ were currently attending educational institutions
$4.1 \%$ were not responded
Among persons aged 5-29 attending education of level primary \& above 48.5\% were in Primary
$33.5 \%$ were in Middle
$7.9 \%$ were in Secondary/HS
$10.1 \%$ were in above-HS level

## F. Type of education

Among persons aged 5-29 attending education institutes $98.3 \%$ were in General stream, $1.6 \%$ were in Technical and $0.1 \%$ were in Vocational course.

## G. Attendance ratios

Gross Attendance Ratio (\%):

| Classes I-V | $99 \%$ | $106 \%$ | $90 \%$ |
| :--- | ---: | :---: | :---: |
| Classes VI-VIII | $103 \%$ | $79 \%$ | $153 \%$ |
| Classes IX-X | $50 \%$ | $51 \%$ | $49 \%$ |
| Classes XI-XII | $41 \%$ | $30 \%$ | $63 \%$ |

Age-specific Attendance Ratio (\%):

| Age 6-10 | $93 \%$ | $89 \%$ | $98 \%$ |
| :--- | :--- | :--- | :--- |
| Age 11-13 | $89 \%$ | $85 \%$ | $97 \%$ |
| Age 14-17 | $56 \%$ | $49 \%$ | $70 \%$ |
| Age 18-24 | $16 \%$ | $10 \%$ | $28 \%$ |

Net Attendance Ratio (\%):

| Classes I-V | $84 \%$ | $87 \%$ | $80 \%$ |
| :--- | ---: | ---: | ---: |
| Classes VI-VIII | $74 \%$ | $67 \%$ | $81 \%$ |
| Classes IX-X | $38 \%$ | $37 \%$ | $38 \%$ |
| Classes XI-XII | $7 \%$ | $6 \%$ | $9 \%$ |

## H. Type of institution attended

For Primary level students, type of institution was:
$>$ govt. and local body in 68.8\%,
$>$ private aided in $5.9 \%$,
> private unaided in $24.6 \%$ cases

For Middle level students, type of institution was:
$>$ govt. and local body in 56.2\%,
$>$ private aided in 13.2\%
$>$ private unaided in 29.8 \% cases
For Secondary/ HS level students, type of institution was:
$>$ govt. and local body in 49.1\%,
$>$ private aided in 40.3\%,
$>$ private unaided in $8.8 \%$ cases

## I. Students attending recognized institutions among those in private unaided institutions (\%)

At Primary level - 96.8\% of students in private unaided institutions attended recognized institutions

At Middle level - 96.1\% of students in private unaided institutions attended recognized institutions

## J. Proportion of students getting free education

At Primary level:
At Middle level:

At Secondary/HS level:

63\% students got free education (Rural- 89\%, Urban- 22\%)
54\% students got free education (Rural- 83\%, Urban- 19\%)
48\% students got free education (Rural- 62\%, Urban- 26\%)

## K. Proportion of students getting educational incentives

Scholarship/ stipend:
Free/ subsidized books:

Free/ subsidized stationery:
Mid-day meal from govt.:
Concession in transport fare:

Total: 36\% (Rural- 53\%, Urban- 12\%)
Total: 44\% (Rural- 65\%, Urban- 15\%)
Total: 7.5\% (Rural- 11.4\%, Urban- 1.9\%)
Total: 44\% (Rural- 65\%, Urban- 14\%)
Total: 7.3\% (Rural- 7.9\%, Urban- 5.2\%)
L. Average annual private expenditure per student on education by level and type of education

## General Education:

Primary - Rs. 2625 (Rural- Rs. 674, Urban- Rs.5790)
Middle - Rs. 4852 (Rural- Rs.1327, Urban- Rs.9130)
Secondary/ HS - Rs. 5239 (Rural- Rs.3337, Urban- Rs.8331)
Above HS - Rs. 6418 (Rural- Rs.4981, Urban- Rs.8117)
Overall - Rs. 3857 (Rural- Rs.1385, Urban- Rs.7459)
Technical Education: Rs. 69766 (Rural- Rs.9445, Urban- Rs.76024)
Vocational Education: Rs. 9689 (Rural- Rs.3240, Urban- Rs.18986)
'Rural' ('urban’) figures are estimates for students living in rural (urban) areas

## M. Major components of private expenditure* and their shares in the total

|  | Rural | Urban |
| :--- | :---: | :---: |
| Tuition fee | $6 \%$ | $18 \%$ |
| Examination fee, other fees \& payment | $8 \%$ | $16 \%$ |
| Books \& stationery | $38 \%$ | $23 \%$ |
| Uniform | $29 \%$ | $21 \%$ |
| Transport | $6 \%$ | $15 \%$ |
| Private coaching | $3 \%$ | $3 \%$ |
| Others | $10 \%$ | $4 \%$ |

* considering all types of education: general, technical and vocational

## N. Proportion of persons of age 5-29 never enrolled

Age $5 \quad$ 20.6\% (Rural- 25.9\%, Urban- 5.8\%)

Age 6-10
Age 11-13
Age 14-17
Age 18-24
Age 25-29
3.8\% (Rural- 6.1\%, Urban- 0.5\%)
4.5\% (Rural- 6.1\%, Urban- 1.2\%)
7.3\% (Rural- 9.4\%, Urban- 2.5\%)

17\% (Rural- 20.5\%, Urban- 9.7\%)
23.4\% (Rural- 31.1\%, Urban- 15.4\%)

## O. Major reasons for non-enrollment:

Parents not interested in education of children:
26.7\%

Education not considered necessary:
18.6\%

Financial constraints:
16.5\%

Others
38.2\%

## Chapter 1 Introduction

1.0.1 The report is based on the findings of the 64th Round of National Sample Survey state sample on 'Participation and Expenditure in Education', conducted during the period July 2007 - June 2008.
1.0.2 In most countries, the government spends substantial amounts on the creation as well as the functioning of the educational infrastructure. But to avail themselves of such facilities, individuals, too, have to incur expenditure in the form of tuition fees, examination fees, cost of books and stationery etc. While information is available in budget documents on the expenditure incurred by governments, there is an increasing role of non-government organizations as well as individuals in the education sector. The generation of information on education and the expenditure by individuals through a specialized survey, therefore, has special significance in the contemporary context.
1.0.3 The NSS 64th Round-State sample was designed to collect information on (a) participation of persons aged 5-29 years in the education system of the state and (b) private expenditure incurred by households on education. The purpose was to study (i) the extent of use of educational infrastructure, or facilities and incentives provided by the government and private sector as reflected in current attendance status of population in educational institutions and (ii) the magnitude and nature of private expenditure on education.

### 1.1 Coverage

1.1.1 For the purpose of this survey, 'education' covers the following:
I. School education including that under the Education Guarantee Scheme (EGS) from Class I to X or XII, irrespective of the recognition status of the educational institution,
II. Higher secondary / pre-university education leading to certificate/diploma/degree etc. It also includes enrollment in private unrecognized institutions which have regular classes and follow the syllabus and pattern of education as in recognized schools or colleges, and which sponsor students for public examinations as private or external candidates,
III. General university education, whether full-time or part-time, leading to certificate/diplomas, degrees, etc. Universities not recognized by University Grant Commission are not covered,
IV. Correspondence courses conducted by universities, deemed universities or institutions authorized by competent authorities for awarding regular degrees or diplomas or certificates,
V. Higher secondary/ pre-university/ under-graduate/ post-graduate/ professional/ technical education leading to certificates, diplomas, degrees etc. conducted by recognized open universities/schools,
VI. Technical or professional courses, leading to degrees/ diplomas/ certificates, conducted by Universities, Deemed Universities, or institutes like National Institute of Fashion Technology, National School of Drama, Satyajit Ray Film and Television Institute, Film and Television Institute of India, Lok Nayak Jayaprakash Narayan National Institute of Criminology and Forensic Science etc. or Institutions authorized by competent authorities like All India Council of Technical Education (AICTE), Medical Council of India (MCI), etc.,
VII. Professional courses conducted by Institutes like the Institute of Chartered Accountants of India, the Institute of Cost and Works Accountants of India, the Institute of Company Secretaries of India, Actuarial Society of India, etc.,
VIII. All types of vocational courses of duration three months or more, conducted by institutions like Industrial Training Institute (ITI), National Vocational Training Institute, Regional Vocational Training Institutes, etc., authorized by competent authorities,
IX. All the courses at primary level and above, whether recognized or not, conducted by recognized educational institutions, and not covered under the above-mentioned categories.
1.1.2 The following courses are specifically excluded:

- Art, music and similar types of course conducted by individuals in their houses or unrecognized/ unaffiliated institutions,
- Classes taken by private tutors,
- Education at nursery/kindergarten/preparatory levels - except for information on enrollment status and drop-out / discontinuance status.
- The non-formal system of education being implemented through various programmes by government or other agencies - except for information on enrollment status and drop-out /discontinuance status.

### 1.2 New features of NSS 64th Round

1.2.1 The survey on 'Participation and Expenditure in Education' conducted during July 2007 - June 2008 was broadly similar to that undertaken in the 52nd round (July 1994 - June 1995) of NSS with the following new additions or modifications.

- The survey collected detailed information on education for persons in the age group 5-29 years (as in the last quinquennial NSS employment unemployment survey), compared to 5-24 years in the 52nd round.
- The NSS 52nd round covered only general and technical education whereas the $64^{\text {th }}$ round covered vocational education as well.
- In the technical/professional category specific information on courses like MBA, Chartered Accountancy, etc. was collected.
- Information was collected on distances from nearest school having primary/ upper primary/ secondary level classes, rather than on distance from nearest primary/ upper primary/ secondary school.
- Information on household consumption expenditure (Rs.) during last 30 days was collected through a set of five questions, in place of the detailed worksheet used in the 52nd round.
- Information on expenditure on education was collected for at most two courses instead of one course as was done in the 52nd round.
- The block used in the 52nd round for recording the details of expenditure on dependants studying away from home was dropped; instead, two items of information, viz. number of dependants studying away from home, and amount sent to them, were included in the block on household characteristics.
- A new question "Changed educational institution during last one year?" was added.
- To get an idea of the proportion of students repeating the year in the same class, information on the class/grade/year in the current academic session and in the previous academic session was collected.
- For Class X and below, questions on grade completed before dropping out / discontinuance and type of school last attended were introduced.

### 1.3 The 64th round survey (July 2007 - June 2008)

### 1.3.1 This report is based on the State sample only. For Gujarat State, 184 villages and 176 urban blocks were surveyed as a State Sample.

1.3.2 From each sample village or urban block, eight households were selected for the survey on 'Participation and Expenditure in Education'. For each sample household some general particulars such as age, sex, educational level attained, current attendance and enrollment status, etc. were collected from all the household members. For persons of age 5-29 years, who formed the main target group of the survey, further information on current attendance and enrollment status in educational institutions was obtained. More detailed data on education was collected from the persons in the target age-group who were reported to be
currently attending at primary level or above. This included information on type of education, details of course, level of current attendance, class/ grade/ year of study, type of management of educational institution, whether the institution is recognized, details of benefits received, if any, such as fee waiver, scholarship, free study materials and free mid-day meals, and detailed break-up of private educational expenditure for each person. Those currently not attending any educational institution were asked whether they had ever been enrolled, and if so whether they had completed their education or discontinued midcourse, and what was the main reason for dropping out or for nonenrollment.

Statement 1.0: Number of villages / blocks and corresponding number of households and persons surveyed for NSS 64th Round State sample Schedule 25.2

| Sector | No. of Sample | No. of Household | No. of persons |
| :---: | :---: | :---: | :---: |
| Rural | 184 | 1461 | 7084 |
| Urban | 176 | 1401 | 6041 |
| Total | 360 | 2862 | 13125 |

(Ref.: Table-1)

### 1.4 Layout of the report

1.4.1 Major definitions and concepts related to the survey are given in Chapter II. A summary of the findings of the survey are presented in the three subsequent chapters. Literacy and completed educational level for the population and the current attendance/ enrollment status of persons of age 5-29 in educational institutions are discussed in Chapter III. A detailed analysis on participation in the education system of the country, various incentives availed and private expenditure incurred on education, for persons in the age-group 5-29 years currently attending at primary level and above, is presented in Chapter IV.
1.4.2 Use of estimated aggregates: The estimates, in this report, are generally presented as ratios. However, the estimates of aggregates are also given in the margin of the detailed tables in Appendix A. It may be noted that estimates of ratios are generally expected to be robust and the estimates of aggregates may be used only to combine the ratios but not for generating estimates of absolute numbers for a characteristic. To estimate an absolute number in any category, it is advisable to apply the survey estimates to the Census population or projections. It may also be noted that the estimated proportions and ratios are generally presented as per 1000 numbers, with the figures rounded off. Therefore, the accuracy of the aggregates derived from the estimates of ratios provided in this report will be limited to the number of significant digits available in the ratio or percentage estimates used.

