## SITheman india EDUCATional SURVEY

## STATE REPORT ARUNACHAL PRADESH

## DIRECTORATE OF SCHOOL EDUCATION ARUNACHAL PRADESH

$\%$

## FOREWORD

The Sixth All India Educationel Survey was conducted in Arunachal Pradesh along with rest of the country under the overall supervision and guidance of the National Council of Fducational Research and Training (NCERT), with $30^{\text {th }}$ September' 1993 as the reference date. The Survey covered all the schools of the State from primary to higher secondary irrespective of their management. The data collected in the course of the Survey are of immense importance in order to understand the status of school education, availability of various facilities, areas of concern, etc. for proper planning and policy initiatives required for quality education at various stages.

The Survey was indeed a gigantic task considering the hilly terrain of the State coupled with communication bottlenecks. Inspite of that the task was accomplished under the strict supervision and control of the State Survey Unit and belp and cooperation of the State Unit of the National Informatics Centre (NIC) in compilation and computerisation of the Survey results.

The State Report which is of an analytical nature is the culmination of the whole operation. It is written by a team of officers constituted for the purpose. Earlier block tabulations in 55 volumes (one for each block), district tabulations in 12 volumes (one for each district) and state tabulations in 5 volumes were brought out by the State Survey Unit in collaboration with the NCERT and the NIC. The present report gives an analysis of the different aspects covered in the Survey. It is hoped that the State Report of the Sixth Educational Survey will be useful to the planners and researchers.

I express my gratitude to all the Block Survey Officers, District Survey Officers and the State Survey Unit headed by Shri N.Dutta and also the State Unit of the NIC who worked as a team in the execution of such a gigantic project. I also express my thanks to the project team of the NCERT for their expert guidance and help.

I must convey my sincere thanks to the team of officers consisting of Shri D.C.Nath, Dr. B.P.Sah and Shri N.Dutta for sparing their time to write this State Report. My thanks are also due to the statistical staff, typists and all others who have rendered their valuable services in connection with the Survey.

MS. SANGAY LHADEN
Secretary (Education)
Govt. of Arunachal Pradesh
Itanagar.

## PREFACE

All India Educational Surveys are the important source of information for educational planning, research and formulation of educational policies. The Sixth All India Educational Survey has been conducted with reference data as on September 30, 1993. This Survey is a joint endeavour of the National Council of Educational Research and Training (NCERT) and the National Informatics Centre (NIC) and the State departments of education. Previously five such Surveys have been conducted by the NCERT with the involvement of the State departments of education and the reports published at the State and National level. In all this previous Surveys the data processing was done manually whereas in the Sixth Survey it was done with the help of computers with an aim to build-up a computerised database on school education.

The Survey operation in Arunachal Pradesh have been undertaken by the project team of the State education department under the active support and academic guidance provided by the NCERT project team. A very wide variety of data comprising more than a thousand data items of school education have been collected from all the 55 blocks of the State with the help of the block level education officers and school teachers. A great deal of effort has also been put for validation of the data in computer and interconsistency of information collected from various schedules during the Survey. The data have been analysed and made available to the users by bringing out block tabulations in 55 volumes (one for each block), district tabulations in 12 volumes (one for each district) and State tabulations in 5 volumes besides other publications at the national level.

The State Report is now being brought out. This rejort is an important outcome of the Survey presenting analytical discussion on the various aspects covered in the Survey. The report has been written by a team of officers consisting of Shri D.C.Nath, Dr. B.P.Sah and myself.

I would take this opportunity to acknowledge my sincere thanks to all the officers and members of the project teams in the NCERT, the NIC and the State department of education who have made sincere efforts to complete this gigantic task. I express my special thanks to Shri D.C.Nath and Dr. B.P.Sah for their important role and helping me in preparing this State Report. I also express my thanks to all other staff particularly Shri P.K.Rajkhowa and Shri G.K.Iev for their supporting role in bringing out this report. I am grateful to block level officers, district level officers, members of the State Survey Unit and the State Unit of NIC who extended all suppoit in completing this project. Finally. I express my gratefulness to the State Education Secretary and the Director of School Education for extending their administrative support and all help in executing the Survey operations.
N.DUTTA

State Survey Officer
Arunachal Pradesh
Itanagar.

## CONTENTS

FOREWORD ..... iii
PREFACE ..... v
Chapter 1 Introduction ..... 1
Sixth AIES objective, scope, concepts and definition and organisation of Survey at the State level, State profile.
Chapter 2 Habitation in Rural Areas
Villages by population, habitations in different population slabs (all habitations, predominently populated by SC/BT)
Chapter 3 Education at Primary Stage ..... 13
Habitations and villages having eductional facilities in them by population slab; habitation served by educational facilities by population slab and distance for all habitations, predominantly populated by SC and ST; habitations and villages not served by population slabs; primary schools by area, management, type, teachers, enrolment. class-rooms, etc.; primary sections by area, management type, enrolment at primary stage by area, management, sex, SC and ST, etc.; enrolment ratios and class- wise repeaters rate; pupil-teacher ratio.
Chapter 4 Education at Upper-Primary Stage ..... 19
Habitations and villages having eductional facilities in them by population slab; habitation served by educational facilities by population slab and distance for all habitations, predominantly populated by SC and ST; habitations and villages not served by population slabs; upper primary schools by area, management, type, teachers, enrolment, class-rooms, etc.; upper primary sections by area, management, type, enrolment at upper primary stage by area, management, sex, SC and ST, etc.; enrolment ratios and class-wise repeaters rate; pupil-teacher ratio.
Chapter $5 \quad$ Education at Secondary Stage ..... 25
Rural habitations and villages served; facility for secondary education as per distance and population slabs of habitations (ALL, SC and ST); secondary schools by area, management and type; enrolment, area, management, sec, SC and ST; repeaters rate, laboratory, guidance services, Home Science etc.

| Chapter 6 | Education at Higher Secondary Stage <br> Facilities for higher secondary stage as per distance, population slabs (ALL, SC \& ST); hr. secondary schools by area, management and type; enrolment in classes XI and XII by area, management, sex, SC and ST; enrolment of classes XI and XII attached to degree colleges; streamwise enrolment; facilities for science teaching; enrolment indices; laboratory, guidance services, home science etc. | 30 |
| :---: | :---: | :---: |
| Chapter 7 | Other Forms of Education <br> Pre-primary education, non-formal education, education for disabled children, unrecognised schools. | 35 |
| Chapter 8 | Teachers <br> Tenure of service; teachers at various school stages; academic \& professional qualifications of teachers by school stages; utilisation of teachers; teachers teaching science and mathematics by qualifications and their utilisation; attrition rate of teachers; housing facility to teachers and teachers residing outside the village and town. | 37 |
| Chapter 9 | School Building <br> Type of school buildings and its ownership; use of school building; availability of class-rooms; expansion potential and additional rooms required; drinking-water, urinals, lavatories, facilities. | 42 |
| Chapter 10 | Educational and Ancillary Facilities <br> Libraries; book Bank; facilities for sports and games; sports/games equipment/material available and their use; sports/games activities; medical check-up of students; inoculation/vaccination; contingency funds; SUPW facility; incentive schemes; blackboard, furniture for teachers and students. | 46 |
| Chapter 11 | Educational Finance <br> Different type of fees per students per annum at different stage of education; recurring and non-recurring income of schools by sources; recurring and non-recurring expenditure of schools on different items | 50 |

## CHAPTER 1

## INTRODUCTION

1:0 The first endeavor that the Government of India made for the assessment of the magnitude of the task of accomplishing the goal of Universalisation of Elementary Education (UEE) and for planning the future strategy was the first All India Educational Survey (AIES) which was conducted by the Union Ministry of Education in 1957 and, as a follow-up action, rapid expansion of elementary education began with the opening of new schools; and the Government of India started conducting the AIESs periodically for assessing the availability of educational facilities, identifying imbalances, providing basic input in the formulation and mid-term evaluation of Five-Year Plans of education. Except this first one, the National Council of Educational Research and Training (NCERT) and the State Governments/Union Territory Administrations have conducted the earlier four AIESs on complete enumeration basis.

The Sixth All India Educational Survey is different from the previous surveys with regard to survey methodology because, for the first time, computer system has been used for processing the data collected on complete enumeration basis as well as from each and every unit of school and habitation in Arunachal Pradesh. The date of reference for the collection of data is 30 September, 1993. The use of computer system and NIC facilities has helped in efficient processing of survey data and dissemination of information.

### 1.1 OBJECTIVES OF THE SIXTH ALL INDIA EDUCATIONAL SURVEY.

The objectives of the Sixth All India Educational Survey are enumerated below.
(i) To create database on variables of the Sixth AIES that can be shared by different agencies.
(ii) To develop computerised Management Information System (MIS) to be maintained and updated on an annual basis at various levels of administration.
(iii) To assess the present position of the eudcational facilities at various stages of the school, in respect of coverage of the school going population, the distance to be covered by a child to reach the school, enrolment in general, and of Scheduled Caste (SC) and Scheduled Tribe (ST) children and girls in particular with special reference to Universalisation of Elementary Education (UEE).
(iv) To assess the availability of physical facilities, like school building, play ground, furniture etc.
(v) To assess the availability of basic amenities, like medical check-up, drinking water, urinals, etc.
(vi) To identify incentive schemes and the number of beneficiaries.
(vii) To assess the position of educational inputs, like blackboards and chalk, library, laboratory, text-book bank, etc.
(viii) To know about the academic and professional qualifications of working teachers with special reference to teaching of science and mathematics, and to determine attrition rate in the teaching profession.
(ix) To assess the availability of other educational facilities, like non-formal education, education for disabled children and pre-primary education.

The National Policy on Education, 1986 emphasised on qualitative improvement of education with special reference to the socially disadvantaged groups of the society including the women. Therefore, the focus of educational planning has gradually shifted from the Fifth AIES and onwards towards quality of educational facilities. Thus, it is directed towards not merely opening of new schools or upgrading the existing schools but also to provide the basic minimum educational facilities in them. The blackboards, textbooks, other instructional and play material for the purpose of attracting more children to schools and making their learning more interesting and purposeful.

### 1.2 SCOPE OF THE SIXTH ALLL INDIA EDUCATIONAL SURVEY.

The scope of the Sixth All India Educational Survey seeks to cover the following aspects for the purpose of realising the objectives mentioned above.
(i) Educational facilities in rural and urban areas for general education, non-formal education, special education and pre-primary education.
(ii) School characteristics, Facilities for academic activities including language teaching and medium of instruction; courses offered at higher secondary stage; Integrated educational programme; physical facilities including accommodation, library, guidance and counselling, teaching of science and home science; sports and games facilities; Teachers' strength; Enrolment class-wise including the enrolments of classes XI and XII.
(iii) Qualitative aspect of the facilities like accommodation, teaching aids, library, sports and games material; ancillary services including health and incentive schemes; media of instruction and language teaching; age-grade-wise enrolment; repeaters; income and expenditure.
(iv) Teachers' personal characteristics; their academic and professional competence; competence in mathematics and science teaching.
(v) District level income and expenditure on education.

The above mentioned scope of the Sixth AIES makes it evident that this survey operation generates massive data, which have increased manifold in comparison to the data volume of the previous fifth AIES without which the objectives, as anumerated above, may not have been accomplished.

The tools of the Sixth All India Educational Survey consisting of welldefined proformae.
(i) Village Information Form (VIF) : It is meant for collection of information in respect of all the villages that figure in the 1991 census or which have come up afterwards with regard to actual/estimated population of the village; number of recognised schools in the villages; actual/estimated population in various habitations of the villages; distance at which the schooling facilities for primary, upper primary, secondary and higher secondary stages are available for each habitation; habitations predominantly populated by Scheduled Castes and Scheduled Tribes; number of unrecognised schools in the village; centres for nonformal education, their instructors and enrolment by sex; schools for the disabled (handicapped) children, their number and disability-wise enrolment; schools for pre-primary education.
(ii) Urban Information Form (UIF) : It seeks to collect information about actual/estimated population of these towns; number of recognised schools of different types; centres for non-formal education, their instructors and enrolments by sex, schools for the disabled (handicapped) children, their number and disability-wise enrolments; schools for pre-primary education.
(iii) School Information Form - 1 (SIF-1) : It is devised to collect information from the recognised primary, upper primary, secondary and higher secondary schools about their identification, management, type, class-rooms and basic facilities, availability of teachers, type of courses, library facilities etc.
(iv) School Information Form-2 (SIF-2) : It is meant for collecting information from the recognised primary, upper primary, secondary and higher secondary schools regarding medium of instruction, school buildings, play grounds, teching-learning material, class-wise enrolment details, income and expenditure of schools etc.
(v) Teacher Information Form (TIF) : It is meant for collecting information from teachers about their tenure of service, full time/part time, educational qualification, trained/untrained, age, sex, category, capability to teach subjects like mathematics, science etc.
(vi) Educational Finance Form (EFF) : Through this form data on income and expenditure on school education at the district level are sought to be collected.
(vii) Educational Statistics - A Flash (ESF) : This form is designed to compile the data at the Block/Town levels through VIF and SIF-1. This information is to be compiled on a high priority basis so that key results of the survey could be flashed just after data collection.

## 1.4 CONCEPTS AND DEFINITJONS

Some of the important concepts and terms used in the various forms for data collection are defined as below.
(i) VILLAGE : A village means the 'census revenue village' as used in the 1991 census. It represents a parcel of land whose boundaries are defined and settled for revenue purposes. A village with no population will be termed as 'bechirag' or 'deserted' or 'uninhabited'.
(ii) HABITATION : A habitation is a distinct cluster of houses existing in a compact and contiguous manner with a local name and its population should not be less than twenty-five in plain areas and less than ten in hilly or sparsely populated areas. In case a village has only one habitation, the population condition will not apply.
(iii) URBAN AREA : All areas which were identified as 'Urban' at the time of the 1991 census or subsequently notified to be so are to be treated as urban. In Arunachal Pradesh, there are ten urban areas - Bomdila, Along, Pasighat, Tezu, Namsai, Khonsa, Ziro, Itanagar, Naharlagun and Roing.
(iv) RURAL AREA : Areas which are not urban shall be treated as rural.
(v) SCHOOL STAGE : The education pattern differs from State to State. Various combinations of classes of the school system constitute primary, upper primary, secondary and higher secondary stages.
(vi) SECTION : All the students of a class are divided into groups for the convenience of teaching. Each group is called a section.
(vii) C.D.BLOCK : C.D. Block in this survey connotes 'the Block under the community project administration'. In this survey the C.D.Block (not educational) is the unit for collection of data.
(viii) RECOGNISED SCHOOL : A recognised school is one in which the course(s) of study followed is (are) prescribed or recognised by the Government (Central/State) or by a University or a Board constituted by law or by any other agency authorised in this behalf by the Central or State Government and which satisfies one or more of the authorities, e.g. Directorate of Education, Municipal Board, Secondary Board, etc. with regard to its standard of efficiency. It runs regular classes and sends candidates for public examination, if any.
(ix) MANAGEMENT : The authority which runs a school determines its type of management. It may be government, local body or private body receiving government aid or not receiving government aid.
(a) GOVERNMENT : All schools run by the State, Central Government, Public Sector Undertakings or Autonomous Organisations completely financed by the Government will be treated as Government Schools.
(b) LOCAL BODY : All schools run by municipal corporations, municipal committees, notified area committees, zilla parishads, panchayat samities, cantonment boards, etc., will be treated as local body schools.
(c) PRIVATE AIDED : A private aided school is one which is run by an individual or a private organisation and receives maintenance grant from a government or a local body.
(d) PRIVATE UNAIDED : A private unaided school is one which is managed by an individual or a private organisation and does not receive maintenance grant either from a government or a local body.
(x) TYPE OF SCHOOL
(a) BOYS' SCHOOL : A School is a 'school for boys' if boys are admitted to all classes and admission of girls is restricted to some specific classes only.
(b) GIRLS' SCHOOL : A school is a school for girls if girls are admitted to all classes and the admission of boys is restricted to some specific classes only.
(c) CO-EDUCATIONAL SCHOOL : A school is 'co-educational' if boys and girls are admitted to all classes in the school.
(xi) TRAINED TEACHER : A trained teacher is one who has successfully undergone a course of teacher training.
(xii) DISTANCE - The distance between two habitations or between a school and a habitation is the convenient walking distance between the central points of the two habitations or the school and the central point of a habitation.
If the aerial distance or the distance as the crow flies is one km . between the central point of a habitation and the school but the actual convenient walking distance by road or path is 1.5 km ., then the distance between the two will be the walking distance i.e. 1.5 km .
(xiii) REPEATERS : Those pupils who were in the same class in the previous year are to be treated as repeaters.

