/ F O R E W O R D /

It is a pleasure to know that the Annual Edition of "District Statistical Handbook of Lower Subansiri District, 1993-94" is being published by the District Statistical Wing, Ziro.

This publication contains many vital facts on different developmental activities of the District. The information contained in this Edition will be of tremendous use for planning at different levels.

I appreciate the sincere efforts put in by Mr. A. Gohain, District Statistical Officer, Lower Subansiri District, Ziro and his staff in bringing out this publication and hope that, this tempo will be maintained in future.

at Ziro, the 21st Dec' 1994.

(RAJIV YADAV), IAS,
Deputy Commissioner,
Lower Subansiri District,
ZIRO-791 120.

INTRODUCTION

The "Statistical Hand Book of Lower Subansiri District, 1993-94" is an Annual publication and is 25th issue of its kind. It aims at presenting a comprehensive picture of various Socio-Economic aspects and progress made in the different field of developmental activities in Lower Subansiri District during the year, 1993-94. The various chapters of this publication are as per the board frame of coverage prescribed by the Director of Economics and Statistics, Govt. of Arunachal Pradesh, Itanagar. The details of the data presented in this publication are relating to the 31st March'1994.

The field data used/presented in this publication are duly collected from various Sister Department/Offices directly or indirectly. The Statistics Branch, Ziro, therefore, does not accept any responsibility for any kind of errors/omissions etc, which might have originated at the source office itself. The source of the field data are duly collected and is given at the foot of each table in this publication.

I avail this opportunity to extend my thanks and gratitude to all the Heads of Departments/Offices for whose sincere co-operation and help made it possible to bring out this Annual Publication in time.

My thanks are also due to all our staff, specially Shri Tasso Kano, SIS and Shri Koj Chatung, FI Ziro for collection of data, compilation and preparing the manuscript copy, to Smti Koj Yanva, LDC and Shri Rupam Pawegam, Contingent staff for neatly cutting the stensils (Typing etc.) and also to Shri Koj Talang, Shri Dani Buga and Shri Joram Khoda, all peon for neatly doing the cyclestyling works.

