## Chapter I

### List of Tables

Table No.	Title	Page No.
(1)	(2)	(3)
1	Number of villages/blocks, households, total no. of persons, persons aged 5-29 years, persons aged 5-29 years currently attending any type of education, persons aged 5-29 years currently enrolled but not attending in any type of education and average household size, both surveyed and estimated for the state	T1-T3
2A.1	Per 1000 distribution of households by deciles class, separately for each social group	T4-T6
2A.2	Per 1000 distribution of households by deciles class, separately for each religion	T7-T9
2B	Per 1000 distribution of households by distance from school having primary, upper primary and secondary level classes for each decile class	T10-T14
2C	Per 1000 distribution of households by distance from school having primary, upper primary and secondary level classes for each social group	T15-T17
2D	Per 1000 distribution of households by distance of school having primary, upper primary and secondary level classes for each religion	T18-T23
3A	Per 1000 distribution of persons by level of education for each age-group	T24-T32
3B	Per 1000 distribution of persons by level of education for each decile class in MPCE	T33T-41
4B	Per 1000 distribution of persons of age 5-29 years by current attendance and current enrolment status for each decile class in MPCE	T42-T50
4C	Per 1000 distribution of persons of age 5-29 years by current attendance and current enrolment status for each social group	T51-T59
4D	Per 1000 distribution of persons of age 5-29 years by current attendance and current enrolment status for each religion	T60-T68
5B	Per 1000 distribution of students of age 5-29 years by level of current attendance by each decile class in MPCE	T69-T77
5C	Per 1000 distribution of students of age 5-29 years by level of current attendance for each social group	T78-T86
5D	Per 1000 distribution of students of age 5-29 years by level of current attendance for each religion	T87-T95
6A	Estimated and sample number of persons of different age-groups by broad class group in school education and the rest	T96-T104
6B	Gross attendance ratio by broad class group in school education	T105-T107
7	Age specific attendance ratio by broad age group in general education	T108
8	Net attendance ratio by broad class group in general education	T109
9	Per 1000 distribution of currently attending students of age 5-29 years by broad level of education and nature of institution	T110-T114
10	Per 1000 distribution of currently attending students of age 5-29 years pursuing general education by type of institution being currently attended and	T115-T119

<b>Table No.</b>	<b>Title</b>	<b>Page No.</b>
<b>(1)</b>	<b>(2)</b>	<b>(3)</b>
	broad level of education	
11B	Proportion (per 1000) of students of age 5-29 years pursuing general education and (a) getting free education, (b) fully exempted from tuition fee and (c) partly exempted from tuition fee by broad education level for each decile class in MPCE	T120-T128
11C	Proportion (per 1000) of students of age 5-29 years pursuing general education and (a) getting free education, (b) fully exempted from tuition fee and (c) partly exempted from tuition fee by broad education level for each type of institution	T129-T137
12B	Proportion (per 1000) of students of age 5-29 years pursuing general education and receiving (i) scholarship, free or subsidized books/stationary, mid-day meals, etc. and (ii) mode of transport and concession, if any for each decile class in MPCE	T138-T146
12C	Proportion (per 1000) of students of age 5-29 years pursuing general education and receiving (i) scholarship, free or subsidized books/stationary, mid-day meals, etc. and (ii) mode of transport and concession, if any for each level of education	T147-T155
12D	Proportion (per 1000) of students of age 5-29 years pursuing general education and receiving (i) scholarship, free or subsidized books/stationary, mid-day meals, etc. and (ii) mode of transport and concession, if any by type of institution	T156-T164
13B	Average expenditure (Rs.) per student of age 5-29 years pursuing general education by broad level of education for each decile class in MPCE	T165-T169
13C	Average expenditure (Rs.) per student of age 5-29 years pursuing general education by broad level of education for each type of institution	T170-T174
14	Average annual expenditure (Rs.) per student in different types of courses	T175-T177
15B.1	Average annual expenditure (Rs.) per student of age 5-29 years pursuing general education on various items of expenditure	T178-T182
15B.2	Average annual expenditure (Rs.) per student of age 5-29 years pursuing general education for each level of education	T183-T187
15B.3	Average annual expenditure (Rs.) per student of age 5-29 years pursuing general education for each type of institution	T188-T190
15C.2	Average annual expenditure (Rs.) per student of age 5-29 years pursuing technical/professional education for each level of education	T191-T193
15C.3	Average annual expenditure (Rs.) per student of age 5-29 years pursuing technical/professional education for each type of institution	T194-T196
15.D.2	Average annual expenditure (Rs.) per student of age 5-29 years pursuing vocational education for each level of education	T197-T201
15D.3	Average annual expenditure (Rs.) per student of age 5-29 years pursuing vocational education for each type of institution	T202-T204
16B	Average annual expenditure (Rs.) per reporting student of age 5-29 years pursuing general education by item of expenditure for each level of education	T205-T209
16C	Average annual expenditure (Rs.) per reporting student of age 5-29 years pursuing general education by item of expenditure for each type of institution	T210-T214
17C	Proportion (per 1000) of ever-enrolled persons aged 5-29 years by age group for each completed level of education	T215-T259