## Chapter II <br> Concepts and Definitions

2.1 Important concepts and definitions used in this survey as given in the instructions to field staff conducting the survey are stated below:
2.1.1 Household: A group of persons normally living together and taking food from a common kitchen constitute a household. It includes temporary stay aways (those whose total period of absence from the household is expected to be less than 6 months) but excludes temporary visitors and guests (expected total period of stay less than 6 months).
2.1.2 Household monthly per capita expenditure (MPCE): Household consumer expenditure is measured as the expenditure incurred by a household on domestic account during a specified period, called reference period. It also includes the imputed values of goods and services, which are not purchased but procured otherwise for consumption. In other words, it is the sum total of monetary values of all the items (i.e. goods and services) consumed by the household on domestic account during the reference period. Monthly per capita expenditure (MPCE) is the household consumer expenditure over a period of 30 days divided by household size.
2.1.3 Educational level: It refers to the stage of educational attainment. It is the highest level a person has completed successfully. The levels are:

- not literate
- literate without any schooling;
- literate without formal schooling
- literate with formal schooling:
o below primary,
o primary,
o upper primary/middle,
o secondary,
o higher secondary,
o diploma/ certificate course,
o graduate,
o Post-graduate and above.
It may be noted that if a person has successfully passed the final year of a given level, then and only then will he/ she be considered to have attained that level of education. For example, for a person studying in Class IX the educational level will be middle and not secondary.
2.1.4 Level of current attendance: The term in the present report refers to the stage of education that a student is currently pursuing, if any. For example, the level of current attendance of a person studying in Class IX will be secondary. Here the categories are:
- never attended;
- ever attended but currently not attending;
- currently attending in:
- non-formal education,
- pre-primary (nursery/ kindergarten, etc.),
- primary,
- upper primary or middle,
- secondary,
- higher secondary,
- diploma or certificate (below graduate level)
- diploma or certificate (graduate and above level)
- graduation level degree courses
- post-graduation and above degree courses

In the schedule used for data collection, the 'levels' of current attendance, at the higher stages of education, referred to more specific categories indicating not only stage of education but also subject of study. Thus, graduate in agriculture and graduate in medicine were given different ‘level codes’.
2.1.5 Literate: A person is considered literate if he/she can read and write a simple message in at least one language with understanding.
2.1.6 School education levels: A uniform pattern across the country for the number of years of schooling at primary level, upper primary/middle level, secondary level and a higher secondary level is yet to be achieved. Generally, the primary level refers to Classes I-V, the middle to Classes VI-VIII, the secondary to Classes IX-X and the higher secondary to Classes XI-XII. While in many states, this system is being followed, there are some states where the primary level comprises Classes I- IV, the middle Classes V to VII or VIII, the secondary Classes VIII-X, etc., and the higher secondary in some states is taught in colleges. The information pertaining to a state is recorded according to the pattern followed in that state.
2.1.7 Type of education: Education is broadly divided into three categories: (i) general education, (ii) technical and professional education and (iii) vocational education. General education, in this survey, includes general school education from the primary to the higher secondary level, normal university education for a degree, whereas technical/professional
courses involve the hands-on training in addition to theoretical classes. Engineering, Medicine, Agriculture, Management, Chartered Accountancy, Cost Accountancy, etc. are examples of technical/ professional courses. The education which aims at imparting training in very specific fields through providing significant 'hands-on' experience in acquiring necessary skill, which will make them employable or create for them opportunities of self employment and the degree/ diploma/ certificate awarded by the institute which have recognition by State/ Central Government/ public sector or similar employers is included under vocational education. Education offered by ITIs, polytechnics, etc. are examples of vocational courses
2.1.8 Course: A course a) is a structured educational programme having a specified syllabus, duration, level, etc. and b) necessarily involves appearing in some kind of examination/ performance appraisal for getting the degree/ diploma/ certificate or advancing to the next class/ level. Depending upon the subjects covered and the mode of instruction, the courses can be categorized broadly as (a) general, (b) technical/ professional and (c) vocational. For the purpose of this survey, only those courses covered under the definition of 'education' above are considered.
2.1.9 Basic course: When a particular member is undertaking more than one course, the basic course is identified as per following criteria -

- The course which is in the highest level is considered as the basic course.
- If all the courses simultaneously pursued currently are in the same level, then the course of the general education is the basic course.
- In absence of any general education, the course which involves higher cost is taken as the basic course.
- If a person is enrolled both in regular course and course through distance learning then regular course is treated as the basic course irrespective of the cost involved.
2.1.10 Second course: If an individual is pursuing more than one course, then the basic course is taken as the first course in the way suggested above. After the first course is selected then from the remaining courses, the course which involves highest cost is taken as the second course.
2.1.11 Academic session: The academic session is defined in relation to the duration of the course in which one is enrolled in the following manner I. If duration of the course is less than one year, the academic session covers the full duration of the course,
II. If duration of the course is more than one year, then generally at the end of every year there is an evaluation process through examination or otherwise, the passing of which enables the individual for to continue the course further. In such cases, the academic session is of 1 year. For the educational institutions pursuing three to six months semester system, too, academic session is taken as one year.
2.1.12 Nature of institution: This refers to whether the institution is recognized or not. A recognized school/ institution is one in which the course(s) of study followed is/ are prescribed or recognized by the government or a university or a board constituted by law or by any other agency authorized in this behalf by the central or state government.
2.1.13 Type of institution: This refers to the type of management by which the institution is run. It may be run by government or a local body or a private body either receiving or not receiving government aid. Thus, the four types are: (a) government, (b) local body, (c) private aided and (d) private unaided. All schools/ institutions run by central and state governments, public sector undertakings or autonomous organizations completely financed by government are treated as government institutions. All institutions run by municipal corporations, municipal committees, notified area committees, zilla parishads, panchayat samitis, cantonment boards, etc., are treated as local body institutions. A private aided institution is one which is run by an individual or a private organization and receives maintenance grant from a government or a local body. A private unaided institution is one which is managed by an individual or a private organization and is not receiving maintenance grant either from a government or from a local body.
2.1.14 Free education: Education is free of tuition fee in government schools in most of the states and also in private schools in some states up to certain levels of education. There are some schools where students up to a certain level are not required to pay tuition fees. Nevertheless, a fixed sum of money has to be paid such as development fee, library fee, etc. Education in such schools is still considered to be free. This applies to the institution as a whole and not to the specific situation obtaining for the student.
2.1.15 Exemption from tuition fees: This refers to exemption from payment of tuition fees granted to some students on some special consideration in those institutions where it is reported that the education is not free. The exemption may be full or partial.
2.1.16 Private expenditure on education: It is the sum total of all the expenditures incurred by the student on education (towards fees, books \& stationery, uniform, transport, private coaching, study tours, etc.). This include all the expenditures incurred and/or to be incurred during the current academic year/ session on the education of the household members, aged 5-29 years who are currently attending at primary level and above.
2.1.17 Attendance and enrollment: The current attendance status refers to whether a person is currently attending any educational institution or not. While every person, who is attending an educational institution, is necessarily enrolled in that institution, it may so happen that a person, who is enrolled is not currently attending the institution. While most of the official educational statistics are based on enrollment, NSSO survey, because of its household approach, bases its analysis on the current attendance status.
2.1.18 Usual activity status: The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of survey. The activity status on which a person spent relatively longer time (major time criterion) during the 365 days preceding the date of survey is considered the usual principal activity status of the person.

### 2.2 Some concepts/ indicators used in the report:

2.2.1 Literacy rate: Percentage of literates in a population is taken as its literacy rate.
2.2.2 Adult literacy: Literacy rate for population of age 15 and above.
2.2.3 Decile class of MPCE: In the distribution of population of any domain by MPCE level, the first decile is the level of MPCE below which $10 \%$ of the population lie, the second decile is the level below which $20 \%$ of the population lie, and so on. Thus the population can be divided into 10 decile classes (\%) of MPCE: from 0 to the first decile (called $0-10 \%$ ), from the first decile to second decile (called 10-20\%), and so on. Averages of other variables of interest, computed separately for the 10 decile classes, help to portray the variation in the variable with the behavior of MPCE.
2.2.4 Quintile class of MPCE: Similarly, the population of a domain can be divided into five quintile classes of MPCE. The first quintile of MPCE means the level of MPCE below which $20 \%$ of the population lie, the second quintile is the level below which $40 \%$ of the population lie, and
so on. In this round quintile classes are obtained separately for rural sector, urban sector and for rural and urban sectors combined.
2.2.5 Educated persons: Persons with completed education level secondary and above.
2.2.6 Student: A person in the age-group 5-29, who is currently attending formal education at primary level or above, is referred as 'student' in the discussion here.
2.2.7 Gross attendance ratio (GAR): For each class-group, this is the ratio of the number of persons in the class-group to the number of persons in the corresponding official age-group. For example, for Class group I-V the ratio (in \%), corresponding to normative age-group of 6-10, is
$=\quad$ Number of persons attending Classes I-V $\quad \times 100$
Estimated population in the age-group 6-10 years

For the remaining class-groups of school education, i.e. VI-VIII, IX-X and XI-XII, the corresponding official age-groups are taken as 11-13, 14-15 and 16-17 respectively.
2.2.8 Age-specific attendance ratio: For each age-group this measure gives an idea of proportion of persons of a particular age-group currently attending educational institutions, irrespective of the level or class in which they are studying. For example, for age-group 6-10, this attendance ratio is

$$
=\frac{\text { Number of persons in age-group 6-10 currently attending educational institutions }}{\text { Estimated population in the age-group 6-10 years }} \times 100
$$

2.2.9 Net attendance ratio: For each education class-group, this is the ratio of the number of persons in the official age-group attending a particular class-group to the total number persons in the age-group. For example, for Class group I-V the ratio (in \%) is
$=\underline{\text { Number of persons of age 6-10 years currently attending Classes I-V }} \times 100$
Estimated population in the age-group 6-10 years
Similarly it can be obtained for the remaining class-groups of school education, i.e. VI-VIII, IXX and XI-XII, with the corresponding official age-groups as 11-13, 14-15 and 16-17 respectively.
2.2.10 Repeater: A student is taken as a 'repeater', if he/ she reported present class attended to be the same as the previous class attended.

## Chapter III

## Level of Education, Current Attendance \&

## Enrollment Status

3.0.1 In the 64th Round survey, information on level of education attained was obtained for all the members of the selected sample households. These details are also available from other household surveys conducted by NSSO, such as surveys on employment-unemployment. But obviously, the performance of the educational infrastructure, facilities and incentives provided by the government as well as the private sector is best studied through the current attendance status of the school- and college-going population. The focus of the survey was on the persons of age-group 5-29 and their current attendance or enrollment status as this group contains the main beneficiaries of the education system in its current state. Accordingly, the survey generated detailed information on the nature of participation in education, various incentives availed of, and private expenditure incurred on education for persons aged 5-29 who were reported to be currently attending educational institutions at primary-orabove levels.
3.0.2 Details of educational participation of those (in the target age-group) currently attending and the details of non-enrollment from those currently not attending any educational institution are dealt with in the next chapter. The present chapter discusses the following specific aspects of literacy and access to school facilities:

- the major survey findings on literacy and level of education of the population
- current attendance and enrollment status of persons in the agegroup 5-29 years
- distance of households to the nearest schools having primary/ middle/ secondary level.

### 3.1 Literacy and level of education of population

3.1.1 In NSS surveys, a person who can read and write a simple message in any language with understanding is considered literate. The proportions of literates among various age-groups of the population, with rural-urban and male-female classification, serve as key indicators of the socioeconomic progress of the State. The current survey estimates (Statement 3.1 below) indicate that in 2007-08, more than two-thirds ( $69.8 \%$ ) of the population of all ages were literate. The literacy rate (i.e. percentage of literates) for all ages among rural female (RF), rural male (RM), urban
female (UF) and urban male (UM) populations was found to be $54 \%$, $70.8 \%, 80.7 \%$ and $84.6 \%$ respectively.