### 1.5 ORGANISATION OF THE SURVEY AT THE STATE LEVEL.

There are three levels of organisation in conducting this survey, namely, National, State and District.

To organise the survey operation smoothly at the National level, two committees, viz, (i) the Steering Committee and (ii) the Advisory Committee have been constituted. The role of these committees is to monitor the progress and provide administrative and academic support.

A separate State Survey Unit (SSU) was established at Itanagar, the State Capital Headquarter, in addition to a District Survey Unit (DSU) in every District. However, the Assistant District Education Officers/Adult Education Supervisors worked as the Block Survey Officers.

The State Education Secretary extended administrative and operational support and the Resource Personnel of the NCERT guided and monitored the survey operation. The

State Unit of the NIC tabulated and processed the survey data through the Regional Computer Centre (RCC), Jadavpur University, Calcutta.

Since the training of each officer in the survey operation has a significant bearing on the successful execution of the survey, the State level training for the survey officers was organised at the State capital headquarters with the help of the NCERT. The Assistant State Survey Officer, District Survey Officers, Block Survey Officers and Statistical Assistants participated in the said State level training in which their duties and roles were explained and survey tools, coding procedures, scrutiny of forms, procedure for maintaining records and registers and data entry were also elucidated.

The NCERT coordinated the survey work and released funds to the NIC as well as the State Survey Unit. It supplied printed tools/forms and guidelines for survey officers.

The State Survey Unit (SSU) coordinated with the NCERT and NIC and monitored the survey operation at the state level by collecting complete information about the administrative units and the schools in the state and distributing survey materials like blank forms and guidelines for survey officers. It shouldered the responsibility of maintaining the survey accounts and preparing the State Survey Report with the help of the local experts and has to submit the finalised accounts to the NCERT before it is disbanded on the completion of the assignments.

### 1.6 STATE PROFILE

Arunachal Pradesh, with an area of $83,743 \mathrm{Sq.Km}$. and long international border with Bhutan (West), China (North) and Myanmar (East), is situated in the North Eastern part of India. As per the 1991 census, it has the total population of $8,64,558$ (predominantly populated by S.T. with $64 \%$ ), with density of 10 per Sq. Km., the population growth rate of 36.83 (between 1981 and 1991), the sex ratio of 859 females per 1000 males and literacy rate $41.59 \%$ (excluding 0-6 years population) of which male $51.45 \%$ and female $29.69 \%$. Earlier known as North East Frontier Agency (NEFA), it became a Union Territory in 1972 with the name of Arunachal Pradesh, and got Statehood on the $20^{\text {th }}$ February, 1987.

There are twelve districts (one more district has been created after survey) with a total of fifty five blocks (one more Block has been created after the survey) and ten towns in Arunachal Pradesh.

Because of the small number of schools in Arunachal Pradesh, SAMPLING was not resorted to. There was cent percent representation of each and every school and habitation for the purpose of the present educational survey in this state.

Processing of the survey data was done at the NIC Unit of this state in collaboration with the Regional Computer Centre (RCC) at Jadavpur University. However, checking of data and consistency of computer tables was done at the State Survey Unit at Itanagar. The State level data-aralysis involved the generation and use of 399 state tables, 136 district tables and 32 block tables.

The reference date of the $6^{\text {th }}$ All India Educational Survey is $30^{\text {th }}$ September' 1993 . According to the survey, there are 1146 primary, 277 upper primary, 79 secondary and 61 higher secondary schools, the total being 1563 of which 1489 schools are situated in rural areas and 74 in urban areas. Thus, more than $95 \%$ of the total number of schools are situated in the rural areas. The category-wise distribution of schools in rural and urban areas is given in the table below.

| Area | Total no. <br> of schools | Primary <br> Schools | Upper Primary <br> Schools | Secondary <br> Schools | Hr. Secondary <br> Schools |
| :---: | ---: | ---: | ---: | ---: | ---: |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ |
| Rural | $\mathbf{1 4 8 9}$ | 1109 | 261 | $\mathbf{7 2}$ | 47 |
| Urban | 74 | 37 | 16 | 7 | 14 |
| Total | $\mathbf{1 5 6 3}$ | $\mathbf{1 1 4 6}$ | $\mathbf{2 7 7}$ | $\mathbf{7 9}$ | $\mathbf{6 1}$ |

During $5^{\text {th }}$ AIES there were 1215 schools from Primary to Higher Secondary in the State. From $5^{\text {th }}$ Survey to $6^{\text {th }}$ Survey the number of schools has increased 348 representing $28.64 \%$ increase in schooling facilities over a span of 7 years.

In the schools of the State, the enrolment of boys is higher than that of girls. But girls are not lagging far behind. Out of the total student enrolment of $1,77,198$, there are 74,129 girls making the ratio of the enrolment of boys and girls as $7: 5$ and their percentages of $58.2 \%$ and $41.8 \%$ respectively. Further $83.54 \%$ of the total enrolment of students belongs to the rural areas as Arunachal Pradesh is basically a rural state having only 10 small towns.

The stagewise enrolment of boys and girls for rural and urban areas of the state is shown in following table.

| Stage | Boys | Girls | Total |
| :---: | ---: | ---: | ---: |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ |
| I-V | 71011 | 54193 | 125204 |
| Rural | 62321 | 47203 | 109524 |
| Urban | 8690 | 6990 | 15680 |
| VI - VIII | 18990 | 12943 | 31933 |
| Rural | 15522 | 10057 | 25579 |
| Urban | 3468 | 2886 | 6354 |
| IX - X | 8451 | 4991 | 13442 |
| Rural | 6307 | 3281 | 9588 |
| Urban | 2144 | 1710 | 3854 |
| XI - XII | 4617 | 2002 | 6619 |
| Rural | 2523 | 822 | 3345 |
| Urban | 2094 | 1180 | 3274 |

| All Stages |  |  |  |
| :---: | ---: | ---: | ---: |
| I Xil | 103067 | 74129 | 17198 |
| Rural | 86673 | 61363 | $14: 036$ |
| Urban | 16395 | 12766 | 20162 |

In comparison to the total emoment figure of 115345 with boys 0335 and girls 45.11 during the $5^{\text {th }}$ Survey there is an incrase in tot 1 enolment by $5.62 \%$ while for boys and girls $46.54 \%$ and $6+.69 \%$ respectively, as revealed by the 6 " Survey. As iegards en oment of girls in different stages of school education it is found that there is a de. ri wing trend of girls' paticipation from primary stage to higher secondary stage. The stage wise girls' enrolment are $43.28 \%$ in primary, $40 . .3 \%$ in upper primary, $37.13 \%$ in se: 0 dary and $30.25 \%$ in $h$ gher secondary. The compare tive participalan of boys and gits in different stages of $s$ hool sduration is represertec lelon with tie help of a bar ch ir

1 g. 1 Comparative participation of bovs and girls in d fe ent stages of school education
The rural ard urban enroments of the Scheduled Trib: and Scheduter Cas e student; are indicated in the foltowing table:

| Aca | ST. Enrolment I to XII |  | S.C. Enrolment it XII |  | All I to XII |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | Girls | Total | (iiils | T tal | Girls |
| I | 2 | 3 | 4 | 5 | 6 | 7 |
| R ra! | 111381 | 47040 | 764 | $2: 8$ | 1.8036 | 61363 |
| Ubm | 13297 | 6 C 16 | 613 | $2 \times 0$ | 9162 | 12706 |
| I tal | 124678 | 53056 | 1377 | 58 | 1,7198 | 74129 |

This table reveals again that the enrolment pattern has the predominance of the Scheduled Tribes having correlation to the total population. The Scheduled Tribe and Scheduled Caste students constitute respectively $70.36 \%$ and $0.78 \%$ of the total students snrolment in the State as against $74.82 \%$ and $0.71 \%$ during the $5^{\text {th }}$ Survey.

The estimated child population in the age-groups of 6 to below 11 and 11 to selow 14 as on September 30, 1993, meant for classes I to V and VI to VIII respectively, $s$ given in the table below.

| Sex | Age-group <br> 6 to below 11 | Age-group <br> 11 to below 14 | Total <br> 6 to below 14 |
| :---: | :---: | :---: | :---: |
| 1 | 2 | 3 | 4 |
| Boys | 51507 | 33632 | 85139 |
| Girls | 48281 | 28748 | 77029 |
| Total | 99788 | 62380 | 162168 |

Taking into consideration the above estimated child population and the enrolment figures, it is found that the gross coverage in class I to V is $125.47 \%$ and that in class VI to VIII $51.19 \%$ as compared to $94.69 \%$ and $34.43 \%$ respectively in the $5^{\text {th }}$ Survey.

There are 3834 habitations in this State, of which 2030 (52.9\%) do not have primary education facilities within a distance of 1 Km . Out of these 2030 habitations, $1515(74.6 \%)$ have the population below 100 and $453(22.3 \%)$ have the population of 100 to 299 and the rest $62(3 \%)$ have the population of 300 and above.

Education at different stages and the facilities available for them have been analysed in the subsequent chapters.

## CHAPTER 2

## HABITATIONS IN RURAL AREAS

2.0 Habitations in rural areas form the mainstay for all educational activities pertaining to the school education in general and the Universalisation of Elementary Education (UEE) in particular. Therefore, in order to assess the present position of educational facilities at various stages in schooling and the distance at which they are available, it is essential to know about the habitations in rural areas and their population in different slabs. Moreover, the enrolments of the students in general and of Scheduled Caste and Scheduled Tribe students and of girls in particular have direct bearing on their habitations. It is with this objective that the information has been collected, tabulated and processed in course of the Sixth All India Educational survey at the National as well as the State levels.

### 2.1 VILLAGES BY POPULATION

Out of the estimated total population of $9,21,511$ in Arunachal Pradesh $8,04,109$ live in 3623 villages as per the Sixth AIES, whereas during the fifth AIES there were 3196 inhabitated villages with the estimated total rural population of $6,83,930$ out of the total state population of $7,42,887$. Thus, there is an increase of 427 inhabatated villages and $1,20,679$ rural population over the $5^{\text {th }}$ AIES.

The population slabs of these villages are given in the following table :

| Item |  | $5000 \&$ <br> above | $2000-$ <br> 4999 | $1000-$ <br> 1999 | $500-999$ | $300-499$ | Below <br> 300 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | Total |
| 1 | 4 | 32 | 88 | 243 | 298 | 2958 | 3623 |
| Number of <br> villages | 29956 | 88098 | 118550 | 185794 | 112889 | 288822 | 804109 |
| Population of <br> villages | 2 |  |  |  |  |  |  |

It is evident from the table that there are 2958 villages ( $81.6 \%$ ) which have the population below 300, 298 ( $8.2 \%$ ) with the population 300 to 499,243 (6.7\%) with 500 to $999 ; 88(2.4 \%)$ in the slab of 1000 to 1999; 32 in the slab of 2000 to 4999 and only four villages in the whole state having population of 5000 and above. Another feature of these villages is that they are scattered over the hilly terrains of the territory and sparsely populated.

Out of the total child population of $1,62,168$ in the age group 6 to below 14 years, $1,41,524$ representing $87.3 \%$ belong to rural areas. The child-population in the rural areas is shown in the following table :

| Item | Age-group <br> $\mathbf{6}$ to below 11 | Age-group <br> $\mathbf{1 1}$ to below 14 | Total <br> 6 to below 14 |
| :---: | :---: | :---: | :---: |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ |
| Boys | 44,950 | 29,351 | 74,301 |
| Girls | 42,135 | 25,088 | 67,223 |
| Total | $\mathbf{8 7 , 0 8 5}$ | 54,439 | $\mathbf{1 , 4 1 , 5 2 4}$ |

### 2.2 HABITATIONS IN DIFFERENT POPULATION SLABS

As per the Sixth AIES, Arunachal Pradesh has a total of 3834 habitations with a population of $8,04,109$ in them whereas it had a total of 3237 habitations with the estimated rural population of $6,83,930$ as per the $5^{\text {th }}$ AIES. Thus, there has been an increase of 597 habitations and $1,20,179$ population indicating $18.4 \%$ and $14.95 \%$ increase respectively between the period of the fifth and the sixth surveys. The total number of tabitations in various population slabs with their population is given in the following table

Population Slabs

| Iem | 5000 <br> $\&$ <br> above | $2000-$ <br> 4999 | $1000-$ <br> 1999 | $500-$ <br> 999 | $300-$ <br> 499 | $100-299$ | Below <br> 100 | Below <br> 500 | Total |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| Number of <br> habitations | 3 | 26 | 101 | 236 | 300 | 1237 | 1931 | 3468 | 3834 |
| Fopulation <br> of habita- <br> tions | 19020 | 169180 | 134141 | 162054 | 114131 | 211559 | 94016 | 419714 | 804109 |

This table indicates that, in Arunachal Pradesh, there are only three habitations with population 5000 and above; 26 habitations ( $0.67 \%$ ) in the population slab of 2000 to $4999 ; 101$ habitations ( $2.63 \%$ ) in 1000 to 1999; 236 (6.16\%) in 500 to $999 ; 300$ ( $7.82 \%$ ) in 300 to $499 ; 1237(32.26 \%)$ in 100 to 299 and 1931 ( $50.36 \%$ ) with population below 100. Thus, there are 3468 ( $90.45 \%$ ) habitations having population in each below 500.

This shows that there is a predominance of small habitations spread whole over the state.