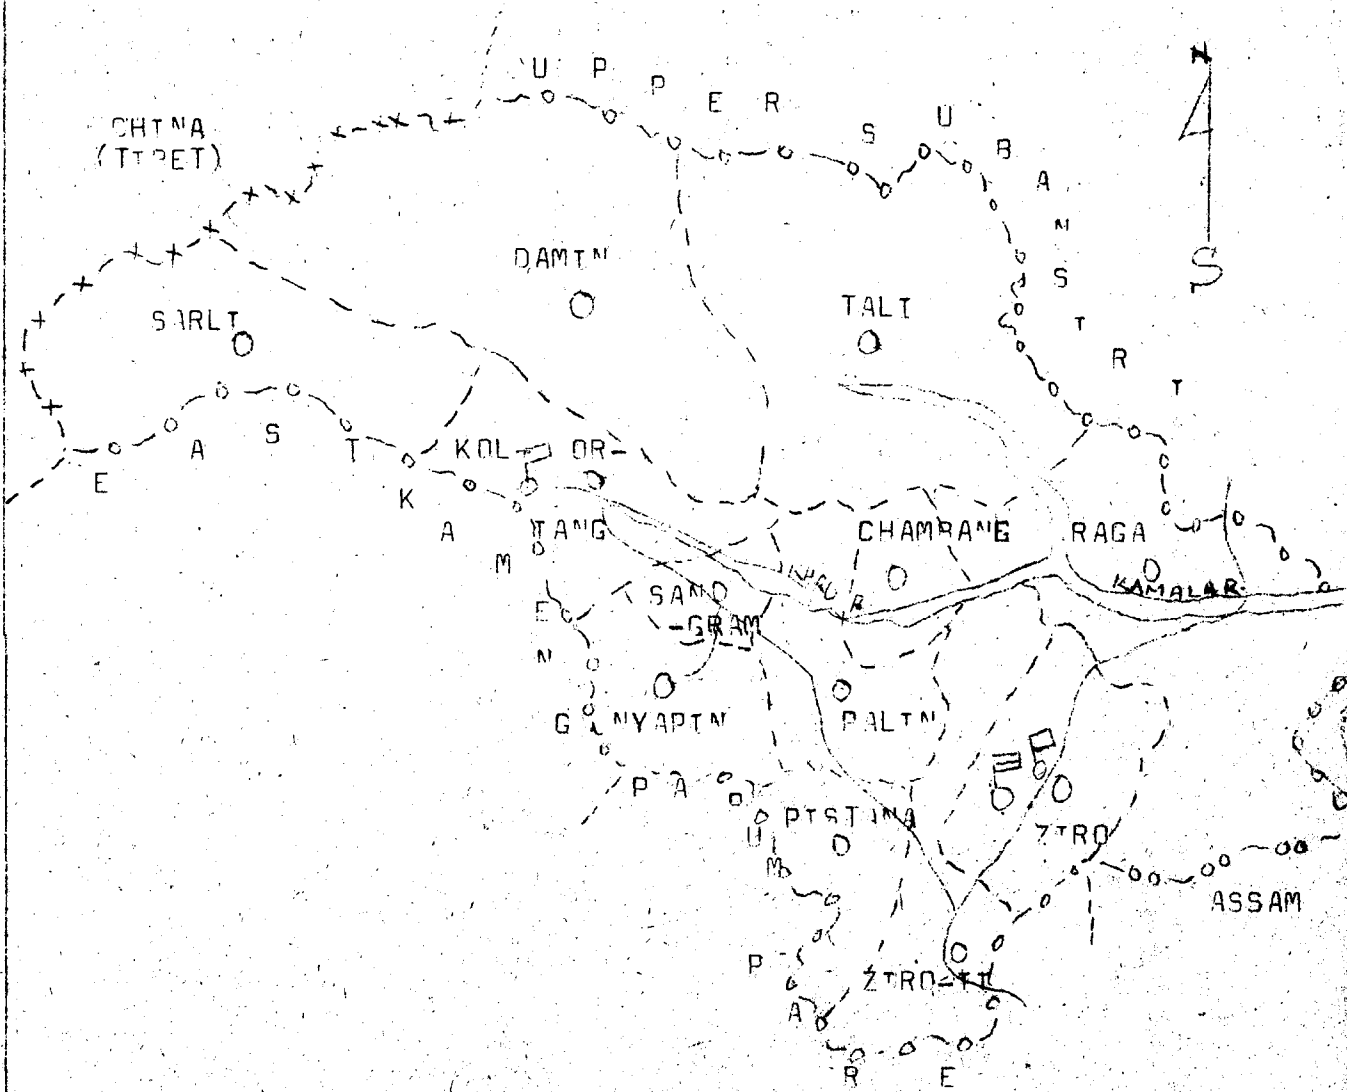

Last but not least, I avail this opportunity to acknowledge with my gratitude to Shri Rajiv Yadav, IAS, Deputy Commissioner, Lower Subansiri District, Ziro for his guidance and writing "FOREWORD" for this publication.

Any constructive suggestions for improvement of this Annual publication of Statistical Hand Book will be gladly accepted.

Dated Ziro, the 21st Dec'1994.

PHYSIOGRAPHY

The Lower subansiri District covers approximately an area of 10,135 Sq. Km. The topography of the District is mostly mountaneous terrain, where the Hill Ranges varies approx from 1000 to 1600 metre above sea Level. A greater part of it, is falls within the higher mountain Zone consisting of tangled peaks and valleys. Nature has gifted the heart land of the District in the form of magnificent plateau at about 1564 metre above sea level, where district H.O. Ziro is situated.

The Forest of the district are rich in valuable species of trees and different varieties of shrubs. Cane and Bamboo grows plenty and in the shadowy recesses of the forests may often be found the exquisite floral treasures of wilder species. The Forests of the District have got great economic values and various types of wild game. The district is also rich in wild fauna. Tigers, panthers, Leonard, Cats, Bear, boars, antelopes and barking deer beautify this nature's Zoological Garden.

One of the main river of this district is KAMLA. The origins of the river is from snow ranges of China (Tibet), which flows towards South East and meets the Subansiri River at Raga circle. The Subansiri river, at one time famous for its gold dust flows through the district and leaving the district at Dollungmukh (Raga Circle). It ultimately joins the mighty Brahmaputra in plains of Assam. Khru, Danior, Ranga, Selu Simmi, Bersen, Rein, Sakhen, Dite, Par, Range etc, river are also worth mentioning.

