# **Lok Sampark Abhiyan – 2<sup>nd</sup> Phase 2000-01**

## **Participatory action for Universalization of Elementary Education**

### **1. Introduction**

Rajiv Gandhi Shiksha Mission was set up in 1994 as an autonomous registered society headed by the Chief Minister of the State to supplement state government effort towards the twin goals of Universal Primary Education and Adult Literacy in these areas.

The objectives of the Mission in the elementary education sector are to create a positive environment for education and universalize access to elementary education of quality. The mission also aims at improving adult literacy. Premised on that the belief basic education and literacy are possible through collective societal action, the mission works through collaboration with local bodies, village level committees and community groups.

### **2. Lok Sampark Abhiyan – 1996 (LSA-I)**

The priorities of the Mission were determined by the existing needs of the state. This collective micro-planning process was called Lok Sampark Abhiyan undertaken in 1996. This was a community-contact campaign, which recognized the need to let the community come forward with its own perceptions. Distinctive to the Mission approach, the first step was participatory problem mapping. The LSA aimed at finding out how many children were going to school and what was the outreach of schooling facilities. This assessment was designed not as a survey to be conducted by bureaucratic functionaries, but as a mobilization process for focusing on specific factors relevant for children's schooling. The process involved door-to-door contact to identify children not going to school, attempts to persuade parents to send their children to school, participatory school mapping and preparation of a village education register for following up on children not going to school. This work was done by local groups of teachers, together with village panchayat members and local activists.

The advantage of LSA over other methods of collecting educational data have been as follows:

- It surveys the whole habitation and not just the school. So it brings on record areas and communities that tend to get left out.

- Being participatory and involving the community it tends to reveal gaps that otherwise may get obscured or marginalised through just government reporting.
- Data collection being a collective and open exercise becomes an instrument for mobilisation and solution seeking.
- Decentralized data construction tends to present a more realistic and contextual picture of problem.

The LSA conducted in 1996 covered 55,295 villages and contacted over 50 lakh households and over 1 crore children. The interesting point that the LSA demonstrated was that the teachers, with proper motivation could interact with the community and that people from different spheres could join forces in the cause of education. This was because the assessment was not threatening and the teacher saw herself as part of a community group. The LSA data was captured in VER at the village level and consolidated up into a computerized MIS. The LSA revealed that only 70% of the habitations had access to primary schools, thereby demolishing the myth of universal access. It showed that the state's existing norms for providing schools had ignored the centripetal pattern of habitations, particularly of the tribal communities.

The LSA also demolished the myth of universal enrolment. Enrolment was not more than 70%. Most children reported, as dropouts had never been enrolled. There was in fact a tremendous demand for education; even from the poorest and most non-literate communities a demand that was greatly stimulated during the LSA since the LSA was also a school mobilization exercise.

The LSA revealed the acute shortage in access to schools and brought to the fore the great demand for schools that existed in the communities. This provoked the government into responding promptly. It had to find radical but simple and practical alternatives that allowed time bound action on a large scale and was cost effective. Cost needed to be closely analyzed by identifying, in a situation of resource constraints, the most critical components of primary education. Procedures had to be made simple and fast. Responding to the demand for schools mobilized through the LSA, the Govt. of Madhya Pradesh launched the Education Guarantee Scheme (EGS) on January 1997 acknowledging the child's right to primary education and to guarantee it.

Under EGS, the Government gives a guarantee to provide a primary schooling facility to the children in a habitation where there is no such facility within a kilometer within a period of 90 days of receiving a demand for such a facility by the local community. The government guarantee includes the basic constituents of an EGS school which are A teacher referred to as guruji in the 1:40 teacher-pupil ratio, Teacher training, Free teaching-learning materials, operational contingencies. The scheme is sensitive to the habitation pattern in the tribal areas of the state where people reside in hamlets called majras, tolas or phalias which are distant from one another.

A historical backlog of more than twenty thousand, accessless habitations could be eliminated in 2 years time. Now every habitation in the state has a schooling facility within a km. By August 1998 Madhya Pradesh declared universal access to primary education made possible by EGS in an extremely cost-effective and time-bound manner without compromising on quality. More than twelve lakh children of the age group 6-14 years are currently studying in EGS schools of Madhya Pradesh. Above all EGS reached out to the unreached areas and the marginalised communities implying that the access created by EGS, has not just been geographical, but also social. More than 40% of the EGS schools have come up in tribal areas and more than 90% of the children studying in these schools are scheduled caste, tribal and other backward class children. Girls constitute almost 47%. The MPEGS model demonstrates that innovations that emerge in response to local contexts can be replicated, if their strategic elements hinge on a reciprocal partnership between the community and the government, balancing local aspirations, and accountability with standard norms and controls.