### 2.3 HABITATIONS PREDOMINANTLY POPULATED BY SCHEDULED TRIBES (ST)

23.1 Out of 3834 habitations in the state, 3541 habitations are predominantly pupulated by Scheduled Tribes with a total population of 686541 . This means $92.36 \%$ of the total habitations are populated by Scheduled Tribes which account for $74.50 \%$ of the total population of the state. The maximum number of habitations (581) is situated in Lower Subansiri district and the minimum number (153) is in Tirap district. But if the S.T. population of the above stated habitations of these two districts are taken into account, it is seen that against 78576 S.T. population of Lower Subansiri district there are 79581 S.T. population in Tirap district. This is because small habitations are predominant in Lower

Subarsiri district. The comparative study of S.T. population of all the districts shows that the maximum S.T. population (88385) live in 207 habitations of East Siang District and the lowest S.T. population (29634) in 206 habitations of Tawang district.
2.3.2 As regards habitations of different population slabs, it is found that $51.68 \%$ of total 3541 S.T. habitations have population below 100 and $34.19 \%$ below 300. This indicates that mostly the habitations are small. Only 299 habitations ( $8.44 \%$ ) have population 500 and above. There are only 3 habitations having population 5000 and above.

### 2.4 HABITATIONS PREDOMINANTLY POPULATED BY SCHEDULED CASTES (SC)

2.4.1 There are 29 habitations predominantly populated by Scheduled Castes with a total population of 12327 . The S.C. populated habitations are $0.76 \%$ of the total habitations and population $1.34 \%$ of the State. These habitations are spread over in 8 districis of the state with the maximum of 9 habitations in Changlang district followed by 6 in West Siang, 4 in each of Upper Subansiri and Tirap, 3 in East Siang and 1 each in West Kameng, Lohit and Papum Pare district. Out of 12327 population of 29 habitations, $6558(53.20 \%)$ live in Changlang district.
2.4.2

Of 29 habitations predominantly populated by S.C., $8(27.59 \%)$ are below 100 population slab and 18 ( $62.07 \%$ ) below 300 population slab. Thus, most of the habitations are small. There are only 7 habitations (24.14\%) having population 500 and above There is no big habitation with population 5000 and above predominantly populated by S.C.

## CHAPTER 3

## EDUCATION AT PRIMARY STAGE

$3.0 \quad$ Primary education forms the hub of the system of education. Therefore, education at all stages has a direct bearing on it. The scheme of Universalisation of Elementary Education (UEE) aims to impart primary education to all children. Therefore, enrolment of hundred percent child population in the age-group of 6-14 years is essential. In order to achieve the goal of UEE, it is required to provide primary education facilities to all children and also to ensure their participation and retention till completion of the stages of lower and upper primary education.

## 3.1 <br> habitations and villages having educational FACILITIES IN THEM BY POPULATION SLAB

3.1.1 As indicated earlier, a total population of $8,04,109$ lives in 3834 habitations in Arunachal Pradesh. All of these habitations fall in different population slabs and the educational facilities provided with them are also different. Out of the total habitations of 3834, primary education facilities exist within 1436 and another 368 habitations within a distance of 1 Km . and thus, 1804 habitations ( $47.05 \%$ ) have primary school/section upto a nationally accepted norm of 1 Km . distance covering $77.87 \%$ of the rural population. During $5^{\text {th }}$ Survey the population coverage within this norm was $73.35 \%$. Further, 327 habitations have primary education facilities within a distance of 1.1 Km . to 2.0 Km . covering another $6.02 \%$ population and remaining 1703 beyond 2 Km . with $16.12 \%$ population.

There are 666 habitations which have population 300 and above, of which 604 habitations have primary schools/sections upto a distance of 1 Km . Another 27 habitations have such facility within a distance of 1.1 Km . to 2.0 Km . and 35 beyond 2 Km.

There are 3623 villages in the state with population of $8,04,109$. Out of these villages, $4(0.11 \%)$ villages with population 5000 and above; $32(0.88 \%)$ with 2000 to $4999 ; 88(2.43 \%)$ with 1000 to $1999 ; 243(6.71 \%)$ with 500 to $999 ; 298(8.23 \%)$ with 300 to 499 and 2958 ( $81.64 \%$ ) with the population below 300 . Thus, villages with small population are predominant in Arunachal Pradesh.

Access to primary school/section for the habitations has already been discussed. The picture that emerged in case of habitations also holds good for the villages. So far as primary education facilities are concerned, 1411 (38.95\%) villages have such facilities within them.

## HABITATIONS SERVEI BY PRIMARY EDUCATIONAI. FACLLITIES BY POPULATION SLAB AND DISTANCE FOR ALL HABITATIONS PREDOMINANTLY POPULATED I Y SC AND ST

3.2.1 Out of 29 habitations with 12,327 population which are predominantly populated by SC, 26 habitations have primary school/section upto a distance of 1 Km . covering $97.61 \%$ of their population. Remaining 2 have such facilities at a distance of 1.1 Km . to 2.0 Km . and 1 beyond 2 Km .
3.2.\% There are 3541 habitations with 686.541 population which are predominantly populated by ST and 1324 (37.39\%) of them have got primary scheols/sections within them covering $70.38 \%$ of the population. Upto a distance of 1 Km . there are 1651 ( $46.63 \%$ ) habitations which have primary schools/sections covering $78.13 \%$ of the population. There are 560 habitations with $58.42 \%$ population in the population slab 300 and above, of which 519 have primary schools/sections upto a dist nce of 1 Km . Another 14 habitations have such facilities within a distance of 1.1 Km . to $\because 0 \mathrm{Km}$. and 27 beyond 2 Km . Further 2981 ( $84.19 \%$ ) habitations fall below 300 population slab with $41.58 \%$ of the population, of which 1132 habitations have primary schools/sections upto a distance of 1 Km . covering $23.08 \%$ of the population. Out of the remaining habitations below 300 population slab, there are 277 and 1572 habitations whi:h have such facilities at a distance of 1.1 Km . to 2.0 Km . and beyond 2 Km . respectively.

### 3.3 HABITATIONS AND VILLAGES NOT SERVED BY POPULATION SLABS

33.1 There are 2030 ( $52.95 \%$ ) habitations out of the total of 3834 which do not have primary schools/sections within a distance of 1 Km . These 2030 habitations account for $2.13 \%$ of the rural population. It is also noticed that 1515 habitations of them belong to below 100 population slab. This means $74.63 \%$ of the habitations without primary schols/sections upto a distance of 1 Km . are small habitations which have only $8.50 \%$ of the total rural population. It may not be practically viable to serve each of these small habitations with a primary school/section. However 33 of them are served with NonFornal Education (NPE) Centres covering another $2.10 \%$ population of the unserved habitations. The remaining unserved habitations requixe special attention for their access to pimary education.
3.3.2 As regards villages, $2212(61.05 \%)$ out of 3623 villages are not served by prirary schools/sections in them. The maximum number of villages ( $78.86 \%$ ) of Lower Subansiri district do not have primary schools/sections. Similarly, $77.31 \%$ villages in Dibang Valley, $76.05 \%$ in Papum Pare, $70.98 \%$ in Lohit, $69.70 \%$ in Upper Subansiri, $62.05 \%$ in Tawang, $59.64 \%$ in East kameng, $50.85 \%$ in West Siang, $49.12 \%$ in Chonglang, 39.18\% in West Kameng, $22.33 \%$ in East siang and $17.95 \%$ in Tirap district do tot have such facilities in them. However, 19 villages of them are served with NPE cenires.

## 3.4

 PRIMARY SCHOOLS BY AREA, MANAGEMENT, TYPE, TEACHERS, ENROLMENT, CLASS-ROOMS, ETC.3.4.1 There are 1146 primary schools in Arunachal Pradesh, of which 1116 ( $97.4 \%$ ) are managed by the government against a total of 952 primary schools during the $5^{\text {th }}$ Survey with 944 ( $99.16 \%$ ) under the government management. There is an increase of $20.38 \%$ primary schools between the two Surveys. In rural areas the number of primary schools has increased from 932 in the $5^{\text {th }}$ Survey to 1109 in the current Survey representing $18.99 \%$ increase and in the urban area the number of primary schools has increased from 20 to 37 . The primary schools by area and management during the $6^{\text {th }}$ Survey are shown in the following table.

| Management | No. of schools in <br> Rural Area | No. of schools in <br> Urban Area | Total |
| :--- | :---: | :---: | :---: |
| 1 | 2 | 3 | 4 |
| Government | 1088 | 28 | 1116 |
| Local Body | 0 | 1 | 01 |
| Private Aided | 11 | 2 | 13 |
| Private Unaided | 10 | 6 | 16 |
| Total | 1109 | 37 | 1146 |

From the above table, it is seen that there are 30 primary schools managed by agencies other than the government whereas the corresponding figure was 8 during the $5^{\text {th }}$ Survey. Another feature is that out of these 30 schools, 16 are private unaided and 1 under local body whereas there was not a single private unaided/local body school during the $5^{\text {th }}$ Survey. This indicates that private initiatives are taking place in establishment of new schools.
3.4.2 There are 7 ( $0.61 \%$ ) primary schools with zero teacher, 521 ( $45.5 \%$ ) single teacher, 400 (34.9\%) two teachers, 79 (6.9\%) three teachers, 37 (3.2\%) four teachers, 27 ( $2.4 \%$ ) five teachers and 75 ( $6.5 \%$ ) more than 5 teachers each. The corresponding figures during the $5^{\text {th }}$ survey were $4(0.42 \%), 526$ ( $55.25 \%$ ), 256 ( $26.89 \%$ ), 81 ( $8.51 \%$ ), 19 ( $2 \%$ ) and 66 (6.93\%) respectively.

There are 2505 teachers in 1146 primary schools of which $20(0.80 \%)$ are SC, 1266 ( $50.54 \%$ ) and 578 ( $25.07 \%$ ) are female. During $5^{\text {th }}$ Survey 329 ( $17.44 \%$ ) of the primary school teachers were female.
3.4.3 The total enrolment in the independent 1146 primary schools of the state is 66,566 , out of which girls constitute 28,238 (42.42\%). Further 59589 ( $89.52 \%$ ) of the total enrolment of the primary schools belong to rural areas and rest 6977 (10.48\%) urban areas. The total enrolments of children belonging to SC and ST are $406(0.61 \%)$ and 51346 (77.14\%) respectively. Against the total enrolments of SC and ST children, the girls of the each category constitute 173 ( $42.61 \%$ ) and 22088 ( $43.02 \%$ ) respectively.
3.4.4 Out of the total 1146 primary schools, there are $70(6.1 \%)$ single-room schools, 345 ( $30.1 \%$ ) double-room schools, 358 (31.2\%) three-room schools, 118 (10.3\%)
four-room schools, 142 ( $12.4 \%$ ) five-room schools, 88 (7.7\%) 6-7 room schools, 10 ( $0.9 \%$ ) 8-9 room schools and 14 ( $1.2 \%$ ) schools with 10 or more than 10 rooms.

### 3.5 PRIMARY SECTIONS BY AREA, MANAGEMENT, TYPE AND ENROLMENT AT PRIMARY STAGE BY AREA, MANAGEMENT, SEX, SC AND ST ETC.

3.5.1 As noted earlier, there are 1146 primary schools in total. In addition to these, there are 274 Upper Primary Schools ( 258 in the Rural and 16 in the Urban areas) which have primary sections with them; 76 Secondary Schools (71 in the Rural and 5 in the Urban areas) and 41 Higher Secondary Schools ( 35 in the Rural and 6 in the Urban areas) also have primary sections with them. Altogether there are 391 other schools which are running primary sections also. Thus, there is a total of 1537 primary sections in the state, of which 1146 ( $74.76 \%$ ) are independent primary schools. Out of 391 other schools having primary sections, 375 ( 355 in the Rural and 20 in the Urban areas) are under the management of the Government and the rest 16 are run by private managements.
3.5.2 The following table gives a picture of the enrolment at primary stage with Sex, SC and ST in the Rural areas.

| Sex | All <br> communities | S.C. | S.T. |
| :--- | :---: | :---: | :---: |
| 1 | $\mathbf{2}$ | $\mathbf{3}$ | 4 |
| Boys | 62,321 | 333 | 47,009 |
| Girls | 47,203 | 173 | 36,949 |
| Total | $1,09,524$ | 506 | 83,958 |

From the above table it may be seen that S.C. and S.T. children in primary section in rural areas constitute $0.46 \%$ and $76.66 \%$ respectively of the total enrolment. The enrolment of girls is 47203 (43.09\%).
3.5.3 The enrolment at primary stage with Sex, SC and ST in the Urban areas is shown in the table below.

| Sex | All <br> communities | S.C. | S.T. |
| :--- | :---: | :---: | :---: |
| 1 | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ |
| Boys | 8,690 | 201 | 3,527 |
| Girls | 6,990 | 180 | 3,183 |
| Total | 15,680 | 381 | 6,710 |

The enrolment pattern under all the columns indicates that the enrolment of boys is higher than that of girls, that is, all communities boys $55.4 \%$ and girls $44.6 \%$; SC boys $52.8 \%$ and girls $47.6 \%$; ST boys $52.7 \%$ and girls $47.3 \%$. Moreover, the enrolment of ST dominates in the urban areas also as in the case of rural areas, and this pattern corresponds to the preponderance of ST population in this State.
3.5.4 The total enrolment at the primary stage (classes I - V) is given in the following table.

| Sex | All <br> communities | S.C. | S.T. |
| :--- | :---: | :---: | :---: |
|  | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ |
| Boys | 71,011 | 534 | 50,536 |
| Girls | 54,193 | 353 | 40,132 |
| Total | $\mathbf{1 , 2 5 , 2 0 4}$ | $\mathbf{8 8 7}$ | $\mathbf{9 0 , 6 6 8}$ |

The total enrolment at the primary stage (classes I-V) is $1,25,204$, out of which girls constitute $54,193(43.28 \%)$ against $40.33 \%$ during the $5^{\text {th }}$ Survey. The S.C. and S.T. children in classes I - V account for 887 ( $0.71 \%$ ) and 90,668 (72.42\%) respectively. Against the total S.C. and S.T enrolments, the girls constitute $39.80 \%$ and $44.26 \%$ in their respective categories. During the $5^{\text {th }}$ Survey $40.85 \%$ S.C. girls and $39.38 \%$ S.T. girls were enrolled. Taking into consideration the enrolment figures of rural and urban areas given in the earlier tables, it is seen that $87.48 \%$ of the total enrolment belongs to the rural areas and the rest $12.52 \%$ in urban areas.

### 3.6 ENROLMENT RATIOS AND CLASSWISE REPEATERS RATE.

3.6.1 The total estimated child population in the age group of 6 to below 11 years is 99788 whereas the total enrolment in classes $\mathrm{I}-\mathrm{V}$ is 125204 . Therefore, the gross enrolment in classes I - V is $125.5 \%$. The gross enrolment ratio in respect of rural areas is $125.8 \%$ and that of urban is $123.4 \%$. The number of S.C. children at primary stage being very small, its gross coverage is not computed. As regards children belonging to ST, the gross enrolment ratio is $102.8 \%$. Further the gross coverage of girls of all communities is $112.2 \%$ and that of S.T. girls is $93.1 \%$.

