P R E F A C E

This volume on District Educational Statistics for the State of Bihar is the eighth in the series of such volumes which will be brought out for all the States and Union Territories. The main aim is to highlight the inter-district variations in a State by giving educational data at district levels with the help of some important indices such as enrolment ratio, percentage of trained teachers, per capita expenditure, teacher pupil ratio, etc.

In order to ascertain whether the educational imbalances have widened or narrowed down with time, the data for the year 1976-77 has been analysed and compared with that for the year 1970-71.

I take this opportunity to express my appreciation of the co-operation received from the Directorate of Education, Bihar and the Project Staff of the Planning, Monitoring and Statistics Division of the Ministry who have prepared this report.

Regional imbalances do exist in the field of Educational Development just as in urbanisation, industrialization, distribution of income and wealth etc. With a view to highlight the regional imbalances in the educational sector, the Ministry of Education and Culture brings out the publication "Educational Statistics : District-wise" quinquennially.

2. A volume of this nature was first published by the National Council of Educational Research and Training in 1960-61. Thereafter, it was decided that such reviews will be brought out in respect of each State every five years by the Ministry of Education and Culture. Accordingly, the reviews for the year 1965-66 were brought out by this Ministry.

3. For making inter-district comparisons possible, some important indices such as enrolment ratios, percentage of trained teachers and per capita expenditure on education have been worked out. These indices show wide range of variations between the districts and hence the need for formulating educational plans at the district level.

II. AREA AND POPULATION

4. After re-organisation of the State in 1977, there are now 31 districts as against 17 in 1971. However, the total area of the State remained the same after reorganisation. In 1977, the district-wise area varied from 1.9 thousands Sq. Kms. in case of Begusarai district to 18.3 thousands Sq. Kms. in case of Ranchi district.

The increase in number of districts from 17 in 1970-71 to 31 in 1977 is due to bifurcation of the following districts:-

<u>1971</u>		<u>1977</u>
Patna	-	Patna & Nalanda
Gaya	-	Gaya, Nawada & Aurangabad
Shahabad	-	Bhojpur & Rohtas
Saran	-	Saran, Siwan & Gopalganj
Champaran	-	West Champaran & East Champaran
Muzaffarpur	-	Muzaffarpur, Vaishali & Sitamarhi (these districts include a portion of Champaran district also).
Darbhanga	-	Darbhanga, Samstipur & Madubhani
Monghyr	-	Monghyr & Begusarai
Purnea	-	Purnea & Katihar
Hazaribagh	-	Hazaribagh & Giridih

..../-

Rest of the districts in 1977 remained as these were in 1971. The figures shown at item No.34 against the title "Anglo-Indian" under column 2 pertains to the Anglo-Indian students spread all over the state and are not included in any district.

5. The population of Bihar was 562.60 lakhs in 1971. For 1977, the estimated population is 633.78 lakhs (325.78 lakhs Males and 308.00 lakhs Females). The highest population was in Darbhanga district (52.25 lakhs) and the lowest in Dhanbad district (14.64 lakhs) in 1971. In 1977 also the estimated population varied widely among the 31 reorganised districts from 35.88 lakhs in Saranthal Paragana district to 12.48 lakh in Gopalganj district.

6. The overall density of population per Sq. Km. was 324 in 1971 which is estimated to have increased to 364 in 1977. The density of population per Sq. Km. in 1977 varied widely among districts viz. from 791, the highest in Patna to only 133 the lowest in Palamu. The area, total population and density of population for different districts for the years 1970-71 and 1976-77 are given in Statement No.2. Table No.1 below gives a general view of the extent of variation in area, population and the density of population in 1977.

7. The total population of the State as well as population of different age groups for the year 1971 and 1977 given in this report are based on the revised population projections (as on 1st March of the year) available from the office of Registrar General of India. District-wise population in the age-groups 6-11, 11-14, and 14-17 are based on the following formula:-

We assume that,

$$\frac{P_{6-11}}{P} = \frac{P_{6-11}^i}{P^i} = K$$

$$P_{6-11}^i = K P^i$$

Where K is estimated from the equation $K = \frac{P_{6-11}}{P}$

P_{6-11} = denote 6-11 age-group population of the State.