Statement 3.1: Literacy rate (\%) for persons in different age-groups during 2007-08

| Age Group | Rural |  |  | Urban |  |  |  | Rural + Urban |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |  |
| 5 \& above | 79.3 | 59.3 | 69.3 | 93.5 | 88.8 | 91.1 | 84.3 | 70.1 | 77.4 |  |
| 7 \& above | 79.3 | 58.7 | 69.3 | 93.4 | 88.8 | 91.1 | 84.3 | 69.8 | 77.2 |  |
| 15 \& above | 74.8 | 49.9 | 62.5 | 91.2 | 85.9 | 88.5 | 80.6 | 62.9 | 71.8 |  |
| All age | $\mathbf{7 0 . 8}$ | $\mathbf{5 4 . 0}$ | $\mathbf{6 2 . 7}$ | $\mathbf{8 4 . 6}$ | $\mathbf{8 0 . 7}$ | $\mathbf{8 2 . 7}$ | $\mathbf{7 5 . 7}$ | $\mathbf{6 3 . 7}$ | $\mathbf{6 9 . 8}$ |  |

(Ref.: Table-4)
3.1.2 The literacy rates among the population of age $5 \&$ above, 7 \& above or 15 \& above are, arguably, more meaningful indicators than literacy of persons of all ages. The 7-plus literacy rate facilitates comparison with estimates from the Population Census and also with past NSS rounds. In this round, rates for the 5 -plus population were separately generated. The rates for these two age brackets (5-plus and 7-plus) were estimated to be more or less the same in the current round at sub-category level, i.e. rural female, rural male, urban female and urban male. In fact, for rural females, the literacy rate for age $5+$ exceeded that for age $7+$, indicating that the proportion of literates among rural females in the age-group 5-6 exceeded the proportion for the age-group $7 \&$ above. For age $7 \&$ above, the literacy rate in rural Gujarat was $69.3 \%$ ( $58.7 \%$ for females and $79.3 \%$ for males) while in urban Gujarat it was $91.1 \%$ ( $88.8 \%$ for females and $93.4 \%$ for males).
3.1.3 Adult literacy: 71.8\% of the State's adult population (population of age 15 \& above) was found to be literate. Among rural females, rural males, urban females and urban males, the adult literacy rates were $49.9 \%$, $74.8 \%, 85.9 \%$ and $91.2 \%$ respectively.
3.1.4 Distribution of population by educational level is a dynamic phenomenon, the study of which refines the measurement of social development. In NSS surveys the highest completed level of education is reported for each member of the surveyed household after taking into consideration the education attained by her/ him in general, technical, and vocational streams. The levels of education include non-formal education, below primary, primary, middle/ upper primary, secondary, higher secondary (HS), diploma/ certificate courses, graduate level degree courses, post-graduate-and-above level degree courses, etc.

## Statement 3.2: Percentage distribution of persons of age 15 years \& above by completed level of education

| Level of <br> Education | Rural |  |  |  | Urban |  |  |  | Rural + Urban |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |  |  |
|  | 25.2 | 50.1 | 37.5 | 8.8 | 14.1 | 11.5 | 19.4 | 37.1 | 28.2 |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |
|  | 0.5 | 0.3 | 0.4 | 0.2 | 0.3 | 0.3 | 0.4 | 0.3 | 0.3 |  |  |
|  | 9.1 | 7.2 | 8.2 | 5.9 | 6.3 | 6.1 | 8.0 | 6.8 | 7.4 |  |  |
|  | 24.2 | 19.2 | 21.7 | 13.0 | 18.2 | 15.6 | 20.3 | 18.8 | 19.6 |  |  |
|  | 17.6 | 9.1 | 13.4 | 15.3 | 13.4 | 14.3 | 16.8 | 10.6 | 13.7 |  |  |
| Secondary | 12.8 | 8.3 | 10.5 | 20.9 | 28.9 | 24.9 | 15.6 | 15.8 | 15.7 |  |  |
| Higher <br> secondary | 5.0 | 2.1 | 3.5 | 11.1 | 5.7 | 8.4 | 7.1 | 3.4 | 5.3 |  |  |
| Diploma | 0.9 | 0.3 | 0.6 | 1.6 | 0.9 | 1.2 | 1.2 | 0.5 | 0.8 |  |  |
| Graduation | 2.5 | 1.6 | 2.0 | 18.3 | 6.2 | 12.2 | 8.1 | 3.3 | 5.7 |  |  |
| Post <br> graduation <br> \& above | 0.3 | 0.2 | 0.3 | 3.4 | 4.8 | 4.1 | 1.4 | 1.9 | 1.6 |  |  |
| n.r. | 1.9 | 1.8 | 1.8 | 1.6 | 1.2 | 1.4 | 1.8 | 1.6 | 1.7 |  |  |
| Total | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ |  |  |

(Ref.: Table-4)
3.1.5 The distribution of population of age 15 \& above across levels of education in the current survey (Statement 3.2 above) indicates that the literates (71.8\%) includes $7.7 \%$ who had not completed primary level. The highest level of education successfully completed was primary for $19.6 \%$, middle level for $13.7 \%$, secondary for $15.7 \%$, higher secondary (HS) for $5.3 \%$, diploma for $0.8 \%$, graduation for $5.7 \%$ and postgraduation and above for the remaining $1.6 \%$ of the adult (15+) population. The proportion of persons having completed graduate (or above) level was only $1.8 \%$ among rural females, $2.8 \%$ among rural males, $11 \%$ among urban females and $21.7 \%$ among urban males. The distribution of the entire adult (age $15 \&$ above) population of the State by completed level of education can be seen at a glance from Fig.3.1.

3.1.6 Further, the distribution of adult literates (age $15 \&$ above) by completed level of education revealed disparity not only in the proportion of literates, but also in the completed educational level of the literates among the above-mentioned four population categories (viz. RF, RM, UF \& UM).

Statement 3.3: Percentage distribution of literates of age 15 years \& above by completed level of education

| Level of <br> Education | Rural |  |  |  | Urban |  |  | Rural + Urban |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |  |
| Literate but <br> below primary | 12.8 | 15.0 | 13.8 | 6.7 | 7.7 | 7.2 | 10.4 | 11.3 | 10.7 |  |
| Primary | 32.4 | 38.3 | 34.9 | 14.2 | 21.2 | 17.6 | 25.2 | 29.8 | 27.3 |  |
| Middle | 23.5 | 18.2 | 21.4 | 16.8 | 15.6 | 16.2 | 20.8 | 16.8 | 19.1 |  |
| Secondary | 17.1 | 16.5 | 16.8 | 22.9 | 33.6 | 28.1 | 19.3 | 25.1 | 21.9 |  |
| Higher <br> Secondary | 6.7 | 4.2 | 5.6 | 12.2 | 6.6 | 9.5 | 8.8 | 5.4 | 7.4 |  |
| Above Higher <br> Secondary | 7.5 | 7.8 | 7.5 | 25.5 | 13.9 | 19.8 | 13.3 | 9.0 | 11.3 |  |
| Total (incl. n.r.) | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ | $\mathbf{1 0 0 . 0}$ |  |

(Ref.: Table-4)
3.1.7 About $53.3 \%$ of rural female adult literates, compared to $28.9 \%$ of urban female literates, were of level primary or below. On the other hand the proportion of adult literates at above-HS level varied from $7.8 \%$ for rural females and $7.5 \%$ for rural males, to $13.9 \%$ for urban females and $25.5 \%$ for urban males. For the adult literate population of the State as a whole, $38 \%$ were of level primary and below and only $11.3 \%$ were of level above-higher-secondary.
3.1.8 To classify the population by economic level, information on monthly consumption expenditure was recorded for each surveyed household. This enabled the monthly per capita expenditure (MPCE) of the household to which a person belonged to be used as an indicator of his or her economic level. In Statement 3.4, the analysis of Statement 3.3 is done separately for persons (males and females together) at ten different economic levels (ten decile classes of MPCE). It is seen that the economically disadvantaged sections of population were also disadvantaged on account of their educational levels.

Statement 3.4: Percentage distribution of persons of MPCE decile classes by completed level of education

| Level of Education | Decile class (\%) of MPCE* |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 0-10 | 10-20 | 20-30 | 30-40 | 40-50 | 50-60 | 60-70 | 70-80 | 80-90 | 90-100 |
| Rural |  |  |  |  |  |  |  |  |  |  |
| Not literate | 55.6 | 52.5 | 47.0 | 41.4 | 41.1 | 36.8 | 38.6 | 30.4 | 24.4 | 20.9 |
| Literate but below primary | 19.7 | 16.5 | 15.4 | 18.5 | 17.0 | 17.5 | 16.8 | 20.4 | 21.4 | 16.6 |
| Primary | 14.4 | 18.7 | 18.3 | 24.4 | 23.2 | 23.1 | 23.0 | 22.7 | 22.6 | 25.3 |
| Middle | 4.9 | 5.9 | 10.8 | 7.1 | 9.8 | 10.6 | 8.5 | 11.9 | 12.3 | 13.9 |

| Leve Decile class (\%) of MPCE* |  |  |  |  |  |  |  |  |  |  |
| Level of Education | 0-10 | 10-20 | 20-30 | 30-40 | 40-50 | 50-60 | 60-70 | 70-80 | 80-90 | 90-100 |
| Not literate | 28.5 | 100.0 | 49.4 | 19.3 | 0.0 | 9.1 | 7.8 | 0.0 | 33.3 | 14.0 |
| Literate but below primary | 25.2 | 0.0 | 11.2 | 16.0 | 0.0 | 27.4 | 8.3 | 50.0 | 0.0 | 15.1 |
| Primary | 23.4 | 0.0 | 19.4 | 23.0 | 66.7 | 13.6 | 24.1 | 50.0 | 33.3 | 11.6 |
| Middle | 8.7 | 0.0 | 8.6 | 16.4 | 33.3 | 12.8 | 7.3 | 0.0 | 0.0 | 9.5 |
| Secondary | 3.7 | 0.0 | 5.1 | 14.0 | 0.0 | 26.8 | 27.1 | 0.0 | 0.0 | 18.5 |
| Higher Secondary | 9.7 | 0.0 | 4.9 | 6.7 | 0.0 | 4.1 | 4.1 | 0.0 | 0.0 | 8.2 |
| Grad., Post, Diploma | 0.4 | 0.0 | 1.3 | 3.6 | 0.0 | 4.6 | 20.0 | 0.0 | 33.3 | 21.8 |
| N.R. | 0.4 | 0.0 | 0.1 | 1.0 | 0.0 | 1.6 | 1.3 | 0.0 | 0.1 | 1.3 |
| All | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |

*Classes formed separately for rural and urban population
(Ref.: Table-5)
3.1.9 In rural Gujarat, 55.6 \% of the populations in the lowest decile class of MPCE were not literate. Even in the highest decile class, $20.9 \%$ persons were not literate. The proportion of educated persons (i.e. those with education level secondary and above), increases along the decile classes of expenditure from $4.4 \%$ in the lowest to $21.5 \%$ in the highest decile class.
3.1.10 In urban Gujarat the situation was not very different either. The proportion of not-literate persons varies from the lowest to the highest MPCE decile class and does not show any regular trend, while the proportion of educated persons increased steeply from $13.8 \%$ in the lowest to $48.5 \%$ in the highest MPCE decile class.

### 3.2 Distance to nearest school having primary/ middle/ secondary level classes

3.2.1 Logistics in education system, in terms of distance from school is one of the important factors affecting access to education and attendance. In this survey information was obtained from all the sample households on their distance from the nearest school providing school education at (a) primary (b) middle and (c) secondary level. As shown in Statement 3.5, more than $97 \%$ of rural and $92 \%$ of urban households reported having a school with primary classes within 1 km . But availability of schools with middle or secondary level classes differed considerably between rural and urban sectors. Only $75.7 \%$ of rural households, compared to $86.6 \%$ of urban households, had a school within a km providing middle level classes. For secondary level classes, the proportion was $42.9 \%$ for rural compared to $78.3 \%$ for urban households. Further, about $30.9 \%$ of rural households did not have any secondary school within a distance of 3 km .