Out of the total estimated child population of 99788 in the age group 6 to below 11 years, the estimated enrolment in classes I-V is 89240 in the same age group. This gives $89.43 \%$ net coverage. The net coverage for girls is $79.81 \%$ against $98.45 \%$ for boys.
3.6.2 The pupils who were in the same class in the previous year are treated as repeaters. The class-wise repeaters rate is indicated in the following table :

| Area | Percentage of repeaters in class |  |  |  |  | Total (P.C.) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | I | II | III | IV | V |  |
| Rural | 20.13 | $\mathbf{1 6 . 2 5}$ | 14.01 | 11.77 | 10.88 | $\mathbf{1 5 . 7 2}$ |
| Urban | 11.23 | 11.68 | 12.11 | 10.53 | 9.17 | 11.07 |
| Total | $\mathbf{1 9 . 2 6}$ | $\mathbf{1 5 . 7 1}$ | $\mathbf{1 3 . 7 7}$ | $\mathbf{1 1 . 6 0}$ | $\mathbf{1 0 . 6 2}$ | $\mathbf{1 5 . 1 6}$ |

## 3.7

PUPIL-TEACHER RATIO
3.7.1 The pupil-teacher ratio varies from district to district. The ratio per teacher in the primary schools for Tawang is 17.62 ; West Kameng 20.05; East Kameng 29.00; Papum Pare 27.53; Lower Subansiri 38.43; Upper Subansiri 35.06; West Siang 25.95; East Siang 24.22; Dibang Valley 18.62; Lohit 24.14; Changlang 33.17 and Tirap 25.75. The total pupil-teacher ratio in the primary schools comes to 26.57 with 27.65 in the rural areas and 19.93 in the urban areas.
3.7.2 There are 3567 ( 2562 Men and 1005 Women) full time teachers at the primary stage (classes I - V) with the total enrolment of 125204. Therefore, the teacher-pupil ratio is $1: 35$ at the primary stage with $1: 36$ in the rural area and 1:30 in the urban areas.

Fig 3 Pie Chart showing full time male and female teachers at the primary stage (classes_I-V)

## CHAPTER 4

## EDUCATION AT UPPER PRIMARY STAGE

4.0 Universalisation of Elementary Education(UEE) covers the education of the children in the age-group of 6-14 years. it includes both the primary education from class I to V and the upper primary education from VI to VIII.

Primary education scenario has already been discussed in the third chapter and upper primary stage is discussed in this chapter. Like education at primary stage, education at upper primary stage is also essential for achieving the goals of UEE. Therefore, it is necessary to provide upper primary educational facilities to all the children belonging to rural and urban areas.

### 4.1 HABITATIONS AND VILLAGES HAVING UPPER PRIMARY EDUCATIONAL FACILITIES IN THEM BY POPULATION SLAB

4.1.1 Out of the total habitations of 3834 , only 368 ( $9.60 \%$ ) habitations with population of $2,66,373$ have upper primary educational facilities within them covering $33.13 \%$ of the total rural population. They are situated in different population slabs as indicated below :

| Population Slabs | No.of habitations having <br> U.P.Schools/Sections within <br> them | Population of such <br> habitations |
| :---: | :---: | :---: |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ |
| 5000 and above | 3 | 19020 |
| $2000-4999$ | 21 | 57123 |
| $1000-1999$ | 56 | 73990 |
| $500-999$ | 96 | 66146 |
| Below 500 | 192 | 50094 |
| Total | $\mathbf{3 6 8}$ | $\mathbf{2 6 6 3 7 3}$ |

The following table presents the number of the habitations with Upper Primary Schools/Sections at different distances -

| Distance Slabs | Number of <br> habitations | Population of <br> Habitations | \% of population of habitations <br> to the total population served <br> with Upper Primary <br> Education facilities |
| :--- | :---: | :---: | :---: |
| 1 | 2 | 3 | 4 |
| Within the <br> habitations | 368 | 266373 | 33.13 |
| Upto 1 Km. | 204 | 54715 | 6.80 |
| 1.1 to 2 Km. | 263 | 62752 | 7.80 |

| 2.1 to 3 Km. | 252 | 53520 | 6.66 |
| :--- | ---: | ---: | ---: |
| Upto 3 Km. | 1087 | 437360 | 54.39 |
| 3.1 to 4 Km. | 193 | 38766 | 4.82 |
| 4.1 to 5 Km. | 242 | 41604 | 5.17 |
| More than 5 Km. | 2312 | 286379 | 35.62 |
| Total | 3834 | 804109 | $\mathbf{1 0 0 . 0 0}$ |

From the above table, we find that out of the total habitations of 3834, upper primary education facilities exist in 1087 habitations ( $28.35 \%$ ) upto a nationally accepted norm of 3 Km . distance covering $54.30 \%$ of the rural population. During $5^{\text {th }}$ Survey the population coverage within this norm was $42.19 \%$. Further, 435 habitations have upper primary education facilities within a distance of 3.1 Km. to 5.0 Km . covering another $9.99 \%$ population and remaining 2312 beyond 5 Km . with $35.62 \%$ population.

There are 366 habitations which have population 500 and above, of which 268 habitations have upper primary schools/sections upto a distance of 3 Km . and 98 beyond 3 Km .
4.1.2 As regards access to upper primary school/section for the villages is concerned, the above picture as emerged in case of habitations also holds good for the villages. Out of 3623 villages only 365 ( $10.07 \%$ ) villages have upper primary education facilities within them.

### 4.2 HABITATIONS SERVED BY UPPER PRIMARY EDUCATIONAL FACILITIES BY POPULATION SLAB AND DISTANCE FOR ALL HABITATIONS PREDOMINANTLY POPULATED BY SC AND ST

### 4.2.1 Out of 29 habitations (with 12,327 population) in the state which are

 predominantly populated by SC, 10 habitations have upper primary schools/sections upto a distance of 3 Km . covering $59.75 \%$ of their population. Remaining 4 (with $6.27 \%$ population) have such facilities at a distance of 3.1 Km . to 5.0 Km . and 15 (with $33.98 \%$ population) beyond 5 Km .4.2.2 Out of 3541 habitations (with 686541 population) predominantly populated by ST, 337 ( $9.51 \%$ ) of them have upper primary schools/sections within them covering $33.71 \%$ of the population. Upto a distance of 3 Km . there are 972 (27.44\%) habitations which have upper primary schools/sections covering $52.87 \%$ of the population. There are 299 habitations with $42.03 \%$ population in the population slab 500 and above, of which 217 have upper primary schools/sections upto a distance of 3 Km . Another 23 habitations have such facilities within a distance of 3.1 Km . to 5.0 Km . and 59 beyond 5 Km . Further 3242 habitations fall below 500 population slab with $55.97 \%$ of the population, of which 755 habitations have upper primary schools/sections upto a distance of 3 Km . covering $18.15 \%$ of the population. Out of the remaining habitations below 500 population slab, there are 369 and 2118 habitations which have such facilities at a distance of 3.1 Km . to 5.0 Km . and beyond 5 Km . respectively.

### 4.3 HABITATIONS AND VILLAGES NOT SERVED BY POPULATION SLABS

4.3.1 There are 2747 ( $71.65 \%$ ) habitations out of the total of 3834 which do not have upper primary schools/sections within a distance of 3 Km . These 2747 habitations account for $45.61 \%$ of the rural population. It is further observed that 2649 habitations of them belong to below 500 population slab. This means $69.01 \%$ of the habitations without upper primary schools/sections upto a distance of 3 Km . are small habitations which have only $35.14 \%$ of the total rural population. It may not be practically viable to serve each of these small habitations with an upper primary school/section. However, these unserved habitations require special attention for their access to upper primary education by making some alternative arrangement.
4.3.2 So far as villages are concerned, 3258 ( $89.92 \%$ ) out of 3623 villages are not served by upper primary schools/sections in them. The maximum number of villages ( $93.92 \%$ ) of Papumpare district do not have upper primary schools/sections. Similarly, $\mathbf{9 3 . 1 1 \%}$ villages in Lohit, $92.89 \%$ in Lower Subansiri, $92.68 \%$ in Upper Subansiri, $90.91 \%$ in East Kameng, $90.36 \%$ in Tawang, $88.66 \%$ in Dibang Valley, $88.42 \%$ in Changlang, $85.96 \%$ in West Kameng, $84.62 \%$ in Tirap, $84.13 \%$ in West Siang and $80.59 \%$ in East Siang district do not have such facilities in them. However, 3 of the unserved villages in Lower Subansiri district are served with NPE: centres.

### 4.4 UPPER PRIMARY SCHOOLS BY AREA, MANAGEMENT, TYPE, TEACHERS, ENROLMENT, CLASS-ROOMS, ETC.

4.4.1 There are 277 upper primary schools in Arunachal Pradesh, of which 266 ( $96.02 \%$ ) are managed by the government against a total of 182 upper primary schools during the $5^{\text {th }}$ Survey with 179 ( $98.35 \%$ ) under the government management. There is an increase of $52.19 \%$ upper primary schools between the two surveys. In rural area the number of upper primary schools has increased from 178 in the $5^{\text {th }}$ Survey to 261 in the current survey representing $46.63 \%$ increase and in the urban area the number of upper primary schools has increased from 8 to 16 . The upper primary schools by area and management during the $6^{\text {th }}$ Survey are shown in the following table.

| Management | No. of schools in <br> Rural Area | No. of schools in <br> Urban Area | Total |
| :--- | :---: | :---: | :---: |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | 4 |
| Government | 254 | 12 | 266 |
| Local Body | Nil | 1 | 1 |
| Private Aided | 5 | 1 | 6 |
| Private Unaided | 2 | 2 | 4 |
| Total | $\mathbf{2 6 1}$ | $\mathbf{1 6}$ | $\mathbf{2 7 7}$ |

From the table, it is seen that there are 11 upper primary schools managed by agencies other than the government whereas the corresponding figure was 8 during the
$5^{\text {th }}$ Survey. Another feature is that out of these 11 schools, 4 are private unaided and 1 under local body whereas there was not a single private unaided/local body school during the $5^{\text {th }}$ survey. This indicates that private initiatives are taking place in establishment of new upper primary schools.
4.4.2 $\quad 94.2 \%$ of the upper primary schools are situated in the rural areas. The total number of all communities teachers in the rural area upper primary schools is 1701, out of which 258 ( $15.2 \%$ ) are female, 28 ( $1.06 \%$ ) are SC, 637 (37.45\%) are ST and 61 (3.59\%) are other backward classes.
$5.8 \%$ of the upper primary schools are situated in the urban areas. The total number of all communities teachers in the urban area upper primary schools is 228, of which $150(65.7 \%)$ are female, $0(0.00 \%)$ are SC, $105(46.5 \%)$ are ST and $7(3.07 \%)$ are other backward classes.

The total number of teachers of the upper primary schools in the State is 1929, of which 18 ( $0.93 \%$ ) are SC, 742 ( $38.4 \%$ ) are ST, 68 ( $3.53 \%$ ) are other backward classes and 408 ( $21.15 \%$ ) are female. During the $5^{\text {th }}$ Survey 204 ( $16 \%$ ) of the upper primary schools were female.
4.4.3 The following table indicates the total enrolment in the upper primary stage in various communities :

| All communities |  |  | Scheduled Caste |  |  | Scheduled Tribe |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Boys | Girls | Total | Boys | Girls | Total | Boys | Girls | Total |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ | $\mathbf{7}$ | $\mathbf{8}$ | $\mathbf{9}$ |
| 18990 | 12943 | 31933 | 225 | 133 | 358 | 12547 | 8684 | 21231 |

It is evident that all communities girls' enrolment of 12,943 ( $40.5 \%$ ) is less than the boys' enrolment of 18,990 ( $59.5 \%$ ). The total S.T. enrolment of 21,231 ( $98.3 \%$ ) and the S.C. enrolment of $358(1.7 \%)$. The ST boys' enrolment of $12,547(59 \%)$ is higher than the S.T. girls' enrolment of $8,684(41 \%)$ in its own category. Similarly, the S.C. boys' enrolment of $225(62.84 \%)$ is higher than the S.C. girls' enrolment of $133(37.16 \%)$. The total ST enrolment is higher and commensurate with the higher ST population in the State.
4.4.4 Out of 277 upper primary schools, there are 56 schools which have 10 and above rooms each, 89 with $8-9$ rooms, 72 with $6-7$ rooms, 21 with 5 rooms, 21 with 4 rooms, 11 with 3 rooms, 5 with 2 rooms and 2 which have one room each.

### 4.5 UPPER PRIMARY SECTIONS BY AREA, MANAGEMENT, TYPE, ENROLMENT AT UPPER PRIMARY STAGE BY AREA, MANAGEMENT, SEX, SC AND ST, ETC.

4.5.1 There are 415 upper primary sections with 379 (91.3\%) in rural and 36 (8.7\%) in urban area.

Out of 415 upper primary sections, 396 (95.4\%) are under the government management, 1 local body, 13 (3.1\%) private aided and 5 (1.2\%) private unaided.
4.5.2 The total enrolment in rural area in upper primary sections is 25579 with 15522 boys ( $60.68 \%$ ) and 10057 girls ( $39.31 \%$ ). The total S.C. enrolment is 195 with 133 boys ( $68.2 \%$ ) and 62 girls ( $31.79 \%$ ). The S.T. enrolment is 18444 with 11154 boys (60.47\%) and 7290 girls (39.53\%).
4.5.3 In urban area the total enrolment in upper primary sections is 6354 with 3468 boys ( $54.57 \%$ ) and 2886 girls ( $45.43 \%$ ). The total S.C. enrolment is 163 with 92 boys ( $56.44 \%$ ) and 71 girls ( $43.56 \%$ ). The S.T. enrolment is 2787 with 1393 boys ( $49.98 \%$ ) and 1394 girls ( $50.02 \%$ ).
4.5.4 The total enrolment of students in upper primary sections is 31,933 with 18990 boys ( $59.5 \%$ ) and 12,943 girls ( $40.5 \%$ ). The total S.C. enrolment is 358 with 225 boys ( $62.8 \%$ ) and 133 girls ( $37.2 \%$ ). The total S.T. enrolment is 21,231 with 12,547 boys (59\%) and 8684 girls (41\%). The S.C. and S.T. enrolments represent $1.12 \%$ and $66.5 \%$ respectively of the total enrolment.

### 4.6 ENROLMENT RATIO AND CLASSWISE REPEATERS RATE

4.6.1 The total estimated child population in the age group of 11 to below 14 years is 62380 while it is 54439 for rural area and 7941 for urban area. The total enrolment in class VI to VIII is 31933. The rural and urban enrolments are 25579 and 6354 respectively. Therefore, the total gross enrolment ratio in upper primary stage works out to be $51.19 \%$. In case of rural it is $46.98 \%$ and that for urban is $80.02 \%$. Further the gross coverage in respect of girls of all communities is $45.02 \%$ against $56.46 \%$ for boys.

The net coverage in the upper primary stage is $38.78 \%$. It is $43.87 \%$ for boys and $33.22 \%$ for girls.
4.6.2 The classwise repeaters rate is shown in the following table.

| Area | Percentage of repeaters in class |  |  | Total (P.C.) |
| :---: | :---: | :---: | :---: | :---: |
|  | VI | VII | VIII |  |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ |
| Rural | 9.73 | 9.21 | 14.33 | 10.93 |
| Urban | 9.47 | 7.98 | 8.81 | 8.80 |
| Total | 9.68 | 8.96 | $\mathbf{1 3 . 1 9}$ | $\mathbf{1 0 . 5 1}$ |

### 4.7 PUPIL-TEACHER RATIO

4.7.1 The pupil-teacher ratio varies from district to district. The ratio for Tawang is 15.46 ; West Kameng 20.36; East Kameng 20.97; Papum Pare 30.29; Lower Subansiri 33.04; Upper Subansiri 27.03; West Siang 26.41; East Siang 22.33; Dibang Valley 25.10; Lohit 23.79; Changlang 22.01 and Tirap 19.01. The total pupil-teacher ratio at the upper
primary School stage comes to 24.49 with 23.80 in the rural area and 29.63 in the urban area.
4.7.2 There are 1806 ( 1498 men and 308 women) full time teachers at the upper primary stage (classes VI - VIII) with total enrolment of 31933 students. Therefore, the teacher-pupil ratio is $1: 18$ at the upper primary stage with 1 : 16 at the rural area and $1: 28$ at the urban area.

