

Report of the Group
for
Central Universities
to provide inputs to the

Oversight Committee

(10th August 2006)

Report of the Group for Central Universities

Part – I : Genesis and Vital Statistics

In pursuance of G.O.I., M/HRD, Deptt. of Secondary and Higher Education's communication dated 29th May, 2006, the Group for Central Universities consisting of the following met on 3.6.06 and 21.6.2006 in the office of UGC and on 27.7.2006 at Jamia Hamdard a deemed to be University.

(i)	Shri Saiyed Hamid, former VC, AMU and Chancellor Jamia Hamdard	-	Chairman
(ii)	Prof. Panjab Singh, VC, BHU	-	Member
(iii)	Prof. Deepak Pental, VC, Delhi University	-	Member
(iv)	Prof. Pramod Tandon, VC, NEHU	-	Member
(v)	Prof. Sayed E. Hasnain, VC, Hyderabad University	-	Member
(vi)	Shri Vivek Rae, JS, Dept. of Expenditure, Min. of Finance	-	Member
(vii)	Dr. M. Govinda Rao, Professor, NIPFP	-	Member
(viii)	Dr. T. R. Kem, Secretary, UGC	-	Convenor

Prof. Panjab Singh, Prof. Deepak Pental and Prof. Sayed E. Hasnain could not attend the first meeting on 3.6.2006 while Prof. Pramod Tandon could not attend the meeting held on 21.6.2006.

2. The Group, at its first meeting, designed a proforma for collecting information from various Central Universities relating to the existing course intake in different disciplines and proposed increases consequent on giving 27% reservation to OBCs while maintaining the existing unreserved seats. Information on requirements was sought in terms of both recurring and non-recurring expenditure.

3. The information furnished in response by Central Universities duly tabulated was discussed at the 2nd meeting of the Group held on 21.6.2006. To seek clarification on the spot and to facilitate comprehension, Registrars/Finance Officers of Central Universities were also invited to the second meeting. The third meeting of the group was held on 27.7.2006 at 10:30 a.m. at Jamia Hamdard, New Delhi, a deemed to be University. It was attended by the full group. The Interim Report submitted earlier was discussed and updated. Based on detailed discussions, estimates of recurring and non-recurring expenditure requirements were finalized. These work out respectively to **Rs.606.40 crores** and **Rs.2702.11 crores** as given in the statement at **Annexure-I**. The details with regard to additional manpower (teaching and non-teaching) and recurring expenditure thereof is depicted in the statement at **Annexure -I (a)** and non-recurring expenditure item-wise for infrastructural development in statement at **Annexure-I(b)**. It will be seen that in consequence of the extension the intake in various courses (excluding Ph.D.) in 17 Central Universities and the Colleges affiliated to the Universities of Delhi, Allahabad and BHU will stand enhanced from **92,011 to 1,41,697**.

In addition to the above, **approximately 3333** students were registered for Ph.D. programme in Central Universities during the academic year 2005-2006. It is observed that most of the Central Universities are not following reservation for SC/ST while registering

students for Ph.D. Programmes. However, they have made a provision to relax the eligibility criteria for SC/ST candidates in so far as registration for Ph.D. programme is concerned

4. Summary

The information contained in **Annexure – I** and **Annexure-I(a) & I(b)** is summarized as follows:

Sl. No.	Item	Amount / Numbers
1	Existing Intake Capacity <i>(of various courses at UG, PG, M.Phil.& Diploma / Certificate level)</i>	92,011
2	Increase in intake capacity to provide 27% reservation for OBC maintaining existing general seats	49,686
3	Approximately Students registered for Ph.D. programme during the year 2005-2006	3,333
4	Manpower requirement	
4.1	Teaching	6609
4.2	Non-teaching	6476
5	Financial implication	
5.1	Recurring expenditure per annum on account of additional manpower (Teaching and Non-teaching)	377.97 Crores
5.2	Non-salary recurring expenditure per annum	228.43 Crores
	Sub-total recurring expenditure (5.1+ 5.2)	606.40 Crores
6	Non-recurring expenditure for infrastructural development	2702.11 Crores

Part – II : Configuration

5 Institutions covered in the Final Report

5.1 Central Universities

No. of Central Universities = 17*

(Three Central Universities viz IGNOU, Central Agricultural University and Aligarh Muslim University have been excluded, the first two are getting grants directly from Government of India, the third has a minority character (subjudice))

List enclosed at Annexure – II

5.2 Colleges affiliated to the Universities of Delhi, Allahabad and BHU.

Delhi

Out of 80 odd colleges affiliated to the University of Delhi, 66 colleges (excluding colleges of Medicine, Nursing, Pharmacy, Ayurveda, Unani, Engineering etc.) conduct courses in

Arts, Science, Commerce, Fine Arts, Home Science, Education etc. at Undergraduate level. Out of these 66 colleges, 53 colleges are getting Non-Plan grants from UGC; the remaining are Delhi Administration Colleges. In addition, one Medical College, viz., University College of Medical Sciences (U.C.M.S.), which is getting non-plan grant from U.G.C., has been included.

College-wise information is not available. The University of Delhi has made projections in an integrated manner. A detailed proposal as submitted by University of Delhi is enclosed at **Annexure-VII**.

List enclosed at **Annexure-III**

BHU

There are four affiliated colleges. The funding pattern under Non-Plan category is as follows:

UGC	:	47.5%
State Government	:	47.5%
Trust	:	5%

List enclosed at **Annexure - IV**

Allahabad University

There are eleven constituent colleges of Allahabad University

List enclosed at **Annexure – V**

5.3 Institutions-wise / discipline wise proposed increase in intake and faculty/ non-teaching staff is enclosed at Annexure – VIII

6. Part – III : Financial Implications

6.1 Estimated recurring expenditure per annum on account of additional manpower.

The group recommends the following phasing of recurring expenditure on Salaries (Teaching and non-teaching) and non-salary expenditure.

