PREFACE

Sarva Shiksha Abhiyan is a flagship programme for universalisation of elementary education within a given time frame. In order to accomplish this task it is imperative to have a planning process in place which emanates from habitation level. Unless the educational status and need of each habitation is known it would not be possible to realize the dream of universalizing elementary education. It is in the light of this that District Information System for Education has been operationalised in the state of J&K. In fact it is one of the important achievements of SSA mission in J&K to operationalize the system. It is probably for the first time in the history of education department in the state of J&K that the basic information about each and every school upto elementary level has become available with least margin for errors. However there are some small gaps in the coverage of private schools. It is only question of time when the coverage will be complete in respect of private schools also. However it is no mean achievement to have covered almost 95% of private schools.

The data which has been gathered is of primary importance not only for the SSA mission but for all the educational planners who have a stake in furthering the cause of universalisation of elementary education in the State. We are circulating the DISE data for 2004-05 and 2005-06 among the educational administrators in the sincere hope that this will go a long way in helping the planning process at various levels. The data might also be of critical importance for the purpose of research and evaluation.

The reader might find it inconvenient to find the data in an unhappy mix of landscape and portrait formats. But this could not be avoided due to limited options in the software. We hope that the difficulty will be covered very shortly. The inconvenience shall have to be put up with.

**(Farooq Ahmad Peer), IAS
State Project Director,
Sarva Shiksha Abhiyan,
J&K State.**