Eig. 4 Pie Chart showing full time male and female teachers at the upper primary stage (classes VI - VIII)

## CHAPTER 5

## EDUCATION AT SECONDARY STAGE

5.0 Secondary education plays its multi-faced role by bringing about coordinated and integrated approach in regard to the programmes for the development of human resource. Education at secondary stage may be terminal for some and a gateway to higher education for others. It is, therefore, necessary that secondary education must be organised and implemented in such a manner that the pupils become capable of facing the challenges of life with confidence.

### 5.1 RURAL HABITATIONS AND VILLAGES SERVED

5.1.1 The following table shows the number of habitations and villages served by secondary schools / sections at certain distance :

| Distance | No. of habitation served by <br> Secondary Schools/sections | Percentage to total <br> habitation |
| :--- | :---: | :---: |
| Within the habitation | 115 | 3.00 |
| 0.1 to 2 km. | 273 | 7.12 |
| 2.1 to 4 km. | 259 | 6.76 |
| 4.1 to 5 km. | 124 | 3.23 |
| 5.1 to 6 km. | 89 | 2.32 |
| 6.1 to 8 km. | 182 | 4.75 |
| More than 8 km | 2792 | 72.82 |
| TOTAL | $\mathbf{3 8 3 4}$ | $\mathbf{1 0 0}$ |

From the above table, it is noted that there are 115 rural habitations (3\%) having secondary schools/sections within them; 771 (20.10\%) upto a distance of 5 km .; 1042 ( $27.18 \%$ ) upto 8 km . and 2792 habitations ( $72.82 \%$ ) having these facilities at a distance of more than 8 km .
5.1.2 Out of total 3623 villages, 114 (3.15\%) have secondary schools/sections within them.
5.2.1 Facility for secondary education as per distance and population slabs of habitations for all categories is given below :

| Population <br> slab | Total No. of <br> habitation | Habitations served by secondary schools / sections |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  |  | Within | Upto 5 km. | Upto 8 km. | Beyond 8 km |
| 5000-above | 3 | 3 | 3 | 3 | 0 |
| $2000-4999$ | 26 | 17 | 22 | 24 | 2 |
| $1000-1999$ | 101 | 31 | 65 | 74 | 27 |
| $500-999$ | 236 | 34 | 114 | 134 | 102 |
| Below 500 | 3468 | 30 | 567 | 807 | 2661 |
| TOTAL | $\mathbf{3 8 3 4}$ | $\mathbf{1 1 5}$ | $\mathbf{7 7 1}$ | $\mathbf{1 0 4 2}$ | $\mathbf{2 7 9 2}$ |

The above table shows that all the habitations with population 5000 and above are served by secondary education facility within them. Such facility is available within them for $65.38 \%$ habitations in population slab $2000-4999,30.69 \%$ in population slab 1000-1999, $14.41 \%$ in population slab $500-999$ and $0.87 \%$ below 500 population slab.

Similarly, it is noted that $84.62 \%$ habitations in population slab 2000-4999, $64.36 \%$ in population slab $1000-1999,48.31 \%$ in population slab $500-999$ and $16.35 \%$ in population slab below 500 , have secondary education facility upto a distance of 5 km .
5.2.2 Facility for secondary education according to distance and population slabs of habitations pre-dominantly populated by ST is indicated in the table below :

| Population <br> slab | Total No. of ST <br> habitations | Habitations served by secondary schools / sections |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  |  | Within | Upto 5 km. | Upto 8 km. | Beyond 8 km |
| 5000 - above | 3 | 3 | 3 | 3 | 0 |
| $2000-4999$ | 16 | 14 | 14 | 15 | 1 |
| $1000-1999$ | 82 | 27 | 52 | 58 | 24 |
| $500-999$ | 198 | 30 | 89 | 102 | 96 |
| Below 500 | 3242 | 26 | 503 | 714 | 2528 |
| TOTAL | $\mathbf{3 5 4 1}$ | $\mathbf{1 0 0}$ | 661 | $\mathbf{8 9 2}$ | $\mathbf{2 6 4 9}$ |

It is noted from the above table that all the habitations in the population slab 5000 and above predominantly populated by ST have secondary education facility within them. This facility is available within them for $87.5 \%$ habitations in population slab $2000-4999,32.92 \%$ in population slab 1000-1999, $15.15 \%$ in population slab 500-999 and $0.80 \%$ in population slab below 500.

Upto a distance of 5 km ., the secondary education facility is available for $87.5 \%$ habitations in population slab 2000-4.999, $63.41 \%$ in population slab 1000-1999, $44.94 \%$ in population slab $500-999$ and $15.51 \%$ habitations below 500 population slab.
5.2.3 $\quad 29$ habitations out of a total of 3834 are pre-dominantly populated by SC. The secondary education facility is available in 12 ( $41.37 \%$ ) S.C. habitations upto a distance of 5 km .

### 5.3 SECONDARY SCHOOLS BY AREA, MANAGEMENT \& TYPE

The following table exhibits the total number of secondary schools in the State by both the area and the management :

| Area | Govt. | Local Body | Pvt. Aided | Pvt. unaided | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ |
| Rural | 70 | 0 | 2 | 0 | 72 |
| Urban | 7 | 0 | 0 | 0 | 7 |
| Total | 77 | 0 | 2 | 0 | 79 |

All these 79 are the secondary schools i.e. of one type; out of which 77 are managed by the State Government ( 70 in the rural and 7 in the Urban areas); and 2 are private aided schools (both in Rural area only). Neither any local body Secondary School nor any Private Unaided one exists in the State. Again, out of 79 secondary schools, 72 are in the rural Areas and only 7 are in the Urban areas. Thus, two features of these schools are distinctly clear - (i) most of them are run by the Govt., and (ii) most of them are in the rural areas.
5.4.0 SECONDARY SECTIONS BY AREA, MANAGEMENT \& TYPE.
5.4.1 The total number of secondary sections by area, management and type is given in the following table :

| Area | Govt. | Local Body | Pvt. Aided | Pvt. Unaided | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 1. Rural | 114 | 0 | 5 | 0 | 119 |
| a) $S$ in Secondary Schools <br> b) $S$ in H.S. Schools | 70 44 | 0 0 | 2 3 | 0 0 | 72 47 |
| II.Urban | 18 | 0 | 2 | 1 | 21 |
| c) $S$ in Secondary Schools <br> d) $S$ in H.S. Schools | 7 11 | 0 0 | 0 2 | 0 1 | 7 14 |
| $\begin{aligned} & \text { III. Total of } \\ & \text { I \& II } \end{aligned}$ | 132 | 0 | 7 | 1 | 140 |

Note : 'S' indicates Secondary Section.

The table exhibits that there are 140 secondary sections (119 in the rural and 21 in the urban areas), out of which 132 are under the management of Govt. (114 in the rural and 18 in the urban areas); 7 are Private aided schools ( 5 in the rural and 2 in the urban areas); and one is Private Unaided in urban area only. There is no secondary section under the management of any Local Body either in the rural area or in the urban area.
5.4.2 Out of a total of 140 secondary sections, 79 (rural 72 and urban 7) are in secondary schools and remaining 61 (rural 47 and urban 14) are in higher secondary schools.

### 5.5.0 ENROLMENT, AREA, MANAGEMENT, SEX, SC AND ST.

5.5.1 The following table indicates the features of Enrolment alongwith Area, Sex, SC and ST in the Secondary Schools/Sections of the State -

Number of students at Secondary stage

| Area | All Communities |  |  | Scheduled Castes |  |  | Scheduled Tribe |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Boys | Girls | Total | Boys | Girls | Total | Boys | Girls | Total |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
| Rural | 6307 | 3281 | 9588 | 34 | 21 | 55 | 4348 | 2271 | 6619 |
| Urban | 2144 | 1710 | 3854 | 20 | 17 | 37 | 1145 | 887 | 2032 |
| Total | 8451 | 4991 | 13442 | 54 | 38 | 92 | 5493 | 3158 | 8651 |

The table depicts that the total enrolment of students belonging to communities at the secondary school stage is 13,442 , out of which 9,588 (71.33\%) are enrolled in the rural areas and 3854 ( $28.67 \%$ ) are enrolled in the urban areas. The enrolment of girls is $57.12 \%$ against $62.88 \%$ for boys.
5.5.2 The total enrolment of SC students at the secondary school stage is 92 out of which 55 ( $59.78 \%$ ) are enrolled in the rural areas and 37 ( $40.22 \%$ ) are enrolled in the urban areas. The enrolment of SC girls accounts for $41.30 \%$ against $58.7 \%$ for SC boys.
5.5.3 The total enrolment of ST students at the secondary school stage is 8,651 , out of which $6,619(76.51 \%)$ are in the rural areas and $2032(23.49 \%)$ are in the urban areas. The percentage of ST girls enrolment is $36.5 \%$ while the same for boys is $63.5 \%$.

### 5.6.0 REPEATERS' RATE, LABORATORY \& GUIDANCE SERVICES

### 5.6.1 REPEATERS' RATE :

The Survey result reveals that the repeaters' rate varies from class to class. The table given below indicates the various features of repeaters' rate.

Table: Percentage of repeaters' in different stages.

| Area | I - V |  |  | VI - VII |  |  | IX - X |  |  | XI - XII |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Boys | Girls | Total | Boys | Girls | Total | Boys | Girls | Total | Boys | Girls | Total |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ | $\mathbf{7}$ | $\mathbf{8}$ | $\mathbf{9}$ | $\mathbf{1 0}$ | $\mathbf{1 1}$ | $\mathbf{1 2}$ | $\mathbf{1 3}$ |
| Rural | 15.72 | 15.83 | 15.77 | 10.95 | 10.90 | 10.93 | 14.26 | 15.51 | 13.18 | 11.38 | 14.60 | 12.17 |
| Urban | 11.07 | 9.90 | 10.55 | 9.40 | 8.07 | 8.80 | 15.02 | 14.34 | 14.76 | 5.85 | 6.48 | $\mathbf{9 . 5 0}$ |
| Total | $\mathbf{1 5 . 1 6}$ | $\mathbf{1 5 . 0 7}$ | $\mathbf{1 5 . 1 2}$ | $\mathbf{1 0 . 6 7}$ | $\mathbf{1 0 . 2 7}$ | $\mathbf{1 0 . 5 1}$ | $\mathbf{1 4 . 5 9}$ | $\mathbf{1 4 . 1 5}$ | $\mathbf{1 4 . 4 2}$ | $\mathbf{8 . 9 2}$ | $\mathbf{9 . 9 3}$ | $\mathbf{9 . 2 2}$ |

The total average repeaters' rate is $12.31 \%$ of which boys $12.33 \%$ and girls $12.35 \%$.

### 5.6.2 LABORATORY SERVICES :

Out of these 140 schools having secondary sections, 110 (78.57\%) have Science Laboratories - 51 have separate laboratories for Physics, Chemistry and Biology each; 55 have combined laboratories for Physics, Chemistry \& Biology; and 4 have combined laboratories for Physics, Chemistry and separate laboratory for Biology. As regard area-wise break-up, 93 schools in the rural areas and 17 in the urban areas have Science laboratories. Out of which, 37 schools in the rural areas and 14 in the urban areas have separate laboratories for Physics, Chemistry and Biology each; 52 schools in the rural areas and 3 in the urban areas have combined laboratories for Physics, Chemistry and Biology; and 4 schools in the rural areas alone have combined laboratories for Physics \& Chemistry and separate laboratory for Biology. To note the management-wise break-up, 102 Government, 7 Private Aided and 1 Private Unaided Schools (total 110) have the facilities of Science laboratories.

### 5.6.3 GUIDANCE SERVICES :

Out of a total of 790 secondary schools, only 5 have Guidance Services; 3 have Teacher Councellors; and 1 has Career Master only. All these schools having guidance services are located in the rural areas. Such facilities are not available in any of secondary schools in urban areas. As regard management-wise break-up, it is noted that 4 Government Schools have Guidance Services, 2 Government Schools have Career Master and 1 Private Aided School has Guidance Services as well as a teacher counsellor.

### 5.7.0 HOME SCIENCE, ETC.

5.7.1 Out of a total of 79 secondary schools in the State, only one school in the rural area and under the management of the Government has Home Science with a Home Science Laboratory.
5.7.2 There are 4 secondary schools having indoor halls for games and they are situated in the rural areas and under the management of the Government. All these indoor halls for games are in usable condition including 1 open to community. However, none of the secondary schools in the State has any swimming pool.

## CHAPTER 6

## EDUCATION AT HIGHER SECONDARY STAGE

6.0 Education at Higher Secondary Stage prepares the students for joining the institutions of higher education for further studies in humanities, science and commerce as well as for taking up technical courses as their future careers. Therefore, it acquires special significance in the life of the students for making and choosing careers. In order to make it more purposeful and goal oriented, it becomes necessary to assess the existing facilities at regular intervals of time and introduce certain modifications for adding new dimensions and maintaining excellence. Therefore, analysis of the facilities for higher secondary stage acquires greater relevance in the context of this educational survey.

### 6.1.0 FACILITIES FOR HIGHER SECONDARY STAGE AS PER DISTANCE, POPULATION SLABS (ALL, SC \& ST)

6.1.1 The number of habitations in clifferent population slabs having facilities for higher secondary education within the habitations, within a distance of 8 km . and beyond 8 km . is given in the table below :

| Population <br> Slabs | No. of <br> habitations <br> in the slab | Habitations having the facility |  |  | Percentage of <br> habitations <br> served upto 8 km |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Within | Within 8 km | Beyond 8 km. |  |
| 1 | 2 | 3 | 4 | 5 | 6 |
| 5000 -above | 3 | 2 | 2 | 1 | 66.67 |
| $2000-4999$ | 26 | 12 | 18 | 8 | 69.23 |
| $1000-1999$ | 101 | 15 | 46 | 55 | 45.54 |
| $500-999$ | 236 | 10 | 65 | 171 | 27.54 |
| Below-500 | 3468 | 6 | 477 | 2991 | 13.75 |
| TOTAL | 3834 | 45 | 608 | 3226 | 15.86 |

The table exhibits clearly that there are 3834 habitations in different population slabs out of which 45 (1.17\%) have Higher Secondary stage facilities within them; 608 ( $15.86 \%$ ) upto a distance of 8 km . and 3226 (84.14\%) at a distance of more than 8 km .
6.1.2 There are 29 habitations ( $0.76 \%$ ) of the total of 3834) which are predominantly populated by SC. Out of these 29 habitations, 1 has the Higher Secondary stage facilities within it, 8 upto 8 km . distance and 21 have at a distance of more than 8 km.
6.1.3 There are 3541 habitations ( $92.36 \%$ ) of the total of 3834) which are predominantly populated by ST. Out of these 3541 habitations, 39 (1.10\%) have Higher

Secondary stage facilities within them, 526 ( $14.57 \%$ ) within 8 km . and 3015 ( $85.15 \%$ ) have these facilities at a distance of more than 8 km .

