PREFACE

This volume on District Educational Statistics for the State of Karnataka is 17th in the series of such volumes which will be brought out for all the States and Union Territories. The main aim is to highlight the inter-district variations in a State by giving educational data at district levels with the help of some important indices such as Enrolment Ratio, Percentage of Trained Teachers, Per Capita Expenditure, Teacher Pupil Ratio etc.

In order to ascertain whether the educational imbalances have widened or narrowed down with time, the data for the year 1976-77 has been analysed in comparison with that for the year 1970-71. Wherever clear data was not available district-wise estimated data has been used.

I take this opportunity to express my appreciation of the co-operation received from the Directorate of Education, Karnataka and the project staff of the Planning, Monitoring & Statistics Division of the Ministry who have prepared this report,

INTRODUCTION

Regional imbalances do exist in the field of educational development just as in urbanisation, industrialisation, distribution of Income and Wealth etc. With a view to highlight the regional imbalances in the educational sector, the Ministry of Education & Culture brings out the publication 'Educational Statistics - District-wise' quinquennially.

2. A volume of this nature was first published by the National Council of Educational Research & Training in 1960-61. Thereafter, it was decided that such reviews will be brought out in respect of each State, every five years, by the Ministry of Education & Culture. Accordingly, the reviews for the year 1965-66 were brought out by this Ministry.

3. For making inter-district comparisons possible, some important indices such as Enrolment Ratios, Percentage of Trained Teachers in Schools and Per Capita Expenditure on Education have been worked out. These indices show wide range of variations between the districts and hence the need for formulating educational plan at the district level.

II - AREA AND POPULATION

4. The area of Karnataka State (1,91,773 Sq. Kms.) remained unchanged from 1971 to 1977. This State was known as Mysore State in 1971 and its name was changed to Karnataka in November, 1973. Administratively there were 19 districts in Karnataka. However, in 1970-71 the Directorate of Education bifurcated Bangalore district in 2 units i.e. Bangalore city and Bangalore rural for collection of educational data and in 1976-77 it was further bifurcated into 3 units viz. Bangalore South, Bangalore North and Bangalore Rural. The area of these bifurcated units of Bangalore district is not available separately for each sub-district. The district-wise area in Karnataka varies from 17.1 Thousand Sq. Kms. in case of Bijapur district to 4.1 Thousand Sq. Kms. in case of Kodagu (Coorg) district.

5. The population of Mysore State was 292.45 Lakhs in 1971. In 1971 Bangalore city and Bangalore Rural had the highest population (33.59 Lakhs) followed by Belgaum district (24.19 Lakhs) and the lowest was in Kodagu (Coorg) district (3.78 Lakhs). The estimated population of Karnataka was 330.16 Lakhs (168.90 Lakhs Men and 161.26 Lakhs Women) for the year 1977 and among districts it varied widely from 37.92 Lakhs in Bangalore (Bangalore South, Bangalore North and Bangalore Rural) followed by Belgaum (27.31 Lakhs) and to as low as 4.26 Lakhs in case of Kodagu (Coorg) district.

6. The overall density of population per Sq. Km. was 153 in 1971 which is estimated to have increased to 172 in 1977. The density of population per Sq. Km. also varies widely among the districts viz. from the highest of 478 in Bangalore district (Bangalore North, South and Bangalore Rural) to only 93 in case of North Kannada (Kanara). The area, total population and density of population for different districts for the year 1970-71 and 1976-77 are given in Statement No. (2). Table No. (1) below gives a general view of the extent of variation in area, population and the density of population in 1977.

7. The total population of the State as well as population of different districts in different age-groups for the year 1971 and 1977 given in this report are based on the revised population projections (as on 1st March of the year) available from the office of the Registrar General of India. District-wise population in the age-groups 6-11, 11-14 and 14-17 are based on the following formulae:-

We assume that:

$$\frac{P_{6-11}}{P} = \frac{P_{6-11}^i}{P^i} = K$$

$$P_{6-11}^i = K P_{6-11}$$

Where K is estimated from the equation $K = \frac{P_{6-11}}{P}$

P_{6-11} = Denotes 6-11 age-group population of the State

P = total population of the State

P_{6-11}^i = 6-11 age-group population of the i th district

P^i = total population of the i th district

To get the sex-wise break up of total population in the various age-groups of the district first of all the Girls' population is estimated using the above equation with the only difference that in above formula total population is replaced by the Girls' population. The Boys population is obtained by the residual method i.e.

Boys population in the age-group 6-11 = Total population in the age-group 6-11 - Girls population in the age-group 6-11

Similar formulae are used for estimating the district-wise population in the age-groups 11-14 and 14-17 years.

8. The total estimated population of children in the age-group 6-11 years was 44.39 Lakhs in 1977 (22.76 Lakhs Boys and 21.63 Lakhs Girls) which constituted 13.44% of the total population.

9. The population in the age-group 11-14 years in 1977 was 24.89 Lakhs (12.50 Lakhs Boys and 12.39 Lakhs Girls) which constituted 7.54% of the total population.

10. Similarly the estimated population in the age-group 14-17 years was 22.80 Lakhs (11.45 Lakhs Boys and 11.35 Lakhs Girls). This formed 6.9% of total population.

11. Thus, out of the total population of 330.16 Lakhs of the State, the school going population in the age-group 6-17 years was 92.08 Lakhs (46.71 Lakhs Boys and 45.37 Lakhs Girls). The population in the age-group 6-17 years constituted 27.88% of the total population. This percentage for Boys and Girls was 14.14 and 13.74 respectively. The district-wise details may be seen in Statement No.(3).

III - LITERACY

12. According to the 1971 Census, the effective literacy rate, that is, the numbers of literates per hundred of the population (excluding age-group 0-4 years) in the State was 36.83. The literacy rates for Males and Females separately were 48.51 and 24.55 respectively, indicating a wide gap between the two sexes. The district-wise details are given in Statement No.(7).

The percentage of population of Scheduled Castes & Scheduled Tribes to total population was 10.8 and 0.89 respectively. Hence the co-efficient of equality of Scheduled Castes & Scheduled Tribes in these Classes works out to 105.2 and 110.1 respectively. The district-wise details are given in Statements No.(12) & (13).

*The co-efficient of equality or extent of coverage is defined as

$$I = \frac{\text{Percentage of enrolment of Scheduled Castes/Scheduled Tribes to total enrolment}}{\text{Percentage of population of Scheduled Castes/Scheduled Tribes to total population}} \times 100$$

(d) EXPENDITURE

31. The Total Expenditure on Primary Schools in Karnataka increased from Rs.783.51 Lakhs in 1970-71 to Rs.1560.24 Lakhs in 1976-77. This gives an average annual growth rate of 16.52% during the period of six years.

32. The per capita expenditure in the State on Primary Schools was Rs.2.68 in 1970-71 which increased to Rs.4.73 in 1976-77. The expenditure per head of population was maximum in Hasan district (Rs.8.24) and minimum in South Kannada (Rs.1.69) in 1976-77.

In 1976-77 this percentage was maximum (28.3%) in Hassan and minimum in South Kannada (3.8%). Teacher-Pupil ratio which was 42 in 1970-71 became 44 in 1976-77. The Pupil-Teacher ratio varied from 32 in North Kannada to 55 in Raichur district in 1976-77. The details can be seen from Statement No.(14) and Table No.(2) given below:-
