# PREFACE

Selected Educational Statistics is an annual publication of the Education Department in the Ministry of Human Resource Development. This publication furnishes quick estimates pertaining to statistics of number of educational institutions, enrolment, teachers and selected census data on population and literacy. Where we could not receive complete and validated data from the States, we have repeated the data for the preceding years on the premise that users prefer a timely publication, however tentative, to a perfect but an antiquated publication. Data have been repeated in respect of J&K for all stages; HP for primary education; for higher education in respect of M.P. West Bengal & Delhi and for intermediate education in respect of Andhra Pradesh and Karnataka because we did not receive complete and correct data from these States.

2. The population projections of school going children in the age group 6-11 years and 11-14 years for all communities are based on the projections worked out by Technical Committee of Planning Commission on the basis of 1991 census. This publication also contains district-wise literacy percentage in respect of total population and population belonging to SC/ST on the basis of 1991 census

2. Users of this publication would note that the present edition seeks to be more comprehensive. The time series data on population, literacy, enrolment, teachers, educational institutions has been more systematically presented. There is greater focus on Gender, SC and ST. An attempt has been made to present comparative educational statistics of India in relation to a few selected countries. Graphical presentations have also been introduced. These improvements are a small step towards the goal of a more comprehensive, reliable and informative publication. The present edition of the publication includes three new sections giving (i) State-wise/class-wise/sex-wise enrolment, (ii) Age-wise/state-wise literacy percentages in respect of decadal censuses 1961, 1971, 1981 & 1991 and (iii) Data on literacy and Age-specific/NER from 52<sup>nd</sup> and 53<sup>rd</sup> round of NSSO.

3. I would like to compliment Dr. R.S. Thakur and all the officers in the Statistics Unit, Department of Secondary and Higher Education for this publication.

# AN OVERVIEW

## Introduction:

India is the home of 16% of World's total population accommodated in an area of 2.42% of the World's total area. As against 2820 languages in the entire world, as many as 325 languages are effectively used in India alone. After 8-10 Kms local dialects change in India. India spends 3.4% of its GNP on education and has 48% of its adult population as illiterates while China spends only 2.3% of its GNP and has only 18% of its adult population as illiterates. It is, therefore, not essential that those who spend more of GDP on education and training have highest literacy percentage. There are many other factors involved in it including the system of governance, management of educational facilities etc. Notwithstanding this, higher allocations on education are indicative of Government's determination of eradication of illiteracy and universalisation of education. The population, area, density of the world and some of our neighbouring countries has been given in Sub-Table -1:

**Population, Area, Density, Literacy & public Expenditure in India**

In matters of illiteracy, Nepal with 72.5% adult illiterates is at the top closely followed by Afghanistan, Pakistan, Bangladesh etc. amongst the above named countries. NSSO 53<sup>rd</sup> Round revealed that India had 43% of its adult population as illiterate in 1997.

From 1989 through 1997: (i) Analysis of Budgeted Expr. On Education, MHRD

(ii) Economic Survey 1997-98, Ministry of Finance.

The percentage availability of finances for education and training as a percentage of GDP indicates that during the year 1951, this was slightly less than 1% which increased to around 3.62% during 1997 is indicative of the fact that the budgetary availability of

Percentage of expr.to total expr. & to GDP for years 1951-1997

— % of edu. expr to total expr    - - - % of edu.expr.toGDP

resources for education increased substantially over the years but the increase is yet to touch the targeted percentage of 6% of GDP. Similarly, the percentage of expenditure on education and training to total expenditure of all sectors during the last five decades indicates that it has increased from 7.92% in 1951 to 13.73% in 1997 i.e. 6 percentage points during the last five decades. This gives us an annual growth rate of 0.15% during the period 1951-1997.

