PREFACE

Planning is a process of decentralised Planning calls for precise and reliable data about various socio-economic factors, resource potentialities, etc. A suitable planning unit like a Taluka/District. As a prelude to the introduction of decentralised planning process in Karnataka, collection of essential plan statistics for each of the talukas in different districts was initiated during 1970s and the establishment of the District and Regional Planning Division in the Planning Department. This Division under the guidance of the Planning Secretary listed out various items for the purpose of collecting information. The first issue of the Taluka-wise Plan Statistics was published for the period 1969-75. Coverage of data in the Plan Statistics is being improved from year to year to meet the requirements of decentralised planning. This volume is the fifth in the series up to the period ending 1983-84.

The brochure contains the statistics relating to District Income, demographic features, Welfare Measures for Weaker Section, Employment and Unemployment Agriculture and Allied activities, Economic and Social Infrastructure, etc.

The District Planning Officer and his staff have collected and compiled the Taluka-wise Statistics which was reviewed and finalised by the District and Regional Planning Division at the State Level. In spite of best efforts to verify the data for accuracy and consistency, it is tilossible that there are some errors here and there. We shall be grateful if they are brought to our notice so that we may be able to rectify them.

We are thankful to all the concerned departments at the district level for their co-operation in making available the required data.