### 6.2.0 HIGHER SECONDARY SCHOOLS BY AREA, MANAGEMENT \& TYPE

6.2.1 There are 61 Higher Secondary Schools out of which 55 are under the management of the Government ( 44 in the rural and 11 in the urban areas), 5 are private aided ( 3 in the rural and 2 in the urban areas) and one is private unaided situated in the urban area. There is no Higher Secondary School under the management of Local Body. The above details are given in the table below :

| Area | Govt. | Local Body | Private Aided | Private Unaided | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Rural | 44 | 0 | 3 | 0 | 47 |
| Urban | 11 | 0 | 2 | 1 | 14 |
| TOTAL | 55 | 0 | 5 | 1 | 61 |

6.2.2 There is no higher secondary school in the State have higher secondary section only two schools have both secondary and higher secondary, 18 have upper primary and secondary alongwith higher secondary and 41 schools have all the stages from primary to higher secondary as shown in the table below.

| Area | Sec. \& Hr. Sec. | Upper Pry., <br> Sec. \& Hr. Sec. | Pry.,Upper Pry., <br> Sec. \& Hr.Sec. | Total |
| :--- | :---: | :---: | :---: | :---: |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ |
| Rural | 1 | 11 | 35 | 47 |
| Urban | 1 | 7 | 6 | 14 |
| TOTAL | $\mathbf{2}$ | $\mathbf{1 8}$ | $\mathbf{4 1}$ | $\mathbf{6 1}$ |

$\begin{array}{ll}\text { 6.3.0 } & \text { ENROLMENT IN CLASSES XI AND XII BY AREA, } \\ & \text { MANAGEMENT, SEX, SC AND ST (ENROLMENT OF CLASSES }\end{array}$
6.3.1 The table given below shows enrolment in classes XI and XII in the rural areas by six, SC and ST.

## NUMBER OF STUDENTS IN RURAL AREAS

| Class | All Communities |  |  | Scheduled Caste |  |  | Scheduled Tribe |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Boys | Girls | Total | Boys | Girls | Total | Boys | Girls | Total |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ | $\mathbf{7}$ | $\mathbf{8}$ | $\mathbf{9}$ | $\mathbf{1 0}$ |
| XI | 1264 | 433 | 1697 | 2 | 1 | 3 | 875 | 283 | 1158 |
| XII | 1259 | 389 | 1648 | 4 | 1 | 5 | 955 | 247 | 1202 |
| TOTAL | $\mathbf{2 5 2 3}$ | $\mathbf{8 2 2}$ | $\mathbf{3 3 4 5}$ | $\mathbf{6}$ | $\mathbf{2}$ | $\mathbf{8}$ | $\mathbf{1 8 3 0}$ | $\mathbf{5 3 0}$ | $\mathbf{2 3 6 0}$ |

It is noted from the above table that there is a total of 1697 students in class XI for all communities of which 433 ( $25.51 \%$ ) are girls and 1264 ( $74.49 \%$ ) boys. The enrolment of class XII for all communities is 1648 with 389 (23.6\%) girls and 1259 (76.4\%) boys. There are 3345 students in both the classes together representing $50.73 \%$ in class XI and $49.27 \%$ in class XII.

As regard SC, enrolment, there are only 8 students in class XI and XII together with 2 girls and 6 boys.

There are 2360 ST students in classes XI and XII together with 530 ( $22.46 \%$ ) girls and $1830(77.54 \%)$ boys. The total enrolment of ST students in class XI is 1158 out of which $283(24.44 \%)$ girls and $875(75.56 \%)$ boys. The number of ST students in class XII is 1202 with 247 ( $20.55 \%$ ) girls and 955 ( $79.45 \%$ ) boys. The ST enrolment at higher secondary stage is $70.55 \%$ of the total enrolment of all communities.
6.3.2. The enrolment in classes XI and XII in the urban areas by sex, SC and ST is given in the table below :

## NUMBER OF STUDENTS IN URBAN AREAS

| Class | All Communities |  |  | Scheduled Caste |  |  |  | Scheduled Tribe |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Boys | Girls | Total | Boy: | Girls | Total | Boys | Girls | Total |  |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | 6 | 7 | $\mathbf{8}$ | $\mathbf{9}$ | $\mathbf{1 0}$ |  |
| XI | 1040 | 602 | 1642 | 8 | 7 | 15 | 583 | 289 | 872 |  |
| XII | 1054 | 578 | 1632 | 12 | 5 | 17 | 633 | 263 | 896 |  |
| TOTAL | 2094 | 1180 | $\mathbf{3 2 7 4}$ | $\mathbf{2 0}$ | $\mathbf{1 2}$ | $\mathbf{3 2}$ | $\mathbf{1 2 1 6}$ | $\mathbf{5 5 2}$ | $\mathbf{1 7 6 8}$ |  |

It is seen from the above table that there are 1642 students in class XI for all communities of which $602(36.66 \%)$ are girls and 1040 ( $63.34 \%$ ) boys. The enrolment of class XII for all communities is 1632 with 578 ( $35.42 \%$ ) girls and 1054 ( $64.58 \%$ ) boys. The total enrolment in both classes XI and XII is 3274 of which the enrolment in class XI is $50.15 \%$ while in class XII it is $49.85 \%$.

The SC enrolment in classes XI and XII together is 32 with 12 (37.5\%) girls and 20 ( $62.5 \%$ ) boys. The SC enrolment in higher secondary stage represents $0.98 \%$ of the total enrolment for all communities.

The number of ST students in classes XI and XII together is 1768 with 552 ( $31.22 \%$ ) girls and 1216 ( $68.78 \%$ ) boys. Out of a total enrolment of 872 ST students in class XI, 289 ( $33.14 \%$ ) are girls and 583 ( $66.85 \%$ ) are boys. These figures for class XII are $896,263(29.35 \%)$ and $633(70.65 \%)$ respectively.
6.3.3. The total number of all communities studetns enrolment in classes XI and XII in both the rural and the urban areas combined together is 6619 out of which $40(0.6 \%)$

SC and 4128 (62.37\%) ST. Again representation of girls in the total enrolment at higher secondary stage is 2002 ( $30.25 \%$ ) against 4617 ( $69.75 \%$ ) boys.
6.3.4. Out of 6619 students at higher secondary stage, 6354 students are enrolled in 55 schools managed by the Government representing $96 \%$ of the total enrolment. There are 219 students ( $3.31 \%$ ) in 5 private aided schools and 46 ( $0.69 \%$ ) in 1 private unaided school.
6.3.5 There are four Degree Colleges in the State. But classes XI and XII are not attached with anyone of them. Degree colleges are teaching the courses of studies leading to the award of the first Degree by University. Classes XI and XII are taught in the Higher Secondary Schools only.

### 6.4.0 STREAMWISE ENROLMENT

6.4.1 There are combination of streams in most of the 61 higher secondary schools. 53 schools have Arts, 38 Science, 5 Commerce and 2 other streams. Amongst 6619 students at +2 stage, 4529 ( $68.42 \%$ ) in Arts, 1989 (30.05\%) in Science, 97 ( $1.47 \%$ ) in Commerce and remaining 4 students turn out in other streams. The streamwise enrolments of girls in Arts, Science and Commerce are 1494, 483 and 25 respectively.

### 6.5.0 FACILITIES FOR SCIENCE TEACHING

6.5.1 There are 38 schools - 33 Government, 4 Private Aided and 1 Private Unaided - having the facilities for Science Teaching. Of them 26 are in the rural areas and 12 are in the urban areas.

Of the 38 schools offering Science stream, 32 have qualified teachers in Physics, 36 in Chemistry, 35 in Mathematics and biology each.

### 6.6.0 ENROLMENT INDICES

6.6.1 The various aspects of enrolment at +2 stage have been discussed in earlier paragraphs. The important enrolment ratios are summerised below :

| Particulars | Boys | Girls | Total |
| :--- | :---: | :---: | :---: |
|  | 69.75 | 30.25 | 100 |
| All communities | 65 | 35 | 100 |
| SC | 73.79 | 26.21 | 100 |
| ST | 75.43 | 25.57 | 100 |
| Rural | 63.96 | 36.04 | 100 |
| Urban | 67.01 | 32.99 | 100 |
| Arts | 75.72 | 24.28 | 100 |
| Science | 74.23 | 25.77 | 100 |
| Commerce |  |  |  |

6.7.1 LABORATORY FACILITIES

There are 38 higher secondary schools teaching Science subjects. Of these: 33 have separate laboratories for Physics, Chemistry and Biology; 3 have combined laboratories for Physics, Chemistry and Biology; 1 has combined laboratory for Physics, and Chemistry and separate laboratory for Biology and 1 school does not have laboratory in. any of the Science subjects.

In urban areas there are 12 higher secondary schools teaching Science: subjects and all of them have separate laboratories for Physics, Chemistry and Biology. Out of 26 such schools in the rural areas, 21 have separate laboratories for each subject; 3 have combined laboratories for all the three subjects, and 1 has combined laboratory for Physics; \& Chemistry but a separate laboratory for Biology.

### 6.7.2 GUIDANCE SERVICES

Out of the total of 61 higher secondary schools, only 11 have guidance services; 5 have Trained guidance Councellor; 4 have Teacher Councellor and 1 has Career Master only.

### 6.7.3 HOME SCIENCE

Amongst all the higher secondary schools of the State, only one Private Aided School is teaching Home Science and having a Home Science Laboratory.

### 6.7.4 OTHER FACILITIES

10 government higher secondary schools, 5 in the rural areas and 5 in the urban areas, have indoor halls for games. 9 of them are in usable condition. Another 5 Private aided higher secondary schools, 3 in the rural areas and 2 in the urban areas have indoor halls for games which are in usable condition. However, none of the higher secondary schools in the State has any facility of swimming pool.

## CHAPTER 7

## OTHER FORMS OF EDUCATION

7.0

Besides education at primary, upper primary, secondary and higher secondary stages, other forms of education, viz., pre-primary education, non-formal education, education for disabled children and education in unrecognised schools also play an important role in extending the reach of education. These forms of education are discussed in this chapter based on the information collected in this survey.

### 7.1 PRE-PRIMARY EDUCATION

7.1.1 There are 499 pre-primary classes - 459 in the rural and 40 in the urban areas attached to schools. 19342 children are enrolled in them. The number of girls enrolled in pre-primary classes is $10,306(53.28 \%)$ against $9,036(46.72 \%)$ boys. 405 teachers are working at pre-primary stage, of them 254 are female and 151 are male.
7.1.2 There are 1018 Balwadi/Anganwadi pre-primary education centres in the State. All these centres are in the rural areas. The total enrolment in these centres is 35087 with 18474 boys and 16613 girls. 1302 Anganwadi workers are imparting pre-primary education, of them 1176 are female and rest 126 are male.
7.1.3 There are 40 independent pre-primary schools - 26 in the rural and 14 in the urban areas. 73 teachers are employed therein - 46 in the rural and 27 in the urban areas. Out of these, 20 are male and 53 are female teachers. 2564 children are on the rolls 1362 in the rural and 1202 in the urban areas. The enrolments of boys and girls are 1491 and 1073 respectively.
7.1.4 The three types of pre-primary education discussed above are summerised in the table below.

| Type of <br> Institution | Total No. <br> of the ins- <br> titutions | No. of teachers |  |  | No. of children |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Female | Total | Boys | Girls | Total |  |
| 1 |  | 3 | 4 | 5 | 6 | 7 | 8 |
| Pre-Primary Classes <br> attached to schools | 499 | 151 | 254 | 405 | 9036 | 10306 | 19342 |
| Balwadi/Anganwadi <br> Centres | 1018 | 126 | 1176 | 1302 | 18474 | 16613 | 35087 |
| Independent Pre <br> Primary schools | 40 | 20 | 53 | 73 | 1491 | 1073 | 2564 |
| TOTAL | $\mathbf{1 5 5 7}$ | $\mathbf{2 9 7}$ | $\mathbf{1 4 8 3}$ | $\mathbf{1 7 8 0}$ | $\mathbf{2 9 0 0 1}$ | $\mathbf{2 7 9 9 2}$ | $\mathbf{5 6 9 9 3}$ |

It is noted from the table that there are 1557 pre-primary classes/centres which have employed 1780 teachers ( 297 male and 1483 female) and enrolled 56993 children ( 29001 boys and 27992 girls) altogether.

## 7.2

 NON-FORMAL EDUCATION7.2.1 The following table shows the total number of non-formal education centres according to area, management, level and type.

| Level of Centre | Type of Centre | Govt. <br> Centre in <br> rural area | Centre by <br> voluntary <br> agencies | Total in the <br> rural area |
| :--- | :--- | :--- | :--- | :---: |
|  | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ |
| Primary only | For both boys \& girls | 41 | 0 | 41 |
| Upper Pry.only | For both boys \& girls | 4 | 0 | 4 |
|  <br> upper primary | For both boys \& girls | 1 | 0 | 1 |
| Total | For both boys \& girls | $\mathbf{4 6}$ | $\mathbf{0}$ | $\mathbf{4 6}$ |

It is seen from the table that there are 46 non-formal education centres run by the Government in the rural areas for both boys and girls. Out of which 41 are for primary education; 4 for upper primary education and 1 for both primary and upper primary education.
7.2.2 The number of NFE centres with enrolment at primary and upper primary levels of education is presented in the following table.

| Level | No. of Non-formal centres with enrolment |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $1-10$ | $11-20$ | $21-30$ | $31-40$ | $41-50$ | More than 50 | Total |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Primary only | 11 | 12 | 14 | 1 | 2 | 1 | 41 |
| U/Primary only | 0 | 0 | 0 | 1 | 0 | 3 | 4 |
|  <br> U/Primary | 0 | 0 | 1 | 0 | 0 | 0 | 1 |
| Total | 11 | 12 | 15 | 2 | 2 | 4 | 46 |

The above table shows that out of the total 46 NFE centres, 11 have the enrolment of 1-10; 12 have 11-20; 15 have 21-30; 2 have $31-40 ; 2$ have $41-50$ and 4 have more than 50.

### 7.3 EDUCATION FOR DISABLED CHILDREN

The Sixth All India Educational Survey reveals that there is no school exclusively for either the blind or the deaf $\&$ dumb or the orthopaedically handicapped or the mentally retarded. There is only one school in the category meant for other disabled children established in an urban area for both boys and girls. This school has the enrolment of 31 disabled children including boys and girls. It is situated at the State Capital and run by an NGO.

### 7.4 UNRECOGNISED SCHOOLS

There are 61 unrecognised schools in this State. Out of which, 50 are primary schools, 13 are upper primary schools and 1 is higher secondary school.

## CHAPTER 8

## TEACHERS

8.0

The National Policy on Education, 1986 emphasises the need for qualitative improvement in education. The teacher plays the most important role to implement the policy. The Present Survey gives a number of information about teachers serving at various school stages. Based on the Survey data, the clifferent aspects of teachers are discussed in this chapter.

### 8.1 TENURE OF SERVICE:

The tenure of service for all categories of the teachers in Arunachal Pradesh extends upto the attainment of the age of sixty years. The maximum age-limit at the time of recruitment as Senior and Junior Teachers is 35 years and as Assistant Teachers, Physical Education Teachers and Laboratory Assistants is 30 years. The usual relaxation of age is available to the SC/ST teachers at the time of recruitment.

