This volume on District Educational Statistics for the state of Andhra Pradesh is the twentieth in the series of such volumes which will be brought out for all the states and Union Territories. The main aim is to highlight the inter-district variations in a state by giving educational data at district levels with the help of some important indices such as enrolment ratio, percentage of trained teachers, per capita expenditure and teacher pupil ratio etc.

In order to ascertain whether the educational imbalances have widened or narrowed down with time the data for the year 1976-77 has been analysed and compared with that for the year 1970-71.

I take this opportunity to express my appreciation of the cooperation received from the Director of Education, Andhra Pradesh and the project staff of the Planning, Monitoring and Statistics Division who have prepared this report.

Regional imbalances do exist in the field of Educational Development just as in urbanisation, industrialisation, distribution of Income and wealth etc. With a view to highlight the regional imbalances in the educational sector, the Ministry of Education and Culture brings out the publication "Educational Statistics District-wise" quinquennially.

2. A volume of this nature was first published by National Council of Educational Research and Training in 1960-61. Thereafter it was decided that such reviews will be brought out in respect of each state every five year by the Ministry of Education and Culture. Accordingly, the reviews for the year 1965-66 were brought out by this Ministry in respect of some of the states.

3. For making inter-district comparisons possible, some important indices such as enrolment ratios, percentage of trained teachers and per capita expenditure on education have been worked out. These indices show wide range of variations in districts and hence the need for formulating educational plans at the district level.

II. AREA AND POPULATION

4. Andhra Pradesh State consists of 22 districts. The number of districts remains the same in both the years under review. Total area of the State is 2.77 lakhs Sq. Km. Among the districts Anantpur has the highest area of 19725 Sq. Km. followed by Guntur 16799 Sq. Km. and Mahabubnagar, 16419 Sq. Km. and Hyderabad has the lowest area of 7767 Sq. Km.

5. In 1971, population of Andhra Pradesh was 4.35 crores (2.20 crores males and 2.15 crores females). Among the districts it varied from 30.67 lakhs in East Godavari to 12.88 lakhs in Adilabad. For 1977, the total population of the state is estimated to have increased to 4.83 crores (2.45 crores ^{males} and 2.38 crores females). Among the districts the highest estimated population was in East Godavari (34.28 lakhs) and the lowest in case of Adilabad (14.3 lakhs).

6. The overall density of population per Sq.Km. was 157 in 1971 at state level. Density of population was the highest (359) in case of Hyderabad City followed by West Godavari (305) and the lowest in Adilabad (80) in 1971. The population density for the state was estimated 175 for the year 1977. Statement 1 gives district-wise particulars of area, population and density of population. Table 1 below gives a general view of the extent of variation in area, population and density of population.

7. The total population of the state as well as of different age groups for the years 1971 and 1977 (as on 1st March) given in the report are based on the revised population projections received from the office of the Registrar General of India. District-wise population for the age groups 6-11, 11-14 and 14-17 for both the years of the report has been calculated using the following formula.

$$P_{6-11}^i = \frac{P_{6-11}^k}{P_{6-11}^i}$$

Where K = 1, 2, 3, 4.

Our assumption being

$$\frac{P_{6-11}^i}{P} = \frac{P_{6-11}^i}{P^i} \quad i = 1, 2, 3, 4.$$

Where

P = Total Population of the state

P_{6-11} = Total 6-11 age group population of the state

P^i = Total population of ith district.

P_{6-11}^i = Total 6-11 age group population of the ith district.

8. To get sex-wise break-up of the total population of different age-groups for the districts, after calculating the total population the girls population is estimated from the above formula with the difference that total population is replaced by girls population. The boys population is obtained by subtracting girls population from the estimated total population for the concerned age groups.
9. The total population of the age group 6-11 of the whole state was estimated to be 64.9 lakhs (33.1 lakhs boys and 31.8 lakhs girls) forming 13.4% of the whole population of the state in 1977.
10. Similarly the estimated population of the age group 11-14 works out to 36.6 lakhs (18.5 lakhs boys and 18.1 lakhs girls) constituting 7.6% of the total population in 1977.
11. 14-17 age group population of the state was estimated to be 33.3 lakhs (16.8 lakhs boys and 16.5 lakhs girls) in 1977. The total 14-17 age group population of 1977 was 6.9% of population of the whole state.
12. Thus of the total population of 483.05 lakhs the school going population in age group 6-17 years was 134.8 lakhs (68.4 lakhs boys and 66.4 lakhs girls). In 1977 the population in the age-group 6-17 years constituted 27.9% of the total population. Among the males and females too the same percentage of 27.9% was reported. District-wise details of population for different age-groups have been given in the statement 2.

III - LITERACY

13. According to 1971 Census the effective literacy viz. the number of literates per one hundred of population excluding the 0-4 age-group was 28.5 for the whole state. In 7 of the 22 districts the enrolment ratio was higher than of the state level. The enrolment ratio in case of girls was the highest in Krishna (30.2) and the lowest in Medak (7.0).

The sex-ratio of enrolment in classes VI-VIII viz enrolment of girls for every 100 boys was 43 in 1970-71 which slightly increased to 47 in 1976-77. District-wise details are given in Statement No.16.