Statement 3.5: Percentage distribution of households by distance to schools having (a) primary (b) middle (c) secondary educational level in rural and urban Gujarat

| Sector | Level | Distance(d) to nearest school |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $\begin{gathered} \mathrm{d}<1 \\ \mathrm{~km} \\ \hline \end{gathered}$ | $\begin{gathered} 1 \mathrm{~km} \leq \mathrm{d}<2 \\ \mathrm{~km} \end{gathered}$ | $\begin{gathered} 2 \mathrm{~km} \leq \mathrm{d}<3 \\ \mathrm{~km} \end{gathered}$ | $\begin{gathered} 3 \mathrm{~km} \leq \mathrm{d}<5 \\ \mathrm{~km} \end{gathered}$ | $\begin{gathered} \mathrm{d} \geq 5 \\ \mathrm{~km} \end{gathered}$ | n.r. | Total |
| Rural | Primary | 97.2 | 1.3 | 0.5 | 0.1 | 0.0 | 0.9 | 100 |
|  | Middle | 75.7 | 5.4 | 6.3 | 2.7 | 9.0 | 0.9 | 100 |
|  | Secondary | 42.9 | 9.9 | 14.8 | 9.6 | 21.3 | 1.5 | 100 |
| Urban | Primary | 92.4 | 6.8 | 0.0 | 0.0 | 0.1 | 0.7 | 100 |
|  | Middle | 86.6 | 10.9 | 0.9 | 0.2 | 0.8 | 0.7 | 100 |
|  | Secondary | 78.3 | 12.5 | 4.8 | 2.5 | 1.1 | 0.7 | 100 |

(Ref.: Table-3)
3.2.2 The logistics of educational access across MPCE decile classes were found to be distinctly revealing, particularly in rural sector (Statement 3.5a below). The availability of primary schools at a distance less than 2 km was uniform at around $98 \%$ of households of various levels of living. With reference to the availability of secondary school, in rural Gujarat, only $41 \%$ households in the lowest decile class of MPCE had a school with secondary level classes at a distance of 2 km . or less whereas in the highest decile class $60 \%$ of households had such educational access. Similar phenomenon was observed in urban sector as well.

Statement 3.5a: Percentage of households belonging to different MPCE decile classes in rural and urban Gujarat with distance less than $2 \mathbf{k m}$. to school having primary/ middle/ secondary level classes

| Decile class* (\%) of MPCE | Percentage of Rural households with distance less than $2 \mathbf{k m}$ to school having classes of level |  |  | Percentage of Urban households with distance less than $2 \mathbf{k m}$ to school having classes of level |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Primary | Middle | secondary | Primary | Middle | secondary |
| 0-10 | 98.2 | 84.5 | 40.5 | 100.0 | 93.4 | 81.2 |
| 10-20 | 99.2 | 80.0 | 30.9 | 0.0 | 0.0 | 0.0 |
| 20-30 | 99.0 | 77.4 | 37.7 | 99.2 | 96.3 | 78.6 |
| 30-40 | 98.0 | 78.8 | 46.5 | 99.7 | 97.1 | 94.9 |
| 40-50 | 96.8 | 76.8 | 48.4 | 0.0 | 0.0 | 0.0 |
| 50-60 | 99.3 | 76.1 | 50.6 | 99.4 | 97.5 | 93.4 |
| 60-70 | 98.8 | 83.9 | 56.3 | 99.4 | 98.5 | 94.7 |
| 70-80 | 98.8 | 87.7 | 69.8 | 0.0 | 0.0 | 0.0 |
| 80-90 | 97.0 | 83.0 | 57.2 | 100.0 | 100.0 | 100.0 |
| 90-100 | 99.6 | 81.6 | 60.4 | 98.7 | 97.6 | 89.0 |

*Classes formed separately for rural and urban population
(Ref.: Table-3)

### 3.3 Current Attendance and Enrollment Status

3.3.1 Current attendance status refers to whether a person is currently attending any educational institution or not. In this survey, current attendance status was recorded for persons in the age group 5-29 years. Persons attending educational institutions were asked whether their level of attendance was informal or formal and, if formal, whether at pre-primary, primary or higher level. While persons attending must necessarily be enrolled in educational institutions, those not attending may or may not be enrolled in any institution. Therefore only the persons not attending were asked about their current educational enrollment status.

Statement 3.6: Percentage of population in the age-group 5-29 years and the proportion of persons currently attending in the age-group

| Characteristic | Rural |  |  | Urban |  |  |  | Rural + Urban |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |  |
| Percentage population in <br> age-group 5-29 years | 45.9 | 44.1 | 45.0 | 47.5 | 47.2 | 47.4 | 46.4 | 42.7 | 45.8 |  |
| Percentage of persons <br> currently attending any <br> education in the age-group <br> 5-29 years | 53.4 | 44.9 | 49.4 | 63.1 | 56.2 | 59.7 | 56.9 | 49.2 | 53.2 |  |

(Ref.: Table-1)
3.3.2 Statement 3.6 above indicates that about $46 \%$ of the entire population belonged to the age-group 5-29 years and $53 \%$ of persons in the agegroup were currently attending educational institutions. There was some gender disparity with $49.2 \%$ of females and $56.9 \%$ of males in the target age-group reported to be attending education currently.
3.3.3 On the whole, our target population for the survey (age 5-29) included nearly $46 \%$ of the population of the state and $53 \%$ of the target populations was currently attending any educational institution.
3.3.4 The current attendance and enrollment status of persons in the age-group 5-29 years can be summarized as below.

Statement 3.7: Percentage distribution of persons of age 5-29 years by current enrollment and attendance status

| Sector | Sex | Percentage of persons |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $\begin{gathered} \text { Currently } \\ \text { not } \\ \text { enrolled } \end{gathered}$ | Currently enrolled but not attending | Currently attending |  |  |  |  |  | n.r. |
|  |  |  |  | Below primary | Primary | Middle | Secondary |  <br> above | Total |  |
| Rural | Male | 34.6 | 7.1 | 0.1 | 25.9 | 16.7 | 6.0 | 4.6 | 53.3 | 5.0 |
|  | Female | 43.1 | 5.8 | 0.4 | 24.4 | 14.1 | 3.5 | 3.0 | 45.4 | 5.7 |
|  | person | 38.6 | 6.6 | 0.2 | 25.2 | 15.5 | 4.8 | 3.7 | 49.3 | 5.3 |
| Urban | Male | 32.1 | 3.3 | 0.1 | 27.4 | 23.0 | 3.9 | 8.7 | 63.1 | 1.5 |
|  | Female | 38.2 | 3.9 | 0.1 | 25.4 | 20.5 | 2.3 | 7.6 | 55.9 | 2.0 |
|  | person | 35.1 | 3.5 | 0.1 | 26.4 | 21.8 | 3.1 | 8.2 | 59.6 | 1.8 |
| Rural <br> Urban | Male | 33.7 | 5.8 | 0.1 | 26.4 | 19.0 | 5.3 | 6.0 | 56.8 | 3.7 |
|  | Female | 41.2 | 5.0 | 0.3 | 24.8 | 16.5 | 3.0 | 4.7 | 49.3 | 4.5 |
|  | person | 37.3 | 5.4 | 0.2 | 25.6 | 17.8 | 4.2 | 5.4 | 53.2 | 4.1 |

(Ref.: Table-6)
3.3.5 As shown in Statement 3.7 above, $37.3 \%$ of population in the target agegroup (5-29 years) was currently not enrolled in any educational institution, $5.4 \%$ was enrolled but not attending and $53.2 \%$ were currently attending educational institutions. A major gap remained between male and female attendance position, especially in the rural sector with $53.3 \%$ of rural males, compared to $45.4 \%$ of rural females of the target agegroup currently attending education. Among all the persons who were currently attending, a majority (25.6\%) were in the primary level.
3.3.6 Variation in current participation and enrollment status of persons across economic levels is shown in Statement 3.8, separately for rural and urban sectors.

Statement 3.8: Percentage distribution of persons of age 5-29 years for MPCE decile classes by current enrollment and attendance status

| Level of attendance/enrollment |  | MPCE decile class (\%)* |  |  |  |  |  |  |  |  |  |

*Classes formed separately for rural and urban population
(Ref.: Table-7)
3.3.7 The proportion of persons in the age-group 5-29 years currently attending educational institutions increases at a steady but gradual pace with increase in economic level - from $35.5 \%$ for the bottom $10 \%$ of population to $62.7 \%$ for the top $10 \%$, ranked by MPCE, in the rural sector and it varies from 57.1\% for MPCE class $0-10$ to $100 \%$ for MPCE class to 70-80 for urban sector.

Fig.3.2R: Distribution of persons of MPCE decile classed in Rural Gujarat by status of current attendance/enrolment

3.3.8 Figures 3.2R above \& 3.2U below shows that proportion of persons currently not enrolled has been high even in the higher decile class in both the rural and the urban sector. This might be because of the presence of persons who were enrolled in the past but were currently not enrolled as they had completed the desired level of education.

3.3.9 In NSS surveys, information on social group and religion is collected at household level, all the members of the household being classified according to the religion and social group of the head of the household. Percentage distribution of population by current attendance and enrollment status is presented in Statement 3.9 below for persons belonging to different social groups and in Statement 3.10 for persons belonging to various religious groups. The overall percentage of persons of age 5-29 years currently attending varied between $38.7 \%$ and $63.6 \%$ for different social groups and between $41.9 \%$ and $89.5 \%$ for different religious groups.

Statement 3.9: Percentage distribution of persons of age 5-29 years by current enrollment and attendance status for each social group

| Social group | Notenrolled | Enrolled but not attending | Currently attending |  |  |  |  |  | Total (incl. n.r.) |

(Ref.: Table-9)

## Chapter IV

## Details of Participation and Expenditure in Education

4.0.0 The primary focus of the survey is on persons of age 5-29 years who are considered to be the main users of the formal education system. In the previous chapter, the discussion on current attendance status or enrollment status of persons of age 5-29 years who took all levels of education, including informal and pre-primary, was considered. For studying the details of participation and expenditure in education, however, the focus is only on persons of the age-group currently attending formal education at primary level or above, who will be referred to as 'students' in the discussion that follows. This chapter provides an analytical synthesis based on the survey findings in its three sections detailing on participation in education, educational incentives and private household expenditure on education.

## A. Participation in Education

4.0.1 For each 'student' in the surveyed households, detailed particulars of participation have been obtained for at most two courses attended. Besides the number of courses attended by the person, the information profile for each course attended covered the following items:

- type of current education (general/ technical/ vocational),
- course or broad subject category
- level of current attendance (primary/ middle/ secondary etc.),
- type of institution attended (government/ local body/ private aided/ private unaided),
- nature of institution (whether recognized) - for private unaided institutions only,
- present and previous class/ grade/ year of study,
- whether repeating in the same class,
- whether changed educational institution, etc.
4.0.2 Based on these, an analysis of participation in education of school- and college-going population has been attempted in the first part of this chapter.

### 4.1 Age-group-wise pattern of current attendance

4.1.1 The distribution of students of all ages between 5 to 29 years by level of current attendance is summarized separately for the four categories of population - rural female, rural male, urban female and urban male - in Figure 4.1 below.
4.1.2 In the rural areas, among both females and males, more than $48 \%$ of students were at primary level while another $31 \%$ were at middle level. Similarly in the urban males more than $43 \%$ of students were in primary level and in the urban females more than $45 \%$ of students were in primary level.
4.1.3 The rural-urban differentiation in the distribution of students in terms of level of current attendance may also need to be viewed in the context of access to schools in these two sectors. As mentioned in Statement 3.5 in the previous chapter, access to school with secondary level classes within 3 km was available to only two-thirds of rural households, compared to more than $96 \%$ of urban households.

Statement 4.1: Percentage distribution of students by level of current attendance

| Sector | Primary | Middle | Secondary | Higher <br> Secondary | Diploma | Graduate | All |
| :--- | ---: | ---: | ---: | :--- | ---: | ---: | ---: |
| Rural Male | 48.5 | 31.3 | 11.3 | 4.8 | 1.7 | 1.9 | 100 |
| Rural Female | 54.2 | 31.4 | 7.7 | 4.6 | 0.8 | 1.1 | 100 |
| Urban Male | 43.5 | 36.4 | 6.2 | 5.9 | 6.0 | 1.8 | 100 |
| Urban Female | 45.2 | 36.5 | 4.0 | 9.1 | 1.9 | 2.6 | 100 |
| All | 48.2 | 33.5 | 7.9 | 5.8 | 2.5 | 1.8 | 100 |

(Ref.: Table-10)

Fig. 4.1: Percentage distribution of students of age 5-29 years by level of current attendance

### 4.2 Current Attendance by Type of Education

4.2.1 Education is broadly divided into three categories: (i) general education, (ii) technical and professional education and (iii) vocational education. General education in this survey included school education at primary, middle, secondary and higher secondary level, and normal university education at graduate and post-graduate level. Technical or professional education included courses involving hands on training in addition to theoretical classes, viz. Engineering, Medicine, Agriculture, Management, Chartered Accountancy, Cost Accountancy, Computer courses of various levels etc. Vocational education covered courses imparting training in specific fields through significant 'hands-on' exercises for acquiring necessary skill in order to create employment opportunity. Courses offered at ITIs, polytechnics, etc. were examples of vocational education. Also, information on type of education was collected separately for the 'major or basic course' and the 'second course' as defined in Chapter II.
4.2.2 The present survey has taken note of emerging changes in the education system with a significant increase in the aggregate attendance in technical and vocational education at post-middle level.