<b>Table No.</b>	<b>Title</b>	<b>Page No.</b>
<b>(1)</b>	<b>(2)</b>	<b>(3)</b>
18B	Per 1000 distribution of drop-outs/discontinuing (age 5-29 years) by reason for dropping out/ discontinuing for each decile class of MPCE	T260-T304
19B	Proportion (per 1000) of never enrolled persons (age 5-29 years) and their per thousand distribution by reason for non-enrolment in each age-group	T305-T313
19C	Proportion (per 1000) of never enrolled persons (age 5-29 years) and their per thousand distribution by reason for non-enrolment in each decile class	T314-T322
20B	Per 1000 distribution of enrolment status and attendance status in the 5-29 years age-group for each decile class of MPCE	T323-T328
21	Proportion of repeaters in currently attending students by broad class-group in general education for different age-groups	T329-T333
22	Per 1000 distribution according to nature of change in educational institution of currently attending students by level of current attendance in general education	T334-T338
23	Per 1000 distribution of enrolment status of the person aged 5-29 years who are currently not attending any educational institution	T339-T341

--x--

## **Chapter II**

### **Concepts and Definitions**

2.1 The concepts and definitions used in the survey are presented in this chapter.

2.2 **Coverage of the survey:** The survey, in its initial portion dealing with demographic characteristics, covers the present status of the population including educational level, current attendance and enrolment status. But the main thrust is on persons of age 5-29 years irrespective of whether they are currently attending any educational institution or not. For this purpose, the term 'education' has been used to include:

- a) School education including those under Education Guarantee Scheme (EGS) commencing from class I to X or XII, as the case may be, irrespective of the recognition status of the educational institution .
- b) Higher secondary / Pre-university education leading to certificate/ diploma/ degree etc. It also includes enrolment in private unrecognised institutions, which have regular classes and following the syllabus and pattern of the education as in recognised schools or colleges and which sponsor students for public examinations as private or external candidates
- c) General University education, whether full time or part time, leading to certificate/ diploma/ degree etc. The Universities not recognised by University Grants Commission were not covered
- d) Correspondence courses conducted by Universities, Deemed Universities or Institutions, authorised by competent authorities for awarding regular degrees or diplomas or certificates
- e) Higher secondary / Pre-university / Under-graduate/ Post-graduate / Professional/ Technical education leading to certificate/diploma/degree etc. conducted by recognised open university/schools
- f) Technical or Professional courses, leading to degree/diploma/certificates, conducted by Universities, Deemed Universities or institutes like, National Institute of Fashion Technology, National School of Drama, Satyajit Ray Film and Television Institute, Film and Television Institute of India, Lok Nayak Jayaprakash Narayan National Institute of Criminology and Forensic Science, etc. or Institutions, authorised by competent authorities like All India Council of Technical Education (AICTE), Medical Council of India (MCI) etc.
- g) Professional courses conducted by Institutes like The Institute of Chartered Accountants of India, The Institute of Cost and Works Accountants of India, The Institute of Company Secretaries of India, Actuarial Society of India, etc.,
- h) All types of vocational courses of duration three months or more, conducted by Institutions like Industrial Training Institute (ITI), National Vocational Training Institute, Regional Vocational Training Institutes, etc., authorised by competent authorities

- i) All the courses at primary level and above, whether recognised or not, conducted by recognised educational institutions and which are not covered under above-mentioned categories.