## 2. Population

### 2.1 GROWTH OF POPULATION:

India comprises 571 districts and 5886 C.D. Blocks spread over in an area of 32,87,263 Sq. Kms. It will be observed from Sub-Table-III below that the population of our country has been increasing constantly. Total population during 1901-1991 increased by more than 3-1/2 times; the population in urban areas increased by 8.42 times while the population in rural areas almost trebled during the same period. The growth of population during the period 1901 to 1991 is given below:

Rural population increased by 2.11 times, urban population increased by almost 3-1/2 times during 1951-1991. Rural-males and rural-females more than doubled themselves during the same period. Urban males increased by 3.58 times; urban females increased by 3.38 times during this period.

Year-wise/State-wise details are in Table - 9

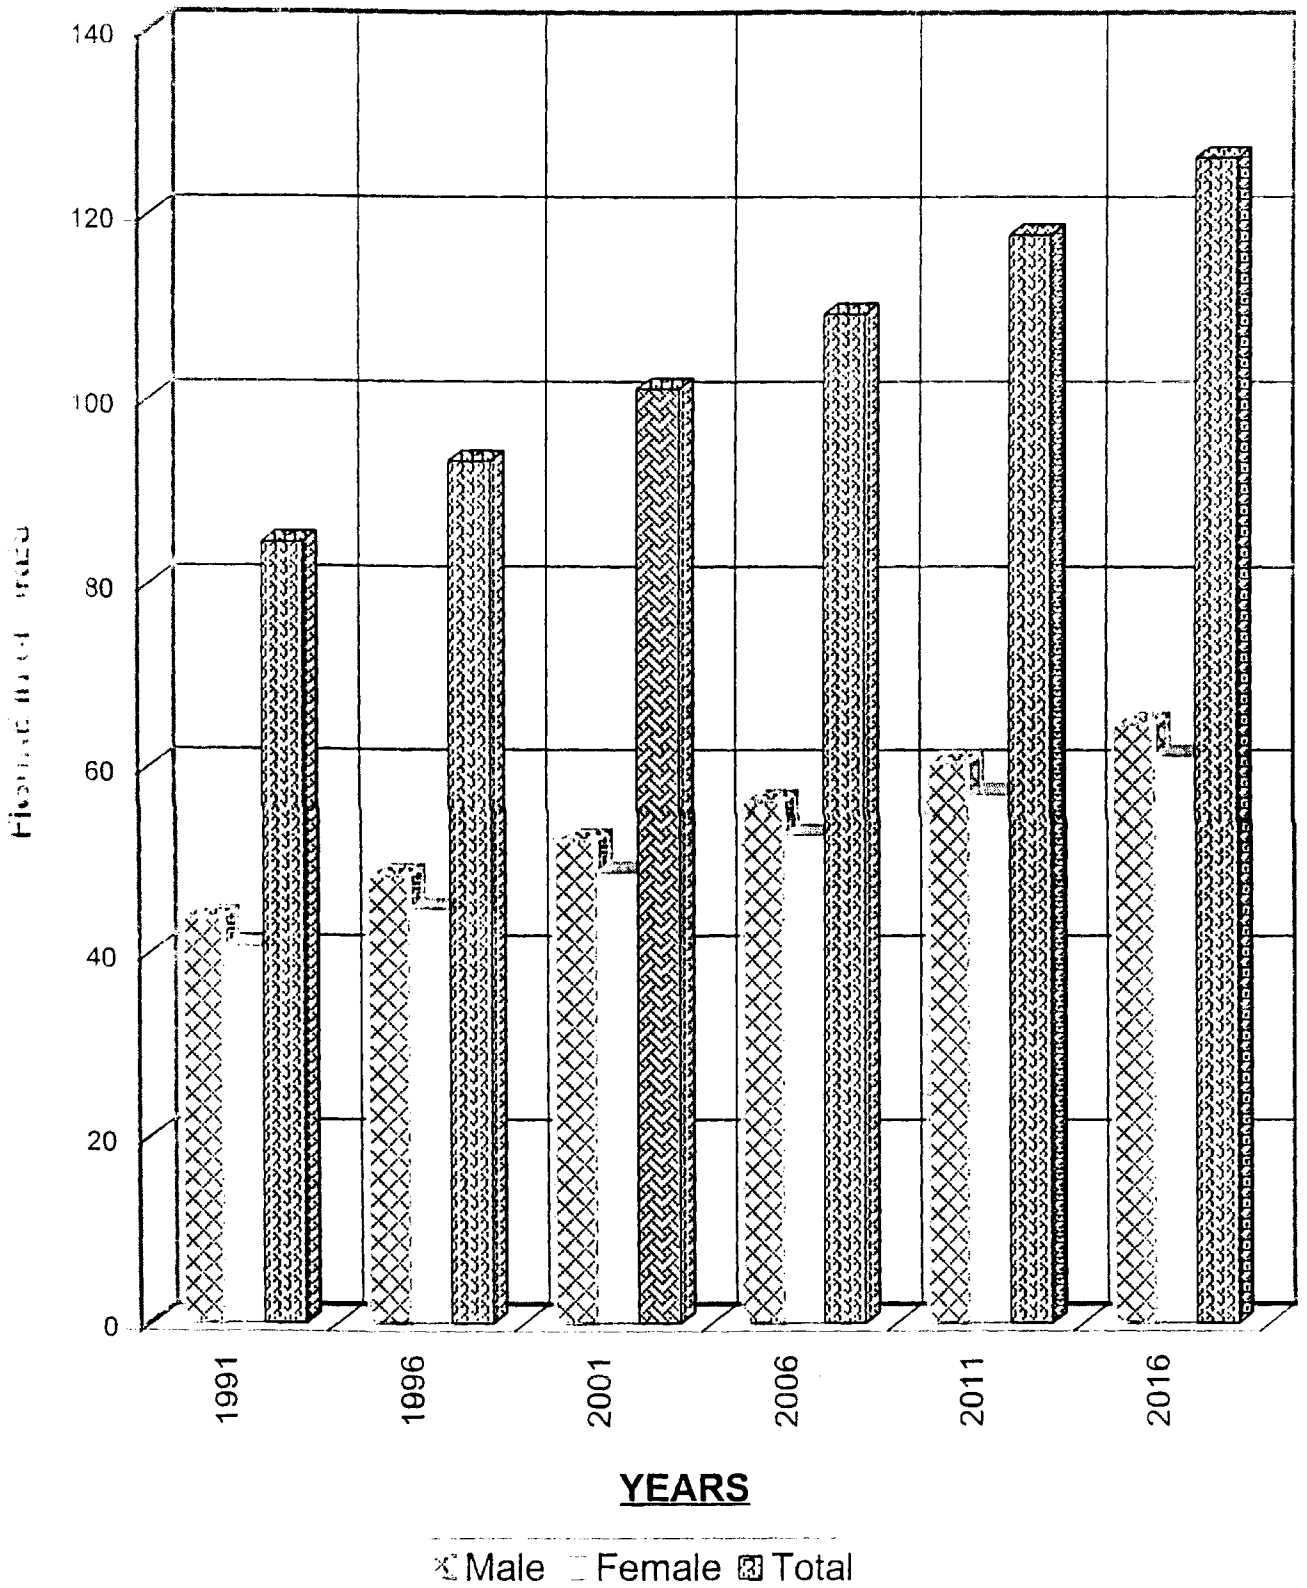

The population structure of India is expected to experience changes. In the 21<sup>st</sup> century, population growth rate in India will decrease according to an estimate given by the Planning Commission. The growth rate of population was around 2.16% during 1981-1991 will continue to decrease to 1.81% during 1991-2001; 1.53% during 2001-2011 until approximately to 1.4% during 2011-2016. The percentage of child population (6-13 yrs.) has experienced a declining trend in 1991 and is likely to further decrease thereafter. But this growth rate is still substantial keeping the population base India has already achieved. Thus, though the population growth rate is expected to decrease but the total population is expected to increase tremendously from 846.3 millions in 1991 to 1263.54 millions in 2016 needing more facilities in the education sector. The improvement of health services and family planning programmes may lower the mortality and birth rates. We may experience a shifting pattern from population growth with high fertility and mortality rates to a growth pattern having lower fertility and mortality rates. This may further change the composition of population. The structure may change from a pyramid form i.e. apex of old age people to a dome type dominated by middle aged [v(b)].

