INTRODUCTION

Our Preparation for the twenty first century will acquire a significant dimension by our contribution to human resource development

In a brilliant " Human Development goals for the 90's " report entitled on the state of the world's Children 1990 UNICEF aptly puts it. As the international community formulates development goals and strategies for 1990's, there is a growing consensus that human development must now take the centre stage". In the past development planners had been pre-occupied with economic indicators such as GNP, savings, investment, trade and production targets. The sheer fact of economic growth is no guarantee that basic human needs will be met. Human Development, on the other hand, focusses on the fulfilment of basic human needs as the most important indicators of development. It is significant that human goals are not just desirable, but technically feasible and financially affordable. The major requirement for their achievement is political will, vision and leadership. It is UNICEF's hope that leaders of the world and the development community will rise to the challenge of these goals aimed at over-coming the worst manifestation of poverty though enhancement of human capabilities. I need enhancement of human capabilities is possible only through education.

Education being a very crucial input in Human Resource Development, target groups have been given foremost attention for the benefit of the weaker and the disadvantaged sections of the community,

- o Scheduled Caste and Scheduled Tribes
- o Women
- o Those living in backward areas, rural areas in general, urban slums, hilly regions, boarders and deserted zones in outlaying places of the projects.

Contd....P/2

- o Educationally backward minorities
- o The handicapped.

The important priorities in the educational front may be summed up as follows :

- Universalisation of Elementary Education.
- Functional skill development in Adult Education.
- Consolidation of Higher Education.
- Modernisation of Technical Education.
- Language development to foster unity and integrity of the country amidst diversity.
- Access to education from primary to the Higher

In fact, extensive access to education has been provided through non-formal stream, that is the NFE programme and open school and open university system. Educational Technology in terms of mass media (Television and Radio) has been increasingly pressed into service to facilitate access to education.

The strategies and instrumentalities followed for over all educational development may be briefly outlined :

- o Involvement of the States to facilitate consensus-based decisions.
- o Involvement of voluntary agencies.
- o Mass mobilisation.
- o Strengthening of national, State and private Resources institutions.
- o National cooperation bilateral, multilateral and area-specific plans.

The content of Education was continuously oriented towards fundamental values such as unity and integrity of the country, creation of cultural consciousness, strengthening of democratic

institutions and socialism, equal right for women, development of scientific thinking, preservation of environment and population control.

In this context the educational inputs should be adequately provided in Orissa for achieving the goal of universalisation of Elementary education. The task to be performed during the 8th Plan Period is immense and varied and can be tackled not only through a set of isolated schemes but through a series of integrated and well-coordinated programmes.

It will not be out of place to mention here that in the last five decades since independence the State has registered a significant expansion of educational facilities at all levels and sectors of Education. Thus new fields of study and research have opened up and substantial infrastructure has been created. The rapid expansion of educational infrastructure has contributed to the quality of education.

"Education in Orissa" provides the broad spectrum of educational objective in the following chapters, tables and graphs.

The analysis of the educational issues shows that EFA by 2000 A.D. is a global challenge reinforced by India's willingness to pursue these goals. It is difficult to provide adequate financial resources from the State's meagre budget allocation for creating the new structures and systems which are required for moving at a faster rate for achieving the educational goal. The resolve of Govt. of India and the international agencies to provide funds for achieving the goals have given a new hope to the Govt. and people of the state to achieve the targets of access,

retaining and achievement within the District Primary Education Programme (DPEP) in one of the most challenging programmes for achieving educational transformation in Orissa.

C H A P T E R I

A Profile of School Education.

STATISTICS OF SCHOOL EDUCATION

Planning including educational planning is in the concurrent list as such it is the joint responsibility of the centre and the state. Besides, the constitution provides for two onerous responsibilities on the State that is steps toward universalisation of elementary education and promotion of educational and economic development of the weaker sections of the society.

Need of Educational Statistics

A reliable and sound statistical data base is a basic requisite for the success of planning. Broadly speaking, there are important areas in which educational statistics are required. These are : (a) Educational Planning & policy, (b) for taking administrative decisions, (c) research and studies and (d) dissemination of information for use by various national and international agencies such as UNESCO, UNICEF, Planning commission etc.

National policy of Education 1986 has laid great emphasis on developing a national system of Education, the elimination of disparities in educational system and provision of more facilities through qualitative intervention. The NPE 1985, and the POA gave unqualified priority to UEE and introduced many innovations. The emphasis has shifted from enrolment per-se to enrolment as well as retention.

Education is now funded by various sources, Central and State Government, local bodies and private sources. There is an increasing in the trend expenditure on education both by central and State Govt. during last decade. To assess the above aspects there is great need of Educational statistics. In Orissa Statistical cell attached to DSE is engaged in collection, compilation and

Contd....p/

dissemination of Educational Statistics. Under the charge of Deputy Director, Planning/Statistical officer with one statistical Supervisor, two statistical investigators and four statistical Assistants and 4 Jr. Assistant (Statistics). At the district level there are one or more statistical Investigators/Assistants to attend to the work of collection of statistics at block level.