CLIMATE:

The climatic condition of the District varies from place to place and season to season. The climate is largely influenced by the nature of terrain depending upon altitude and location of place and it can, at best a year may broadly be divided into four seasons in a general (1) The cold weather season is from December to February (2) March to May is the premonsoon season of thunder storms followed by)

(c)

(3) The South West monsoon from June to about the middle of October and (4) the second half of October to November which constitutes the post monsoon or the retreating monsoon period and is a period of transition. In the foot hills or low high belt area of the district, the climatic condition moderate in comparison to high belt areas, where during winter is very cold and chill while in summer is pleasant. December and January are generally the coldest months and July and August are the warmest months.

Annual Rainfall in the South is heavier than in the northern areas of the District. During the monsoon period more than 70 percent of the rain over the southern half occurs while in the northern portions it is about 60 percent. Variability of rainfall for the monsoon and the year, as a whole, are relatively small. Average Annual rainfall of the District is recorded as 355 cms.

Relative humidity is always high throughout the year except in the winter months being slightly less humid. In the cold season, the sky is obscured on many mornings due to lifted fog which clears with the advance of the day generally moderately clouded in the period of March to May, heavily clouded to overcast in the monsoon season and clear or lightly clouded during the post monsoon season. Winds are generally light. Strong Katabatic winds down the valleys are experienced as local effect produced by the nature of terrain.

POPULATION

As per 1991 census Lower Subansiri District is having 595 villages with a total population of 93,167 comprising 42,502 Males and 40,665 females. Ziro township has a population of 2,862 persons, comprising 5,060 Males and 3,802 females.

The average density of population per Sq.Km is 8 (approx) for the district as compared to 10 persons for Arunachal Pradesh.

The approximate literate population of the District as per 1991 census was 27,229 forming 32.74 percent of the total population. The average literacy rate among males and females was recorded as 40.55 percent and 18.55 percent respectively.

(D)

The District Head quarter, Ziro has declared as urban during 1991 census and rest areas of the District are still considered as rural. The sex Ratio indicated 956 females per 1000 males. The decennial growth rate of population (1981-91) was recorded as 37.23 for the district.

LOCAL INHABITANTS:

There are 3 (three) major tribes in Lower Subansiri District, namely, Apatanis, Nishis (Nishangs or Dafla) and Hill Miris:-

APATANIS:

The Apatanis are belong to the Tibeto-Mongoloid stock. All Apatanis trace their descent from one legendary ancestor, ABOTANI. They are migrated to this magnificent plateau from Northern area beyond Khru and Kime Rivers. They are well-built, fair in complexion and medium to tall in structure. The Apatanis live in fairly large which are compact and permanent although during recent years they have been persuaded to disperse to avoid damage by fires. In spite of their distinct entities among class, they are mutually linked up with kinship, ritualistic and friendship ties. Some of them have good business acumen. Their houses are made of bamboo and timber.

An Apatani family is patriarchal. They divided into two classes, the GYUCHI and the GYUTTI, who do not intermarry. But now-a-days inter-marriage among these classes is being encouraged by the younger generation and intellectual group of the Tribe. The religion is indigenous. Earlier, the Apatanis have prominent tattoo marks on the face. However, the system of tattooing is being discouraged by the younger generation and has abolished.

The Apatani tribe is sub-divided into a number of clans. All of them are believed to have originated from a single tribal identity. Among themselves, these people are highly Co-operative. The tribe endogamy and clan exogamy is the rule of the tribe. Monogamy is the social norm but sometimes bigamy is also practised.

Marriage is solemnised either by the way of negotiations or by seeing omen with the help of chicken liver. The process is first initiated from the boy side.