P = Total population of State.

P_{6-11}^i = 6-11 age-group population of the ith District.

P^i = Total population of the ith District.

To get the sex-wise break up of total population in the various age-groups of the district, first of all the girls population is estimated using the above equation with the only difference that in the above formula total population is replaced by the girls population. The boys population is obtained by the residual method i.e.

Boys population in the age-group 6-11 (=)

Total population in the age-group 6-11 (-)

Girls population in the age-group 6-11

.../-

Similar formulae are used for estimating the district-wise population in the age-groups 11-14 & 14-17 years.

8. The total estimated population of children in the age-group 6-11 years was 83.62 lakhs in 1977 (43.00 lakhs boys and 40.62 lakhs girls) which formed 13.19% of the total population of the State.

9. Similarly the estimated population in the age-group 11-14 years was 45.54 lakhs in 1977 (23.55 lakhs boys and 21.99 lakhs girls) which constituted 7.19% of the total population.

10. The population in the age-group 14-17 in 1977 was 41.72 lakhs, consisting of 21.70 lakhs boys and 20.62 lakhs girls. This formed 6.58% of the total population.

11. Thus out of the total population of 633.78 lakhs of the State, the School going population in the age group 6-17 years was 170.88 lakhs consisting of 88.25 lakhs boys and 82.63 lakhs girls. The population in the age group 6-17 years constituted 26.96% of the total population. The percentage for boys was 27.08%, while for girls it formed 26.83%.

III - LITERACY

12. According to the 1971 census the effective literacy rate that is the number of literates per hundred of the population (excluding the age group 0-4) in the State was 23.5. The literacy rates for males and females were 35.8 and 10.2 respectively indicating a wide gap between the two sexes. Details are given in Statement No.7.

35. On an average, in 1970-71, a Middle schools served an area of 21.4 sq. kms. The po improved considerably in 1976-77 and a Middle school was then available for every 16.7 sq. area. In 1976-77 the area served by a Middle school was less than the State average in 19 districts. The area served by a Middle school was the lowest in Patna (5.9 sq. kms.) and highest in the case of Palamu (39.3 sq. kms.).

36. The population served by a Middle school in the State decreased from 6,918 in 1970- to 6,081 in 1976-77 i.e. during the period of 6 years. Among the districts, the population served by a middle school in 1976-77 varied from 4,150 in Nalanda to 9,772 in W. Champaran district. The details are given in Statement No. 15. The number of teachers in Middle schools also increased from 47,542 in 1970-71 to 71,918 in 1976-77 showing an increa of 51.3% during the period i.e. an annual growth rate of 8.5%.

(b) ENROLMENT :

37. The total enrolment in Middle schools was 15.77 lakhs in 1970-71 and it increased to 22.99 lakhs in 1976-77 which shows an average annual growth rate of 7.6%. The enrolment at the middle stage i.e. in classes VI-VIII increased from 8.73 lakhs (7.27 lakhs boys and 1.46 lakhs girls) in 1970-71 to 9.67 lakhs (7.80 lakhs boys and 1.87 lakhs girls) in 1976-77. This shows an average exponential growth rate of 1.7% per annum during the period under consideration. The average annual exponential growth rates of enrolment separately for boys and girls in these classes were 1.2% and 4.2% respectively.