**2.3 Level of Education:** It refers to the different stages of educational attainment. The levels are (i) not literate, (ii) literate without any schooling, (iii) literate without formal schooling, (iv) literate with formal schooling, (v) below primary, (vi) primary, (vii) middle, (viii) secondary, (ix) higher secondary, (x) diploma/certificate, (xi) graduate, and, (xii) post-graduate and above. It may be noted that if a person has successfully passed the final year of a given level, then and only then he/she has been considered to have attained that level of education. For example, the level attained by a person studying in Class IX will be middle but the level at which he/she is currently studying is secondary.

**2.4 Literate:** A person is considered literate if he / she can read and write a message in at least one language with understanding.

**2.5 School Education Levels:** A uniform pattern in the number of years of schooling at primary, middle, secondary and higher secondary levels are yet to be achieved. Generally, the primary level refers to Classes I-V, the middle to Classes VI-VIII, the secondary to Classes IX-X and the higher secondary to Classes XI-XII. While in Maharashtra State, the primary level comprises of Classes I-IV, the middle Classes V to VII, the secondary Classes VIII-X and the higher secondary Classes XI-XII. In The State higher secondary is either taught in schools or in colleges.

**2.6 Type of Education:** Education is broadly divided into three categories: (i) general education and (ii) technical and professional education and (iii) Vocational. General education, in this survey, includes general school education from the primary to the higher secondary level, normal university education for a degree whereas technical/professional courses involve the hands on training in addition to theoretical classes. Educations like Engineering, Medicine, Agriculture, Management, Chartered Accountancy, Cost Accountancy etc. are examples of technical/ professional courses. The education which aims at imparting training in very specific fields through providing significant 'hands on' experience in acquiring necessary skills, which will make them employable or create for them opportunities of self employment and the degree/ diploma/ certificate awarded by the institute have recognition by State/ Central Government/ public sector or similar employers are included under vocational education. Education offered by ITIs, polytechnics, etc. are examples of vocational courses.

**2.6 Nature of Institution:** This refers to whether the institution is recognised or not. A recognised school / institution is one in which the course(s) of study followed is/are prescribed or recognised by the Government or a university or a board constituted by law or by any other agency authorised in this behalf by the Central or State Government. It also satisfies one or more of the authorities, e.g. Directorate of education, Municipal Board, Secondary Board, etc. with regard to its standard of efficiency. It runs regular classes and sends candidates for public examination, if any.

**2.7 Type of Institutions:** This refers to the type of management by which the institution is run. It may be run by Government, a local body or a private body either receiving or not receiving Government aid. Thus, the four types are: (a) Government, (b) Local Body, (c) Private aided and (d) Private unaided. All schools/ institutions run by Central and State Governments, public sector undertakings or autonomous organisations completely financed by the Government are treated as Government institutions. All institutions run by municipal corporations, municipal

committees, notified area committees, zilla parishads, panchayat samitis, cantonment boards, etc. are treated as local body institutions. A private aided institution is one, which is run by an individual or a private organisation and receives maintenance grant from a Government or a local body. A private unaided institution is one, which is managed by an individual or a private organisation and is not receiving maintenance grant either from a Government or from a local body.

2.8 **Free Education:** Education is free of tuition fee in Government schools in most of the States and also in private schools in some States up to certain levels of education. There are some schools where students up to a certain level are not required to pay tuition fees. Nevertheless, a fixed sum of money has to be paid such as development fee, library fee, etc. Education in such schools is still considered to be free. This applies to the institution as a whole and not to the specific situation obtaining for the student.