(c) ENROLMENT OF S.C. AND S.T.

45. In 1970-71 the total enrolment of Scheduled Castes and Scheduled Tribes in classes VI-VIII was 72,226 which formed 10.5% of the total enrolment in these classes. Among the districts this percentage varied from 17.0% in East Godavari to 4.6 in Nizamabad. In 1976-77 scheduled Caste students studying in VI-VIII classes were 84,953 forming 9.2% of the total enrolment in these classes. 46. S.T. students were reported only 11,807 studying in classes VI-VIII which formed only 1.3% of the total enrolment in these classes. Extent of coverage of the students of this community was estimated to be 34.1%. The district-wise particulars of S.C. and S.T enrolment and their percentages are given in Statement 17. The expenditure incurred on a middle school was Rs.18,636 in 1970-71 which increased to Rs.41021 in 1976-77. The expenditure on middle schools as perhead of population also increased from Rs.1.3 in

1970-71 to Rs.3.4 in 1976-77. The highest expenditure per head of population was Rs. 5.5 in Karimnagar followed by Warangal (Rs.5.0) and the lowest in Anantpur (Rs. 1.6) in 1976-77.

49. It can be observed from the Statement 18 that cost per student has negative correlation with teacher:pupil ratio. This implies that the average cost per student is high when the teacher pupil ratio is low.

50. Teacher pupil ratio in the middle schools was 1:31 in 1970-71 and 1:32 in 1976-77. Looking at the district-wise position, the teacher pupil ratio varies from 35 in Guntur to 19 in Medak.

53. In 1970-71, on an average a higher secondary school was available for every 95.0 Sq. Kms. Educational facilities improved during the period as for every area of 81.1 Sq. Kms. a Higher Secondary ^{School} could be made available in 1976-77.

54. At the state level a higher secondary school was available for every 14929 persons in 1970-71. The position improved during the period under review as a population of 14162 was being served by a higher secondary school in 1976-77 at the state level. Among the districts the population served by a higher secondary school varies from 25122 in Visakhapatnam to 9226 in Hyderabad City.

55. The number of teachers working in higher secondary schools in the state increased from 49862 to 56964 during the period under consideration showing an average annual growth rate of 2.4% of the total number of teachers, 13411 were women forming 23.5. (b) ENROLMENT

56. The total enrolment in higher secondary schools of the state was 8.12 lakhs in 1970-71 which increased to 12.07 in 1976-77. Enrolment in classes IX-XI increased from 2.79 thousand (208 thousands boys and 71 thousand girls) to 35 thousand (250 thousands boys and 101 girls) in 1976-77 showing an average annual growth rate of 4.3% during the period. The corresponding growth rates for boys and girls were 3.4% and 7.0% respectively.

57. At the state level the enrolment ratio at the high/higher secondary stage i.e. enrolment in classes IX-XI as a percentage of population in 14-17 age group was 10.1 in 1970-71 which slightly increased to 10.5 in 1976-77. In case of boys it declined from 15.3 to 14.9 but for girls it increased slightly from 5.3 to 6.1 during the period under consideration. Among the districts the enrolment ratio varies from 21.5 in Hyderabad city to 5.0 in Medak and Adilabad. District-wise details of enrolment are given in Statement No.20.

(c) ENROLMENT OF S.C. AND S.T.

58. Of the total enrolment in classes IX-XI in 1970-71 8.4% boys and 8.9% girls belonged to Scheduled Castes and Scheduled Tribes jointly. Both boys and girls together formed 8.5%. The extent of coverage in enrolment of scheduled caste and scheduled tribe students was 49.7 in 1970-71. Thus it is seen that higher secondary education of scheduled castes and scheduled tribes was lagging behind the general population in 1970-71.

59. In 1976-77 the S.C. boys and girls formed separately 8.6% and 9.1%. Taking boys and girls together the percentage was 8.7 in 1976-77. Percentage of expenditure on higher secondary schools to total expenditure on education was 28.8 in 1970-71 which declined to 26.5 in 1976-77 at state level. In 1976-77 among the districts the highest share of 40.8% of total expenditure on education was incurred on Secondary Schools in Nizamabad followed by 38.3% in Hyderabad district and the lowest in case of Visakhapatnam (30.1%).

61. Expenditure on higher secondary schools as per head of population was Rs.4.2 in 1970-71 which increased to Rs.8.2 in 1976-77. From the district-wise breakup, it has been observed that the expenditure per head of population varies from Rs.22.9 in Hyderabad City followed by Rs.8.8 in Guntur to Rs.5.2 both in Srikakulam and Adilabad.

62. Average cost per student in high/higher secondary schools was Rs.199 in 1970-71 which increased to Rs.326 in 1976-77. In 1976-77 this variation was from Rs.443 in Srikakulam followed by Rs.428 in Nalgonda to 207 in Adilabad. It can also be seen from the Statement 22 that in 15 of the 22 districts the average cost per student is more than the state average. There exists negative correlation between the cost per student and teacher pupil ratio in High/Higher Secondary schools in the districts viz. average cost per student is high whereas the teacher pupil ratio is low. Teacher pupil ratio was $\frac{1}{18}$ in 1970-71 in higher secondary schools at state level which slightly decreased to 1:21 in 1976-77.
