This volume on District Educational Statistics for the State of Assam is the fifth in the series of such volumes, brought out for all the States and Union Territories. The main aim is to highlight the inter-district variations in a State by giving educational data at district levels with the help of some important indices such as enrolment ratio, percentage of trained teachers, per-capita expenditure and teacher-pupil ratio etc.

In order to ascertain whether the educational imbalances have widened or narrowed down over a period of time, the data for the year 1981-82 has been analysed and compared with that for the year 1976-77.

I take this opportunity to acknowledge the assistance received from the Director of Education, Assam in supplying the required statistical data and the Project staff of the Planning, Monitoring & Statistics Division in compiling this report.

The Ministry of Human Resource Development, Department of Education brings out the publication "Educational Statistics - District-wise" quinquennially since 1965-66 to highlight the Regional imbalances in educational sector. The first volume of such publication was published in 1960-61 by the National Council of Educational Research and Training.

2. In this volume, the comparative picture of Educational Statistics of Institutions, Enrolment & Teachers at district level in respect of Assam is given for the year 1976-77 and 1981-82. Indicators like enrolment, ratio, teacher pupil ratios and average school available for the population etc. in each district are also depicted in this report.

II - AREA AND POPULATION

3. The total area of the Assam State as per 1971 Census is 78,523 Sq. Kms. Assam had 10 districts in 1981-82 and 1976-77. The maximum area belonged to Goalpara (10,359 Sq.Kms) and the minimum N.C. Hills (4,890 Sq.Kms.). It may be mentioned here that due to disturbed conditions in the state, the 1981 Census could not be conducted there.

4. The estimated population for the year 1977 was 176.80 Lakhs which has been worked out for the year 1982 as 203.90 lakhs (107.25 lakhs Males and 96.66 lakhs Females). In 1977, among the districts the largest population was in Kamrup district (34.50 lakhs) and the lowest in N.C. Hills (0.92 lakh). In 1982 also the estimated population varied widely among the districts from 39.80 lakhs in Kamrup district to 1.06 lakhs in N.C. Hills district.

5. The overall density of population per Sq. Km. was 226 in 1977 which is estimated to have increased to 260 Sq.Km. in 1982. The density of population per Sq.Km. in 1982 varied widely among Districts viz. from 421 the highest in Nagaon to only 22 the lowest in N.C. Hills. The Area, total population and density of population for different Districts for the year 1976-77 and 1981-82 are given in Appendix No.2. Table No.(I) gives district-wise position of percentage share of area and percentage share of population in 1982:

.... /-

TABLE-I. Extent of Variation in Area, Population & Density of Population

Name of the District	Percentage share of Area - 1982	Percentage share of Population in 1982	Density of Population Per Sq. Km. in 1982.

2. Darrang	11.2	11.9	276
3. Dibrugarh	8.9	9.6	280
4. Goalpara	13.2	15.2	299
5. Kamrup	12.6	19.5	403
6. Lakhimpur	7.2	4.9	176
7. Nagaon	7.1	11.5	421
8. Sibsagar	11.5	12.6	285
9. Karbi Anglong	13.2	2.6	51
10. N.C. Hills	6.2	0.5	22
TOTAL	100.0	100.0	260

6. The total population of the State as well as population of different Age-Groups for the year 1977 and 1982 given in this report are based on the revised population projections (as on 1st March of the year) available from the office of Registrar General of India. District-wise population in the Age-Groups 6-11, 11-14 and 14-17 are based on the following formula:-

We assume that

$$\frac{P_{6-11}}{P} = \frac{P_{6-11}^i}{P^i} = K$$

$$P_{6-11}^i = KP^i$$

where K is estimated from the equation $K = \frac{P_{6-11}}{P}$

P_{6-11} = Denote 6-11 Age-Group population of the State

P = Total Population of the State

P_{6-11}^i = Age-Group Population of the ith District

P^i = Total Population of the ith District.

To get the Sex-wise break-up of total population in the various Age-Groups of the district first the Girls population is estimated using the above equation with the only difference that in the above formula Total Population is replaced by the Girls population. The boys population is obtained by subtracting girls population from the total population for the respective districts.

7. Similar formulae are used for estimating the District-wise Population in the Age-Groups 11-14 and 14-17 years.

8. The Total estimated population of children in the Age-Group 6-11 years was 29.23 lakhs in 1982 (15.14 lakhs Boys and 14.09 lakhs Girls) which formed 14.3% of the total population of the State.

9. Similarly the estimated population in the Age-Group 11-14 years was 14.63 lakhs in 1982 (7.37 lakhs Boys and 7.26 lakhs Girls) which constituted 7.2% of the total population.
10. The estimated population in the Age-Group 14-17 in 1982 was 14.13 lakhs (7.16 lakhs Boys and 6.97 lakhs Girls) which formed 6.9% of the total population.
11. Thus out of the Total Population of 203.91 lakhs of the State, School Going Population in the Age-Group 6-17 years was 57.99 lakhs consisting of 29.67 lakhs Boys and 28.32 lakhs Girls. The population in the Age-Group 6-17 years constituted 28.4% of the Total Population. The percentage for Boys was 27.7% while for Girls it formed 29.3%. District-wise details are given in Appendix No.2.

III. -LITERACY

12. Census was not held in Assam during 1981 due to disturbed conditions in the state.