The LSA – EGS experience indicates how information gathering if done as a collective campaign-involving stakeholder compels action. Participatory problem mapping can work out right solutions. Because of the effectiveness the LSA-I, second round of LSA was undertaken in 2000 –2001.

### **3. Lok Sampark Abhiyan - 2000-2001 (LSA-II)**

#### **3.1 The objective of LSA II were to:**

- a) re-assess the primary base.
- b) map gaps in the provisioning of elementary education facilities
- c) assess the extent of participation of children in elementary education

- d) mobilize people to take stock of the educational situation of their children and plan for it
- e) update/create a Village Education Register in every village for tracking childwise progress through the school cycle

### 3.2 Methodology

LSA II was formulated by reviewing the design and effect of LSA I, by attempting to address factors missing in the LSA I and identifying new ones needed because of the widening of the scope. Instruments were refined through a process of consultation and field testings followed by trainings and orientation.

Local communities were mobilised to map their problems and attempt to solve them through collective action. Key actors in this were panchayats, teachers, parents and children. The scale of the LSA II is shown below in table 1.

**Table 1 – Scale of Participation, LSA-II**

Children surveyed	1.18 crores
Habitations covered	81473
Schools where mobilisation activities like pravesh utsav & Bal mela held	95236
Gram Shiksha Sabhas held	55841
Cluster level conventions held	6030
Number of persons involved in planning process (officials, teachers, social workers, elected representatives, VEC/PTA members etc.)	
Total	414437
Male	290106
Female	124331

The process began at the village level with a survey of children, identifying those who go to the school and those who do not. The survey itself was preceded by a meeting of the village education committee to guide and facilitate the survey with the help of parents and children themselves. Children going to school for example were involved in contacting those who did not. Mobilisation activities like Pravesh Utsav, Bal mela, Shala Chalo Abhiyan were organised, which helped in mobilising the community to assist in the survey. This led to updating the Village Education Registers and creating them where they still did not exist.

The data of the VER was computerized at the district level. Efforts are on to computerize the BRC and the CRC levels so that the data can be easily organised for use by the teachers at the level closest to school.

### 3.3 Summary of Key Findings:

LSA II reveals the following Status as compared to LSA I

As a result of increase in access, Gross Enrolment Ratio (GER) has risen from 76.5 % in 1996 to 96.2 % in 2000-01. Presently 82.64 lakh children are enrolled in schools out of this 14.7% is contributed by the EGS. The GER of girls has risen from 70.7% in 1996 to 94.3 % in 2000-01. There has been significant increase in GER of ST, from 78% in 1992 to 91% in 2000-01. The gap in GER of boys and girls has also narrowed from 25% in 1992 to 11% in 1996 and to 3.6% in 2000-01, indicative of the fact that girl enrolment has increased in the past eight years.

Table 2 - Comparison of Primary level Gross Enrolment Ratio LSAI & LSA II

GER AS PER LSA'1996 (%)			GER AS PER LSA'2000-01 (%)		
Boys	Girls	Total	Boys	Girls	Total
81.5	70.7	76.5	97.9	94.3	96.2

Enrolment at the upper primary level has also increased because of the increase in transition from primary to the upper primary levels.

Table 3 - Comparison of Upper Primary Gross Enrolment Ratio LSAI & LSA II

GER AS PER LSA'1996 (%)			GER AS PER LSA'2000-01 (%)		
Boys	Girls	Total	Boys	Girls	Total
62.4	49.0	56.6	74.6	64.6	70.3

LSA data being disaggregated allows the state to look at the range of the problem and identify the most difficult areas for interventions, for example the LSA shows

- GER at primary level ranges from 107.6 (Bhind) to 81.7 (Barwani).
- GER at upper primary level ranges from 93.7 (Bhind) to 30.9 (Jhabua).
- Girls GER at upper primary level ranges from 90.7 (Bhind) to 25.6 (Jhabua)

The percentage of out- of- school children has decreased from 29.3 % in 1996 to 11.2 % in 2000-01.