## Statement 4.2: Percentage distribution of students of age 5-29 years by type of education received through the major course attended

| Sector | sex | Percentage distribution of students by type of education |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | General | Technical | Vocational | All |
| Rural | Male | 99.42 | 0.40 | 0.17 | 100.00 |
|  | Female | 100.00 | 0.00 | 0.00 | 100.00 |
|  | Person | 99.67 | 0.23 | 0.10 | 100.00 |
| Urban | Male | 94.71 | 5.11 | 0.18 | 100.00 |
|  | Female | 98.51 | 1.49 | 0.00 | 100.00 |
|  | Person | 96.47 | 3.43 | 0.10 | 100.00 |
| Total | Male | 97.54 | 2.29 | 0.18 | 100.00 |
|  | Female | 99.35 | 0.65 | 0.00 | 100.00 |
|  | Person | 98.34 | 1.56 | 0.10 | 100.00 |

(Ref.: Table-25)
4.2.3 Statement 4.2 shows percentage distribution of students aged $5-29$ by the type of education they received in the major or basic course they were attending. In type of education the highest share is of general education $98.34 \%$, with $99.67 \%$ in rural areas and $96.47 \%$ in urban areas, while only $1.56 \%$ was in technical education and $0.10 \%$ was in vocational education. The percentage of students pursuing technical education was $3.43 \%$ in urban areas and $0.23 \%$ in rural areas. The proportion receiving vocational education was $0.1 \%$ for both rural and urban students.

### 4.3 Attendance Ratios

4.3.1 In most of the official educational statistics, enrollment ratios are taken as important indicators which give an idea of the proportion of a population enrolled in educational institutions. Gross enrollment ratio, age-specific enrollment ratio and net enrollment ratio are taken as three principal indicators. Now the NSS surveys because of their household approach have the advantage of being able to collect information on attendance, rather than that on enrollment, in the educational institutions. Therefore, instead of enrollment ratios, the corresponding attendance ratios are obtained.

## Gross Attendance Ratio (GAR)

4.3.2 For each class-group, this is the ratio of the number of persons in the class-group to the number persons in the corresponding official agegroup. For example, for Class group I-V the ratio (in \%), corresponding to normative age-group of 6-10, is

$$
=\frac{\text { Number of persons attending Classes I-V }}{\text { Estimated population in the age-group 6-10 years }} \times 100
$$

4.3.3 For the remaining class-groups of school education, i.e. VI-VIII, IX-X and XI-XII, the corresponding official age-groups are taken as $11-13,14-15$ and 16-17 respectively. Accordingly, for broader class-groups like I-VIII, I-XII and post-HS (higher secondary) the age-groups taken are 6-13 years, 6-17 years and 18-24 years.
4.3.4 In the gross attendance ratio, the denominator consists of all persons in the official age group, whether attending or not, while the numerator includes both the over-aged and the under aged students as long as they are studying in Classes I to IV. Therefore, it can work out to more than 100 as well. In spite of this shortcoming, this indicator is used quite widely, for comparison with gross enrollment ratio.

## Statement 4.3: Gross attendance ratio by broad class group in any education

| Class <br> Group | Rural |  |  |  | Urban |  |  |  | Rural + Urban |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | :---: | :---: |
|  | Male | Female | Person | Male | Female | Person | Male | Female | Person |  |  |
| I-V | 107 | 105 | 106 | 118 | 70 | 90 | 111 | 89 | 99 |  |  |
| VI-VIII | 87 | 71 | 79 | 111 | 277 | 153 | 96 | 113 | 103 |  |  |
| I-VIII | 99 | 92 | 96 | 115 | 103 | 109 | 105 | 96 | 101 |  |  |
| IX-X | 59 | 40 | 51 | 46 | 58 | 49 | 55 | 43 | 50 |  |  |
| XI-XII\# | 34 | 26 | 30 | 41 | 100 | 63 | 37 | 47 | 41 |  |  |
| Post-HS | 8 | 4 | 6 | 10 | 10 | 10 | 8 | 6 | 7 |  |  |

\# including diploma with minimum entry requirement below HS
(Ref.: Table-11)
4.3.5 Statement 4.3 presents the gross attendance ratios for four class-groups of school education and for the combined class-groups I-VIII and 'post-HS' level. In the first class-group, i.e. Classes I-V, the gross attendance ratio for all the categories (viz. rural female, rural male, etc.) is more than 70.
4.3.6 For the Class-group I-VIII, which corresponds to elementary education as a whole, the GAR was $96 \%$ in the rural and $109 \%$ in the urban sector. For females, the ratio was marginally lower - 92\% in rural and 103\% in urban compared to $99 \%$ in rural and $115 \%$ in urban males. However, there was sharp decline in GAR in the subsequent class-groups, i.e. IX-X, XI-XII and post-HS.

Fig.4.2 Gross Attendance Ratio across Class-groups

## Age-specific Attendance Ratio (AAR)

4.3.7 For each age-group this measure gives an idea of proportion of persons of a particular age group currently attending educational institutions, irrespective of the level or class in which they are studying. For example, for age-group 6-10, the attendance ratio is
$=$ No. of persons in age-gr. 6-10 currently attending educational institutions $\times 100$ Estimated population in the age-group 6-10 years
4.3.8 But it needs to be noted that often a high and apparently encouraging agespecific attendance ratio might be due to a large number of persons actually studying in a lower class group than is desirable at their age.

Statement 4.4: Age-specific attendance ratio by broad age group for any education

| Age <br> group | Rural |  |  |  | Urban |  |  | Rural + Urban |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |  |
| $6-10$ | 90 | 87 | 89 | 99 | 98 | 98 | 93 | 93 | 93 |  |
| $11-13$ | 89 | 81 | 85 | 98 | 95 | 97 | 93 | 84 | 89 |  |
| $14-17$ | 60 | 36 | 49 | 68 | 73 | 70 | 63 | 45 | 56 |  |
| $18-24$ | 12 | 8 | 10 | 28 | 27 | 28 | 17 | 14 | 16 |  |
| $25-29$ | 0 | 0 | 0 | 0 | 1 | 1 | 0 | 1 | 1 |  |

(Ref.: Table-13)
4.3.9 The overall age-specific attendance ratio drops steadily from $93 \%$ in agegroup $6-10$ and $89 \%$ at age $11-13$, to $56 \%$ for age $14-17,16 \%$ for the age-group 18-24, and finally to only $1 \%$ for age 25-29 (Statement 4.4 above).

## Net Attendance Ratio (NAR)

4.3.10 For each education class-group, this is the ratio of the number of persons in the official age-group attending a particular class-group to the total number persons in the age-group. For example, for Class group I-V the ratio (in \%) is
$=$ Number of persons in age-gr. 6-10 currently attending Classes I-V $\times 100$
Estimated population in the age-group 6-10 years
4.3.11 similarly it can be obtained for the remaining class-groups of school education, i.e. VI-VIII, IX-X and XI-XII, with the corresponding official age-groups as $11-13,14-15$ and $16-17$ respectively. This indicator overcomes the deficiencies of both gross attendance ratio and age specific attendance ratio.

## Statement 4.5: Net attendance ratio by broad class group

| Class <br> Group | Rural |  |  |  | Urban |  |  | Rural + Urban |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |  |
| I-V | 88 | 86 | 87 | 99 | 67 | 80 | 92 | 77 | 84 |  |
| VI-VIII | 70 | 64 | 67 | 90 | 79 | 87 | 78 | 67 | 74 |  |
| IX-X | 43 | 29 | 37 | 35 | 46 | 38 | 41 | 33 | 38 |  |
| XI-XII | 25 | 18 | 22 | 35 | 33 | 34 | 29 | 22 | 26 |  |
| XI-XII\# | 32 | 22 | 28 | 45 | 42 | 43 | 37 | 27 | 33 |  |

\# includes diploma with minimum entry requirement below HS (Ref.: Table-14)
4.3.12 For the state as a whole, $84 \%$ children in the age-group 6 -10, the official age-group for Classes I-V, were reported to be attending Classes I-V. For the class-group VI-VIII, the net attendance ratio remained below $74 \%$. For IX-X, XI-XII and post-HS level covering all education, the attendance ratios were quite lower: $38 \%$, $26 \%$ and $33 \%$ respectively.

### 4.4 Attendance by type of educational institution

4.4.1 Type of institution, as defined in Chapter II, refers to the type of management of the educational institution. Accordingly the types are (i) government, (ii) local body, (iii) private body receiving aid from government and (iv) private body not receiving aid from government. The distribution of students by type of institution attended (as reported by the surveyed household) for different levels of school education is presented in Statement 4.6 below.

Statement 4.6: Percentage distribution of currently attending students aged $\mathbf{5 - 2 9}$ years pursuing various levels of school education by type of institution attended

| Type of institute | Rural |  |  | Urban |  |  | Rural + Urban |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |
| Primary |  |  |  |  |  |  |  |  |  |
| Government \& local body | 95.7 | 96.4 | 96.0 | 22.3 | 27.5 | 24.7 | 68.2 | 69.6 | 68.8 |
| Private aided | 1.5 | 1.7 | 1.6 | 15.4 | 10.1 | 12.9 | 6.7 | 4.9 | 5.9 |
| Private unaided | 1.9 | 1.5 | 1.7 | 61.1 | 62.5 | 61.8 | 24.1 | 25.2 | 24.6 |
| Total* | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |
| Middle |  |  |  |  |  |  |  |  |  |
| Government \& local body | 84.1 | 88.3 | 85.9 | 23.6 | 16.3 | 20.2 | 57.6 | 54.4 | 56.2 |
| Private aided | 12.6 | 7.5 | 10.4 | 18.3 | 14.8 | 16.7 | 15.1 | 10.9 | 13.2 |
| Private unaided | 2.3 | 3.9 | 3.0 | 57.1 | 68.6 | 62.4 | 26.2 | 34.3 | 29.8 |
| Total* | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |
| Secondary \& HS |  |  |  |  |  |  |  |  |  |
| Government \& local body | 65.4 | 54.7 | 61.5 | 40.7 | 16.4 | 29.1 | 57.2 | 37.6 | 49.1 |
| Private aided | 28.8 | 35.3 | 31.2 | 40.6 | 70.7 | 55.1 | 32.7 | 51.1 | 40.3 |
| Private unaided | 4.9 | 4.9 | 4.9 | 17.9 | 12.2 | 15.2 | 9.2 | 8.2 | 8.8 |
| Total* | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |

*incl. n.r. \& 'not known' case
(Ref.: Table- 16)
4.4.2 In rural areas, the majority of students were attending Government \& Local bodies- $96 \%$ of primary level students, $86 \%$ of middle level students and $62 \%$ of Secondary and HS level. Private schools accounted for $3 \%$ of students at primary, $13 \%$ of students at middle level and $36 \%$ of student at secondary and HS level.
4.4.3 In urban areas, on the other hand, more than $70 \%$ of students at primary level, middle level and secondary and HS level were in private schools. Government \& local body schools accounted for $25 \%$ of primary level students, $20 \%$ of middle level students, and $29 \%$ of secondary/ HS level students.

Fig.4.3: Percentage distribution of students at each level of school education by type of institution attended

Statement 4.7: Percentage distribution of currently attending students aged 5-29 years pursuing different types of education by type of institution

| Type of education | Type of institution | Rural |  |  | Urban |  |  | Rural + Urban |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

|  | Total* | 100.0 | 0.0 | 100.0 | 100.0 | 0.0 | 100.0 | 100.0 | 0.0 | 100.0 |

*incl. n.r. \& 'not known’ cases
4.4.6 Distributions of students by type of institution for different types of education (general/ technical/ vocational) are presented in Statement 4.7 above and Fig. 4.4 below. In rural, all students were in Government \& local body currently attending in Technical and vocational education. More than $85 \%$ of students were in Government \& local body in General education. In urban, more than $70 \%$ of students were in private institutions in General and Vocational educations. In Technical education highest percentage of students were in Government \& local body.
4.4.7 All these indicate a significant presence of private institutions in school education in urban areas.