2.9 **Exemption from Tuition Fees:** This refers to exemption from payment of tuition fees granted to some students on some special consideration in those institutions where it is reported that the education is not free. The exemption may be full or partial.

2.10 **Private Expenditure on Education:** It is the sum total of all the expenditures incurred by the student on education (towards fees, books & stationery, uniform, transport, private coaching, study tours, etc.).

2.11 **Attendance and enrollment:** The current attendance status refers to whether a person is currently attending any educational institution or not. While every person who is attending an educational institution is necessarily enrolled in that institution, it may so happen that a person who is enrolled is not currently attending the institution. While most of the official educational statistics are based on enrolment, the NSSO Survey, because of its household approach, bases its analysis on the current attendance status.

2.12 **Dropout:** The term 'dropout' has been used in two senses. It may mean either: (i) one who has discontinued education for which he or she was enrolled or (ii) one who has discontinued education before attaining a specific level. According to the first definition, for example, if a person has completed the middle level but does not enroll for higher education, he/she is not considered as a dropout. It is considered as a case of discontinuation. However, if the person enrolls for the secondary level but does not complete it then he/she is considered as dropped out.

--x--

## Chapter III

### Sample Design and Estimation Procedure

#### 1.1 Sample Design

1.1.1 **Outline of sample design:** A stratified multi-stage design has been adopted for the 64th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. However, for the newly declared towns and out growths (OGs) in census 2001 for which UFS had not been done (i.e. non-UFS towns), each individual town/OG was considered as an FSU. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs i.e. villages/ towns/ blocks requiring hamlet-group (hg)/ sub-block (sb) formation, one intermediate stage was the selection of two hgs/ sbs from each FSU.

1.1.2 **Sampling Frame for First Stage Units:** *For the rural sector*, the list of 2001 census villages (Panchayat wards for Kerala) constituted the sampling frame. *For the urban sector*, the list of latest available Urban Frame Survey (UFS) blocks and for non-UFS towns list of such towns/ OGs had been considered as the sampling frame.

1.1.3 **Stratification:** Within each district of a State/ UT, generally speaking, two basic strata had been formed: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, within the urban areas of a district, if there are one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them had been considered to form a separate basic stratum and the remaining urban areas of the district was considered as another basic stratum. For a few districts, particularly in case of Tamil Nadu, if total number of non-UFS towns in the district exceeded certain number, all such towns taken together had been considered to form another basic stratum. Otherwise, they had been merged with the UFS towns for stratification.

#### 1.1.4 Sub-stratification:

1.1.4.1 **Rural sector:** If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed was ' $r/4$ '. The villages within a district as per frame were first arranged in ascending order of population. Then sub-strata 1 to ' $r/4$ ' were demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and had more or less equal population.

1.1.4.2 **Urban sector:** If 'u' be the sample size for a urban stratum, ' $u/4$ ' number of sub-strata were formed. The towns within a district, except those with population 10 lakhs or more and also the non-UFS towns, were first arranged in ascending order of population. Next, UFS blocks of each town were arranged by IV unit no. X block no. in ascending order. From this arranged frame of UFS blocks of all the towns, ' $u/4$ ' number of sub-strata were formed in such a way that each sub-stratum had more or less equal number of FSUs.

1.1.4.3 For towns with population 10 lakhs or more, the urban blocks were first arranged by IV unit no. X block no. in ascending order. Then ' $u/4$ ' number of sub-strata were formed in such a way that each sub-stratum had more or less equal number of blocks.

1.1.4.4 All non-UFS towns, if available in a district and exceeded a certain minimum number, formed one separate stratum within the district. Hence, there were separate stratum numbers for

UFS towns and non-UFS within a district. No sub-stratification was done for non-UFS towns. However, sub-stratum number for all sample non-UFS towns was given as 1 for uniformity.

