CHAPIER - I

INIRODUCTION

Daman & Diu' are the two seperate isolated land blocks situated at a distance of about 792 kms. away from one another on the West coast of Arabian sea and on the border of Gujarat State. Both these pockets, formely each comparising a block cum district of erstwhile Union Territory of Goa, Daman & Diu have been formed into a seperate Union Territory after de-linking of Goa, which attainded a state hood on 30th May '87. Earlier they were Portuguese colonies until 19th December, 1961 when they got liberated along with Goa. As per the documented history, Daman was acquired by the Portuguese in 1559 from the State of Gujarat, after having attacked at many times. Prior to that it remained under one of the seven division pf Konkan Vaishyas between the 2nd Centuary B.C.to 13th centurary A.D.

The documented history of Diu begun with Mouriyas in (B.C. 322 to 222 B.C.). This part was conquered by Portugues: in 1546 from South Gujarat. In between the above period both "Daman" and "Diu" had chaptered history, having been under the posse sion and ruled by many Kings and Dynasties.

PHYSICAL FEATURES

Location: Daman is loacted on the west coast of India between the parallels 20-27'-25" and 20-22'-00" of latitude north and between the meridians 72-49'-42" and 72-54'-43" of longitude east of Greenwich. Its length from the extreme north and south measures 11.4 kms. and the width from east to west measures 7.7 kms. The district of Daman is bounded on the north by the Bhagavan river, on the east by Gujanat state, on the south by Kalem river and on the west by the Arabian Sea.

Diu is situated between the parallels 20-44'-34'' and 20-42'-00'' of latitude north between the meredians 71-00'-24'' and 70-52'-26'' of longitude east of Greenwich. Its length from the extreme north and south measures 4.6 kms. and width from east to west measures 13.8 kms.

PHYSICAL CHARACTER :

Physiographically, Daman forms a small part of the South Gujarat and has been developed on alluvial deposits brought down by parallel flowing streams from peint part of Sahyadri Ranges. Daman is divided by Daman Ganga river into two district parts traditionally known as Moti-Daman to the south and Nani Daman to the North. Now, both these parts have been connected by a bridge.

The physical feature if `DIU' are similar to those of Saurashtra, but it is even more arid and saline. Diu is tiny island in the Arabian Sea near the port of Veraval, is

seperated from the southern extremity of the Saurashtra peninsula by a narrow channel running through a swamp. The channel is navigable only for fishing boats and small crafts. On the south of the island, there is a sandstone cliff washed by the sea. Close by, the water is deep. The tpopgraphy is generally plain, the hillocks attaining a maximum heights of 30.5 mts. The harbour, though small, is an excellent one where vessels can lay at anchor in two fathoms of water.

RIVERS:

In Daman there three west flowing rivers pass through the terrain namely Bhagavan river running along the north boundry, the Kalem, river flowing to south boundry and the Damanganga flowing in between. The last one is nevigable with a bar at its mouth. There is a roadstead outside the bar where vessels upto 400 tonnes can anchor and discharge cargo.

SOILS

Soil in Daman is moist and fertile, incase of Diu it is barren and sultry.

RAINFALL AND CLIMATE

Both Daman & Diu have four seasons. These being summer season from March to May, South west monsoon from June to September, post monsoon from October to November and winter season from December to February. Despite humidity the climate is pleasant.

In Daman the climate is mild and warm. The altitude of Daman town is 12 mts. above the sea level. The Daman town received the average annual rainfall of 2,062.7 mm. The maximum and minimum temperature of this town respectively is 0 0 32 C and 20 C.

In Diu the climate is sultry. The altitude of Diu town is six metres above sea level and it received the average rainfall of 706.4 mm. The maximum and minimum temperature of this town respectively is 30.8 and 20.4 C.

AREA :

Daman has an area of 72 sq.kms. comprising 21 villages and a municipal town of Daman. Diu has an area of 40 sq.kms. with 5 villages and one municipal town. Thus, the combined area of the new Union Territory of Daman & Diu is 112 sq.kms.

POPULATION :

As per 1991 Census, this Daman has a population of 61,951 of which nearely 20% were tribals. The scheduled castes comprised less than 4% of the total population. The urban population is

sizeable being a little over 50% .Sex retio has declined to 917 from 1017 during the decade 1981-91. The birth rate for 1990 was 39.7 per 1000 persons and the death rate 5.6. The density of population is 860 per sq.km.