#### 2.5 SEX-RATIO

Sex ratio in India has all along been unfavourable to females. Not only this, the sex-ratio has been declining from 1901 to 1991 as will be seen from the Sub-Table VII given below. During the year 1901, sex ratio was 972, which has come down to 927 during 1991.

### 3. Literacy:

The decadal censuses, inter-alia, collects information on literacy. For the purpose of census, a person is considered literate if he or she can read and write with understanding in any language. However, a person who can merely read but cannot write is not literate.

#### 3.1 LITERACY PERCENTAGES 1901 TO 1997:

Literacy rates for the years 1901 to 1997 have been shown in Sub-Table X given below. The rate up-to 1941 is for undivided India. In the literacy rates given below, entire population including population in the age-group 0 to 4 has been taken into account except in 1981, 1991 and 1997 where the population in the age group 0 to 6 has been excluded for the purpose of calculation of literacy percentages.

§ NSSO 53<sup>rd</sup> Round 1997

It will be observed from the above that the literacy percentage of males increased from 41.45% during 1961 to 61.89 during 1991 and those for females increased from 13.15% in 1961 to 34.09% in 1991. The total literacy percentage in ages 15+ was 27.76% during 1961 census which increased by 21 percentage points to 48.54% during 1991 as against the overall literacy of 52.21%. However, according to 52<sup>nd</sup> round, the literacy percentage in the age-group 15 years and above is 54.32% (total); 67.25% Males and 40.67% Females. The literacy percentage according to certain age groups is given in Tables 40-43 for the census decades 1961 to 1991. The adult literacy for the age 15 years and above as emerged in the 52<sup>nd</sup> Round of NSSO is given in Tables 44-50 for reference purposes. 53<sup>rd</sup> NSSO Round has put adult literacy of India at 57% (70% M; 43% F). State-wise, Rural-Urban details of adult literacy according to 53<sup>rd</sup> Round of NSSO are contained in Table 57.

Students when enrolled in educational institutions for undergoing systematic instructions in a course of study are classified as enrolment.

The total enrolment at primary stage during the period 1950-51 to 1998-99 increased by 5.77 times while for the girls the increase is nine times. At the upper primary stage of education, the increase during this period is more than 13 times while that of girls the increase is more than 32 times, which is quite appreciable. At the Secondary and Sr. Secondary stage the total increase is 18 times and that of girls the increase is 52 times.

### 7.2 PERCENTAGE OF GIRLS ENROLMENT TO TOTAL ENROLMENT:

The participation of girls at all stages of education has been increasing steadily over the time as may be seen from Sub-Table-XXXI. However, the percentages are still much below fifty per cent at all stages of education.

## 8. Gross Enrolment Ratios:

8.1 Gross Enrolment Ratio (GER) is defined as the percentage of the enrolment in classes I-V and VI VIII and/or I-VIII to the estimated child population in the age groups 6-11 years and 11-14 and/or 6-14 years respectively. Enrolment in these stages include under-age and over-age children. Hence the total percentage may be more than 100% in some cases. The gross enrolment ratios for the age-group 6-11 years, 11-14 years and 6-14 years are presented below in Sub-Table-XXXII.

## 9. Rates of Drop-out:

Rate of dropout has been defined as percentage of the number of children to total enrolment dropping out of the school educational system. There are a number of methods for estimating these rates. The results arrived at by conventional method have been indicated below in Sub-Table-XXXIII.