**1.1.5 Total sample size (FSUs):** 12,688 FSUs for central sample and 13,600 FSUs for state sample were allocated at all-India level. For Maharashtra State, the central sample size was 1,008 FSUs and the state sample size was 1,256 FSUs.

**1.1.6 Allocation of total sample to States and UTs:** The total number of sample FSUs was allocated to the States and UTs in proportion to population as per census 2001 subject to a minimum sample allocation to each State/UT. While doing so, the resource availability in terms of number of field investigators was kept in view.

**1.1.7 Allocation of State/ UT level sample to rural and urban sectors:** State/ UT level sample was allocated between two sectors in proportion to population as per *census 2001* with 1.5 weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu etc. had not exceeded the rural sample size. A minimum of 8 FSUs had been allocated to each state/ UT separately for rural and urban areas. Further the State level allocation for both rural and urban had been adjusted marginally in a few cases to ensure that each stratum gets a minimum allocation of 4 FSUs.

**1.1.8 Allocation to strata:** Within each sector of a State/ UT, the respective sample size was allocated to the different strata in proportion to the stratum population as per census 2001. Allocations at stratum level had been adjusted to a multiple of 4 with a minimum sample size of 4.

**1.1.9 Selection of FSUs:** From each sub-stratum of a district of rural sector, four FSUs were selected with Probability Proportional to Size With Replacement (PPSWR), size being the population as per census 2001. For urban sector, from each sub-stratum four FSUs were selected by using Simple Random Sampling Without Replacement (SRSWOR) for UFS towns and by PPSWR in case of non-UFS towns with size being the population as per Census 2001. Within each sub-stratum, samples were drawn in the form of two independent sub-samples in both the rural and urban sectors.

**1.1.10 Selection of hamlet-groups/ sub-blocks/ households:** Large FSU having approximate present population of 1200 or more was divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

approximate present population of the sample village/block	no. of hgs/sbs to be formed (D)
less than 1200 (no hamlet-groups/sub-blocks)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

For rural areas of Himachal Pradesh, Sikkim and Poonch, Rajouri, Udhampur, Doda districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups formed is as follows.

approximate present population of the sample village/block	no. of hgs/sbs to be formed (D)
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

Two hamlet-groups (hg)/ sub-blocks (sb) were selected from a large FSU wherever hamlet-groups/ sub-blocks had been formed, by SRSWOR. Listing and selection of the households were done independently in the two selected hamlet-groups/ sub-blocks described as sample hg/ sb 1 and 2. The FSUs without hg/ sb formation were treated as sample hg/ sb number 1.

#### 1.1.11 Formation of Second Stage Strata and allocation of households

1.1.11.1 **Schedule 10.2 (employment & unemployment and migration particulars):** All the households listed in the selected FSU/ hamlet-groups/ sub-blocks were stratified into three second stage strata (SSS) as given below:

SSS 1:	households having at least one out-migrant and received at least one remittance from him/ her during last 365 days
SSS 2:	remaining households having at least one other type of migrants, including temporary out-migrants, for employment purpose
SSS 3:	other households

1.1.11.2 **Schedule 25.2 (participation and expenditure in education):** The listed households had been stratified into two SSS as under:

SSS 1:	households having any member of age 5 – 29 years enrolled at primary and above level
SSS 2:	other households

1.1.11.3 **Schedule 1.0 (household consumer expenditure):** The listed households had been stratified into two SSS as under:

SSS 1:	relatively affluent households
SSS 2:	other households

In rural areas a household was classified as affluent if (i) it owned any of the items such as motor car/ jeep/ tractor/ combine-harvester/ truck/ bus/ van, consumer durables like fridge/ washing machine or spacious pucca house in good condition or (ii) a household member was a professional such as doctor/ advocate or has a high salaried job or (iii) the household owned 2 hectares or more cultivable land or 1 hectare or more irrigated land or (iv) owned at least 10 heads of cattle and buffaloes. From among all such households, ten relatively most affluent households constituted the SSS1.