LITERACY :

As per 1991 Census, the overall percentage of literacy in Daman was 62 percent. The literacy in the age above 7 years is about 73 percent for the U.T.

ECONOMY :

The economy of Daman is mainly based on agriculture and marine products. It is famous for its dried Bombay ducks and salted fish. Of the total 7200 Ha. about 2382 Ha. is covered by food crops (paddy being principal crop) and 151 Ha. by cash crops like coconut, mango and vegetables. An additional area of 360 Ha is cultivable. The area under forest is 52 Ha

Fruit trees are rared in small tracts of good soil having some irrigation facilities.

The important activity of inhabitants of Daman is trade and business and the import oriented economy prevailing at the time of Portuguese rule has been replaced by greater and multiple trade channel with the Gujarat hinterland.

The touristic importance of Daman has also considerably increased after formation of these areas into separte U.T, giving a boost to the local economy. It has a number of historical monuments such as, the churches, temples and fort. The beaches also attract the tourists in a large number.

In Nime, the majority of the population is engaged in fishing and the production of salt. Quite a sizeable population had also engaged in producing exquisite handicrafts made of ivory tortoise and horns of animals which ofcourse now declining. Only about 10% (384 Ha.) of the total area of 4000 Ha. is covered with food crops (mainly Bajra) and 86 Ha. by cash crops like coconut, vegetable etc. Candy area is thickly covered by branches palms called OKRA.

IRANSPORI :

Daman is linked by road, rail and air. The necessary railway station being VAPI'. A Vayodoot services has also started. By road, Daman is Nearly 175 kms from Bombay and 100 kms. from Surat.

Diu is linked by road. The nearest railway station is Veraval in Gujarat at a distance of about 111 kms. The nearest airports are Keshod and Bhavnagar both in Gujarat State. Diu also had a small airport during POrtuguese period which had been destroyed during its liberation. Now it has been reconditioned and a Vayudoot service may start soon.

GENERAL:

Both Daman and Diu have an old history of urbanisation. They were mini town and had a trade abroad. Comparatively speaking, Diu is more pictursque than Daman, though undeveloped. However, the tourism had not been paid much attention in these areas which has emerged into a main economic industry after formation of these areas as separate U.T.

CHAPTER - II

RESOURCE MOBILISATION

The main source of Revenue for this Union Territory are Land Revenue, Stamp & Registration fees, State Excise, Sales Tax, Vehicle and Goods Duties. Yearwise total of Revenue receipts for Daman district and Diu district is given below

	TOTAL	REVENUE	RECEIPTS	(Rs. i	n crores)
Year			Daman	Diu	Total (Daman&Diu)
1985-86			11.58	,D, 61	12.19
1986-87			9.31	0.61	9.92
1987-88		•	,11.30	0.77	12.07
1.988-89			N.A.	N.A.	20.05
1.98990			N.A.	N.A.	24.77
1990-91			N.A.	N.A.	33.43
1991-92	(Antici	pated)	N. A	N. A	34.36
1992-93	(Target) 	N. A	N. A	37.80

Amongst all the resources, the central excise, sales tax contribute a major portion of revenue for this U.T.

It will be seen that during the seventh five year plan, the revenue receipts have almost trippled from Rs. 12.88 crores to Rs. 34 crores per annum. Thus the U.T. has been maintaining a steady growth in revenue receipt against the expenditure on various committed liabilities.

CHAPTER - III

THE PLANNING PROGRESS

The Planning Process for the U.T of Daman and Diu in its real sense started from the Annual Plan 1988-89 formation of its a separte U.T consequent upon formation of Goa as fulfledged State. Prior to that these districts had been benefitted through Planned development programmes of the erstwhile U.T of Gos Daman and Diu and thus had benefits of building various infrastcutures necessary for a district.

Data collected from the available records in Daman & Diu provide some vague idea of thrust given for the development of these regions prior to delinking. The plan expenditure for Daman & Diu during the proceeding five year plan is given below :

Total Plan expenditure and per capita plan expenditure during the 4th. 5th and 6th and 7th Five Year Plan period for the U.T. of Daman and Diu is shown below.

Plan period	Outlay (Rs.Crores) Daman & Diu	(Rs. crores)	
IV Plan (1969-74)	3.11 *	D. 71	113
V Plan (1974-78)	4.53 *	2.34	372

6N'WAL ELAN 1992-97

The Annual Flam 1992-93 has been prepared keeping in the basic approach and strategy envisaged in the context of Eighth Five Year Plan and other priorities which were drawn during the Seventh Five Year Plan.

1) The Priorities:

During the seventh five year plan, the new proposals enlisted were the following.

- a) Setting up of a Polytechnic College at Daman.
- b) Expansion of intake capacity in the technical training institutes & introduction of new courses.
- c) Expansion of bed caracity in the cottege hospital et Daman and Primary Health Centre, Diu.
- d) Construction of various functional and non-functional buildings for the govt. incl. housing for govt. servants.
- e) Infrastructure for the development of primary economic sentential Animar Susbandry, Dainy & Fishery.
- f) Cheation of various administrative infrastructure for fusioning toptt., Animal Husbandry, Fishery, Forestry, Tourism, Information & Publicity, Social Welfare Deptt.
- g) Investment with the Govt. of Gujarat for second power contactor at Damen.
- h) Setting up of a compon Industrial Development Corporation for Daman & Diu.

All the above mentioned projetos/schames are the major spill over for eighth plan.

2) New Schemes:

The following New Schemes/Projects had been proposed for the Annual Plan 1998-91 and 1991-92 some of which were not agreed to for that plan period. The same have been proposed for the Eighth Plan 1992-97 and Annual Plan 1992-93 as there had been a large demand from the Public leaders.

- a) Hotriculture Farm, Piggery farm, Poultry farm.
- b) Weigh bridges, coastal highway with a new bridge over Damanganga river, new antises erosion walls at Daman and Diu, dredging of sea creeks between Diu & Chogla, development of minor ports under Transport Section.
- c) State subsidy scheme for development of industries and setting of Industries Deptt.

- d) Schemes under Science & Technology, new projects under Tourism sector like tourist hostel, tourist complex, sailing club.
- e) Setting up of Kala Academy, Central library.
- f) T.B. Hospital.
- g) Sewerage scheme.
- h) Industrial workers housing scheme.
- i) Land acquisition for Kendriya Vidhyalaya.

Some of these schemes were not approved for the Annual Plan 1991-92 and therefore have been again included in the Annual Plan 1992-93. Few schemes have been slightly modified keeping in view the local conditions.

Since the various capital works have been included in the Annual Plan 1992-93, there is also substantial amount required for land acquisition.

Total outlay of Rs. 28.16 crores has been proposed for this Annual Plan of which 18.53 crores account for capital works which envisage an employment potential of 6222 person on regular basis for the plan period.

.

U.T. OF DAMAN AND DIU

THE BROAD SYNOPSIS OF EIGHTH FIVE YEAR PLAN 1992-97

The Eighth Plan of the U.T. of Daman and Diu has been formulated keeping in view the strategy and approach as envisaged by the National Development Council at the national level. With in these frame works, the regional priorities has been kept in view at the first instance inwhich the public leaders are actively involved. The approach basically is towards generating large employment in the U.T.; Creation of technical manpower, reduce disparities in the income, more precisely through anti-poverty programmes and work on decentralised Planning process with people participation.

The Union Territory is gradually urbanising because of developmental thrust laid on some important sectors like fishing, tourism, and industry. Still it has a large rural area and hence major flow of Plan development funds is towards the rural development.

Daman and Diu historically are small town having municipalities and hence 27 percent of population is also distributed in urban area. Daman is more urbanised than Diu having 43 percent of Urban population. The majority of population in urban area are engaged in fishing. Therefore, priorities for agricultural and rural development has been given in the eighth plan , precisely on fisheries.

Industrial growth has taken place at a high rate during last 3-4 years and hence demand for power as well as water supply has increased. These form the basic and more important programmes for eighth plan which call for priority.

The following new schemes have been included under the eighth plan.

- i) New farm for hotriculture and seed development.
- ii) Poultry, Piggery farm.
- iii) Training programme for fishermen, fish seed farm, development of inland fishery though already developed infrastructure like ponds/tanks, Investment in public sectors for fisheries marketing, and financial support etc..
- iv) New schemes in forestry to involve villagers and the school children in forest preservation and development and social /farm forestry, creation of new infrastructures like parks, and basic amenities for the Forest Office.
- v) Regulation of holding and consolidation of holdings, Primary Reporting System.
- vi) Coastal highway with second bridge on Damanganga, widening of navigational channel in Daman and Diu, Improvement of light house and minor ports, weigh bridge, Traffic education cell, Ferry services.