### 4.5 Attendance by nature of institution

4.5.1 In this survey round, information was collected on nature of the institution, i.e. whether the institution is recognized or not, only for the unaided private institutions.

Statement 4.8: Percentage of students aged 5-29 years attending recognized and unrecognized private unaided institutions at primary or middle level education

| Level of education | Nature of institution | Rural |  |  | Urban |  |  | Rural + Urban |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Male | Female | Total | Male | Female | Total | Male | Female | Total |
| Primary | Recognized | 68.6 | 51.4 | 61.8 | 97.7 | 99.2 | 98.4 | 96.2 | 97.5 | 96.8 |
|  | Unrecognized | 0.0 | 0.0 | 0.0 | 0.0 | 0.2 | 0.1 | 0.0 | 0.2 | 0.1 |
|  | Not known \& n.r. | 31.4 | 48.6 | 38.2 | 2.3 | 0.6 | 1.5 | 3.8 | 2.3 | 3.1 |
|  | All ${ }^{*}$ | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |
| Middle | Recognized | 83.7 | 62.5 | 71.8 | 97.5 | 97.5 | 97.5 | 96.8 | 95.4 | 96.1 |
|  | Unrecognized | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 |
|  | Not known \& n.r. | 16.3 | 37.5 | 28.2 | 2.5 | 2.5 | 2.5 | 3.2 | 4.6 | 3.9 |
|  | All ${ }^{*}$ | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |

* Private unaided institutions only
(Ref.: Table-15)
4.5.2 Almost $96 \%$ of the students attending private unaided institutions at primary and middle level were attending recognized institutions. Ruralurban difference in this respect was greater at primary level, with $98 \%$ of the students attending recognized institutions in urban areas as against only $62 \%$ in rural areas. At middle level the rural-urban difference narrowed to about 25 percentage points.
4.5.3 In case of about $28 \%$ of rural students of private unaided institutions and $2.5 \%$ of urban students of such institutions, the informants did not know whether the institution was recognized or not.

### 4.6 Change in educational institution

4.6.1 In the survey the students currently attending were asked whether they had changed their educational institution during the last one year, and if so, what the nature of the change was. The tabulated results are shown in Statement 4.9 below.

Statement 4.9: Percentage distribution of students aged 5-29 by nature of change in educational institution during last one year separately for different levels of school education

| Level of education | Nature of change in educational institution |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | :---: |
|  | No <br> change | Govt. to govt. | Private to govt. | Govt. to <br> private | Private to <br> private |  |
|  | 99.0 | 0.0 | 0.1 | 0.8 | 0.1 |  |
| Middle | 96.4 | 1.6 | 0.3 | 1.4 | 0.3 |  |
| Secondary | 98.7 | 0.0 | 0.0 | 1.3 | 0.0 |  |
| Higher Secondary | 93.8 | 0.8 | 0.0 | 4.9 | 0.6 |  |

(Ref.: Table- 38)
4.6.2 At primary and secondary level, the instances of change in education were negligible. Even at middle level more than $96 \%$ of students did not report any change in institution. However, at higher secondary level about $6 \%$ students reported a change in educational institution.

### 4.7 Proportion of repeaters in school education

4.7.1 In this survey round, for each person in the target age-group (5-29 years) who were reported to be attending at primary-or-above levels, information on both present class and previous class attended, was obtained. This enabled estimation of proportion of 'repeaters' in the various class-groups of school education. A student was considered as a 'repeater', if he/ she reported present class attended to be the same as the previous class.
4.7.2 Statement 4.10 below reveals that among class-groups, the proportion of repeaters was in the range $4-8 \%$ for nearly all the population categories and class-groups. It was highest in the classes’ I-V, followed by the VIVIII classes. Another notable feature is that the proportion of girls repeating in a class was less than the proportion of boys repeating, especially in urban areas.

Statement 4.10: Percentage of repeaters among currently attending students aged 5-29 years by broad class-group of school education

| Class group | Rural |  |  |  | Urban |  |  | Rural + Urban |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |  |
| I-V | 11.5 | 7.5 | 9.7 | 5.7 | 3.9 | 4.9 | 9.4 | 6.1 | 7.8 |  |
| VI-VIII | 2.3 | 2.9 | 2.6 | 1.4 | 1.1 | 7.2 | 7.0 | 2.0 | 4.8 |  |
| IX-X | 3.8 | 2.9 | 3.5 | 7.7 | 1.4 | 5.4 | 4.8 | 2.5 | 4.0 |  |
| XI-XII | 0.0 | 13.9 | 5.6 | 5.7 | 1.9 | 3.5 | 2.5 | 6.7 | 4.5 |  |

(Ref.: Table-37)

## B. Educational Incentives Received by Students

4.8.0 In this survey information was obtained for each 'student' on various educational incentives received by them, viz.

- free education or tuition fee waiver,
- scholarship or stipend,
- subsidized books or stationery,
- mid-day meal,
- students' concession in public transport etc.

The second part discusses the various incentives received by the 'students'.

### 4.9 Free education and exemption from tuition fee

4.9.1 Education is free of tuition fees in government schools in most of the states, as also in private schools in some states, up to a certain level of education. All such cases where tuition fee is not required to be paid for any student of the institution up to a particular level are considered to be instances of free education. Again, there are cases where certain students of an institution are exempted from payment of tuition fees, fully or partly, on some special considerations like merit, financial limitations, etc. These are referred to as cases of tuition fee exemption, fully or partly. The proportion of students receiving these facilities (viz. free education and tuition fee exemption - fully or partly) among the students currently attending at various levels of school education is given in Statement 4.11.

Statement 4.11: Percentage of currently attending students aged 5-29 years getting free education or exemption from tuition fees at different levels of school education

| Level of education | Type of waiver | Rural |  |  | Urban |  |  | Rural + Urban |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Male | Female | Total | Male | Female | Total | Male | Female | Total |
| Primary | Free education | 89.3 | 88.3 | 88.9 | 19.5 | 24.8 | 22.0 | 63.2 | 63.6 | 63.4 |
|  | Tuition fee fully waived | 0.3 | 0.0 | 0.2 | 0.3 | 0.0 | 0.1 | 0.3 | 0.0 | 0.2 |
|  | Tuition fee partly waived | 0.4 | 0.0 | 0.2 | 0.3 | 0.2 | 0.2 | 0.4 | 0.1 | 0.2 |
| Middle | Free education | 82.7 | 82.5 | 82.6 | 23.6 | 14.0 | 19.2 | 56.9 | 50.3 | 54.0 |
|  | Tuition fee fully waived | 0.0 | 0.0 | 0.0 | 0.1 | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 |
|  | Tuition fee partly waived | 2.2 | 0.0 | 1.2 | 0.3 | 0.0 | 0.2 | 1.4 | 0.0 | 0.8 |
| SecondaryHS | Free education | 61.6 | 62.8 | 62.0 | 26.1 | 25.3 | 25.7 | 49.7 | 46.0 | 48.2 |
|  | Tuition fee fully waived | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 | 0.0 |
|  | Tuition fee partly waived | 0.0 | 1.3 | 0.5 | 0.5 | 0.0 | 0.2 | 0.2 | 0.7 | 0.4 |

(Ref.: Table-17)
4.9.2 It is interesting to note that the proportion of students receiving free education at primary or middle level matched well with the proportion of students attending schools run by central or state government or local bodies as presented in Statement 4.6. Thus nearly 89\% of rural students and about $22 \%$ of urban students attending primary level classes got free education. At middle level, education was free for $83 \%$ of rural and $19 \%$ of urban students. At secondary and higher secondary level, it was free for $62 \%$ of rural and $26 \%$ of urban students. The proportion receiving free education was higher among rural students compared to urban students.
4.9.3 Statement 4.12 below depicts the proportion of beneficiaries of these educational incentives in different MPCE decile classes in rural and urban sectors. As expected, the proportion of students availing free education was high in the lower decile classes but gradually reduced as one moved up along MPCE decile classes in both the sectors. Thus, in rural Gujarat, the proportion of students receiving free education dropped from more than $93 \%$ in the poorest decile class to $60 \%$ or less in the richest class at primary and middle levels of education. The drop was even sharper in the urban sector for primary and middle level, from more than $86 \%$ to $4 \%$. In case of tuition fee exemption, however, a similar pattern was not observed. This could be because such waivers are not always accorded on economic considerations alone.

Statement 4.12: Percentage of currently attending students aged 5-29 years getting free education or exemption from tuition fees in MPCE decile classes

| Level of education | Type of incentive | MPCE decile group (\%) table 11bd |  |  |  |  |  |  |  |  |  |

(Ref.: Table -18)

### 4.10 Other Incentives

4.10.1 Some students are awarded scholarships or stipends in cash as long as they continue their studies or are provided with free or subsidized books and/ or stationery as educational incentives. In many states, schools provide the students with mid-day meals or concession in public transport fare for the students. In Statement 4.13 the proportion of students who reported having availed themselves of these incentives has been presented for different categories of population.

## Statement 4.13: Percentage receiving different types of incentives among students of age 5-29 years pursuing general education

| Type of incentive | Rural |  |  |  | Urban |  |  | Rural + Urban |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |  |
| Scholarship | 50.7 | 55.7 | 52.8 | 9.0 | 14.2 | 11.5 | 34.5 | 37.9 | 36.0 |  |
| Free/subsidized books | 61.8 | 68.0 | 64.5 | 14.1 | 15.9 | 15.0 | 43.3 | 45.6 | 44.3 |  |
| Free/subsidized stationery | 10.8 | 12.0 | 11.4 | 2.4 | 1.4 | 1.9 | 7.5 | 7.5 | 7.5 |  |
| Mid-day meals by govt. | 61.7 | 68.1 | 64.5 | 12.0 | 15.1 | 13.5 | 42.4 | 45.3 | 43.7 |  |
| Mid-day meals by others | 0.6 | 1.2 | 0.9 | 0.9 | 0.1 | 0.5 | 0.7 | 0.7 | 0.7 |  |
| Mid-day meals (total) | 62.4 | 69.2 | 65.3 | 12.9 | 15.2 | 14.0 | 43.1 | 46.1 | 44.4 |  |
| Concession in public transport fare* | 8.2 | 7.0 | 7.9 | 5.6 | 4.4 | 5.2 | 7.7 | 6.5 | 7.3 |  |

*obtained by multiplying the proportion of students using public
(Ref.: Table-20 transport by the proportion availing concession among them.
4.10.2 Of the students of age 5-29 and pursuing general education, $36 \%$ received scholarships, $44.3 \%$ received free or subsidized books, 7.5\% got free or subsidized stationery, $44.4 \%$ received mid-day meals and $7.3 \%$ got concession in public transport fare.
4.10.3 Rural students benefited more from these incentives, especially in respect of scholarship, free/ subsidized books, mid-day meals from government, etc. Thus, out of 1000 students in rural areas, 528 received scholarships compared to only 115 in urban areas, 645 received free or subsidized books compared to 150 in urban areas, and 645 received mid-day meals from government compared to 135 in urban areas.