Similarly, in the urban sector, a cut-off point 'A' (in Rs.) had been determined from NSS 61st round data for **each NSS region** in such a way that top 10% of the households had MPCE equal to or more than 'A'. All the listed households with MPCE more than 'A' were considered as affluent.

The values of cut-off point A (urban MPCE in Rs.) for each NSS state region

State	State-region code	description	A (urban MPCE in Rs.)
Maharashtra	271	Coastal	2,912
	272	Inland Western	2,119
	273	Inland Northern	1,998
	274	Inland Central	1,414
	275	Inland Eastern	1,816
	276	Eastern	1,589

1.1.11.4 Compositions of second-stage strata (SSS) with number of households to be surveyed from different SSS for various schedules of enquiry were as follows:

SSS	composition of SSS within a sample FSU	number of households surveyed	
		FSU without hg/sb formation	FSU with hg/sb formation (for each hg/sb)
<b>schedule 10.2</b>			
SSS 1:	households having at least one outmigrant and received at least one remittance from him/ her during last 365 days	2	1
SSS 2:	remaining households having at least one other type of migrants, including temporary out-migrants, for employment purpose	4	2
SSS 3:	other households	4	2
<b>schedule 25.2</b>			
SSS 1:	households having any member of age 5 – 29 years enrolled at primary and above level	4	2
SSS 2:	other households	4	2
<b>schedule 1.0</b>			
SSS 1:	relatively affluent households	2	1
SSS 2:	other households	2	1

1.1.12 **Selection of households:** From each SSS the sample households for each of the schedules were selected by SRSWOR. If a household was selected for more than one schedule, then only one schedule was canvassed in that household in the priority order of Schedule 10.2, Schedule 25.2 and Schedule 1.0 and in that case the household was replaced for the other schedule. If a household was selected for Schedule 10.2 it was not selected for Schedule 25.2 or Schedule 1.0. Similarly, if a household was not selected for Schedule 10.2 but selected for Schedule 25.2 it was not selected for Schedule 1.0.

## 1.2 Estimation Procedure

### 1.2.1 Notations:

- s = subscript for s-th stratum  
t = subscript for t-th sub-stratum  
m = subscript for sub-sample (m=1,2)  
i = subscript for i-th FSU [village (panchayat ward)/block/non-UFS town or OG]  
d = subscript for a hamlet-group/sub-block (d= 1,2)  
j = subscript for j-th second stage stratum in an FSU/hg/sb [ j = (1,2 or 3 for schedule 10.2), (1 or 2 for schedules 25.2 and 1.0)  
k = subscript for k-th sample household under a particular second stage stratum within an FSU/hg/sb  
D = total number of hg's/sb's formed in the sample village (panchayat ward)/block/non-UFS town or OG  
D\* = 1 if D =1  
= D /2 for FSUs with D > 1  
N = total number of FSUs in any urban ( UFS ) sub-stratum  
Z = total size of a rural sub-stratum or urban sub- stratum of non-UFS towns or OGs ( = sum of sizes for all the FSUs of a sub- stratum )  
z = size of sample village/non-UFS town or OG used for selection  
n = number of sample village/block/non-UFS town or OG surveyed including zero cases but excluding casualty for a particular sub-sample and sub-stratum  
H = total number of households listed in a second-stage stratum of a village/block/non-UFS town or OG/hamlet group/sub-block of sample FSU  
h = number of households surveyed in a second-stage stratum of a village/block/non-UFS town or OG/hamlet-group/sub-block of sample FSU  
E = total number of enterprises listed in a second-stage stratum of a village/block/non-UFS town or OG/segment of sample FSU  
 $\hat{x}_i, \hat{y}_i$  = observed value of characteristics x,y under estimation  
X, Y = estimate of population total X, Y for the characteristics x,y

Under the above symbols,

$y_{smtidjk}$  = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th hg/sb (d = 1, 2) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum;

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

### 1.2.2 Formulae for estimation of aggregates for a particular sub-sample and stratum in rural / urban sector:

#### 1.2.2.1 Schedule 0.0:

##### 1.2.2.1.1 Rural:

Estimation formula for a sub-stratum:

- (i) For estimating the number of households possessing a characteristic:

$$\hat{Y} = \frac{Z}{n} \sum_{i=1}^n \frac{1}{z_i} D_i^* [y_{i1} + x y_{i2}]$$

where  $y_{i1}, y_{i2}$  are the total number of households possessing the characteristic  $y$  in hg's 1 & 2 of the  $i$ -th FSU respectively.