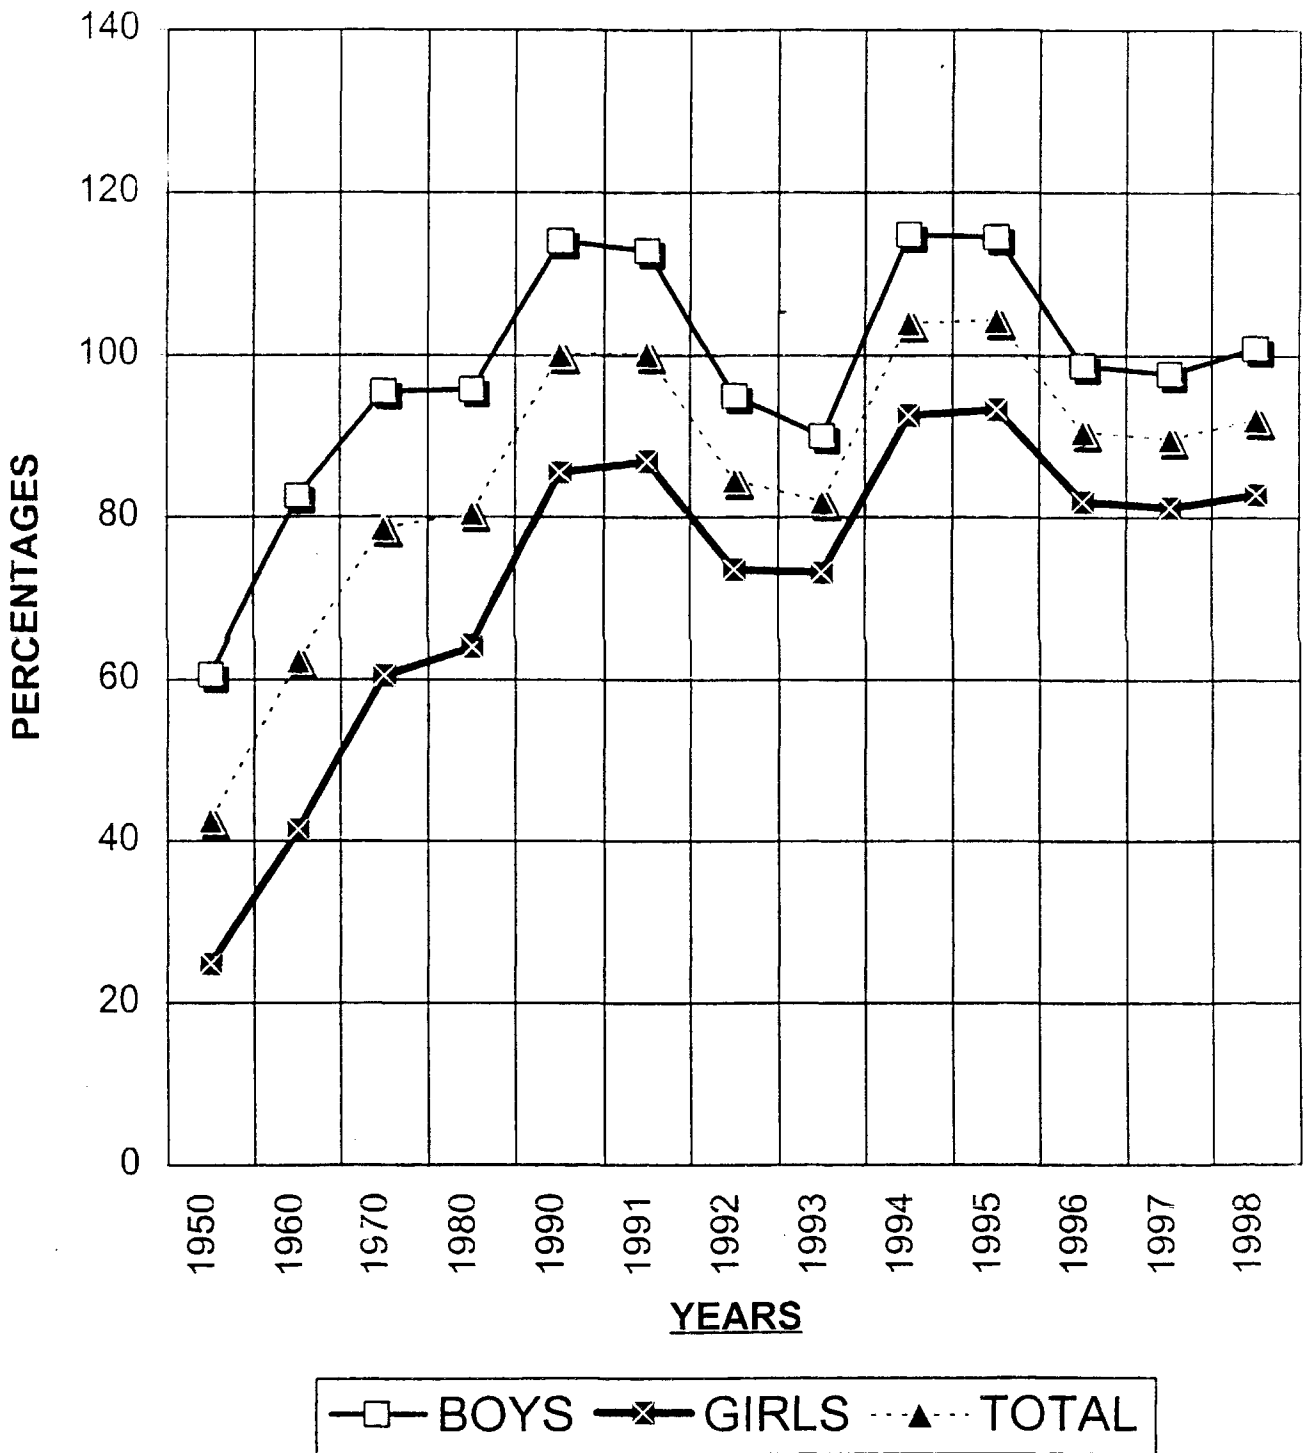

**SUB-TABLE-XXXIII**

It will be observed from the above that the rate of dropouts has been decreasing year after year. It was 65% in 1960-61, which has now come down to 39.74% in 1998-99 in Primary Classes. Similarly, the rate of dropouts was 78% in 1960-61, which has come down to 56.82% in 1998-99 in upper primary classes. This has considerably improved the rates of retention which was 22% in 1960-61 has now gone up to 60.26% in 1998-99.

## 10. Teachers:

A Teacher is one who teaches/instructs a group of pupils (students) pursuing a course in an educational institution.

In absolute terms, a substantial increase in the number of teachers has been registered from 1950-51 in all types of schools. Total teachers increased from 7.51 lakhs in 1950-51 to 49.29 lakhs in 1998-99 by more than six times while the female teachers increased from 1.15 lakhs in 1950-51 to 17.01 lakhs in 1998-99 by fifteen times. Details have been given in Sub-Table-XXXIV.

The percentage of female teachers to total is 35% in primary schools, 36% in Upper Primary Schools and 33% in High and Sr. Secondary Schools.

On the basis of the school enrolment and the number of teachers, the TPR after independence is as follows:

# GROWTH OF SCHOOL TEACHERS - 1950-1998

## TEACHER-PUPIL RATIO

Year	Primary	Upper Primary	High / Hr. Secondary
1950-51	1:24	1:20	1:21
1960-61	1:36	1:31	1:25
1970-71	1:39	1:32	1:25
1980-81	1:38	1:33	1:27
1990-91	1:43	1:37	1:31
1995-96	1:47	1:38	1:33
1996-97	1:45	1:38	1:33
1997-98	1:42	1:37	1:31
1998-99	1:42	1:37	1:31

At the time of independence there was a widespread dearth of educational institutions in the country and whatever institutions were available, their utilisation was also not optimum. During the year 1950-51 the Teacher Pupil Ratio in primary schools was 1:24, in middle schools it was 1:20, in High and Higher Secondary schools, the TPR was 1:21. In 1998-99 this ratio has now increased to 1:42 in primary schools; 1:37 in upper primary schools and 1:31 in High and Higher Secondary Schools. Though the number of educational institutions has considerably increased after independence yet the higher TPR indicates that the utilisation of these educational facilities has also increased and on the basis of enrolment, there seems to be rush in the educational institutions demanding for opening of more and more educational institutions for handling the rush in these institutions and improving the quality of education.

### 11. Districtwise Statistics:

District-wise educational statistics included in this publication are as follows:
