P R E F A C E

This brochure is the seventeenth in the series of the Annual statistical publication entitled "Selected Educational Statistics" brought out by the Department of Education. Indeed, timely availability of statistical data helps considerably the planners and administrators to plan out future programmes in a more systematic and scientific way. Efforts have been made to reduce the time-lag in the publication of this brochure.

2. The population projections of school going children of age group 6-11 years and 11-14 years are based on the 1981 Population Census as the relevant data of the 1991 Population Census is not yet received. The tables relating to distribution of population, sex ratio/density and growth rate of population and percentage of literates to estimated population aged seven years and above are based on provisional results of 1991 Population Census.

3. NIC has created a data base on educational statistics on NEC S-1000 system at Delhi for use of all persons. This gives general information about population, estimated school going children in the age-group of 6-14 years, number of institutions, students enrolment by stage/classes, number of teachers enrolment by type of institutions, budgetted expenditure for all States/UTs. Data is available for four years. This data base can be invoked by giving command "EDU" at "System" NEC S-1000 from any user end.

4. I would like to thank the functionaries of the Education Departments of States and Union Territories, Statistics Division and CMIS Unit of this Department for making this publication possible.