(ii) For estimating the number of villages possessing a characteristic:

$$\hat{Y} = \frac{Z}{n} \sum_{i=1}^n \frac{1}{z_i} y_i$$

where  $y_i$  is taken as 1 for sample villages possessing the characteristic and 0 otherwise.

#### 1.2.2.1.2 Urban:

Estimation formula for a sub-stratum

(i) For estimating the number of households possessing a characteristic:

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n D_i^* [y_{i1} + x y_{i2}]$$

for UFS sub-stratum,

$$\hat{Y} = \frac{Z}{n} \sum_{i=1}^n \frac{1}{z_i} D_i^* [y_{i1} + x y_{i2}]$$

for non-UFS sub-stratum

where  $y_{i1}, y_{i2}$  are the totals of observed values for the characteristic  $y$  belonging to sub-blocks 1 and 2 respectively, of the  $i$ -th FSU.

#### 1.2.2.2 Schedule 10.2/25.2/1.0:

##### 1.2.2.2.1 Rural:

Estimation formula for a sub-stratum:

(i) For households selected in  $j$ -th second stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} D_i^* \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

(ii) For all selected households:

$$\hat{Y} = \sum_j \hat{Y}_j$$

#### 1.2.2.2.2 Urban:

Estimation formula for a sub-stratum :

- (i) For households selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} D_i^* \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right] \quad \text{for UFS sub-stratum}$$

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} D_i^* \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right] \quad \text{for non-UFS sub-stratum}$$

- (ii) For all selected households:

$$\hat{Y} = \sum_j \hat{Y}_j$$

#### 1.2.2.3 Estimate for a stratum:

$$\hat{Y}_s = \sum_t \hat{Y}_j$$

#### 1.2.3 Overall Estimate for Aggregates :

Overall estimate for aggregates for a stratum ( $Y_s$ ) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

#### 1.2.4 Overall Estimate of Aggregates at State/all-India level:

The overall estimate  $\hat{Y}$  at the State/all-India level is obtained by summing the stratum

estimates  $\hat{Y}_s$  over all strata belonging to the State/all-India.

### 1.2.5 Estimates of Ratios:

Let  $\hat{Y}$  and  $\hat{X}$  be the overall estimate of the aggregates Y and X for two characteristics y and x respectively at the State/all-India level.

Then the combined ratio estimate ( $\hat{R}$ ) of the ratio ( $R = \frac{Y}{X}$ ) will be obtained  $\hat{R} = \frac{\hat{Y}}{\hat{X}}$ .

1.2.6 **Estimates of error:** The estimated variances of the above estimates will be as follows:

1.2.6.1 **For aggregate  $\hat{Y}$ :**

$$\hat{V}ar(\hat{Y}) = \sum_s \hat{V}ar(\hat{Y}_s)$$

where  $\hat{v}ar(\hat{Y}_s)$  are as given below.

1.2.6.1.1 **For strata with PPSWR selection at first stage:**

$$\hat{V}ar_{ppswr}(\hat{Y}_s) = \left[ \sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left( \frac{Z_{sti} \hat{Y}_{sti}}{z_{sti}} - \hat{Y}_{st} \right)^2 \right],$$

where

$$\hat{Y}_{sti} = \sum_j Y_{stij},$$

$$\hat{Y}_{stij} = D^*_{sti} \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right]$$

1.2.6.1.2 **For strata with SRSWOR selection at first stage:**

$$\hat{V}ar_{srswor}(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2$$

where  $\hat{Y}_{st1}$  and  $\hat{Y}_{st2}$  are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

1.2.6.2 For ratio R :

$$\widehat{MSE}(\hat{R}) = \frac{1}{(\hat{X})^2} \left[ \sum_s \widehat{MSE}_s(\hat{R}) + \sum_{s'} \widehat{MSE}_{s'}(\hat{R}) \right]$$

where s, s' indicate respectively the strata with PPSWR and SRSWOR selection at first stage.

