## FOREWORD

An attempt has been made in this publication to provide in a compact form operational statistics relating to the educational system collected by the Directorate of Public Instruction from educational institutions, as also other important statistics relating to education, collected from diverse sources. Efforts have been made, with the help of some selected indicators, to bring to focus the current level as well as inter-district disparity in the development of education in Assam. Besides, in order to facilitate inter State comparison a table showing selected indicators on education in different States has also been incorporated. The statistics presented here cover only recognised institutions. Further it has not been possible to cover statistics relating to non-formal education in this publication.

It may be noted that this Directorate had earlier issued two publications entitled "Education in Assam. A Statistical Hand Book"; the first covering the period 1947-48 to 1958-59 and the second the period 1947-48 to 1960-61. The statistics given in these two publications are, however, not comparable with those in this publication due to differences in geographical coverage arising from reorganisation of Assam.

Co-operation extended by the concerned Departments/Institutions in making available the statistics for this publication is gratefully acknowledged. It is intended to bring out similar publications in future and suggestions for improvement of the quality and coverage is most welcome.