The Apatanis perform many pantomime dances out of which the DAMINDA and PAKHU ITTU dances are very popular. DREE, YAPUNG, MYOKO and MURUNG are the major festivals of Apatani. Dree and Yapung festivals are celebrated every year in the month of July and sometimes in the month of September and October, respectively. There is great merry making and dancing during the Dree festival. The Myoko festival is celebrated each year in the month of March in a cycle manner by forming three groups of villages. First group comprised of Hong village alone. Second group are Hari and Bulla (comprising Hari, Kalong, Reru, Tajang and Lempia villages). Third group are the villages of Hija, Dutta, Mudang Tage and Bamin-Michi. Murung is celebrated every year in the month of January. The significance of these festivals are mainly to ensure better cultivation, protect the grains from hailstone, storms insects and wild animals and well being of villagers in general and their live stock.

The Apatanis are Agriculturists. They practice permanent type of cultivation and their agricultural paddy fields are well developed and irrigated. They rear Withuns (*bos frontalis*), cattle, pigs, Goats and poultry. They practise fishing by nets, angles and traps. They hunt and chasing by means of spears, traps, and bows and arrows. The Apatani women are skillful weavers. Basketery is the popular handicraft amongst the men folk.

There is a village council in each Apatani village and the council consists of one or two BULIYANG representative from each clan. The position of a Buliyang is hereditary. They are arbiters of tribal law and the upholders of tribal justice, but the individual buliangs are primarily the spokesmen of their own clan or groups of clans and not chieftains, wielding absolute authority. The councils of Buliyang formesly decided almost all the cases that were reported to them. If a person or party did not conform to the decision of the council, the MEEHAS could destroy the disputed property and thus coerce his or their party to agreed party.

(F)

The Buliyangs of the entire Apatani community are divided into two broad groups viz :

- (1) TALYANG-HAO, comprised of Hari, Kalong, Dutta, Mudang Tage and Bamin Michi villages and (2) NIICHII-NIITII-RERU -- TAJANG-DIIRE-HIJA, comprising of Reru, Tajang, Hija and Hong villages.

THE NISHIS:

The Nishis, also called Nishangs in the upper areas are believed to be belonged to the Tibeto-Mongoloid ~~xx~~ stock. All Nishis trace their descent from one legendary areance stor, ABOTANI, whose Grand sons are believed to have been the fore fathers of three groups of clans known as DOPUM, DODUM and DAL, respectively. The Nishis, inhabitants of the western half of the district are migrated from Northern area, beyond khru River. They are well-built, fair in complexion and medium to tall in physical structure. Some of them have good knowledge of business. Their houses are made of thatch, bamboo and timber.

Each of these main groups (Dopum, Dodum and Dal) is sub-divided into phratries and exogamous clans and there are areas where clans of all these three main groups live side by side. Nishi family is patriarchal and polygamy is practised. Mithuns are essential part of the bride price for marriage. Their houses are dispersed over the hill-side and they live in small scattered villages. Most of their dwelling houses are long with many hearths, accomodating as many as five to six households belonging to a common lineage. Families may join or leave a village at will from one village to the other.

The Nishis observe a number of ceremonies in the villages. The important community festival is known as NYOKUM, performed once in a year in the month of February. During this festival the priests devote days together to pray the supreme being. Men and women rejoice by dancing, singing and feasting as part of the ceremony. The Nishis too have a number of songs and dances for different socio-religious festivities. The RIKAM-PADA is most popular and important song and dance of Nishis community. The significance of Nyokum festival is to ensure better cultivation, protect the grains from natural calamities and alsfor the prosperity of the villagers all being in general.

(G)

The Nishi women are adept in weaving skill. Basketery is a popular handicraft among the men-folk.

The Nishis are agriculturists and they commonly practises shifting cultivation (Jhuming) Permanent cultivation is also being progressively adopted, wherever it is feasible. Principal method of Jhuming consists of clearing of a patch of jungle by cutting and burning after a number of years called the 'Jhum cycle' Mithuns, cows, Pigs, Goats and fowls are kept. They hunt and chase by pears, traps, bows and arrows.

There is a village council in each Nishi village which is responsible for the internal administration.

THE HILL MIRIS:

The Hill Miris are fair in complexion. Their main concentration is spread over Raga Circle. Main festival is BOORI-BOOT, which is being celebrated in the month of February with full of rejoicing and enthusiasm. They weave elegant garments and are fond of dance and music. The socio-economic and political life of the Hill Miris are almost similar to that of the Nishis. There are, of course, certain regional differences, for example, the Hill Miri houses have only three to four hearths, their head-dress is more elaborate and they claim association with the Miris of the plains.