## 8.2 <br> TEACHERS AT VARIOUS SCHOOL STAGES

8.2.1 The following table gives a picture of the total number of sanctioned posts as well as of the teachers in position at various school stages in both the rural and the urban areas.

| School stages | Area | Total sanctioned <br> posts of teachers | Total teachers in <br> position |
| :--- | :--- | :---: | :---: |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ |
| PRIMARY | Rural | 3124 | 3042 |
|  | Urban | 538 | 525 |
|  | Total | 3662 | 3567 |
| UPPER PRIMARY | Rural | 1618 | 1579 |
|  | Urban | 232 | 227 |
|  | Total | 1850 | 1806 |
| SECONDARY | Rural | 848 | 826 |
|  | Urban | 222 | 217 |
|  | Total | 1070 | 1043 |
| HIGHER SECONDARY | Rural | 423 | 413 |
|  | Urban | 191 | 187 |
|  | Total | 614 | 600 |
| TOTAL | Rural | $\mathbf{6 0 1 3}$ | $\mathbf{5 8 5 9}$ |
|  | Urban | $\mathbf{1 1 8 4}$ | $\mathbf{1 1 5 7}$ |
|  | Total | $\mathbf{7 1 9 7}$ | $\mathbf{7 0 1 6}$ |

8.2.2 It may be noted that 3567 teachers are working at the primary stage against the sanctioned posts of 3662 . Out of 3567 teachers 3042 ( $85 \%$ ) are working in the rural areas and 524 ( $15 \%$ ) in the urban areas.
8.2.3 $\quad 1806$ teachers are working at the upper primary stage against 1850 sanctioned posts. Of them, 1579 ( $87 \%$ ) are posted in the rural areas and the rest 227 (13\%) in the urban areas.
8.2.4 A total of 1043 teachers are working at the secondary stage against 1070 sanctioned posts. 826 (79\%) teachers are posted in the rural areas and 217 ( $21 \%$ ) in the urban areas.
8.2.5 At higher secondary stage 600 teachers are working against 614 sanctioned posts. Of them $413(69 \%)$ are posted in the rural areas and $187(31 \%)$ in the urban areas.
8.2.6 Altogether 7016 teachers are working at various school stages against 7197 sanctioned posts. Out of 7016 teachers, 5859 ( $84 \%$ ) are posted in the rural areas and 1157 ( $16 \%$ ) in the urban areas. The number of the teachers at the primary school stage is the highest $3567(51 \%)$ followed by $1806(26 \%)$ at the upper primary school stage; 1043 ( $15 \%$ ) at the secondary school stage and $600(8 \%)$ at the higher secondary school stage.

### 8.3 ACADEMIC AND PROFESSIONAL QUALIFICATIONS OF TEACHERS BY SCHOOL STAGES

8.3.1 At primary school stage, the teachers with B.A./B.Sc. degree are recruited. Preference is given to those having B.Ed./B.T. training degree. However, the persons belonging to ST category of the State with class XII Board Examination pass certificate are also appointed for teaching at the primary school stage. A total of $44 \%$ teachers are trained at this stage.
8.3.2 At upper primary school stage, the teachers with B.A./B.Sc. and B.Ed./B.T. degree are recruited. Persons with post graduate degree with professional training are given preference. However, the persons belonging to ST category of the State with B.A./B.Sc. degree are also appointed for teaching at the upper primary school stage. A total of $43 \%$ teachers are trained at this stage.
8.3.3 At secondary school stage, the teachers with graduate/post graduate and B.Ed./B.T. degree are recruited. Persons having teaching experience are given preference. Academically qualified ST persons even without B.Ed./B.T. degree are also appointed for teaching at this stage. A total of $51 \%$ teachers are trained at secondary stage.
8.3.4 At higher secondary school stage, the teachers with post graduate and B.Ed./B.T. degree are appointed. Preference is given to those who have teaching experience at +2 stage. Persons belonging to ST category of the State with post graduate degree are also recruited even without B.Ed./B.T. degree.

### 8.4 UTILISATION OF TEACHERS :

8.4.1 There are 7016 teachers working at different school-stages against 7197 sanctioned posts. In addition to this, there are 80 voluntary/contractual and 53 part time teachers also who are teaching at different school stages. A total of 74 teachers are also there
who are recruited exclusively for physical education/physical training/yoga at secondary and higher secondary school stages. At primary stage, there are 521 schools with one teacher each; 400 schools with two teachers each; 79 schools with three teachers each; 37 schools with four teachers each; 27 schools with five teachers each; and 75 schools with more than five teachers each.
8.4.2 The assistant teachers and the junior teachers are assigned with thirty-six periods per week while senior teachers are assigned with thirty-three periods. The language teachers are given thirty periods per week. Besides, provisional classes are also given to the teachers as and when required. Remedial classes are also arranged whenever needed.
8.4.3 Teachers at all stages set the question papers and evaluate the answerscripts of the students as part of continuous assessment of performance. They cooperate with the school authorities in conducting examinations, annual functions and all other curricular and co-curricular activities of the schools. Some of them are assigned with the duties of the National Open School, N.S.S., N.C.C., Library, Bharat Scouts \& Guides, Games and Sports also.

### 8.5 TEACHERS TEACHING SCIENCE \& MATHEMATICS BY QUALIFICATIONS AND THEIR UTILISATION

8.5.1 Teaching of Science (Physics., chemistry \& Biology) and Mathematics at +2 stage is undertaken by the qualified teachers who possess post-graduate degrees in the concerned subject with B.Ed./B.T. degree. A total of $66 \%$ teachers teaching at this stage are trained. There are 38 higher secondary schocls offering teaching in Physics, Chemistry, Biology and mathematics wherein the number of qualified teachers subjectwise is 32 in Physics, 36 in Chemistry, 35 in Biology and 35 in Mathematics.
8.5.2 The senior teachers in Science and Mathematics are assigned with the teaching of their respective subjects in classes XII, XI and X. The junior teachers with B.Sc. \& B.Ed./B.T. or M.Sc. \& B.Ed./B.T. degrees are assigned with the teaching of Science and Mathematics in upper primary and secondary stages. The assistant teachers with B.Sc., B.Ed. / B.T. or XII (Science) Board Examination pass certificate are assigned with the teaching of Science and Mathematics at the primary stage.
8.5.3 In certain cases where the Vice-Principals possess the post-graduate degrees in Science subjects and Mathematics with B.Ed./B.T. degree and adequate experience of teaching the subjects concerned at +2 stage, they also teach the Science and Mathematics.
8.5.4 Besides teaching their subjects, the teachers teaching Science and Mathematics supervise the students' practical work and organise science club and also guide students for science exhibitions/ seminars at inter-school, inter-district, inter-state and national levels. In case of necessity, remedial classes are also arranged by them for weaker students.

## ATTRITION RATE OF TEACHERS

The total percentage attrition rate of teachers at the primary school-stage is 0.91 , at the upper primary school-stage 1.37 , at secondary school-stage 1.36 and at the higher secondary school-stage is 1.34 . Thus, the percentage attrition rate of teachers at upper primary school stage is the highest (1.37) followed by secondary school stage (1.36), higher secondary school stage (1.34) and primary school stage ( 0.91 ). The percentage attrition rate of teachers in urban area is less than that in rural area, such as, primary 0.88 in urban area against 0.91 in rural area, upper primary 0.95 against 1.42 and secondary 0.76 against 1.44. But it is reverse at the higher secondary stage where attrition percentage in urban area is higher (1.60) than in the rural area (1.22). The over-all percentage attrition rate is 1.20 .

### 8.7 HOUSING FACILITY FOR TEACHERS AND TEACHERS RESIDING OUTSIDE THE VILLAGE AND TOWN

8.7.1 The table given below indicates the number of teachers at different type of schools who have been provided with housing facility.

| Type of Schools | Areawise total number of the teachers benefitted by housing facility |  |  |
| :--- | :---: | :---: | :---: |
|  | Rural | Urban | Total |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ |
| PRIMARY | 1614 | 136 | 1750 |
| UPPER PRIMARY | 1270 | 80 | 1350 |
| SECONDARY | 830 | 128 | 958 |
| HIGHER <br> SECONDARY | 880 | 424 | 1304 |
| TOTAL | $\mathbf{4 5 9 4}$ | $\mathbf{7 6 8}$ | $\mathbf{5 3 6 2}$ |

A total of 5362 teachers have been benefitted by the housing facility with 4594 in the rural area and 768 in the urban area. The primary school teachers form the highest number of 1750 in respect of being benefitted by the housing facility followed by upper primary school teachers 1350, secondary school teachers 958 and higher secondary school teachers 1304.
8.7.2 The following table indicates the number of teachers at different type of schools. who are staying outside the village/town where the school is located.

\left.| Type of Schools | Areawise total number of the teachers residing outside the |  |  |
| :--- | :---: | :---: | :---: |
|  |  |  |  |$\right]$

From the above table it is noted that a total of 326 teachers are residing outside the village/town, out of which 189 are primary school teachers, 107 upper primary school teachers, 18 secondary school teachers and 12 higher secondary school teachers. The rural and urban break up of the teachers residing outside the village/town are 262 and 64 respectively.

## CHAPTER 9

## SCHOOL BUILDING

9.0

Unlike the previous surveys, information regarding condition of schooll buildings, ownership of school premises, additional class-rooms required and expansiom potential and availability of drinking water, urinal and lavatory facilities have been collected in the $6^{\text {th }}$ Survey. These will enable the planners to understand the various aspects off physical facilities prevailing in the State.

## 9.1 <br> TYPE OF SCHOOL BUILDING AND ITS OWNERSHIP

9.1.1 The number of the schools according to the type of building in both the rural and urban areas is given in the table below.

| Type of Building | Area with the number of schools |  |  |
| :--- | :---: | :---: | :---: |
|  | Rural | Urban | Total |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ |
| Pucca | 481 | 43 | 524 |
| Partly pucca | 323 | 24 | 347 |
| Kachcha | 422 | 5 | 427 |
| Thatched huts | 261 | 2 | 263 |
| Tents | 0 | 0 | 0 |
| Open Space | 2 | 0 | 2 |
| Total | $\mathbf{1 4 8 9}$ | $\mathbf{7 4}$ | $\mathbf{1 5 6 3}$ |

524 schools ( $33.53 \%$ ) are run in pucca buildings, 347 (22.20\%) in partly pucca, 427 ( $27.32 \%$ ) in kachcha buildings, 263 (16.83\%) in thatched huts and 2 in opem space. No school is run in tent.
9.1.2 The table given below shows the ownership of school buildings with their respective numbers under different management.

| Management | Total school building |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Owned | Rented | Rent-free | Total |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ |
| Government | 1439 | 4 | 71 | 1514 |
| Local Body | 2 | 0 | 0 | 2 |
| Private Aided | 24 | 0 | 2 | 26 |
| Private Unaided | 15 | 3 | 3 | 21 |
| Total | $\mathbf{1 4 8 0}$ | 7 | $\mathbf{7 6}$ | $\mathbf{1 5 6 3}$ |

It is seen from the above table that out of 1563 school buildings, 1480 are owned, 7 rented and remaining 76 rent-free. Management-wise break up of own buildings is 1439 government, 2 local body, 24 private aided and 15 private unaided. There are 7 rented
buiildings of which 4 government and 3 private unaided. Further 71 government, 2 private aided and 3 private unaided schools have rent-free accommodation.

### 9.2 USE OF SCHOOL BUILDING

781 school buildings are used only for educational purposes, 591 for adult education, 369 for other educational purposes, 271 for other purposes, 63 for non-formal education and 18 for running another school/college. Moreover, there are 699 schools which are not used for other purposes. Category-wise school buildings used for different purposes are indicated in the following table.

| Sichool category | Not used <br> for other <br> purposes | Another <br> school/ <br> college | Adult <br> Edn. | Non- <br> formal <br> Educa- <br> tion | Other <br> Ednl. <br> Purpose | Any <br> other <br> purpose | Only <br> for <br> Ednl. <br> Purpose |
| :--- | ---: | :--- | :--- | :--- | :--- | ---: | ---: |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ | $\mathbf{7}$ | $\mathbf{8}$ |
| PIRIMARY | 528 | 10 | 427 | 37 | 258 | 190 | 556 |
| UPPER <br> PRIMARY | 104 | 5 | 119 | 10 | 74 | 55 | 158 |
| SECONDARY | 31 | 2 | 33 | 13 | 24 | 16 | 46 |
| HIGHER SEC. | 36 | 1 | 12 | 3 | 13 | 10 | 21 |
| TOTAL | $\mathbf{6 9 9}$ | $\mathbf{1 8}$ | $\mathbf{5 9 1}$ | $\mathbf{6 3}$ | $\mathbf{3 6 9}$ | $\mathbf{2 7 1}$ | $\mathbf{7 8 1}$ |

## 9.3 <br> AVAILABILITY OF CLASS-ROOMS

There are 88 schools with 10 and more class-rooms available for instructional purposes, 106 with $8-9$ rooms, 18.5 with $6-7$ rooms, 199 with 5 rooms, 175 with 4 rooms, 381 with 3 rooms, 356 with 2 roorns and 70 with one room each. There are 3 schools - 1 primary and 2 upper primary - which have no rooms. The details of class-rooms are presented in tabular form below.

| Schools with total <br> number of rooms | Primary | Upper <br> Primary | Secondary | Higher <br> Secondary | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ |
| With zero room | 1 | 2 | 0 | 0 | 3 |
| With 1 room | 70 | 0 | 0 | 0 | 70 |
| With 2 room | 348 | 5 | 3 | 0 | 356 |
| With 3 room | 359 | 11 | 11 | 0 | 381 |
| With 4 room | $\mathbf{1 1 8}$ | 21 | 32 | 4 | 175 |
| With 5 room | 151 | 21 | 21 | 6 | 199 |
| With 6-7 room | 91 | 72 | 6 | 16 | 185 |
| With 8-9 room | 4 | 89 | 6 | 7 | 106 |
| 10 and above | 4 | 56 | 0 | 28 | 88 |
| Total | $\mathbf{1 1 4 6}$ | 277 | $\mathbf{7 9}$ | $\mathbf{6 1}$ | $\mathbf{1 5 6 3}$ |

9.4.1 All the schools have expansion potential. There are 1260 schools in total having scope for construction of additional classrooms of which 114 schools have land available and construction on upper storey possible, 15 schools have the scope for construction of additional storey and 1131 have expansion potential using the available land. The expansion potentials of schools are shown in the following table.

| Items of the schools having <br> expansion potential | School categories |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Primary | U/Primary | Secondary | Hr.Sec. |  |
|  | 2 | 3 | 4 | 5 | 6 |
| Only using the available <br> land | 841 | 193 | 59 | 38 | 1131 |
| Only construction of <br> additional storey | 07 | 04 | 02 | 02 | 15 |
| Land available and <br> construction on upper <br> storey possible | 82 | 25 | 05 | 02 | 114 |
| Total no. of schools having <br> expansion potential | 930 | 222 | 66 | 42 | 1260 |
| No scope | 0 | 0 | 0 | 0 | 0 |
| Total | 930 | 222 | 66 | 42 | 1260 |

