DIRECTORATE OF ECONOMICS & STATISTICS,
RAJASTHAN, JAIPUR

PREFACE

Promoting gender equality and empowerment of women is an important issue in the development agenda of the nation. We have witnessed some very important developments in the women's onwards march towards equality with men. During last couple of years, the focus has decisively shifted from welfare of women to empowerment of women, which has been recognized as the key factor to bring about improvement in the status of women. To reflect the status of women in the contemporary Indian society and its concern towards their emancipation, monitoring of various socio-economic indicators, which are integral to the empowerment of women, has assumed great significance.

Keeping in view this, felt need of planners and policy makers the Directorate of Economics and Statistics, Rajasthan has brought out the publication "Women and men in Rajasthan -2009", hoping that this will serve the purpose of sensitizing the users/producers of data on gender issues and it would be very well received by policy makers, Researchers and academicians. The Publication contains time series data covering various facts of development of women in the state.

The Directorate is grateful to various departments and organizations for the generous co-operation extended by them in providing the desired data.

The publication has been prepared by the coordination unit of this Directorate; the staff deserves my appreciation for their sincere efforts in preparation of the manuscript.

Your comments/suggestions for further improvement in the contents and quality of the publication would be highly valued.

DEFINITIONS OF TERMS USED

Annual Exponential Growth Rate

$R = [\ln P(t+10) - \ln P(t)] / 10$ Where \ln stands for natural logarithms $P(t)$ = Initial Population $P(t+10)$ = Population in next census after 10 years

Couples Effectively Protected

Couples effectively protected is defined as the use effectiveness levels of different methods which is indicative of the effective coverage of the eligible couple of all the methods of contraceptions under family planning. The effectiveness is taken to be 100% in case of sterilization and oral pills, 95% in case of conventional contraceptives.

Gross Enrolment Ratio

Gross enrolment ratio at a particular stage of education is defined as the number of pupils per hundred children of the age group corresponding to that stage. Two stages considered here are primary (I-V) and Middle (VI-VIII) the corresponding age groups for these stages are 6-10 years and 11-13 years respectively. Thus, gross enrolment ratio for primary stage (I-V) is total enrolment in classes I-V per hundred children in the age group 6-10 years. While interpreting these figures it should be noted that there may be many students outside the age group 6-10 years enrolled in classes I-V. Therefore, enrolment ratios in some age groups can be more than 100.

Infant Mortality Rate

Infant Mortality Rate is defined as the number of deaths under one year of age to the thousand live births in a year.

Juvenile

Boys below 16 years of age and girls below 18 years of age are defined a Juvenile. Before 1988 boys and girls below 21 years were taken as juvenile.

Literate

A person who can both read and write with understanding in any language is considered as literate and a person who can merely read but cannot write is taken to be not literate.