Table 4 - Reduction in % of out of school children against target LSA I & LSA II

% of Out- of -school children against target population as per LSA'1996			% of Out- of- school-children against target population as per LSA'2000-01		
Boys	Girls	Total	Boys	Girls	Total
24.4	35.2	29.3	9.4	13.3	11.2

LSA II also reveals that infrastructure gaps have widened because of a widening primary base:

Table 5 – Access gaps of Middle Schools

Existing Govt. Middle Schools	Additional Govt. Middle Schools required
13468	11343

Table 6 – Infrastructure gaps of Primary and Middle Schools

Infrastructure Gaps	Govt. Primary Schools	Govt. Middle Schools	Total
Schools without Building	23387	15526	38913
Schools without Toilets	33259	10637	43896
Schools without Drinking Water facility	29233	10608	39841
Additional Rooms required	36668	17942	54610
Major repairs required in school buildings			6287
Minor repairs required in school buildings			9426

LSA also reveals that economic reasons affect steady participation of children in the schooling process.

Table 7 – Factors affecting children's participation in schools

Reasons for out of school children	Percentage
Siblings Care	20.6%
Working in fields, agricultural labour or other labour work	19.9%
Cattle Grazing	17.5%
Weak Financial condition	14.0%
Migration	10.3%
Lack of educational facilities (middle Schools)	7.8%
Social belief due to which parents are reluctant to educate girls	6.0%
Handicapped or prolonged illness	2.4%
School environment not conducive	1.5%

Factors which pertain to health and sibling care, also actually drive from economically strained circumstances of the family.

#### 4. **LSA as Basis of decentralized Planning**

The outcomes of survey were discussed in Gram Shiksha Sabhas. In the state, more than 55 thousand Gram Shiksha Sabhas were held in which more than 40 lakh members participated. The Gram Shiksha Sabha discussed the development needs of the village of which education was one of the issues for discussion. Issues like regular attendance of all children in school and ensuring satisfactory levels of achievement were also discussed. The community, during the discussion, identified the factors that impede in materializing the objectives of attendance and achievement and formulated local solutions to overcome them. The community also formulated a village education plan stating its needs and the resources it has. This plan reflected the perception of the community on the education of its children. This has led to a village based UEE plan, based on a partnership of community, panchayat and government. These Gram Shiksha plans have been discussed in the gram panchayats, which has also taken decisions on committing their resources to meet the village needs. Each gram panchayat has presented its perspective education plan to the Jan Shiksha Kendra. A similar method of consolidation was followed at the Janpad Shiksha Kendra and Zilla Shiksha Kendra. Thus, 45 district perspective UEE plans have emerged and these aggregate into a state plan. At the state level the key tasks are to help analyze gaps and to mobilise resource support for bridging them.

- The LSA data has been used for planning for UEE, specially the (Sarva Shiksha Abhiyan Plan). This establishes the basis of the *Jan Shiksha Yojana* stipulated in the Jan Shiksha Adhiniyam.

#### 5. **LSA as creating a common platform for intervention at all levels**

LSA aims at making information a stimulus for action. It seeks to bring together vertical with lateral use of information, participatory construction of VER with a computerized MIS; local action with resource support from above.

Admittedly the data it captures is experiential knowledge at the local level. But the idea is that once informal impressions and experiences which by their very nature of

being part of a routinized diurnal, acquire the form of formal and public document, they acquire an objectivity that compels cognizance and action

The new legal framework created by the Jan Shiksha Adhiniyam enforces society's responsibility for the education of its children.

PTAs have been made responsible for ensuring the enrolment and regular attendance of children in school. This would require childwise plans of action at habitation levels. The LSA data is captured in the VER. The VER helps focus attention on the unenrolled and dropped out children enables local correctives. The VER enables childwise tracking. The broad reasons that have been identified as factors for dropouts are economic activities, sibling care, migration to other places etc.

Thus LSA helps in providing PTA and VEC and supporting institution of the village level instruments of surveying, recording planning and monitoring educational facilities, children's participation in and use of them to assist them in discharging this social responsibility.

#### **6. LSA as a dynamic methodology towards participatory planning and management**

The advance made by LSA I over the previous LSA II is that

- LSA I was confined to the primary level; LSA II re-looks primary and moves to upper primary, thus fusing the two into the unified field of elementary. This is how it should be, because issues at any of these levels are integrally related as a learning continuum and splitting them into primary and upper primary create serious problem.
- LSA II has been used on basis of educational planning right from village to state
- LSA II has an in built methodology for periodical updation and quarterly reporting and so becomes a tool for monitoring.
- LSA II has the advantage of the statutory stipulation of certain prerequisite conditions for effective participatory management such as Parent Teachers Association (PTA), Village Education Committee (VEC), teacher fora as Jan Shiksha Kendra (JSK); and decentralized planning through Jan Shiksha Adhiniyam (JSA). The need is to ensure that LSA continues to be a dynamic process responding to the needs of the community and enabling their articulation in a way that prompts collective problem solving in a time bound way to facilitate the realization of the goals of the Education For All (EFA)