ADMINISTRATIVE SET UP:

The Administrative set-up is based on single line Administration, which aims at keeping closest Co-operation amongst various developmental departments with the administration to keep step together for speedy development of the people and the area.

The entire Lower Subansiri District is divided into 2 (two) Sub-Divisions viz:- Ziro and Kolo. Ziro sub-Division is comprised of 7 (seven) circles, Ziro (sadar), Ziro-II, Pistana, Palin, Chambang, Kolo and Kolo. Kolo sub-Division has got 5 (five) circles.

(H)

Damin, Nyapin and Sangram.

The District has 12 (Twelve) circles and 595 villages. The District has been covered by 9 (Nine) blocks, comprising of Palin, Chambang, Ziro-I, Ziro-II, Tali, Tamen-Raga, Koloriang-Sarli, Huri, Damin and Nyapin.

The Deputy Commissioner, being the over-all In-charge of the District, maintains law and order with the help of Administrative Officers and Police force. He is also look after the developmental activities of the District. The villagers have their own customary administrative system in the form of traditional village councils. The Assam frontier (Administration of Justice) Regulation, 1945, authorises the village councils to settle all civil matters and certain criminal matters falling within their jurisdictions. However, for all matters, the Deputy Commissioner and other Administrative Officers, have jurisdiction under the supervision of Assam High Court, who holds the appellate and the revisional authority.