2007 – 2008	35%
2008 – 2009	70%
2009 – 2010	100%

Note : Although a suggestion was made that the expansion should be spread over the five years of the Eleventh Plan period, consensus in the group could be reached on three years.

The annual recurring expenditure on account of additional manpower (Teaching and Non-teaching) & non-salary items is estimated as follows for a period of five years from 2007-08 to 2011-12:-

Annually	Amount in Crores
2007-08	212.24
2008-09	424.48
2009-10	606.40
2010-11	606.40

2011-12**606.40****6.2 Estimated Non-recurring expenditure for infrastructural development.**

Total estimated non-recurring expenditure for infrastructural development has been phased out over the period of three years in the ratio of 55% in the year 2007-2008, 35% in the year 2008-2009 and 10% in the year 2009-2010, with a provision to carry forward to the next financial year the unspent amount.

The yearly Non-recurring expenditure is projected as follows:

Year	Amount in Crores
2007-08	1486.16
2008-09	945.74
2009-10	270.21
TOTAL	2702.11

It may be recalled that the Interim report dated 23.6.2006 had been discussed by the Chairman and the Convenor of the Group for Central Universities with the Oversight Committee on 12th July, 2006. and suitable modifications made in consequence.

Part – IV : Unique Features Peculiar to certain Universities.

After traversing common ground the group would like to point out the unique features which would require some universities to be treated differently and which demand a special dispensation. These are contained in **Annexure – VI** and are summarized below:

Four Universities, namely, Babasaheb Bhimrao Ambedkar University, Lucknow, Nagaland University, Mizoram University and NEHU, Shillong are following a policy that provides 50% reservation for SC/STs. The Manipur University provides 33% reservation for SCs/STs. In these cases the implementation of the OBC reservation policy will have to be worked out separately. In our estimates, however, we have tentatively assumed in their case also a constant increase of 54%.

Part - V**7. Certain Guidelines/Observations:**

- (i) Proposed reservation policy of the Government gives a rare opportunity to the Central Universities/Institutions to enhance their intake capacity and develop the required infrastructure which will ensure quality and relevance while bringing in excellence. This opportunity should be converted into an abiding strength. There should be no compromise repeat no compromise whatsoever on quality.
- (ii) To meet the teaching staff requirement for the additional strength without compromising on quality of teaching, the following suggestions are made:
 - re-employ teachers after retirement on the basis of their performance and following a process of strict screening;

- appointing on contract outstanding teachers in various faculties preceding regular recruitment;
 - internal adjustment of giving additional teaching load and reasonable honorarium per lecture (already in vogue in many universities) without imposing an excessive burden on the teachers.
 - Teaching Assistantship may be provided to students pursuing doctoral programmes only on the basis of merit as explained vide **para VII page - 7**.
- (iii) Regular recruitment for additional teaching positions may not be rushed as this will adversely affect the quality of recruitment. Teachers' recruitment will have to be phased.
- (iv) The present ban on recruitment of non-teaching staff may be removed, however, the Expenditure Reforms Commission's guidelines may invariably be followed. This will take care of the immediate problems arising out of the increased intake. In the recruitment of non-teaching staff, the technical staff (of the right caliber) should receive priority.
- (v) The time span to implement reservation policy should match with that required to develop infrastructure particularly building facilities and recruitment of teachers. The policy has to be planned with meticulous care, else it will adversely affect the quality of education.
- (vi) It was generally felt that enough freedom should be given to the university authorities to fill-up the vacancies for teaching and non-teaching categories as well as for infrastructural development activities to cope with the enhanced intake capacity also,
- (vii) Increase in seats will require additional teachers, classrooms, expansion of library facilities, laboratories and IT infrastructure. In brief, this would necessitate a major one-time expenditure on infrastructure as well as significant increase in recurring expenditure. Beside the enhanced need for resources, infrastructure development will be a time-consuming process which cannot be accomplished in a short term.
- (viii) There is great variation in the number of students enrolled in the Central Universities. Therefore, every university should be allowed to develop individual strategies for implementing the decision on increase in intake, to maintain educational standards and to derive adequate short term and long term benefits from the new inclusion policies.
- (ix) The O.B.C. quota should not be taken as an arithmetical exercise covering multi-faceted expansion. It should be taken as an opportunity for significant enhancement of standards around. Here two points arise:
- (a) First the fast pace that is being desired should not be allowed to dilute standards. This has particular relevance to appointment of faculty and purchase of equipments and books. The process cannot be rushed with impunity. The University should be given enough latitude and flexibility and powers of internal adjustment in intake to permit significant and lasting improvements. It is well known that Government are serious about fulfilling their commitment to O.B.Cs. They can,

therefore, in the interest of promoting quality education, adopt the prudent technique of hastening slowly and phase the increase over three years. The best strategy would be to make academic expansion a tool for academic reform and quality augmentation. A policy compulsion can be transformed into an opportunity. It will help the University to prioritise the implementation plan and bring about radical reforms. Expansion of capacity of this magnitude is not likely to occur in the foreseeable future. Optimum use should therefore be made of this expansion for raising significantly standards of higher education.

(b) The second point relates to the desirability of evening out opportunities over three years for those young men and women who aspire in their due turn for joining the academic stream or securing technical and administrative posts in universities. Bumper recruitment in one year followed by a drought of opportunities in the two succeeding years would be an inequity which is certainly avoidable. And the phasing of enhanced admissions as well as recruitment over about three years will conduce to securing entry of better human material in either case. Regulated flow is always more manageable and yields better results than a sudden spurt. We are in a position at the moment to convert a welcome expansion into a rare opportunity for ushering in an era of significant academic reform buttressed by provision of the required infra-structure, the induction of better teachers and an equitable year-wise spread of students.

