Major Irrigation Projects costing more than Rs. 30 crores*—Check list (Rs. lakhs)**STATEMENT IF.4**

1. Name of projects with brief description, location and districts benefited. In case of Multipurpose and inter-state projects, details of sharing of cost and benefits among various purposes and States may be indicated.
2. Date of commencement
3. Target date of completion
4. Indicate the various components of the project completed upto 1977-78 and the works proposed for 1978-79 and 79-83. The details of expenditure and outlay for 1978-79 and 1979-83 may be indicated as below:

Kallada Irrigation project envisages construction of a dam 335M long and 73.5 Mht at parapar across Kallada river and a pick up weir at Ottakkal 118 M long about 5 km. down stream. The LBC and RBC take off from the weir. The anticipated estimated benefit of the project is 105220 ha. (gross) in Quilon District.

1961.

spills to VIIth plan.

Block I upto + 300, Block II upto + 367 including the special foundation treatment of fault zone and rock blasting Block 6 & 7 up to + 215 have been completed except for sluice and retaining wall. Block 3 reached upto 320' block, 4 & 5 upto 250'. All the works pertaining to the diversion weir at Ottakkal except the last span have been completed for partial commissioning of the project in 1979-80. The R.B.C. upto 44.15 km. and the Sasthankotta branch canal up to 15th km. are programmed to be completed.

GENERAL NOTES ON STATE CORPORATIONS

1. The Kerala State Handloom Finance and Trading Corporation

The Kerala State Handloom Finance and Trading Corporation was formed in 1966 to provide financial and ancillary facilities for the development of handloom industry in general and the sector of the industry which is outside the co-operative fold in particular. The activities of the Corporation include the sale of raw materials like yarn, chemicals, dyes etc; export of handloom fabrics, imparting latest techniques in weaving to weavers and issue of short term loans to private weavers.

In 1976-77, the Corporation disbursed short term loans to 87 members for an aggregate amount of Rs. 2.60 lakhs. Besides it also provided credit loan of Rs.1.32 lakhs to 131 members. The Corporation has since its inception disbursed loans totalling Rs.46.17 lakhs to 1294 members. The general slump in the textile industry adversely affected the sales turnover of the Corporation, which in 1976-77 was only Rs.31.64 lakhs.

The Corporation has formulated a novel scheme of assisting individual weavers in the State. According to this scheme, the Corporation will make available to 6000 individual weavers loan assistance of Rs. 1,500 each at four per cent interest from the State Bank of India, for which it will stand guarantee. This loan assistance will be deposited by the weavers in the Corporation, which, in turn, will supply inputs to them, and procure their products afterwards. The loan instalments will be recovered and remitted to the Bank by the Corporation. The response to this scheme from the weaving community is quite encouraging.

"The Kerala Garments Ltd," a subsidiary Company of the Corporation, was incorporated with an authorised capital of Rs. 20 lakhs to implement and manage a garment manufacturing unit. This project has been completed and commercial production has commenced.

The State Government has appointed the Corporation as the agency for the implementation of the three projects (two intensive development projects, and one export production project) for the development of handloom industry in the State. One of these intensive development projects is being located at Trivandrum, and covers the six southern districts, while the second project is being located at Cannanore and covers the remaining five districts in the northern region. The export production project is to be located at Cannanore. The intensive development project will cost Rs. 185 lakhs each, and the export production project Rs.40 lakhs. The major share in the cost of these projects will be provided by the Central Government. The Corporation has already taken several steps to implement these three projects, and expects to complete them within a period of four years, as scheduled.

2. Kerala State Small Industries Development and Employment Corporation

Two autonomous Corporations, the Kerala Small Industries Corporation, and the Kerala Employment Promotion Corporation were amalgamated to form the Kerala State Small Industries Development and Employment Corporation (SIDECO) with effect from 18-3-1977. This newly formed Corporation has the following twelve functional divisions for rendering a package of integrated services to the small entrepreneurs.