Statement 4.14: Percentage of students receiving different types of incentives among students of age 5-29 years pursuing general education, separately for MPCE decile classes

| Type of incentive | Percentage student receiving incentives in MPCE decile class* |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 0-10 | 10-20 | 20-30 | 30-40 | 40-50 | 50-60 | 60-70 | 70-80 | 80-90 | 90-100 |
| Rural |  |  |  |  |  |  |  |  |  |  |
| Scholarship | 65.4 | 87.4 | 80.9 | 70.8 | 70.1 | 52.0 | 43.4 | 45.8 | 27.2 | 29.7 |
| Free/subsidized books | 76.0 | 91.7 | 71.8 | 77.0 | 64.0 | 59.6 | 51.0 | 69.8 | 58.0 | 52.1 |

| Mid-day meals by govt. | 86.4 | 86.8 | 72.9 | 74.4 | 69.1 | 60.3 | 56.5 | 65.2 | 57.2 | 47.9 |
| Mid-day meals by others | 1.8 | 0.5 | 0.0 | 1.7 | 0.9 | 0.0 | 0.0 | 2.2 | 1.0 | 0.7 |
| Mid-day meals (total) | 88.2 | 87.4 | 72.9 | 76.1 | 70.0 | 60.3 | 56.5 | 67.4 | 58.2 | 48.7 |
| Concession in public transport fare | 10.0 | 10.0 | 10.0 | 10.0 | 8.4 | 7.9 | 7.6 | 7.7 | 6.5 | 7.9 |
| Urban |  |  |  |  |  |  |  |  |  |  |
| Scholarship | 66.9 | 0.0 | 35.3 | 25.8 | 0.0 | 5.3 | 6.8 | 0.0 | 0.0 | 4.4 |
| Free/subsidized books | 72.4 | 0.0 | 46.9 | 39.7 | 0.0 | 12.0 | 4.9 | 0.0 | 0.0 | 5.8 |
| Free/subsidized stationery | 4.2 | 0.0 | 2.6 | 1.7 | 0.0 | 2.5 | 1.1 | 0.0 | 0.0 | 3.2 |
| Mid-day meals by govt. | 70.8 | 0.0 | 42.9 | 38.0 | 0.0 | 8.8 | 4.8 | 0.0 | 0.0 | 3.9 |
| Mid-day meals by others | 2.5 | 0.0 | 3.3 | 0.0 | 0.0 | 1.1 | 0.0 | 0.0 | 0.0 | 0.0 |
| Mid-day meals (total) | 73.4 | 0.0 | 46.2 | 38.0 | 0.0 | 9.9 | 4.8 | 0.0 | 0.0 | 3.9 |
| Concession in public transport fare | 10.0 | 0.0 | 0.0 | 0.0 | 0.0 | 9.1 | 10.0 | 0.0 | 0.0 | 1.4 |

*MPCE decile classes were obtained separately for rural and urban sector (Ref.: Table-21)
4.10.6 When students are classified by MPCE decile group, the proportion of beneficiary students is seen to drop steadily from the lowest to the highest decile class in respect of almost all the incentives (Statement 4.14 above), except some variation in middle classes.

Statement 4.15: Percentage of students receiving different types of incentives among students of age 5-29 years pursuing general education at different levels

| Type of incentive | Percentage students receiving incentives at level |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
|  | Primary | Middle | Sec./HS | Above HS | All |
| Scholarship | 41.4 | 33.3 | 27.8 | 17.3 | 36.0 |
| Free/subsidized books | 58.7 | 41.4 | 10.0 | 3.5 | 44.3 |
| Free/subsidized stationery | 8.7 | 7.7 | 3.6 | 2.9 | 7.5 |
| Mid-day meals by govt. | 61.0 | 39.4 | 3.0 | 0.0 | 43.7 |
| Mid-day meals by others | 0.6 | 0.9 | 0.7 | 0.0 | 0.7 |
| Mid-day meals (total) | 61.6 | 40.4 | 3.7 | 0.0 | 44.4 |
| Concession in public transport fare | 4.2 | 9.1 | 7.1 | 7.4 | 7.3 |

(Ref.: Table-22)
4.10.7 In Statement 4.15 above the proportions of beneficiaries are obtained separately for different levels of education. The percentage of students receiving scholarships decreased with increased educational levels. The percentage of students receiving free or subsidized books was $59 \%$ at primary level, $41 \%$ at middle level and $10 \%$ at secondary/ HS level. The percentage receiving free mid-day meals was as high as $62 \%$ at primary level, $40 \%$ at middle level and $4 \%$ at secondary/ HS level. The use of public transport and the percentage availing them of fare concessions in public transport ranges between 4.1 per cent to 9.1 per cent in different educational level.
4.10.8 If the students are classified by the type of educational institution attended, it is seen that those in institutions run by government or local bodies received more incentives compared to those in private institutions. Thus, about $55 \%$ of students in government and $85 \%$ students from local-body-run institutions got mid-day meals compared to $3 \%$ in aided private institutions and $1 \%$ in unaided private only. Note that this category included all institutions even at higher levels of education.

Statement 4.16: Percentage receiving different types of incentives among students of age 5-29 years pursuing general education by type of institution

| Type of incentive | Type of institute |  |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | :---: | :---: | :---: |
|  | Government | Local body |  |  |  | Private aided | Private unaided |
| Scholarship | 52.2 | 56.0 | 13.7 | 1.3 |  |  |  |
| Free/subsidized books | 56.7 | 81.0 | 5.2 | 0.9 |  |  |  |
| Free/subsidized stationery | 14.5 | 9.1 | 0.7 | 0.6 |  |  |  |
| Mid-day meals by govt. | 53.9 | 83.5 | 2.1 | 0.4 |  |  |  |
| Mid-day meals by others | 0.6 | 1.3 | 0.6 | 0.3 |  |  |  |
| Mid-day meals (total) | 54.5 | 84.8 | 2.6 | 0.6 |  |  |  |
| Concession in public transport fare | 7.2 | 7.5 | 8.2 | 3.1 |  |  |  |

(Ref.: Table-23)
4.10.9 Differentials across institution types were equally marked in case of free/ subsidized books, with $56.7 \%$ \& $81 \%$ of students in governmentrun schools and institutes run by local body respectively compared to $5.2 \%$ in aided private and $1 \%$ in unaided institutions. Differentials were less marked in case of concessional fares in public transport.

## C. Private Expenditure on Education

4.11.0 Education has all along remained an important development priority, necessitating intervention by government for its easy access and reach to different sections of society. As a result, it has involved subsidization, mainly in the form of establishment of a large number of schools operated by government and local bodies for affordable availability of education.
4.11.1 Nevertheless, individuals attending educational institutions incur expenditure in the form of payment of fees of different kinds (tuition fee, examination fee, other fees, etc.), purchase of books, stationery and uniforms, expenses on conveyance, private coaching, etc. This is referred to as private expenditure on education. In the current survey information on this has been obtained from all the persons in the agegroup 5-29 years currently attending at primary level and above. For all the courses attended, related information on private expenditure on education incurred by the 'students' was collected in the survey and is summarized here.

### 4.12 Average expenditure on education

4.12.1 The average annual private expenditure in general, technical and vocational education and again, for general education by level of current attendance, is presented in Statement 4.17 separately for each sex and sector.
Statement 4.17: Average annual expenditure (Rs.) per student of age 5-29 years by type and level of education

| Type \& level of education | Rural |  |  | Urban |  |  | Rural + Urban |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |
| Primary | 764 | 569 | 674 | 6175 | 5359 | 5790 | 2790 | 2432 | 2625 |
| Middle | 1383 | 1252 | 1327 | 4618 | 14378 | 9130 | 2797 | 7420 | 4852 |
| Sec./HS | 3202 | 3570 | 3337 | 9968 | 6567 | 8331 | 5468 | 4911 | 5239 |
| Above HS (General) | 5000 | 4941 | 4981 | 9049 | 7297 | 8117 | 6492 | 6314 | 6418 |
| General education all | 1494 | 1242 | 1385 | 6143 | 8931 | 7459 | 3302 | 4542 | 3857 |
| Technical education | 9445 | 0 | 9445 | 78357 | 62033 | 76024 | 70916 | 62033 | 69766 |
| Vocational education | 3240 | 0 | 3240 | 18986 | 0 | 18986 | 9689 | 0 | 9689 |

(Ref.: Table-24, 30, 31)
4.12.2 At primary level the average annual expenditure worked out to Rs. 2625 with the urban average of Rs. 5790 which is more than 9 times the rural average Rs. 674. For students in level middle, secondary/ higher
secondary, and above higher secondary, the average expenditure in a year was found to be Rs. 4852, Rs. 5239 and Rs. 6418 respectively.
4.12.3 Average expenditure on vocational education was, in both rural and urban sectors, around double the average expenditure of general education and expenditure on technical/ professional education, in turn, was three times in rural and four times in urban sectors that on vocational education. In technical education the average annual expenditure was estimated to be as high as Rs. 69766 while for vocational education it was Rs. 9689.

### 4.13 Components of private expenditure on education

4.13.1 The private education expenditure is composed of different items of educational expenditure, viz. tuition fees, examination fees, other fees and payments, expenditures on books, stationery, uniform, conveyance, private coaching, etc. For different categories of population - formed by sex and sector, the average expenditure for each of the above components has been presented in Statement 4.17 below. All the types and levels of education in major course are taken into account for estimating the average expenditure on different items.

Statement 4.18: Average annual expenditure (Rs.) per student of age 5-29 years pursuing any education by item of expenditure

| Item of expenditure | Rural |  |  |  | Urban |  |  |  | Rural + Urban |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | :---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |  |  |
| Tuition fee | 260 | 177 | 224 | 5387 | 6728 | 6007 | 2314 | 3012 | 2623 |  |  |
| Examination \& other <br> payment | 67 | 52 | 60 | 550 | 227 | 400 | 260 | 127 | 201 |  |  |
| Books \& stationery | 405 | 344 | 379 | 921 | 777 | 855 | 612 | 531 | 576 |  |  |
| Uniform | 297 | 283 | 291 | 525 | 479 | 504 | 388 | 368 | 379 |  |  |
| Transport | 185 | 116 | 155 | 1346 | 1433 | 1386 | 650 | 686 | 666 |  |  |
| Private coaching | 186 | 148 | 170 | 576 | 434 | 511 | 342 | 272 | 311 |  |  |
| other expenses | 129 | 124 | 127 | 472 | 147 | 322 | 267 | 134 | 208 |  |  |
| Total | $\mathbf{1 5 2 9}$ | $\mathbf{1 2 4 2}$ | $\mathbf{1 4 0 6}$ | $\mathbf{9 7 7 5}$ | $\mathbf{1 0 2 2 2}$ | $\mathbf{9 9 8 2}$ | $\mathbf{4 8 3 2}$ | $\mathbf{5 1 2 9}$ | $\mathbf{4 9 6 3}$ |  |  |

(Ref.: Table- 26)
4.13.2 For the State as a whole average expenditure on tuition fees was Rs. 2623, examination fee, other fees and payments Rs. 201 together contributed about more than half of total expenditure was Rs. 4963 on education. Transport expenditure was Rs. 666 reported to be the next major component of expenditure followed by Books and stationery
expenditure of Rs. 576. Further, there is a noticeable difference in average amount spent on tuition fee, examination fee, other fees and transport between rural and urban sectors.

Fig.4.5b: percentage distribution of private expenditure on education into items of expenditure in Urban Gujarat

4.13.3 Fig. 4.5a \& 4.5b depict the share of the individual items in the private expenditure on education in the rural and the urban sector. In rural, tuition fee, together with examination fee \& other fees and payments, contributed $20 \%$ of total expenditure while another $27 \%$ was spent on books and stationery and $12 \%$ was spent on private coaching.
4.13.4 In the urban sector tuition fee alone contributed $60 \%$ of total expenditure. Transport, had $14 \%$ share with another $9 \%$ claimed by books \& stationery.
4.13.6 In Statement 4.18 above, the average annual expenditure was worked out over all the attending, students in a particular population category. However, not all of them incur expenditure on each item of education. Statement 4.19 below indicates the proportion of students reporting expenditure on different items. For example only above $42 \%$ of the students reported payment of tuition fee, although tuition fee was seen (Statement 4.18) to be one of the largest component of total educational expenditure. While $39 \%$ students had paid examination or other fees, more than $98 \%$ students had incurred some expenditure on books and stationery. There was wide variation between rural and urban sectors in the proportion of students incurring expenditure on items like tuition fee, transport and private coaching. Thus, nearly $77 \%$ of urban students but only $16 \%$ of rural students reported having paid tuition fees, while transport expenditure was incurred by about $62 \%$ of urban students and only $15 \%$ of rural students.

## Statement 4.19: Percentage of students pursuing any education reporting expenditure on specific items of expenditure

| Item of expenditure | Rural |  |  |  | Urban |  |  | Rural + Urban |  |  |
| :--- | ---: | :---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |  |
| Tuition fee | 18 | 14 | 16 | 77 | 77 | 77 | 42 | 41 | 42 |  |
| Exam. fee, other | 22 | 17 | 20 | 68 | 66 | 67 | 40 | 38 | 39 |  |
| Books \& stationery | 97 | 97 | 97 | 99 | 99 | 99 | 98 | 98 | 98 |  |
| Uniform | 74 | 72 | 73 | 90 | 88 | 89 | 80 | 79 | 80 |  |
| Transport | 18 | 11 | 15 | 61 | 62 | 62 | 35 | 33 | 34 |  |
| Private coaching | 7 | 6 | 7 | 15 | 10 | 13 | 10 | 8 | 9 |  |
| Other expenses | 24 | 25 | 24 | 17 | 16 | 16 | 21 | 21 | 21 |  |

(Ref.: Table-26)
4.13.7 Statement 4.20 below shows the shares of individual components in the average expenditure of students for each type of education and level of current attendance. It can be seen that in technical as well as in vocational education, tuition fee, examination fee and other fees together claimed a much larger share in the total expenditure, than they did in general education.