1.2.6.2.1 For strata with PPSWR selection at first stage:

$$\widehat{MSE}_s(\hat{R}) = \sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{nst} \left[ \frac{Z_{st}}{Z_{sti}} (\hat{Y}_{sti} - \hat{R}\hat{X}_{sti}) - (\hat{Y}_{st} - \hat{R}\hat{X}_{st}) \right]^2$$

where

$$\hat{Y}_{sti} = \sum_j \hat{Y}_{stij} \quad , \quad \hat{X}_{sti} = \sum_j \hat{X}_{stij} \quad ,$$

$$\hat{Y}_{stij} = D^*_{sti} \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{si1j}} y_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{si2j}} y_{i2jk} \right] \quad ,$$

$$\hat{X}_{stij} = D^*_{sti} \left[ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{si1j}} x_{i1jk} + \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{si2j}} x_{i2jk} \right]$$

1.2.6.2.2 For strata with SRSWOR selection at first stage:

$$\widehat{MSE}_s(\hat{R}) = \sum_t \frac{1}{4} \left[ (\hat{Y}_{st1} - \hat{Y}_{st2})^2 + \hat{R}^2 (\hat{X}_{st1} - \hat{X}_{st2})^2 - 2\hat{R} (\hat{Y}_{st1} - \hat{Y}_{st2}) (\hat{X}_{st1} - \hat{X}_{st2}) \right]$$

where  $\hat{Y}_{st1}$  and  $\hat{Y}_{st2}$  are the estimates for sub-sample 1 and sub-sample 2 respectively, stratum 's' and sub-stratum 't'.

1.2.6.3 Estimates of RSE :

$$\hat{RSE}(\hat{Y}) = \sqrt{\frac{\hat{Var}(\hat{Y})}{\hat{Y}}} \times 100$$

$$\hat{RSE}(\hat{R}) = \sqrt{\frac{\hat{MSE}(\hat{R})}{\hat{R}}} \times 100$$

### 1.3 Multipliers:

The formulae for multipliers for a sub-sample and schedule type are given below:

sch type	sub-stratum	formula for multipliers	
		hg/sb 1	hg/sb 2
0.0	rural	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stm}} \times D^*_{stmi}$	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}} \times D^*_{stmi}$
	Urban (UFS)	$\frac{N_{st}}{n_{stm}} \times D^*_{stmi}$	$\frac{N_{st}}{n_{stm}} \times D^*_{stmi}$
	Urban (non-UFS)	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stm}} \times D^*_{stmi}$	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}} \times D^*_{stmi}$
10.2/ 25.2/ 1.0	rural	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D^*_{stmi} \times \frac{H_{stm1j}}{h_{stm1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D^*_{stmi} \times \frac{H_{stm2j}}{h_{stm2j}}$
	Urban (UFS)	$\frac{N_{st}}{n_{stmj}} \times D^*_{stmi} \times \frac{H_{stm1j}}{h_{stm1j}}$	$\frac{N_{st}}{n_{stmj}} \times D^*_{stmi} \times \frac{H_{stm2j}}{h_{stm2j}}$
	Urban(non-UFS)	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D^*_{stmi} \times \frac{H_{stm1j}}{h_{stm1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D^*_{stmi} \times \frac{H_{stm2j}}{h_{stm2j}}$

j = 1, 2, 3 for sch. 10.2  
= 1, 2 for sch.1.0/25.2

Note: (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable may be used.

(ii) Multipliers have to be computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.

(iii) For estimating number of villages possessing a characteristics,  $D_{stmi}^* = 1$  in the relevant multipliers and there will be only one multiplier for the village.