1. Research and Development Division
2. Industrial Estate and Infrastructure Division
3. Production Division
4. Raw Materials Division
5. Machinery Division
6. Finance Division
7. Technical Consultancy Division
8. Entrepreneurial Development Division
9. Import and Export Division
10. Marketing Division
11. Sick Units Division
12. Information and Publicity Division

Procurement and distribution of raw materials to small scale industrial units, channellisation of institutional finance for industrial development, supply of machinery under the margin money scheme, rehabilitation of sick units and management of production and service units, and management of industrial estates are the major activities of the Corporation. In 1976-77 the Corporation sold raw materials worth Rs.195.25 lakhs to small scale industrial units. The cost of machinery supplied under 'margin money scheme' in the new industrial estates amounted to Rs.55.17 lakhs, and about 200 entrepreneurs were benefited by the scheme. As on 31-3-1977 the Corporation had invested about Rs.159 lakhs for the construction of mini industrial estates. The Corporation has been functioning as a focal point for securing institutional finance for the massive rural industrialisation programme launched in the State.

It was mainly through the effort of the Corporation that finance has been raised from Kerala Financial Corporation, Commercial Banks, and Kerala State Co-operative Bank for the Mini Industrial Estates. The Corporation has also achieved a fair measure of success in the field of sick unit rehabilitation under a tie-up with the Industrial Reconstruction Corporation of India.

In the field of marketing, the Corporation has identified potential markets for small scale units and helped the small entrepreneurs to get necessary patronage from Government Departments and other public undertakings. The Government transferred the ownership of the 18 industrial estates of the conventional type to the Corporation during 1976-77. The Corporation at present manages eight production and service units in different parts of the State, along with the Government Ceramic Centre, Mangattuparambu on an agency basis.

The Corporation's role in small industry development is in the nature of a catalyst. It lays emphasis on the development of small industries which can create more employment opportunities in the rural areas. As a promotional agency it is taking considerable initiative in the implementation of the Mini Industrial Estate Programme of the State.

3. Kerala Handicrafts Development Corporation

The Kerala Handicrafts Development Corporation was organised with the aim of improving the condition of artisans engaged in the production of handicrafts. The Corporation started its activities in March 1969, by taking over the control of the Government owned handicrafts emporia at important centres like New Delhi, Madras, Coimbatore and Trivandrum (S.M.S.M. Institute). Subsequently some of the production centres were also transferred to the Corporation.

Since its inception, the Corporation effected considerable improvement in the sale of handicraft items, and the turnover during 1977-78 is expected to be around Rs. 70 lakhs. There has been considerable improvement in the wages earned by the craftsmen due to the functioning of the Corporation. The Corporation has started a raw material depot to provide raw materials, mainly rosewood to the artisans at reasonable rates. At present about 4000 craftsmen are benefited by the scheme. The Corporation has drawn up a massive plan for implementation in the Sixth Five Year Plan, by which it expects an anticipated sale of handicrafts goods worth Rs. 250 lakhs in 1982-83. About 8000 craftsmen will be additionally benefited by this programme.

The Kerala State Bamboo Corporation, a subsidiary of Handicrafts Development Corporation, was formed exclusively for the development of bamboo industry. The Bamboo Corporation is providing employment to about 4000 craftsmen in and around Angamali. The turnover of the subsidiary Corporation is about Rs. 80 lakhs. The Corporation has plans to expand its activities to cover important centres of the State during the Sixth Plan Period (1978-83).

4. Kerala State Coir Corporation

The Kerala State Coir Corporation, a private limited company fully owned by the Government of Kerala, was set up in July 1969, with an initial paid up capital of Rs. 50 lakhs. The Corporation was expected to act as an export-house by stepping up the sale of coir products in the national and international markets, to establish a strong market base for coir products by maintaining high standards of quality and to render marketing assistance to small scale producers.