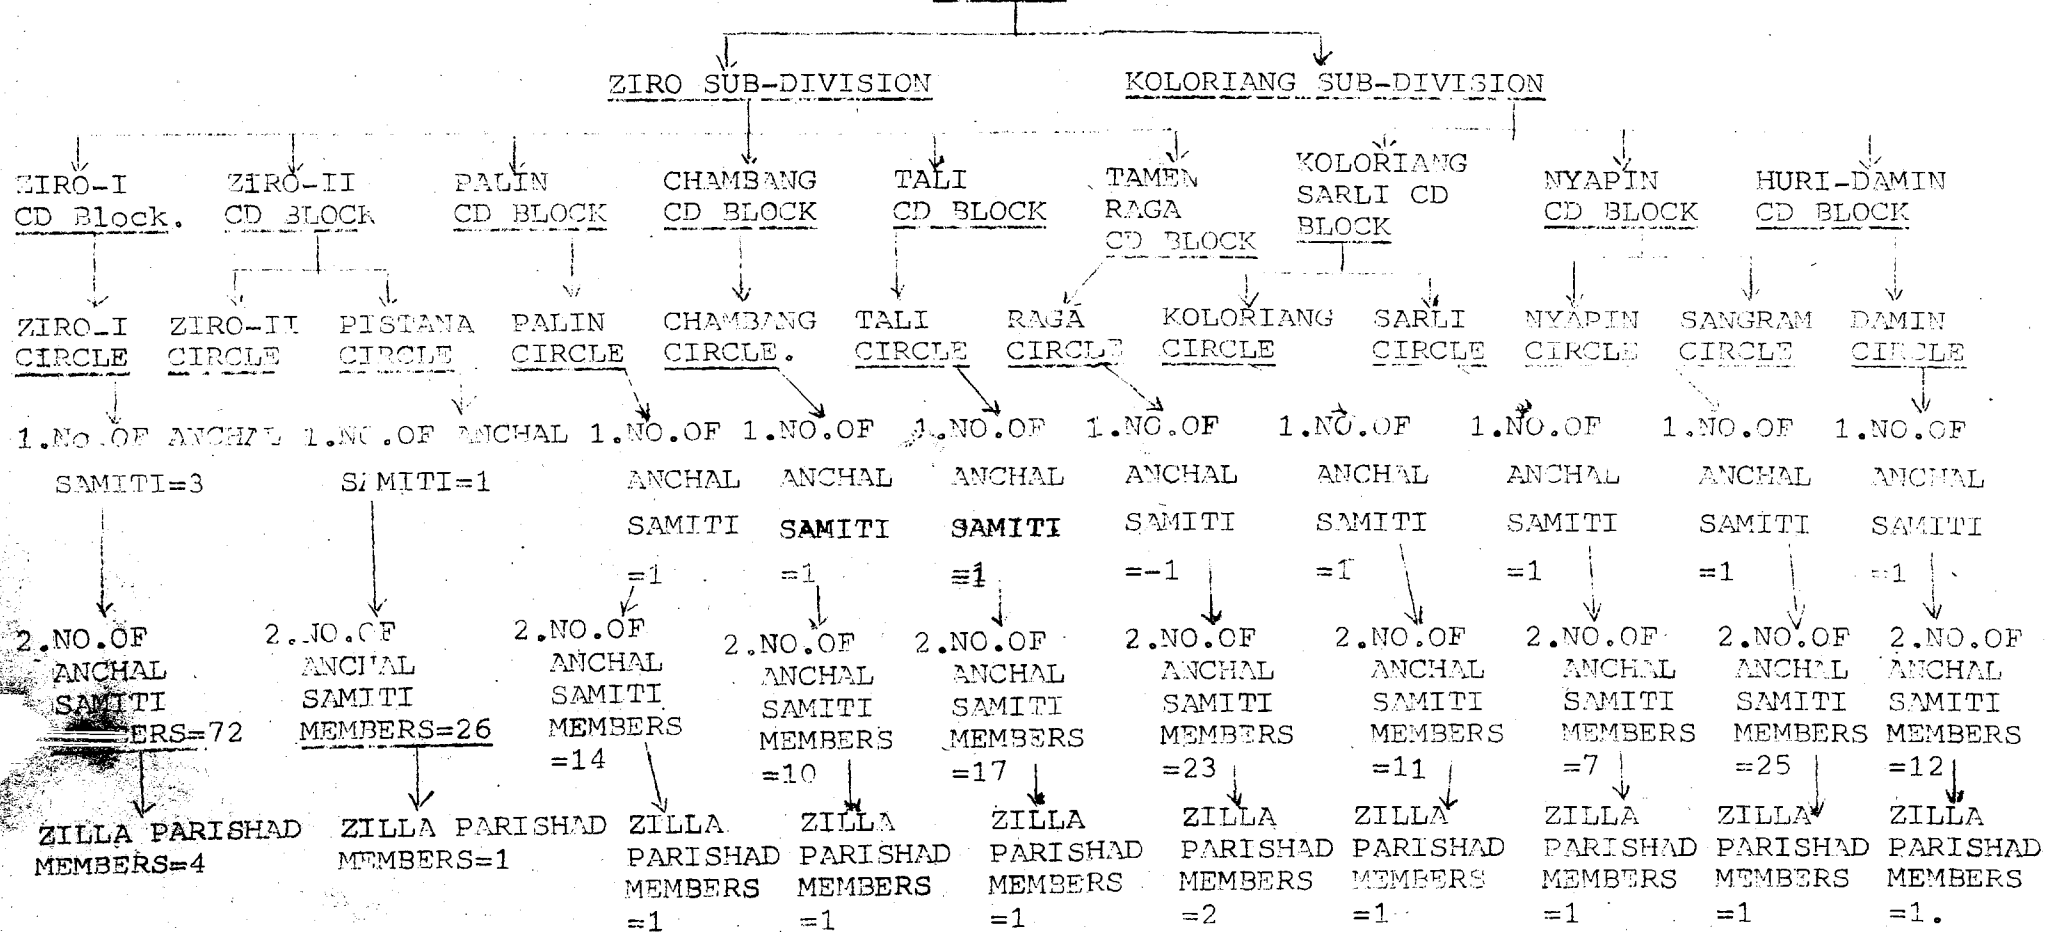

The panchayat Raj has been introduced in the District with the North East frontier Agency Panchayat Raj Regulation, 1967. Under this Regulation (1) The Gram Panchayat (grassroot bodies) exist at the village level, (2) The Anchal Samiti at the Block/Anchal level, (3) The Zilla Parishad operates at the District level and (4) Agency council operates at the Agency level. The Regulation provides for effective participation of the people in the Administration of Arunachal Pradesh through the institutions set-up under the panchayat Raj scheme.

ADMINISTRATIVE SET UP SHOWING DISTRICT, SUB-DIVISIONS, CD/IRD BLOCKS,
CIRCLES AND PANCHAYAT RAJ SYSTEM OF LOWER SUBANSIRI DISTRICT.