- (x) We have not provided for giving preparatory coaching to the O.B.C. students so that they derive full and unhindered benefit from their admission to Universities. It is felt that such a provision where necessary may help produce better results. But this had better be left to the discretion of each individual university in the light of experience acquired during the course of implementation. A financial cushion could be provided for this contingency.

8. Phasing and Prioritisation arising from Observations of the Group on the Points raised in the letter No.11099/5/2006-Edn. Dated 14th July, 2006 from the Planning Commission.

Point 1: The manner and sequence in which the capacity expansion of 54% will take place.

Point 2: Phased implementation of 27% reservation for OBCs from 2007-08

The expansion of the capacity by 54% in Central Universities and Colleges affiliated to Delhi University, BHU & Allahabad University in one spurt would neither be feasible nor advisable. The available opinion crystallizes round an expansion spread over three years.

The Committee is of the view that the manner and sequence should be left to the individual university. The University should take into account various factors like infrastructural requirement/development and the immediate demand of extra seats.

Point 3: The policy changes that would be required in respect of each area to implement the reservations.

- I. Different patterns of reservation are being followed in five Central Universities as outlined in part – B of **Annexure-I** and explained in **Annexure-VI**. It may be noted that the envisaged increased intake while maintaining the existing unreserved seats in

place, may range from 73% to 135% (**Annexure – VI (a)**). A policy decision on various issues like extension of reservation beyond 50% ceiling limit, and implementation of OBC quota in certain Central Universities of North Eastern Region and in Babasaheb Bhimrao Ambedkar University, Lucknow is required.

- II. The major components for expansion in capacity relate to creation of physical infrastructure and appointment of teaching, technical and non-teaching staff. It may not be possible within a short time to add the physical infrastructure and it may be necessary to take the classes in shifts. Concerted action will, therefore, have to be taken to increase the physical infrastructure within 3 years beginning with departments with high demand for seats.
- III. The orders issued by government requiring that only 25% of the non-teaching posts be filled be withdrawn. The University may be given freedom particularly to fill up posts of technical nature which directly relate to teaching and research activities.
- IV. In relaxation of normal purchase procedures, the Universities may be authorized to make purchases by an empowered committee with permission to negotiate the price. Besides, the rules may need to be relaxed for construction of class rooms, laboratories etc. These relaxations will of course be operative within the financial regulations.
- V. Due to paucity of resources the Universities have been building laboratories in an ad hoc manner. Such laboratories are proving to be inadequate for research in the frontier areas of science. Air-conditioning of such laboratories is often inadequate and slipshod. The need to expand student numbers while concomitantly improving competitiveness in research provides an opportunity to design the required facilities in a proper fashion. Examples of properly developed infrastructure for scientific research exist in DBT, CSIR and DAE supported institutes. Sufficient architectural experience exists within the country in developing laboratories. Enhanced allocations should be used to develop proper laboratory facilities in the Universities for R&D work. Existing laboratories can be passed on to other subject areas.
- VI. In order to meet augmented staff requirements meritorious teachers may be re-employed after the age of 62 upto 65 years. This may be done after proper screening. It may also be necessary to fill in the existing vacancies, invariably taking care that quality is not diluted in the process.
- VII. New staff will be recruited on a staggered basis in order to maintain quality. Incentives may be provided to attract talented individuals. Currently there is a serious teacher shortage in several subjects. To prepare teachers of tomorrow, students pursuing doctor programmes could be provided teaching assistantships; these students will help in tutorial and laboratory work. Teaching assistantship should be provided only on the basis of merit.

Point 4: Advance administrative and financial actions that have to be initiated.

- i. The main administrative and financial actions to be initiated involve obtaining sanction of the competent authority for creation/sanction of additional posts, initiating the process of recruitment, both teaching and non-teaching, obtaining financial sanction for the additional expenditure on all fronts, initiating procurement activities and also construction activities.

- ii. Each department of the University should take up assessment of demand for seats and work out an action plan for capacity expansion. They should also be involved in assessing physical infrastructure requirements. Once action plan is prepared by the respective department, these will be consolidated at the University level after making such modifications as may be necessary.
- iii. Funds should be released well in advance in order to create the additional infrastructure.

Point 5: Order of magnitude of estimates about the required financial resources.

The order of magnitude of estimates about the financial resources required are contained in **Annexure-I** and the same are summarized below:

(i) Estimated recurring expenditure per annum on account of additional manpower.

The annual recurring expenditure on account of additional manpower (Teaching, Technical and Non-teaching) & non-salary items is estimated as follows for a period of five years from 2007-08 to 2011-12:-

Annually	Amount in Croress
2007-08	212.24
2008-09	424.48
2009-10	606.40
2010-11	606.40
2011-12	606.40

It was felt that technical posts should not be lumped with non-teaching staff but should be assigned a separate category as “Technical”.

(ii) Estimated Non-recurring expenditure for infrastructural development.