As in the case of other export houses, the Coir Corporation purchases semi-finished goods from small scale producers. The Corporation supplies raw materials such as yarn, dyes, jute etc. to about 2000 small scale producers registered with it, and they in turn supply semi-finished goods to the Corporation. Smoking, stenciling, finishing, packing etc. are done by the Corporation, and the finished products are then sold in the market or exported. During 1976-77 the Corporation purchased semi-finished coir products worth Rs. 87.75 lakhs from the small scale producers. The sales turnover for this year was Rs. 133 lakhs. Export sales of the Corporation was worth Rs. 144 lakhs in 1976-77. For increasing internal sales, the Corporation has opened showrooms in a few State Capitals. It has now drawn up a massive programme for opening show-room-cum warehouses in major cities within India, as well as in places in other countries (New York, Hamburg, Kuwait), for promoting internal and export sales.

The Corporation initiated the setting up of husk retting centres in different parts of the State to create an awareness among the workers about their right to receive the enhanced minimum wages. This resulted in an all-round improvement in the earning of the capacity of the workers. At present the Corporation has 17 husk retting centres in different parts of the State. It is also running a Model Coir Factory at Beypore on commercial lines.

As part of the programme for improvement in the quality of products, and diversification of products to meet the competition in the world market, the Corporation has already taken steps to install a modern dye house. This will largely contribute to the improvement in the colouring of coir products which has long remained a problem with the coir handloom sector. The Corporation has also taken up a project for the manufacture of latex foam backed mattings. This unit with an annual capacity of 3.6 million sq.metres and costing Rs. 178 lakhs will be commissioned by the end of 1978.

5. Kerala State Cashew Development Corporation

The cashew industry in Kerala was facing a critical situation towards the latter half of 1960's, as a result of which most of the cashew factories were not functioning. This situation was the outcome of conflicting interests of factory owners, intermediaries and trade unions. But the export of cashew kernels remained more or less steady, despite the frequent closure of factories. The rapid spread of "Kudivaruppu" (processing in unregistered units) resorted to by the factory owners with the help of hired agents to evade legal obligations to the workers largely helped the exports to remain steady. The Government, therefore, formed the Kerala State Cashew Development Corporation to stabilise the cashew industry and to curb the practise of unlawful exploitation of labour widely practised by the private processors. The Corporation started its activities by taking over a private factory at Kottiyam near Quilon on 4-6-1970. Subsequently it brought under its ownership a number of factories that had remained closed. It also entered the field of processing of by-products like cashew shell liquid and cashew testa.

The Corporation has at present 34 cashew processing factories. These units provide employment to 33,081 workers and 1770 staff members. Owing to the non-availability of raw nuts in adequate quantities the Corporation finds it very difficult to provide employment throughout the year. Yet the Corporation has the distinction of being the biggest processor and exporter of cashew kernels in India. From the point of view of employment it is the biggest public sector undertaking in Kerala and accounts for a quarter of the total processing capacity in Kerala. In 1976-77, the Corporation processed 21,176 tonnes of raw nuts. The total sales turnover of the Corporation during this year was Rs.1491.32 lakhs, of which exports alone was worth Rs.1458.50 lakhs. The Corporation has won the certificate of merit instituted by the Government of India for best export performance for the year 1974-75 and 1975-76. On the basis of the past performance, it has been declared as an Export House. In addition to the 34 factories under its possession the Corporation today is managing and running some additional factories which the owners were unwilling to operate owing to the mounting cost of production. This is only an interim relief measure for providing work to the unemployed cashew workers.

The earnings and other service conditions of the workers and staff of the Corporation are the best obtaining in any cashew factory. The workers get full benefit of minimum wages, D.A., leave facilities, P.F, Gratuity, E.S.I. etc. The entire staff and workers are also covered by the "life cum group gratuity scheme" of the Life Insurance Corporation of India.

The birth and growth of this Corporation constitute one of the major events in the industrial sector of Kerala. The Corporation within its short span of existence has proved that the cashew industry can survive and make profits even after giving statutory benefits to the workers. The major problem confronting the Corporation as also the private factory owners is the inadequacy of raw nuts. Most of the units are operating much less than their rated capacity. The Corporation could only keep the factories working for less than 100 days during the years 1976-77 and 1977-78.

The pattern of settlement in Kerala is entirely different from that of other States. Here the population is scattered all over the habitable areas. No attempt for classification of villages having a population of 1500 and above or below is made since the whole area of the State is almost evenly populated.