Statement 4.20: Average annual expenditure* (Rs.) per student of age 5-29 years by item of expenditure for each type and level of education

| Item of <br> expenditure | General education |  |  |  | Technical <br> education | Vocational <br> education |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
|  | Primary | Middle | Sec./HS | Above HS |  |  |
| Tuition fee | 1160 | 2735 | 918 | 2276 | 55764 | 369 |
| Exam. fee, other | 56 | 117 | 269 | 445 | 5678 | 674 |
|  <br> stationery | 312 | 547 | 942 | 1358 | 4803 | 716 |
| Uniform | 317 | 409 | 548 | 204 | 482 | 1100 |
| Transport | 630 | 756 | 366 | 1339 | 1352 | 0 |
| Private coaching | 71 | 169 | 1449 | 500 | 486 | 37 |
| Other expenses | 79 | 120 | 752 | 295 | 1200 | 9689 |
| Total | 2625 | 4852 | 5239 | 6418 | 69766 |  |

*only major course considered here, as data on break-up of
(Ref.: Table-27, 30, 31)
expenditure was collected for major course only
4.13.8 It is of interest to examine average expenditure per reporting student by item of expenditure for different types and levels of education (Statement 4.21 below). The average tuition fee paid at primary level was Rs. 3472 for students who incurred some expenditure on tuition fees, compared to Rs. 1160 averaged over all students. Again those at primary level incurring transport expenditure spent on the average Rs. 2373 on transport, compared to the much lower average of Rs. 630 obtained by considering all primary level students.

Statement 4.21: Average annual expenditure (Rs.) per reporting student* of age 5-29 years by item of expenditure for each type and level of education

| Item of expenditure | General education |  |  |  | Technical education | Vocational education |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Primary | Middle | Sec./HS | Above HS |  |  |
| Tuition fee | 3472 | 6278 | 1839 | 2764 | 60975 | 6793 |
| Exam. fee, other | 217 | 267 | 416 | 597 | 8602 | 369 |
| Books \& stationery | 319 | 560 | 961 | 1358 | 4803 | 674 |
| Uniform | 390 | 477 | 679 | 1356 | 1586 | 716 |
| Transport | 2373 | 2139 | 800 | 1589 | 2541 | 1100 |
| Private coaching | 1625 | 2275 | 4635 | 3666 | 9451 | 0 |
| Other expenses | 424 | 581 | 2731 | 1309 | 4033 | 37 |

*average for each item is based on the number of
(Ref.: Table-29, 30, 32) students reporting expenditure on that particular item
4.13.9 The synthesis of rural-urban differentiation in the expenditure per student is further elaborated in Statement 4.22 below, in respect of levels of general education. At primary level, expenditure per student in urban areas was Rs. 5792, more than eight times that in rural areas. This disparity was largely accounted by tuition fee, which in case of urban students was almost $50 \%$ of their total expenditure, but only about $13 \%$ in case of rural. This is also in consonance with higher propensity of schooling in government/ local body schools in rural areas.

Statement 4.22: Average annual expenditure (Rs.) per student of age 5-29 years pursuing general education for different levels of education

| Item of expenditure | Primary |  |  | Middle |  |  | Secondary/HS |  |  | All |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Rural | Urban | R+U | Rural | Urban | R+U | Rural | Urban | R+U | Rural | Urban | R+U |
| Tuition fee | 89 | 2898 | 1160 | 224 | 5783 | 2735 | 430 | 1713 | 918 | 212 | 3851 | 1693 |
| Exam. fee, other | 7 | 137 | 56 | 33 | 219 | 117 | 204 | 373 | 269 | 60 | 206 | 120 |
| Books \& stationery | 219 | 462 | 312 | 357 | 776 | 547 | 816 | 1146 | 942 | 377 | 705 | 510 |
| Uniform | 222 | 472 | 317 | 328 | 507 | 409 | 478 | 661 | 548 | 292 | 500 | 376 |
| Transport | 33 | 1599 | 630 | 167 | 1471 | 756 | 351 | 391 | 366 | 148 | 1396 | 656 |
| Private coaching | 30 | 137 | 71 | 92 | 262 | 169 | 792 | 2517 | 1449 | 170 | 512 | 309 |
| Other expenses | 75 | 87 | 79 | 126 | 113 | 120 | 269 | 1537 | 752 | 127 | 291 | 193 |
| Total | 675 | 5792 | 2625 | 1327 | 9131 | 4852 | 3340 | 8338 | 5239 | 1386 | 7461 | 3857 |

(Ref.: Table-27)
4.13.10 The transport and examination fee per urban student was much higher than that of rural students for primary and middle level education. However, the rural-urban expenditure difference reduces, as one move up to higher levels of education. This was also due to steeper hike by more than two-fold in expenditure per rural student, from middle (Rs.
1327) to secondary/higher secondary (Rs. 3340). The major contributors to the increase in rural expenditure per student at these higher levels were tuition fee, examination fee and private coaching.
4.13.11 One other aspect would be to find the average amount spent on different items of expenditure by those who reported expenditure on the items by type of institution attended. But this exercise is restricted to general education only. From Statement 4.23 below it is seen that those who have paid tuition fee have spent Rs. 1266 on an average in institutions run by government and local body, Rs. 1921 in private aided and Rs. 6062 in private unaided institutions. However on private coaching, students in these three types of institutions have spent on an average Rs. 2967, Rs. 3924 and Rs. 2539 respectively. The other cost intensive components was transport, on which students have incurred high expenditure.
Statement 4.23: Average annual expenditure (Rs.) per reporting student* of age 5-29 years pursuing general education by item of expenditure and by type of institution

| Item of expenditure | Type of Institution |  |  |
| :--- | ---: | ---: | ---: |
|  | Govt. \& local |  | Private aided |
| Tuition fee | 1266 | 1921 | private unaided |
| Exam. fee, other | 309 | 395 | 6062 |
| Books \& stationery | 379 | 832 | 265 |
| Uniform | 386 | 667 | 706 |
| Transport | 1068 | 1191 | 527 |
| Private coaching | 2967 | 3924 | 2450 |
| Other expenses | 738 | 1599 | 2539 |

*average for each item is based on the number of students
(Ref.: Table-33)
reporting expenditure on that particular item

## D. Non-enrollment

### 4.14 Non-enrollment in different age-groups

4.14.1 The percentage of never enrolled persons in different age-groups between 5 and 29 years is summarized as below:

## Statement 4.24: Percentage of never enrolled persons of age 5-29 years in different age-groups

| Age- <br> group(years) | Rural |  |  |  | Urban |  |  | Rural + Urban |  |  |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | :---: |
|  | Male | Female | Total | Male | Female | Total | Male | Female | Total |  |

(Ref.: Table-35)
4.14.2 Statement 4.24 above provides segregation of never enrolled persons in different age groups with gender and sector specific details. Now, the variation in this percentage across the age-groups provides illuminating insights into the changing scenario. Among persons in the age-group 25-29 years, $31 \%$ in rural areas and $15 \%$ in urban areas - were found to have never been enrolled. In both sectors the percentage drops steadily as one move along the age-groups 18-24, 14-17 and 11-13, etc. This is an encouraging pattern because it indicates a positive development diminishing phenomenon of non-enrollment. Clearly, the percentage of never-enrolled persons in the age-group 11-13, 14-17, or 18-24, must be shrinking over time. Thus a significant improvement in the enrollment status of population over the last 2 to 3 decades. The higher percentages of never enrolled children at ages 5 and lower do not affect this conclusion, being obviously due to late entry of many children into the educational system, particularly in rural Gujarat. Nearly 95\% of persons in the age-group 11-13 were found to have been enrolled in educational institutions. The enrollment percentage remained reasonably stable for the next age-group (14-17), modestly declining to 93 percentages.

### 4.15 Non-enrollment and MPCE level

4.15.1 It would also be interesting to find out how the proportion of neverenrolled changed with change in household living standards as measured by household monthly per capita expenditure (MPCE). From Statement 4.25 below it can be observed that the proportion of neverenrolled persons, considering all ages between 5 and 29, fell steeply from over $36.6 \%$ in the poorest decile class to only $3.3 \%$ in the richest decile class in rural Gujarat. In urban Gujarat, the percentage is uneven
in different MPCE classes, it is highest in MPCE class 20-30 i.e. 39.2\%. While it is lowest in MPCE class 40-50, 70-80 and 80-90 i.e. 0\%.

Statement 4.25: Percentage of never enrolled persons of age 5-29 years in each MPCE decile class

| MPCE decile class (\%) | Rural |  |  | Urban |  |  |
| :---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  | Male | Female | Total | Male | Female | Total |
| $00-10$ | 27.0 | 44.6 | 36.6 | 7.5 | 14.3 | 11.3 |
| $10-20$ | 20.8 | 27.1 | 23.7 | 0.0 | 0.0 | 0.0 |
| $20-30$ | 7.8 | 28.3 | 16.9 | 39.8 | 38.8 | 39.2 |
| $30-40$ | 9.6 | 21.7 | 15.9 | 2.3 | 6.9 | 4.2 |
| $40-50$ | 14.0 | 20.9 | 16.8 | 0.0 | 0.0 | 0.0 |
| $50-60$ | 5.3 | 15.4 | 10.2 | 0.4 | 1.6 | 1.0 |
| $60-70$ | 2.0 | 24.0 | 12.1 | 0.2 | 1.6 | 1.1 |
| $70-80$ | 7.7 | 13.7 | 10.6 | 0.0 | 0.0 | 0.0 |
| $80-90$ | 2.0 | 2.0 | 2.0 | 0.0 | 0.0 | 0.0 |
| $90-100$ | 1.9 | 5.2 | 3.3 | 9.6 | 0.3 | 5.9 |

(Ref.: Table-36)
4.15.2 The highest percentage of population never enrolled was $37 \%$ in poorest decile class for rural sector and $39 \%$ in third decile class for urban sector. The fall in the proportion of population never enrolled was steepest for rural females - from $44.6 \%$ in poorest decile class to less than $5.2 \%$ in the richest. In the urban sector, both male and female highest percentage of never enrolled in third decile class $40 \%$ for male and $39 \%$ for female.

### 4.16 Reason for non-enrollment

4.16.1 The break-up of the proportion of never-enrolled by reason for nonenrollment for different categories of persons (i.e. rural female, rural male, urban female, urban male) is given in Statement 4.26 below. Only one reason, considered to be most important, was recorded for each never-enrolled person from a specified list of reasons. Therefore, the reasons might not be mutually exclusive. The three most frequently given reasons for non enrollment were, a) parents not interested in education of their children (26.7\%), b) education not considered necessary (18.6\%) and c) financial constraints (16.5\%). For urban 'financial constraints' was most commonly given as the reason for nonenrollment, $80 \%$ for urban males and $45 \%$ for females. Among rural females, only $3.1 \%$ reported that they did not enroll for financial reasons. For rural population categories 'parents not interested' was the
most common reason. This reason was recorded for as many as $28 \%$ of the never-enrolled rural females and $27 \%$ of the rural males.

Statement 4.26: Percentage distribution of never-enrolled persons of age 529 years by major reason for non-enrollment

| Major reason for non-enrollment | Rural |  | Urban |  | Rural + <br> Urban |
| :--- | ---: | ---: | ---: | ---: | ---: |
|  | Male | Female | Male | Female | All persons |
| Parents not interested in studies | 27.1 | 28.1 | 12.2 | 33.2 | 26.7 |
| Education not considered necessary | 24.7 | 21.1 | 0.9 | 6.2 | 18.6 |
| Financial constraints | 8.8 | 3.1 | 79.9 | 44.6 | 16.5 |
| No tradition in the community | 4.8 | 18.1 | 1.5 | 5.5 | 11.6 |
| To attend other domestic chores | 0.8 | 4.8 | 0.0 | 1.0 | 2.9 |
| School is far off | 6.4 | 5.3 | 0.0 | 0.3 | 4.6 |
| For participating in other economic activities | 1.0 | 0.8 | 0.0 | 0.0 | 0.7 |
| To work for wage/salary | 3.5 | 0.6 | 0.0 | 0.0 | 1.3 |
| To look after younger siblings | 2.3 | 3.3 | 0.0 | 0.7 | 2.4 |