- vii) State subsidy scheme for development of industries, setting up of Industries Department. Ship breaking yard.
- viii) More tourist infrastructure like tourist hotel, tourist complex, sailing club, incetives to local entreprenueres, tourist inforantion bentres and tourists transports.
- ix) District forum under Civil Supply & construction of godown.
- x) Kala academy at Daman, construction of Bal Bhavan building, opening Govt. College at Diu, land acquisition for Kendriya Vidyalaya/Navodaya Vidyalayas, office complex for Education Department.
- xi) T.B. Hospital, Aid testing centre, Mobile food laboratory.
- xii) Renovation/desilting of existing drinking wells ; Sewerage system.
- xiii) New schemes for repairing of tribal houses, Industrial workers housing, strengthening of residential building establishment.
- xiv) Assistance to voluntary organisations, cretches centre, free legal aid and advice to poor, medical assistance to poors. New public works like Secretariat office complex.
- xv) I.T.I. Hostel at Diu. Apprenticeship Training,

The total outlay envisaged for the eighth plan 1992-97 is of the size of Rs.137 crores against the actual outlay of Rs. 75 crores approved last year for the period 1990-95. These projections are a little over three times of the actual Assistnace of Rs. 40.55 crores provided during seventh plan.

Following are the important sectors for which large demands for plan investment has been proposed in the 8th Plan.

Sectors	8th Five Year Plan Proposal
Irrigation	501.88
Power	881.OD
Industry	1938.50
<u>Iransport</u>	
Ports & Lighthouse	302.00
Roads & Bridges	1524.90
Other Transport	254.60
Tourism	646.50

Education :

i) General Education 892.40

ii) Technical Education 677.35

Medical & Public Health 596.75

Water Supply 1212.55

Housing 1078.45

Public Works 567.00

Priority Programme:

The Agricultural & Rural Development, Inrigation, Elementary Education, Water Supply, Rural Electrification, Rural Health are the priority sectors and therefore, the outlay are earmanked for them which cannot be diverted or curtailed significantly. The share of these proposal is about Rs. 38 crores in the eighth plan 1992-97 and Rs.7 crores for 1992-93.

Minimum Needs Programme :

This programme seeks to establish a network of bisic services and facilities of social consumption in all areas. It comprises Education, Health, Drinking Water Supply, Nutrition, Rural Housing, Rural Roads and Environmental Improvement of Slums. The allocations are earmarked and cannot be diverted.

All the inhabited villages in Daman and Diu have teen electrified except some of the wados which are being electrified under normal development programme. There is no village as such which can be classified as problem village. However, shortage of water supply exists to some extent. This will be solved through providing bore wells, stand ports, reparing and renovation and desilting of existing wells. The major drinking water supply from Damanganga Reservoir for Daman and from Raval Dam for Diu, will further solve problems of shortage of water supply to these areas.

Growth of population calls for increasing the educational and health facilties which are provided through this programme. The outlay proposed for Educational activities during the Eighth Five Year Plan is 1816.50 lakks while for Health Services it is 596.75 lakks

20 - Point Programme

This programme renews the govt. committments to eradicate poverty, remove socio economic disparities, reduce income inequalities and improve the quality of life. The antipoverty programme like increasing agricultural production, Irrigation, Health, Education, Shelter and Employmental oppurtinities are the main committments of this programme which have been sept in view in the approach towards eighth plan.

Iribal Sub Plan :

20.24 percent population of Daman district is inhabited by tribals. Inorder to improve their economic conditions and bringing them above poverty line, a seperate sub plan is being implemented in Daman district since 1976. A number of family oriented and individual beneficiary schemes are being implemented A Sample Survey conducted earlier indicated that 20 percent of the tribals still live below poverty line and need to be uplifted This gap still exists as per the present index. In view of this and national strategy for reducing the poverty gap, it is imperative to continue the Tribal Sub Plan during the eighth plan. While few schemes viz providing subsidy/loan for mechanised boats is being discontinued in eighth plan in view of the inability to repay the loan, new schemes have been included for improving their economic conditions. Since the territory is fastly developing, the poultry development needs special a thrust through extention services. In this regard, special scheme for assisting tribals in setting up their small poultry 'units viz. backyard poultry has been envisaged.

