TOPOGRAPHY:- The Dibang Valley District claims one of the most difficult terrains in Arunachal Pradesh. The worst parts in the entire district are the regions between Ithun, Ahui as well as also Embra and Talon Rivers. The area between Kronli and foothills had been badly affected by the great earthquake in 1950 and the inevitable landslides changed the very topography of this badly affected area. The hills have not yet settle down and the landslides are common features. The bamboos, grasses and high mountain ranges which are covered with snow almost throughout the year. The middle valley is covered with thick tropical and sub-tropical forests. There are innumerable precipitous ridges, gurgling rivers, deep and narrow gorges which inspire are in minds of travellers. After this middle valley, rain changes into broad and wide valley drained by Dri and Ithun rivers. Situated at the elevation of about 1500 meters, this region is one of the most beautiful area in Arunachal Pradesh.

MAIN TRIBES:-

Two main tribes, namely, Idus and Padams (Adis) inhabit the Dibang Valley area. The Idu-Mishmies to whom the Dibang Valley belongs are the main dominant tribes of the District.

In the foothills areas of Roing and Dambuk Circles Padams (Adis) are Pre-dominant. They originally came from the Damroh, now constitute more than half of the population of the Roing and Dambuk Circles.