As per the projections, the yearly Non-recurring expenditure requirement is given below:

Year	Amount in Crores
2007-08	1486.16
2008-09	945.74
2009-10	270.21
TOTAL	2702.11

Annexures

LIST OF ANNEXURES

Sl. No.	Subject	Annexure number	Page No.
1	2	3	
1.	Statement indicating University-wise existing intake capacity, increase in Intake Capacity considering OBCs reservation @27% while maintaining the existing unreserved seats and financial implication (recurring and non-recurring).	Annexure – I	1-2
2.	Statement indicating the financial implications on account of additional manpower (Teaching and non-teaching) and non-salary items - Recurring Expenditure per annum.	Annexure – I (a)	3-4
3.	Statement indicating the financial implications (Non-recurring) for infrastructural development (Academical and Non-Academical cost)	Annexure – I(b)	5-6
4.	List of Central Universities	Annexure – II	7
5.	List of Colleges affiliated to University of Delhi	Annexure – III	8-9
6.	List of Colleges affiliated to Banaras Hindu University	Annexure – IV	10
7.	List of constituent Colleges of Allahabad University	Annexure – V	11
8.	Unique features peculiar to four Central Universities in North East & Babasaheb Bhimrao Ambedkar University, Lucknow.	Annexure – VI	12-13
9.	Illustrations to workout the percent increase on existing intake considering 27% OBCs reservation while maintaining the existing unreserved seats.	Annexure – VI (a)	14-16
10.	Issues raised by Nagaland University	Annexure – VI (b)	17
11.	Issues raised by Civil Society Women's Organization, Shillong addressed to the Chairman, UGC	Annexure – VI (c)	18-20
12.	A copy of Detailed proposal as submitted by University of Delhi	Annexure – VII	21-28
13.	Information relating to students intake capacity & proposed increase of faculty & Non-teaching staff – Institution-wise/ Discipline-wise	Annexure – VIII	29-64

Statement indicating university-wise existing intake capacity*, increase in intake Capacity considering OBC reservation @ 27% while maintaining the existing unreserved seats and Financial implications (recurring and non-recurring)

Sl. No.	Name of the University	Existing Intake Capacity*	Increase in Intake Capacity to provide 27% reservation for OBC maintaining existing general seats	Students registered for Ph.D. programme during 2005-06	Financial Implications Recurring Expenditure per annum (additional manpower* non-salary)	Non-recurring exp. for infrastructural development	Remarks
PART A							
1.	Darbhanga Hindu University (including colleges) University of Delhi	7442	4019	1168	8500	430.00	
2.	University Departments Colleges (07) 06 Arts, Science & Commerce, 05 Arts, Edu. etc. Colleges University College Medical Sci. Non-Collegiate Education for Girls	8883 (includes 4675 students strike for Non-collegiate education)	3706 22518	455	377.00 (considered for University Departments and Colleges)	296.00 906.00	Out of 80 odd colleges allotted to University of Delhi, 68 colleges (including nursing, Pharmacy, Ayurveda, Unani, Engineering) conduct courses in Arts, Science, Commerce, Fine Arts, Home Science, Education etc. at undergraduate level. Out of these 68 colleges, 53 colleges are getting Non-Plan grants from UGC and the remaining colleges are Delhi Administration Colleges. Here Delhi Administration Colleges are presently working in School Building. For their relocation, the approx cost will be Rs.36000 crore (for 40 crore per college. These 5 colleges will together provide an increased enrolment of 6000 students. Funds for developing new venues for these colleges may be channelled through the Dept. of Delhi. Under Rs.210.00 crore for opening of two new colleges (University College of Science & Technology - Rs.150.00 crore and University College of Commerce & Social Sciences - Rs.60.00 crore) Includes non-recurring expenditure of Rs. 80.00 crore for UGC. Includes expenditure for non-collegiate education for girls.
3.	Hydrabad University	1042	562	124	9.00	100.00

Annexure – VI

Existing reservation policy in a number of Central Universities in North Eastern Region and Babasaheb Bhimrao Ambedkar University: Calculations relating to the increase in number of seats to implement 27% OBCs reservation..

The existing system of reservation in these Universities is spelt out as under: -

Sl. No.	Name of the University	Reservation for SC/ST	Reservation for PH/ other category if any	Approx % increased * intake after providing 27% OBC reservation	Remarks
1	2	3	4	5	6
1	Nagaland University	50	3	135%	
2	Mizoram University	50	3	135%	
3	North Eastern Hill Univ.	50	3	135.0%	
4	Manipur University (SC 2%, ST 31%)	33	3	73%	
5	Babasaheb Bhimrao Ambedkar University	50	3	135%	

* Illustrations are enclosed at Annexure-VI (a)

In view of the existing provision of reservation for SC/ST in Central Universities in North East, being predominantly populated by tribals, and Babasaheb Bhimrao Ambedkar University, Lucknow, the percentage increase in intake works out to the tune of 135% and in case of Manipur University, this works out to 73%. It is summarised that taking into account 22.5% reservation for SC/ST, the increase in intake to provide 27% OBCs reservation, the percentage increase on existing intake will be 54%. Wherever the existing reservation for SC/ST increases beyond 22.5%, the percentage increase in intake capacity while maintaining the existing unreserved seats will increase accordingly.

The Nagaland University has raised for consideration certain issues which in the University's view may merit consideration while working on 27% reservation and the same are enclosed at Annexure VI (b).

2. A Communication received from Civil Society Women's Organization, Shillong addressed to the Chairman, UGC is enclosed at Annexure – VI(c)

The organization has drawn attention towards the objectives for which NEHU was established which states as follows: -

"The objectives of the University is to disseminate the advance knowledge by providing instructional and research facilities in such branches of learning as it may deem fit; to pay special attention to the improvement of the social and economic conditions and welfare of the people of the hill areas of the North-Eastern region and in particular, their intellectual, academic and cultural advancement".

Therefore, on the basis of the objectives of the North Eastern Hill University (NEHU) it is obvious that NEHU is meant strictly for the Hill people of the region i.e. the Scheduled Tribes for the three States viz. Meghalaya, Nagaland and Mizoram, Nowhere was it

mentioned in the objectives, reservation for the Scheduled Castes and Other Backward Classes or for the advanced dominant section of the Society.

The organization has also mentioned other concerns like the population of OBC category in these states, which is non-existent, adding that the sensitivity of issue may lead to communal tension in the area.

In the above context, the society urges the President of India / Chairman of the Scheduled Tribe Commission / MP's of the States of Meghalaya, Nagaland and Mizoram/ Chairman, UGC, MHRD Minister etc. to examine the case carefully so that the ST in North East in general and NEHU in particular may not be marginalized by the Government of India norms/ Models for recruiting students for admission in NEHU. The 27% reservation for OBC should not be pushed down the throats of the Scheduled Tribes in the North-Eastern Region; rather, we demand that the 27% for OBC should automatically be allotted to the Scheduled Tribes.

Issues arising from the different reservation systems followed in certain Central Universities particularly in North Eastern Region :

- i. What should be the % increase in intake capacity in view of reservation system being followed in four Universities in North Eastern Region and Babasaheb Bhimrao Ambedkar University?

Should it be taken as 135% increase as explained in Annexure – VI (a)

- ii. Can the reservation be extended beyond 50% including OBCs?

Annexure – VI(a)

Method to workout the proposed intake considering 27 % OBC reservation and maintaining the existing no. of unreserved seats

	Total No. of seats in a course (say)	=	100
2	Reservation SC/ST	=	22.5%
3	PH/other category, if any	=	NIL
4	Seats unreserved category	=	77.5% seats
5	Proposed OBC reservation (27%)	=	27
6	Unreserved seats after OBC reservation	=	50.5

Method to retain the existing unreserved seats i.e. 77.5 (say)

	50.5 General seats after 27% OBC reservation as on today then filled seats =	100
1	-do-	= 100/50.5
78	-do-	= 100/50.5X78 = 154
	Increase in number of seats	= 54

Delhi University has proposed 57% increase in intake to implement OBC reservation

Unreserved seat after OBC reservation (50.5-3) = 47.5

Method to retain the existing unreserved seats i.e. 74.5 (say)

	47.5 General seats after 27% OBC reservation as on today then filled seats =	100
1	-do-	= 100/47.5
74.5	-do-	= 100/47.5X74.5= 157
	Increase in number of seats	= 57

Method to workout the proposed intake considering 27 % OBC reservation and maintaining the existing no. of unreserved seats

Name of the University : Nagaland, Mizoram and Babasaheb Bhimrao Ambedkar University and NEHU, Shillong

	Total No. of seats in a course (say)	=	100
2	Reservation SC/ST	=	50%
3	PH/other category, if any	=	3%
4	Unreserved category Seats	=	47%
5	Proposed OBC reservation (27%)	=	27%
6	Unreserved seats after OBC reservation	=	20%

Method to retain the existing unreserved seats i.e. 47 (say)

	20 General seats after 27% OBC reservation as on today then total seats	=	100
1	-do-	=	100/20
47	-do-	=	100/20X47 = 235
	Increase in number of seats	=	135

Method to workout the proposed intake considering 27 % OBC reservation and maintaining the existing no. of unreserved seats

Name of the University : Manipur University

	Total No. of seats in a course (say)	=	100
2	Reservation SC (2%)+ST(31%)	=	33%
3	PH/other category, if any	=	3%
4	Unreserved category Seats	=	64
5	Proposed OBC reservation (27%)	=	27%
6	Unreserved seats after OBC reservation	=	37%

Method to retain the existing unreserved seats i.e. 37 (say)

	37 General seats after 27% OBC reservation as on today then total seats	=	100
1	-do-	=	$100/37$
64	-do-	=	$100/37 \times 64 = 172.97$
		Say approx.	= 173
	Increase in number of seats	=	73%

1. Views of Nagaland University

The University authorities have raised for consideration the following issues which in the University's view may merit consideration while working on 27% reservation for OBCs.

- I. Nagaland is predominantly a state populated by tribals. The relevant Act of the Parliament states that there shall be a Legislative Assembly with 60 members representing the tribes. Only recently the Assembly has made one of the 60 seats open, the remaining 59 seats are still reserved for the tribes of Nagaland.
- II. It may not be possible to get 27% of students from the OBCs in Nagaland.
- III. In the event of increasing the students intake by enhancing reservations, such seats are likely to be filled in by students other than OBCs as we may not get OBC candidates. Therefore, once reservation is given, the number of students intake is bound to increase irrespective of whether we get OBC students or not.
- IV. According to the existing policy, 15% of the sanctioned posts of Lecturer are reserved for SC. Almost all these positions are lying unoccupied. Due to the stringent reservation policy, the University can not fill in these positions with ST or candidates of other categories.
- V. In view of III and IV above we may be faced with a situation where the envisaged increase in the intake of students would put additional burden on the existing staff in the teaching Departments.
- VI. Because of geographical remoteness coupled with the fact that any non-Naga entering Nagaland requires the Inner Line Permit (ILP), any increase in the student intake would have direct impact on the quality of education unless we are allowed to fill in the SC reserved teaching positions with the available ST candidates who fulfill the UGC prescribed norms.
- VII. Nevertheless, it is desirable that Nagaland University should also have both National and Universal character in discharging its assigned responsibilities.

In view of the above, the Oversight Committee may consider the possibility of Nagaland University filling in the teaching posts reserved for SC with suitable candidates from ST or other categories while enforcing the 27% reservation policy for OBC.

DIARY NO 1590AS
Date 28/6/06

To,
The Chairman,
University Grants Commission, UGC,
Bahadur Shab Zafar Marg,
New Delhi-110002.

Subject: Issue on reservation of 27% for OBC.

Sir,

This is to apprise you that in 1972, the Shillong students' Union (SSU) took up the issue of demanding a Central University in Shillong, Meghalaya. Leaders, like Mr. Eugene Thomas, Mr. T. Pakyntein, J. Offlyn, (Late) H. Sawian and others went to Delhi to meet (Late) Prof. Nurul Hassan, Union Minister of Education and submitted a memorandum demanding a Central University in Shillong, and the discussion was fruitful. The SSU Leadership also submitted a memorandum to (L) Prof. G.G.Swell, MP who also raised the issue of a Central University for Shillong, in Parliament and in no time the Central University Bill was tabled in Parliament and the same was passed on 19th July 1973. Many forms of agitations were withdrawn after accomplishing the demand and hence; -

"The objectives of the University was to disseminate and advance knowledge by providing instructional and research facilities in such branches of learning as it may deem fit; to pay special attention to the improvement of the social and economic conditions and welfare of the people of the hill areas of the North-Eastern region and in particular, their intellectual, academic and cultural advancement".