Inview of the fuel shortage in the territory it has been felt necessary to divert the tribals in utilisation of natural source of energy for their domestic purpose. Scheme of supply of solar cookers is of special significance. Most of the other schemes for their socio economic development have been proposed to be continued during the eighth plan. Thus Tribal Sub Plan component is Rs.634.85 lakhs for 8th Plan 1992-97 and Rs. 150.93 lakhs for annual plan 1992-93 which is about 5 percent. The proportion appears to be dismal against the total general plan outlay as the general plan outlay envisages investment for major capital infrastructure for Roads and Bridges, Irrigation, Power and Water Supply.

Right to Work:

Government commitments to the people towards right to work is the basic and most important approach of the planning policy. In the eighth Five Year Plan 1992-97, this fundamental issue has been taken utmost care while formulating the plan scheme and projects. The projects and programmes outlined in the eighth plan of the union teritory provide both for the skilled and unskilled labour force in the territory.

The present rural labour force which purely depends upon the wage employment constitute bout 2000 numbers which by the end of 1992-97 would not increase significantly keeping in view the present trend. the estimated number of this category of workers would be at the most 2500 by 1997. In order to provide them full employment every year it is necessary to generate work for about 2.00 lakhs persondays.

The other category of the rural labour force are the cultivators who until get full time work in the fields also need to be given work for at least 100 days in a year. The present strength of this manpower is about 4200. It is expected that their number would not bring much fluctuation the in the demand for work in rural area. Thus additional 4.20 lakhs mandays are required to be generated in the trritory for their full

employment. The schemes/projects proposed in thee eight planprovide for more than these estimates.

The programmes for both the above category of manpower, are envisaged under decentralised planning approach. While, in the case of first category who are the landless agricultural laboureres, priority will be given under the Jawahar Rojgar Yojana, the other category of workers will besides having opportunities under JRY, will have adequate capacity under other programmes like roads, bridges, housing, power, public works programmes undertaken by the U.T. Administration. The works enlisted in the eighth plan would have a potential of generating wage employment of about 60.64 lakhs person-days i.e on an average of about 12 lakhs person days yearly. Thus as against the available laboour force in the territory, the capital projects proposed by the Ut. Administration will generate empoyment double than its absorbing capacity.

There is another category of manpower who are inhabitating in urban area and for whom no special programme has been thought of earlier. There are about 1437 urban poors in the Union Territory of Daman Diu who do require work for their subsistence. This category of workers will be provided employment through special programme under Nehru Rojgar Yojana under which micro enterprises willbe set up, training infrastructure support and employment will be provided and public assets will be created.

The skilled and semiskilled manpower is about 4300 persons as per the statistics available in the Employment Exchanges. A sizeable employment potential is being created in the industrial sector which can absorb about a thousand person in a year. The development of touristic infrastructe has a large impact on the private sector which too has a large capacity to absorb the additional manpower created every year.

Above all, the employment potential in the govt. sector itself has been envisaged for a little above 7000 persons for the eighth plan. It is estimated that the Union territory has already attained a zero unemployment situation.

Employment and unemployment projections for Eighth Five Year Plan, 1992-97.

. *. .* .

Eradication of unemployment situation is the commitment of the govt, and therefore it is one of the strategic approach for the eighth plan. The additional employment will largely depend upon the extent to which expected incremental income in different sectors of economy is achieved.

As the U.T of Daman and Diu have formed only three years ago i.e in 1987, during the middle of seventh plan, no estimates of employment have been built earlier. These data as per National Sample Survey are also not available for Daman and Diu which could provide some etimates for this purpose. However, available official statistics and population census data may be utilised for estimating unemployment in order to envisage suitable approach for the eighth plan.

