PREFACE

The emphasis of empowerment of women has gained prominence in modern times with the increasing awareness of the need to secure equality among men and women in the society. In order to understand and tackle gender issues positively, it is necessary to have an idea about men and women on various aspects. This publication is an effort towards this end.

The publication 'Gender Statistics, Manipur 2006' is a maiden issue brought out by the Directorate of Economics and Statistics, Manipur. It focuses on the database related with population, health, education, economic and social contribution reflecting the existing status of both men and women of the state.

The co-operation and help extended by the Government and other non-Government agencies in making available the data base is very much appreciated. The publication is prepared by the Graphics Section in association with COP Section. The efforts put in by all the officials of the units are gratefully acknowledged.

I hope this publication will be useful to all the data users including Planners Policy makers, Research workers and Academicians. Suggestions for improving the coverage and presentation of the publication would be most welcome.