Therefore, on the basis of the objectives of the North Eastern Hill University (NEHU) it is obvious that NEHU is meant strictly for the Hill people of the region i.e. the Scheduled Tribes of the three states viz. Meghalaya, Nagaland and Mizoram. Nowhere was it mentioned in the objectives, reservation for the Scheduled Castes and Other Backward Classes or for the advanced dominant section of the society. In this regard, NEHU adopted its own reservation policy to protect and promote our ST's interests, identity and to cater to the development of their intellectual, academic and cultural advancement in all spheres of life activities. Moreover, NEHU was established on regional consideration with an aim to promote the Scheduled Tribes of the 3 states in the North Eastern region. Again, in Meghalaya, Nagaland and Mizoram or for that matter even Arunachal Pradesh, the caste system is non-existent and hence, the question of Scheduled Caste does not arise in these states. On the question of OBC, I may refer to the Central Government List for OBC; vide Gazette of India, Published by Authority, No 186, New Delhi, Monday Sept, 13, 1998/ Bhadra 22, 1915. Here OBC for Meghalaya, Nagaland and Mizoram was not listed which virtually indicates that there is no OBC category in these States. Again, on 17th March 2006, the Government of Meghalaya replied to a query in the Assembly Session, that the Government has not published any list of OBC of its own so far (Shillong Times Dated 18th March 2006).

The ST category basically belonged to the North Eastern Region under the 6th Schedule of the Constitution of India, of course, some Adivasi Tribes are accorded ST Status but do not enjoy the 6th Schedule Status as the tribes in the North East.

The SC and OBC categories can be abundantly found in almost all the 5th Schedule States areas and as per the Constitution are inhabited in mainland India. They are found in Andhra Pradesh, Kolkata, Bihar, U.P, Chattisgarh, Madhya Pradesh, Karnataka, Maharashtra, Gujarat, Rajasthan, etc. The question of giving importance to SC and OBC in NEHU is therefore obsolete and not relevant, any wishful thinking to implement the same ought to be done away with.

Therefore, in this context, the Civil Society Women's Organization, (CSWO), urges the President of India/ Chairman of the Scheduled Tribe Commission/ MP's of the States of Meghalaya, Nagaland and Mizoram/ Chairman University Grants Commission/ Human Resource Development Minister, etc to examine the case carefully so that the ST in North East in general and NEHU in particular will not be marginalized by the Government of India norms/ Models for recruiting students for admission in NEHU. The 27% reservation for OBC should not

be pushed down the throats of the Scheduled Tribes in the North-Eastern Region; rather, we demand that the 27% for OBC should automatically be allotted to the Scheduled Tribes. The issue is highly sensitive and may unnecessarily lead to communal tension if not handled carefully, therefore, it needs to be resolved wisely, once and for all.

The CSWO will stand firmly to oppose any group of Politicians who aim to destroy the Temple of Learning (University) for their selfish political gains since the election is round the corner in UP and Bihar.

**Irene.P.Hujon,
President,
CSWO.**

ANNEXURE-VII

(21)

UNIVERSITY OF DELHI
दिल्ली विश्वविद्यालय

Professor Deepak Pental
Vice-Chancellor

VCPU/OBC/06/753
Dated 28 July 2006

Dr. Tilak R.Kem
Secretary
University Grants Commission
Bahadur Shah Zafar Marg
New Delhi 110 002

Dear Dr. Kem

As discussed in the meeting of the Group on Central Universities held yesterday, we are sending you the revised estimates of resource requirements to accommodate OBC reservations. In this connection, we would like to reiterate that the University of Delhi with its 66 constituent colleges and 56 postgraduate departments has an annual intake capacity of 48,491 students while all the other Central Universities put together have a collective intake capacity of 45,497 students. Indeed many of the 66 colleges of the University have individual intake capacity that is greater than the intake capacity of many of the Central Universities. Even for post graduate education, Delhi University admits more than 10,000 students every year which is much larger than is the case of any of the other Central Universities. Moreover, the above figures for Delhi University only include students in the formal stream. If the students in the non-formal stream are included, then Delhi University every year admits more than 137,000 students. This is more than three times the number of students admitted by all other Central Universities put together. The resource requirements of the University of Delhi must be looked at keeping the above mentioned facts in mind.

With best wishes

Yours sincerely,

(Deepak Pental)