The population at present i.e as per 1991, Census based is about 1.81 lakhs person. Thus there is a growth of 26 percent during the decade 1981-91. Using these latest growth rates of population; the projected population by 1997 will be 1.15 lakh person. The estimated number of different categories of workers by 1997 at these rates will be as under:

S1.No	Category of workers	Number as on 1981	Projections for 1997
1	2	3	4
1. Agricu	ultural workers		
i) (Cultivators	4196.	5496
ii) A	Agri. labourers	1838	2078
2. Other	main workers	15182	17170
3. Margir	nal workers	5023	5681
	Total	26239	30425

It is estimated that net addition of unskilled workers during the next five years will be to the extent of only 240 persons. Thus there will be about 2100 unskilled workers by 1997 who will have to be provided full wage employment every year for at least 100 days. Taking into account the other factors it is predicted that the number of unskilled workers by 1995 will be at the maximum about 2500 persons. Thus we are required to generate an employment for about 2000 persons every year. As this class of workers is mostly in rural area, they will have seasonal work in the agricultural operations while for the remaining period they will have to be provided adequate scope for work.

The U. T of Daman and Diu has atpresent 2766 hect of area available for cultivation of foodgrain crops. There are about 4200 cultivators who have only seasonal employment in

agricultural operations. Irrigation potential created through minor irrigation programmes is 1038 hect at ppresent of which net irrigated area is 514 hect which is cultivated by about 800 holdings. Thus only 800 cultivators work on full time in their fields. Remaining 3400 persons will have to be provided work for at least 3 months. It is expected that by 1997 water from Damanganga Reservoir project will be available to entire Daman district which will provide full time work through out the year to this category of workers in the rural area.

SKILLED AND SEMI-SKILLED WORKERS:

under:

The Employment Exchange Statistics indicate about 4500 persons as skilled/unskilled workers on the live register. Net addition to this every year is to the extent of about 750 persons on account of dropout in schools especially after Secondry and Hr. Sec. About 450 children go for higher studies. Average turnout from the college is about 300 candidates. About 200 candidates come out from the Industrial Training Institute. Thus during the Annual plan net addition of skilled/semiskilled labour force is to the extent of 1400 persons. At this rate we will have to accomodate about 7000 person for direct /indirect employment in different sectors. Additional 200 technically trained person will

be available from the Polytechnic College during the period 1993-97. Thus its is estimated that we will have to accommodate about 13000 semiskilled /skilled persons during the eighth plan as

Sl. No. Particulars	Estimated No persons (Pr	o. of unemployed rojections)
	1992-97	1992-93
1. Present backlog	4500	4500
Additions due to drop outs in the sec/hr. sec classes	375 0	750
3. Out turn from colleges	2250	450
4. Out turn from polytechnic	200	40
5. Out turn from ITI	1000	200
Total	11700	5940

Out of the total persons on the live register, 122 are skilled ITI trained personnels and 44 professionals in Engineering and Medical fields who seek employment preferably in the local govt. About 20 percent of the registered ITI trained persons and about 7 percent of professionals are completely unemployed. Thus only 24 ITI trained and 3 professionals in engineering fields are actually unemployed as on oct'91

Out of the remaining registered candidates about 30 percent seek any alternative employment in the govt. offices. Among these the unemployed females are only about 20 percent.

The data of last five years indicate that not more than 1000 person get registered in the Employment Exchange. The yearly placement in govt. offices is as much as 40 percent on an average, Out of the registred candidates about 5 percent already fully employed have re-registered for higher prospects in govt. and public sector.

Though the local ITIs bring every year about 160 or say 200 personnels, only 40 percent of them have registred in Employment Exchange as the other get self employed or go outside the teritory. Thus at this rate the net addition of skilled personnels will be only 400 at the maximum during the eighth plan.

Net new addition of professionals in engineering /medical files is about 10 person every year. At this rate it is expected that by 1992-97 additional 50 such persons will have to be provided jobs.

In view of above, the actual unemployment for eighth plan which will need priorities is as under:

Category · of	Projections for								
manpower	199	92-97	1992-93						
	Backlog	New	Backlog	New					
I.T.I trained	24	400	24	40

Others	1773	5000	1773	1000					
Polytechnic		200	*** •	40					
Total	1800	5650	1800	1090					

Employment Potential for eighth Plan 1992-97 and Annual Plan 1992-93

A large number of scheme envisaged for the eighth plan are such that they would provide adequate employment opportunities directly as well as indirectly to the skilled, semiskilled person increase production and raise the regional economy and the standard of the people. The extent of full time employment that will be available from various socio economic sectors of development is given below which does not include any administrative staff which needs to be created under the govt. departments:

In addition to th Centrally sponsored anti poverty programme implemented by the Rural Development Agency will provide adequate employment to the target group of families. Thus, it is expected that the employment opportunites for skilled and unskilled workers will be more than the available force.