9.4.2 The survey reveals that 2992 additional classrooms - 2256 for primary schools and 736 for upper primary schools - are required. 216 primary schools and 55 upper primary schools do not require any additional classrooms. The details are shown in the following table.

| No. of schools in need of additional <br> Class-rooms | School Categories |  |  |
| :--- | :---: | :---: | :---: |
|  | Primary | U/Primary | Total |
|  | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ |
| Additional Class-rooms not required | 216 | 55 | 271 |
| Requiring 1 additional room | 133 | 14 | 147 |
| 2 additional room | 409 | 51 | 460 |
| 3 additional room | 281 | 79 | 360 |
| 4 additional room | 84 | 35 | 119 |
| 5 additional room | 18 | 30 | 48 |
| More than 5 additional room | 5 | 13 | 18 |
| Total schools | 1146 | 277 | $\mathbf{1 4 2 3}$ |
| Total no. of addl. class-rooms required | $\mathbf{2 2 5 6}$ | $\mathbf{7 3 6}$ | $\mathbf{2 9 9 2}$ |

9.4 .3

271 additional classrooms are required for secondary schools and 201 for higher secondary schools. 13 secondary schools and 19 higher secondary schools do not require any additional classrooms. Requirement of additional classrooms is shown in the table below.

| No. of schools in need of <br> Additional class-rooms | School Categories |  | Total |
| :--- | :---: | :---: | :---: |
|  | Secondary | Higher Secondary |  |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ |
| Addl. Class rooms not required | 13 | 19 | 32 |
| Required 1-2 addl. Class rooms | 13 | 06 | 19 |
| Requiring 3-4 rooms | 25 | 17 | 42 |
| Requiring 5-6 rooms | 25 | 12 | 37 |
| Requiring 7-8 rooms | 02 | 03 | 05 |
| Requiring more than 8 addl. rooms | 01 | 04 | 05 |
| Total schools | 79 | 61 | 140 |
| Total no. of additional class rooms <br> required | 271 | 201 | 472 |

## 9.5

DRINKING WATER, URINAL, LAVATORY FACILITIES
There are 1563 schools with 177198 students from class I to class XII. 734 schools ( $46.96 \%$ ) have drinking water facility for 110864 ( $62.57 \%$ ) students, 347 schools ( $22.20 \%$ ) have urinal facility for 80737 ( $45.56 \%$ ) students, 146 schools $(9.34 \%$ ) have separate urinals for 45077 girls ( $25.44 \%$ ), 233 schools ( $14.91 \%$ ) have lavatory facilities for 63221 students ( $35.68 \%$ ) and $101(6.46 \%)$ schools have separate lavatory for 30590 girls ( $17.26 \%$ ). These facilities are reflected in the following table.

| Facilities items | Total No. of <br> Schools | Total No. of <br> students | Percentage of <br> schools | Percentage of <br> students |
| :--- | :---: | :---: | :---: | :---: |
|  | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ |
| Drinking water | 734 | 110864 | 46.96 | 62.57 |
| Urinals | 347 | 80737 | 22.20 | 45.56 |
| Separate Urinal <br> for girls | 146 | 45077 | 9.34 | 25.44 |
| Lavatory | 233 | 63221 | 14.91 | 35.68 |
| Separate lavatory <br> for girls | 101 | 30590 | 6.46 | 17.26 |

## CHAPTER 10

## EDUCATIONAL AND ANCILLARY FACILITIES

10.0

Education and ancillary facilities are the essential requirement for a good educational institution. The inputs like library, book bank, blackboard, furniture, facilities for sports and games, health care etc. create a proper atmosphere for quality education. The Sixth Survey covers all these aspects and the information collected provides a basis to plan for further improvement.

### 10.1 LIBRARY

The school library plays an important role for efficient functioning a school. It supplements classroom teaching and therefore, it is an inseparable part of a school.

Out of 1563 schools, 681 (43.57\%) have library facilities. This facility is available in $33.16 \%$ of primary schools, $62.09 \%$ of upper primary schools, $89.87 \%$ of secondary schools and $95.08 \%$ of higher secondary schools. The data on library facility are given in the table below.

| School Category | Total No. of schools | Schools having a <br> library each | Percentage of the <br> schools having lib. |
| :--- | :---: | :---: | :---: |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ |
| Primary | 1146 | 380 | 33.16 |
| Upper Primary | 277 | 172 | 62.09 |
| Secondary | 79 | 71 | 89.87 |
| Higher Secondary | 61 | 58 | 95.08 |
| Total | $\mathbf{1 5 6 3}$ | $\mathbf{6 8 1}$ | $\mathbf{4 3 . 5 7}$ |

10.2

BOOK BANK
The table given below shows the total number of the schools by category having book bank with them.

| School Category | Total No. of <br> Schools | Schools having <br> book bank | Percentage of schools <br> having book bank |
| :--- | :---: | :---: | :---: |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | 4 |
| Primary | 1146 | 158 | 13.78 |
| Upper Primary | 277 | 63 | 22.74 |
| Secondary | 79 | 23 | 29.11 |
| Higher Secondary | 61 | 23 | 37.70 |
| Total | $\mathbf{1 5 6 3}$ | 267 | 17.08 |

It is seen from the table that $17.08 \%$ of the schools have book bank. This percentage for primary school is 13.78 , upper primary 22.74 , secondary 29.11 and higher secondary 37.70 .

## FACILITIES FOR SPORTS AND GAMES

The number of schools having facilities for different types of games and sports is presented in the table below.

|  <br> Sports | No.of primary <br> schools having <br> facilities | Upper Pry. <br> Schools having <br> facilities | Secondary <br> schools having <br> facilities | Hr. Sec. <br> Schools having <br> facilities |
| :--- | :---: | :---: | :---: | :---: |
|  | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ |
| Football | 861 | 257 | 75 | 59 |
| Hockey | 8 | 2 | 25 | 34 |
| Cricket | 37 | 33 | 40 | 52 |
| Basket-ball | 39 | 15 | 3 | 10 |
| Volley-ball | 842 | 254 | 78 | 60 |
| Badminton | 96 | 71 | 57 | 54 |
| Shotput | 142 | 103 | 65 | 54 |
| Javelin | 75 | 49 | 54 | 50 |
| Hammer | 46 | 25 | 21 | 30 |
| Discus-throw | 63 | 45 | 56 | 52 |
| Gymnastics | 34 | 5 | 7 | 13 |
| Athletics | 201 | 85 | 45 | 40 |
| Khoko | 163 | 48 | 24 | 26 |
| Kabadi | 430 | 111 | 41 | 40 |
| Archery | 118 | 34 | 9 | 10 |
| Sports | 484 | 108 | 58 | 41 |

The football and the volley-ball appear to be more popular amongst all the games, considering the number of schools having such facilities. A good number of schools have facilities for other games and sports.

### 10.4 SPORTS / GAMES EQUIPMENT/MATERIAL AVAILABLE AND THEIR USE

The number of schools where sports/games equipment/material available for use is shown in the table below.

| Games \& Sports | No. of schools having equipment / material |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | Primary | Upper Primary | Secondary | Hr. Secondary |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ |
| Football | 497 | 179 | 70 | 55 |
| Hockey | 3 | 4 | 23 | 32 |
| Cricket | 9 | 17 | 24 | 44 |
| Basket-ball | 9 | 5 | 3 | 9 |
| Volley-ball | 551 | 194 | 72 | 56 |
| Badminton | 45 | 34 | 50 | 47 |
| Shotput | 27 | 50 | 54 | 51 |

| Javelin | 9 | 21 | 45 | 46 |
| :--- | :---: | :---: | :---: | :---: |
| Hammer | 9 | 16 | 17 | 27 |
| Discus-throw | 11 | 27 | 46 | 51 |
| Gymnastics | 10 | 2 | 6 | 11 |
| Athletics | 46 | 25 | 34 | 34 |
| Khoko | 108 | 34 | 19 | 22 |
| Kabadi | 194 | 61 | 31 | 34 |
| Archery | 32 | 8 | 3 | 5 |
| Sports | 484 | 108 | 58 | 41 |

Availability of equipment/material for various types of games and sports does not commensurate with the availability of facilities as shown in the earlier table. In many of the cases equipments/material are lacking even though facilities are available.

## $10.5 \quad$ SPORTS/GAMES ACTIVITIES

Sports and games activities are undertaken by 585 teachers in primary, 173 in upper primary, 81 in secondary and 62 in higher secondary schools. Thus, a total of 901 teachers have been entrusted with the responsibility of organising sports/games in their respective schools. Most of them are qualified and trained physical education teachers in the secondary and higher secondary schools.They organise these activities regularly because physical education has been made compulsory. In the primary and the upper primary schools, certain teachers are assigned with the duties of organising sports/games activities in their respective schools.

### 10.6 MEDICAL CHECK-UP OF STUDENTS

The survey reveals that medical check-up of students are arranged in 115 primary, 40 upper primary, 26 secondary and 28 higher secondary schools in the State. In rural areas, the corresponding numbers are 100, 32, 24 and 21 respectively.

### 10.7 INOCULATION / VACCINATION

According to the information collected during the survey, it is seen that inoculation/vaccination of students is arranged by 235 primary, 68 upper primary, 38 secondary and 37 higher secondary schools. In rural areas, this activity is carried out in 216 primary, 61 upper primary, 35 secondary and 29 higher secondary schools.

## CONTINGENCY FUND

Out of 1563 schools, 555 ( $35.50 \%$ ) schools have contingency funds. This fund is maintained in 384 ( $33.50 \%$ ) primary, 96 (34.65\%) upper primary, 35 ( $44.30 \%$ ) secondary and $40(65.57 \%)$ higher secondary schools.

It appears from the survey that SUPW facility is available in almost in all the schools. $92.19 \%$ of the schools have this facility. There are 1046 primary schools ( $91.27 \%$ ) out of 1146,259 upper primary schools ( $93.50 \%$ ) out of 277,76 secondary schools ( $96.20 \%$ ) out of 79 and 60 higher secondary schools ( $98.36 \%$ ) out of 61 which have SUPW facilities with them.

### 10.10 INCENTIVE SCHEMES

Incentive schemes like mid-day-meal, free uniform to children, free text books to students and attendance scholarship to girls are implemented in different schools. The details of these schemes in different category of schools are given in the table below.

| Incentive Schemes | No. of schools having the schemes |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | Primary | U/Primary | Secondary | Hr. Secondary | Total |
| $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ |
| Mid-Day-Meal | 899 | 212 | 63 | 37 | 1211 |
| Free Uniform to <br> Children | 993 | 233 | 66 | 39 | 1331 |
| Free Text Books to <br> students | 1087 | 265 | 75 | 56 | 1483 |
| Attendance Scholar- <br> ship to Girls. | 2 | 2 | 1 | 1 | 6 |

### 10.11 BLACKBOARD, FURNITURE FOR TEACHERS AND STUDENTS

There are 9245 sections in 1563 schools. Out of that 6919 sections have usable blackboards. There is, therefore, a shortage of blackboard in 2326 sections. 5518 sections have furniture for teachers leaving a gap of 3727 sections for such facility. As regards mats/furniture for students, it is found that mats/furniture for students are adequate in 6413 sections and inadequate in 2015 sections. 817 sections have no mats/furniture. The information regarding these facilities in different categories of schools are presented in the table below.

| School Category | Total No. of school | Total No. of sections | No. of usable black boards | Shortage of blackboards | No. of Sections Having furni ture for teachers | No. of sections having mats/ furniture for students |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  | Adequate | Inadequate | No mats / furniture |
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 |
| Primary | 1146 | 5364 | 3380 | 1984 | 2548 | 3355 | 1410 | 599 |
| U/Pry. | 277 | 2185 | 1855 | 330 | 1463 | 1554 | 463 | 168 |
| Sec. | 79 | 818 | 807 | 11 | 683 | 677 | 101 | 40 |
| Hr. Sec. | 61 | 878 | 877 | 1 | 824 | 827 | 41 | 10 |
| Total | 1563 | 9245 | 6919 | 2326 | 5518 | 6413 | 2015 | 817 |

## CHAPTER 11

## EDUCATIONAL FINANCE:

11.0 Of 1563 schools of the State, $\mathrm{i} 514(97 \%)$ are run by the government out of its own fund. There are another 49 school's of which, 26 are private aided, 21 priv ste unaided and 2 local body schools. The 26 private aided schools get grant-in-aid from th.e government to meet their najor requirement. The rest 23 private unaided/local body scl,ools mostly depend on the fees collected from the students besides their other sources of $i^{\prime}$, cone. The fee structure at lifferent stages of school education as well as recurring and nonrecurring income/expenditure of schools are discussed in this chapter.

## 11.1 <br> DIFFERENT TYPES OF FEES PER STUDENT PER ANNU $M$ AT DIFFERENT STATEES OF EDUCATION

School Education right from the pre-primary stage to $t^{\prime}$, e higher secondary stage is free. The fees for admission, tuition, library, laboratory, gan'es, building fund etc. are not realised from the studerits.

There is a Students' Welfare Fund in every sc'nool in the name of Pupils' Fund. Therefore, the students pay for this Pupils' Fund per anr.tum at the following rates.
i) Primary Staçe (Classes I - V) : Rs. 60/- p.a.
ii) Upper Pry Stage (Classes VI - 'VIII) : Rs. 60/- p.a.
iii) Secondary Stage (Classes IX -- X) : Rs.120/- p.a.
iv) Hr. Sec Stage (Classes XI - XII) : RS.120/- p.a.

The account of the Pupils' Fund is maintained by every school and the fund collected is deposited in the account opened in a bank. The fund is utilised by the respective schools for the students" welfare ardivities like co-curricular activities, annual school function, annual school picnic and conducting; school examination etc.

The amount of the fees realised by the private aided and the private unaided schools in the State varies from school to school and these schools, therefore, collect different types of fees per student at different stages of education in order to meet the various requirements of the schools. The students seeking admission to these schools have to pay these fews which are very clearly reflected in the school prospectuses/brochures. The managemen's of these schools depend on the students' fees to a very significant extent.

## 11.2 <br> RECURRING ANO NON-RECURRING INCOME OF SCHOOLS BY SOUKCES

All government schools with the provision for education from pre-primary stage to higher secondary stage depend on the government funding as their main source of
recurring and non-recurring income. Every school gets the grant for recurring contingent expenditure at the following rates.
(i) Primary Schools : Rs. 500/.. per annum
(ii) Upper Primary Schools

Rs.1000i- " "
(iii) Secondary Schools

Rs.2000i- " "
(iv) Hr. Sec. Schools : Rs.3000i-" "

The schools other than those maintained by the government, get grants-inaid from the government besides collecting fees from the students and receiving donations from the other sources.

## 11.3 <br> RECURRING AND NON-RECURRING EXPENDITURE OF SCHOOLS ON DIFFERENT ITEMS

All types of recurring expenditure on various items like salary of staff, teaching and learning equipments, electricity etc. incurred by the government schools are met out of government funds. Non-recurring expenditure on items like school buildings, hostel buildings, staff quarters, furniture, construction of play grounds etc. is dependent on requirements of various schools vis-à-vis the plans and programmes of the government. The Govt. aided schools meet their recurring and non-recurring expenditure from the grants-inaid received from the government. Additional expenditure, if any, is met from their own funds raised through fees and donations.