136

28 July 2006

RESOURCE REQUIREMENT FOR INCREASING NUMBER OF SEATS AT UNIVERSITY OF DELHI SUBMITTED TO UGC/MHRD/GOI

1. Currently the University of Delhi has around 366,000 students on its rolls.
2. University admits around 40,000 students in undergraduate courses in the formal stream in 68 colleges (excluding medical other than the University College of Medical Sciences, nursing, pharmacy, ayurvedic & unani and engineering colleges). In 2005-06, 104,000 undergraduate students were on rolls. With 57% increase the number will go upto 163,280.
3. At the postgraduate level the University had 17,282 students in 2005-06 (excluding in the above mentioned disciplines). In two years time this will have to be increased to 27,132.
4. The University's Campus of Open Learning enrolled 178,400 students in 2005-06 (176,200 undergraduate students and 2,200 postgraduate students). There is no cap on the number of students who can study at the Campus of Open Learning. The External Candidate Cell had 39,300 students in 2005-06. There is no cap on student numbers in this program as well. The Non-Collegiate Women's Educational Board enrolled 14,100 students in 2005-06 (13,700 undergraduate students and 400 postgraduate students). An increase of 57% will raise this figure to 22,137.
5. In December, 2005 the University submitted to UGC/MHRD a request for a one-time grant of Rs. 162.50 crore to raise the standards of teaching and mentoring both at the undergraduate and postgraduate level. In 2005-06 the University received an additional grant of Rs. 40 crore - around one fourth of the requested money. Rs. 20 crore is earmarked for computational facilities and laboratories in colleges and Rs. 20 crore for equipment and completion of some of the building work.
6. Before the plan for increasing seats is discussed, some of the trends need to be highlighted
 - a. The University in the past four years has revised all the major undergraduate Honours Courses, upgraded the B.Com (P) and B.A. (P) courses to regular B.Com and B.A. courses. A large number of courses at the postgraduate level have also been revised and by 2007 most of the revision will be completed. The new course work requires substantial computational facilities and laboratory upgradation.
 - b. The University has introduced many academic reforms which include internal assessment, tutorials and contact hours.
 - c. The University admits some of the most meritorious school-leaving students as is evident from the cut-off for subjects like Commerce, Economics, English etc. Interest in Science is diminishing and is a major cause of worry.
 - d. With the economy growing at a faster pace, there are new challenges and opportunities in education. However, realization of these opportunities will require infusion of resources and quality faculty.
7. Given that the University is trying to further improve the levels of teaching and mentoring, the additional requirement of 57% seats seems like a colossal task if quality and standards have to be maintained.

Planning for the increase will require an involved, in-depth analysis. Nevertheless some projections are being made.

8. Increase in seats will require additional teachers, classrooms, expansion of library facilities, laboratories and IT infrastructure. In brief, this would necessitate a major one-time expenditure on infrastructure as well as significant increase in recurring expenditure. Beside the enhanced need for resources, infrastructure development will be a time-consuming process which cannot be accomplished in the short term. Therefore, implementation of such massive expansion can be achieved only with sizeable resources over a reasonable span of time.
9. The University of Delhi allows students to earn degrees in B.Com and B.A. through correspondence courses. Worldwide distance learning is receiving tremendous importance. In India very few e-learning courses are being offered. Distance learning coupled with contact programmes would be a major way of spreading higher education. In 2005-2006, 231,800 students were enrolled in non-formal mode with the University. There is no cap on these seats. Thus the University is offering degrees in Arts and Commerce to all those who are desirous of pursuing the same. Hence affirmative action is already in place at the University.
10. To cope with the 57% increase in students numbers while maintaining quality, we propose a multi-pronged approach
 - a. Colleges should not be forced to increase seats by 57% - in some cases no space for additional infrastructure is available. For science colleges which work till 4 p.m., introduction of evening shift will not be possible. Besides, our experience with evening colleges has not been very encouraging.
 - b. In all other Colleges seats could be increased only if additional infrastructure such as classrooms and laboratories is created. Additional teachers will have to be recruited. Creation of necessary Infrastructure will require 2-3 years after release of funds. Teachers appointment will have to be staggered as recruitment in one go may compromise standards.
11. The solution lies in increasing the overall strength through:
 - Starting new colleges
 - Allowing existing colleges to increase seats to the extent possible
 - Strengthening the distance learning mode by development of e-learning platforms and increasing contact hours over a period of time so as to bring open learning at par with regular teaching

The University therefore proposes the following plan which should be implemented over the XI Plan period so as to increase the numbers while maintaining quality and standards.

Plan of Action

12. Opening of new Colleges

- a. *University College of Science and Technology.* At present there is a great need in the country for linking education in the streams of Science and Technology. Meritorious students studying for B.Sc. degrees should be allowed to move to B.Tech. stream thereafter. This would help to attract the brightest of our students into the science stream and facilitate the bridging of the gap between science and technology. This new University College of Science and Technology will have 1,500 students in B.Sc. and 500 B. Tech. students. We estimate that it will cost Rs.150 crore to construct and equip this new college. This does not include the cost of faculty and recurring costs. Land is available with the University.

3

- b. *University College of Commerce and Social Science*: This College will enroll 2,500 students of Commerce and Social Sciences. The College will have courses in media studies and journalism also. The estimated cost of this project is Rs. 60 crore. Land is available.

13. New premises for 9 Colleges

Nine of the University colleges are presently housed in school buildings. These colleges are fully or partially supported by the Government of National Capital Territory of Delhi. They should be relocated to new venues. Funds for developing the new venues may be channeled through the Government of Delhi. The estimated cost is Rs. 40 crore per College. Total cost will be Rs.360 crore. The nine Colleges will together provide an increased enrollment of 6000 students.

14. New Contact Centres for the Campus of Open Learning

The school buildings that will be vacated by the nine Colleges will be converted into Contact Centres for the Campus of Open Learning. These Centres will be equipped with e-learning facilities and shall enable significant level of contact hours between the faculty of the Campus of Open Learning and enrolled students. The estimated cost of this conversion is around 5 crore each.

15. Support for colleges recently shifted to new premises

Three Colleges supported by the Delhi Government are in the process of shifting into new buildings and hence are in a position to increase the student intake from 2007. These colleges can add around 4,500 students to the total number admitted in the University. Around Rs.2 crore will be required for each of the three colleges for this purpose.

16. Creation of more seats in Colleges

In Colleges that have space available, additional infrastructure (such as lecture rooms, laboratories, tutorial rooms etc.) can be created. A proper survey by architects would be needed to estimate how much could be built without compromising the building laws. The number of additional students that can be admitted in each of these colleges will become clear after the survey. As a rough estimate, 20,000 additional students may be absorbed in these Colleges after suitable infrastructure has been created. The working hours of the colleges will have to be increased. Additional faculty would have to be hired. A minimum of Rs.200 crore will be required for creating additional infrastructure.

17. Upgradation of the Campus of Open Learning (COL)

The above described measures would accommodate an additional 35,000 undergraduate students in the Colleges. Since we need to absorb 59,000 additional students, the remaining 24,000 students would be offered places at the Campus of Open Learning. COL would be upgraded and modernized with the creation of suitable e-learning platforms. Faculty strength would have to be increased to produce new course materials and to interact with students. At least Rs.80 crore will be needed to enhance the capacity of COL to meet the new challenge.

18. Postgraduate Education

The 57% increase will result in raising the postgraduate student population from 17,282 to 27,132. The infrastructure in the University's postgraduate departments will have to be significantly expanded at an estimated cost of Rs.250 crore. Currently University science departments are facing severe resource constraints and the University has already requested resources for improving postgraduate courses.

19. Recurring Expenditure

- a. The annual expenditure of Colleges will go up by about 65% to cope with the 57% increase in students. This implies that at least an additional Rs.350 crore will be required to meet the recurring needs of the University's existing and proposed new Colleges.
- b. In 2004-2005 the annual expenditure of the University in the Postgraduate departments, Research centres and Central facilities was Rs.163 crore. After taking inflation into account, 65% increase in the Universities annual expenditure implies that an additional Rs.128 crore will be required.
- c. Campus of Open Learning (COL): The estimate for the additional recurring expenditure of COL is 16 crore. This would be needed to meet the additional staff costs and other additional recurring costs.

SUMMARY OF ESTIMATED ADDITIONAL EXPENDITURE REQUIRED TO SUPPORT 57% INCREASE IN STUDENT POPULATION:

ADDITIONAL NON-RECURRING EXPENDITURE FOR UNIVERSITY DEPARTMENTS

Budget Heads	Rs. (in crore)
Infrastructure and equipment requirements for Postgraduate education & research	250.00
Five hostels for Postgraduate students (at 5 crore per hostel)	25.00
Construction of houses for faculty	20.00
Contingencies	1.00
Total	296.00

ADDITIONAL NON-RECURRING EXPENDITURE FOR COLLEGES:

Budget Heads	Rs. (in crore)
Opening of two new University colleges	210.00
New premises for 9 Colleges (@ 40 crore per college)	360.00
Equipments and facilities for Colleges recently shifted to new premises	6.00
Infrastructural requirement for creation of additional seats in colleges	200.00
University College of Medical Sciences	80.00
Construction of 10 student hostels (@ 5 crore per hostel)	50.00
Total	906.00

ADDITIONAL RECURRING EXPENDITURE (per annum)* FOR UNIVERSITY DEPARTMENTS

Budget Head	Rs. (in crore)
Postgraduate education in University Departments	128.00

ADDITIONAL RECURRING EXPENDITURE (per annum)* FOR COLLEGES

Budget Head	Rs. (in crore)
Undergraduate education in colleges (including University College of Medical Sciences)	360.00
Non-collegiate women's educational board	1.50
Total	361.50

*Current expenditure is

Undergraduate education in colleges (approximate) : Rs.486 crore
 Postgraduate education in university (approximate) : Rs.179 crore

CAMPUS OF OPEN LEARNING**ADDITIONAL NON-RECURRING EXPENDITURE**

Budget Head	Rs. (in crores)
Upgradation of Campus of Open Learning	80.00
New contact teaching centers for Campus of Open Learning	45.00
Total	125.00

ADDITIONAL RECURRING EXPENDITURE

Budget Head	Rs. (in crores)
Total Additional Recurring Expenditure	16.00

At the meeting of the Group on Central Universities held on 27 July, 2006, a new format for presentation of financial information was circulated. The financial requirements are presented below in this new format.

ADDITIONAL NON-RECURRING EXPENDITURE (EXCLUDING CAMPUS OF OPEN LEARNING)**UNIVERSITY DEPARTMENTS**

I Academic Costs		
S. No.		Rs. (in cores)
(i)	Laboratories	70.00
(ii)	IT Infrastructure	10.00
(iii)	Library Facilities	20.00
(iv)	Equipment	Included under column. (ii)
Total Academic Cost		100.00
II. Non Academic Costs		
S. No.		Rs. (in cores)
(i)	Capital cost of constructing colleges, buildings , classrooms	150.00
(ii)	Capital cost of constructing hostels	25.00
(iii)	Construction of houses for faculty	20.00
(iv)	Contingencies	1.00
Total Non- Academic Costs		196.00
Total (I + II)		296.00

COLLEGES

I Academic Costs		
S. No.		Rs. (in cores)
(i)	Laboratories	130.00
(ii)	IT Infrastructure	22.00
(iii)	Library Facilities	23.00
(iv)	Equipment	125.00
(v)	Any other academic support	20.00
Total Academic Cost		320.00
II. Non Academic Costs		
S. No.		Rs. (in cores)
(i)	Capital cost of constructing colleges, buildings , classrooms	531.00
(ii)	Capital cost of constructing hostels (including UCMS)	55.00
Total Non- Academic Costs		586.00
Total (I + II)		906.00

ADDITIONAL RECURRING EXPENDITURE (EXCLUDING CAMPUS OF OPEN LEARNING)

	Rs. (in cores)
UNIVERSITY DEPARTMENTS	128.00

	Rs. (in cores)
COLLEGES	361.50

CAMPUS OF OPEN LEARNING**ADDITIONAL NON-RECURRING EXPENDITURE**

	Rs. (in cores)
Upgradation of Campus of Open Learning	80.00
New contact teaching centers for Campus of Open Learning	45.00
Total Additional Non-recurring expenditure	125.00

Additional Recurring Expenditure

	Rs. (in cores)
Additional Recurring Expenditure	16.00
