FORIWORD

To bring about effective planned development in all areas, the utilisation of Statistical data at the district level has become extremely important. Unless detailed planning is done for any Scheme with specific reference to socio-economic condition prevailing in the field implementation is bound to suffer. A planner at any level should be well equipped with adequate information on various administrative as well as development units such as Agriculture, Animal Husbandry, Education and other sectors so as to make a critical study of the problems. In this context "The District Statistical Hand Book, 1995" will be of immense help in preparation of Sectoral Plan & Programmes. Apart from some salient features the up-to-date demographic, agricultural, infrastructural and other important characteristics of each Block in Sonepur district have been incorporated in this booklet.

The publication of 'District Statistical Hand Book, 1995 is a bi-yearly issue and the present issue, 1995 is the second of the series. It is hoped that this booklet will serve as a guiding document for the planners, administrators and scholars in their day to day work.

The District Statistical Officer Shri N. C. Panda, Statistical Investigator Shri J. Behera and Statistical Assistant Shri P. C. Bohidar have done commendable work in collection of data and compiling this useful publication.