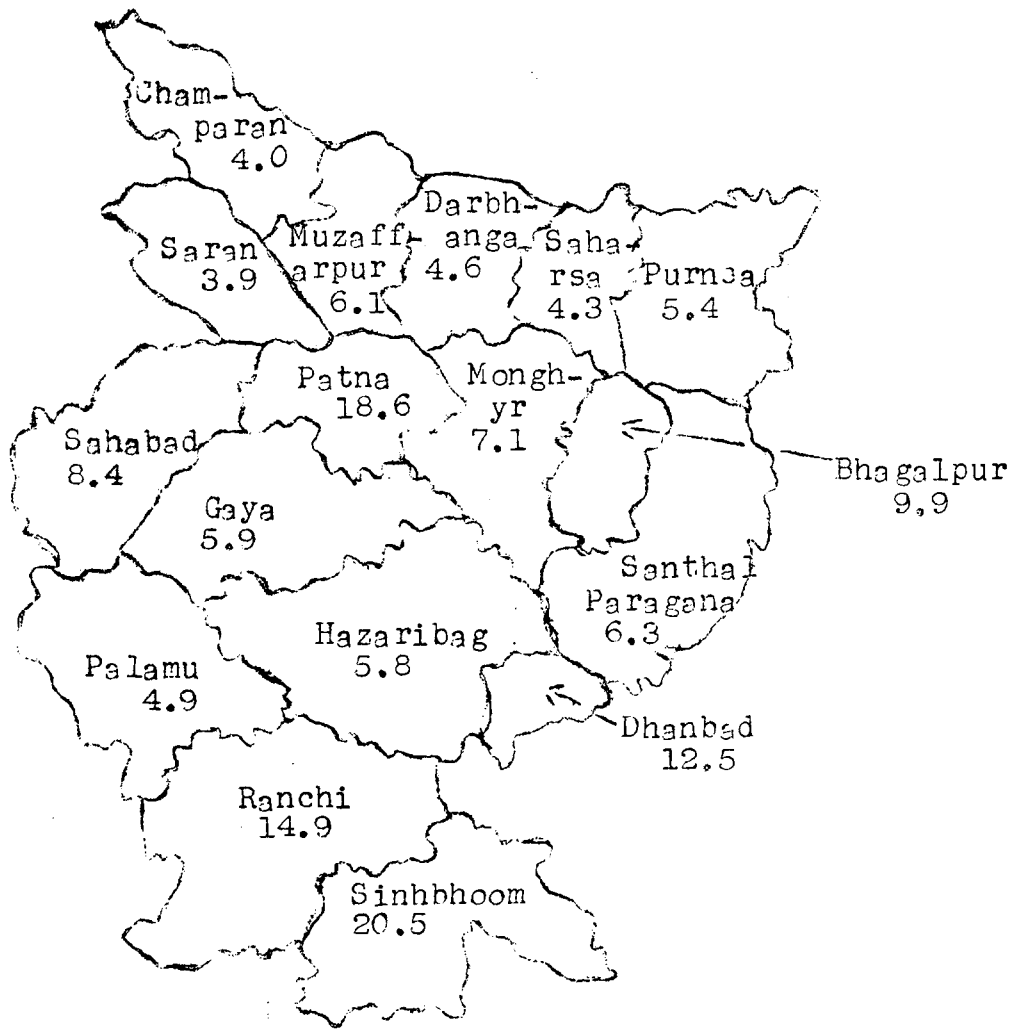

38. The percentage of enrolment in classes VI-VIII to the total population in the age group 11-14 i.e. enrolment ratio gives an index of facilities available at the Middle stage of education. In Bihar this percentage was 22.6 in 1970-71 and 21.2 in 1976-77. In case of boys enrolment ratio was 36.2% in 1970-71 and 33.1% in 1976-77. However, it increased in the case of girls from 7.8% to 8.5% during the period under consideration. Taking boys and girls together, the percentage enrolment in case of 14 districts was more than the corresponding state percentage in 1976-77. At middle stage this percentage indicates a wide disparity between the two sexes in all the districts. However, the position of girls improved slightly during the period 1970-71 to 1976-77. In 1976-77, the enrolment ratio was highest in Patna for boys, girls and total (59.1, 23.1 and 42.3), and the lowest for boys and total in West Champaran district (17.2 & 11.3) whereas the lowest enrolment ratio for girls was in Nawada district i.e. only 2.2. The details may be seen in Statement No.16.

39. Of the total enrolment of 8,72,635 in classes VI-VIII 1,16,217 students belonged to Scheduled Castes and Scheduled Tribes in 1970-71 forming 13.3% of total enrolment. Out of the total enrolment of 9,66,901, the number of students belonging to Scheduled Castes and Scheduled Tribes in 1976-77, forming 6.9% of the total enrolment in classes VI-VIII. The co-efficient of equality for Scheduled Castes therefore comes out to 48.9. Similarly out of the total enrolment in these classes 57,424 students belonged to Scheduled Tribes forming 5.9% of the total enrolment in classes VI-VIII in 1976-77.
