## P R E F A C E

In the present day work, education is a national concern as it has become a vital instrument for social, cultural and political transformation of society. Education planning has, therefore, assumed great importance so as to ensure optimum use of our limited resources of man, money and materials to achieve national priorities in the field of education. This helps to relate education to life, needs and aspiration of the people. Proper educational planning and its effective implementation pre-supposes a Statistical base. In fact, it is no exaggeration to say that modern culture has tended to become a statistical culture.

With a view to have better control on educational activities and supervision of school, the Union Territory of Delhi has been divided into five educational districts viz. North, East, Central, South and West comprising of 23 zones as under :-

District North	Zones 1-6
District East	Zones 7-10
District Central	Zones 11-16
District South	Zones 17-22
District West	Zones 23-28

For demarcation of the districts, the geographical boundaries such as main road, railway lines, etc. have been taken in view.

Zonal boundaries are demarcated so as to make the zones compact and convenient for supervision/inspection purposes.

Initially, the senior Secondary/Secondary and Middle schools were distributed equally among the four districts and as such each district had six zones. However, with opening of more schools according to requirement of increasing population which was not always evenly distributed, the number of schools and consequently the number of zones per district has varied resulting in the creation of 23 zones in all.