Structure :- The Kothari commission (1964-66) and National policy on education adopted in 1968 had inter-alia recommended the introduction of uniform structure of the education in the country. The system generally known as 10+2+3 consist of 10 years of general education at school stage, followed by 2 years of higher secondary education and 3 years of University education to the 1st degree. For the purpose of reporting Statistics on enrolments at the national level, the following structure is used.

- Primary level - Grade - I-V
- M.E. Level - VI - VIII
- Secondary Education - IX - X
- Higher Secondary Education XI-XII/
+2 stage in Colleges.
- University Education.

Reference date :

Information relating to the numerical data is collected as on 30th September of every year while that of the financial data relates to the period ending 31st March of the financial year.

Sources of Educational Statistics : In India/State;

The different sources of educational statistics in India/State can be grouped under the following two heads .

(a)

Regular Educational Statistics

- (i) Ministry of Human Resource Development, Department of Education for Annual Statistics
- (ii) University grant Commission (Data on University & Colleges)
- (iii) Directorate of Education of different states under Education Department).
- (iv) Register General of India (for literacy and educational level of population).
- (v) Planning Commission (Data on Annual & five year Plan).

AD-HOC Educational Statistics :-

- i) National Council of Educational Research and Training (NCERT) for Educational Surveys and Sample studies.
- ii) National Institute of Educational Planning and Administration (NIEPA) (for Educational administration surveys)
- iii) National sample surveys (for socio-economic aspects of population as well as data on unorganised Institutions)
- iv) Institute of Applied Manpower Research (for area manpower surveys vocational & financial Educational surveys).
- v) Directorate of Employment & Training (for data on ITI and employment exchanges).

Other minor sources of educational statistics are :

- 1) Indian Council of Medical Research (for information on Medical education in India)
- ii) Indian council of Agricultural Research (for information on Agricultural Education in India)
- iii) Indian council of Social Science Research (for Information on social science).

Present System of Collection of Educational Statistics :-

The existing system of collection of educational statistics from all states/UTs was introduced with effect from 1976-77 on the basis of recommendation of sixth All India Conference on Educational Statistics held in 1975. Under this system it was decided to collect the basic minimum statistics on the education from states/UTs Govt. with staggering time schedule in different types of forms namely E.S-I, ES-II, ES-III & ES-IV. From the year 1984-85, ES-I, ES-I(c), ES-II(s), ES-II(c), ES-IV(s) and ES-IV(c). ESI(s) forms pertain to college data and ES(s) forms to school data. Also from the year 1987-88 the collection and publication of Educational data Universities and affiliated colleges was transferred to the University grant commission subsequent to the decision taken by standing committee on educational statistics.

All the state Education Departments have statistical cells attached to State Directorates for collection, compilation and dissemination of information on Educational Statistics.

Procedure for collection of data.

The department of education at the Directorate level collects annual statistics on its prescribed forms ES-I, ES-II, ES-III and ES-IV from all the states. These forms cover the entire educational system in the states right from Pre-primary to post graduate level.

The Department of Education supplies the printed copies of Blank form ES-I to all the states. These proforma are got printed by the State Governments for supplying to institutions through the district and block level machinery.

The Department of Human Resource Development also organises Regional Training Programme for benefit of statistical staff at State & District level. On last 20th Nov. 95 to 23rd Nov. 95. One such training was conducted by Govt. of India Ministry of Human Resource Development Department of Education in collaboration with School and mass education, Govt. of Orissa at S.E.R.T. conference Hall at Bhubaneswar.

Organisational Set up :

Generally there are three levels of the organisational setup : i) State, ii) District, iii) Block which are involved in collection and consolidation of Educational Statistics.

^/ Collection of Statistics in respect of Primary and Middle school is done at the Block level and consolidation data for the whole block is forwarded to D.I. of Schools. Data in respect of secondary and Highersecondary schools is generally collected and compiled by the District Inspector of schools and forwarded to State Head quarters. At the State Headquarter, the collection is done in respect of all the institution of higher education as well as High/ Higher Secondary schools where the collection is not done by District Inspector of Schools offices. Finally, the data received at the State headquarters directly from the Higher educational institutions as well as district Inspector's offices is consolidated for the whole state and submitted to the Ministry of Human Resource Development in prescribed forms. In the State Directorate the compilation of data received from different types of institutions and other units is done manually.

Contd....P/

Selected Educationa Statistics :

Since the annual data collected in Forms ES-I to ES-IV are not available well in time Department of Education in MHRD collects data on certain selected items relating to the number of institutions of certain selected categories, the enrolment in selected courses by level and stage and number of teachers in schools of General Education. The information so collected is considered provisional and are published by Dept. of Education well in advance of the availability of the detailed and finalised statistics.

COMPUTERISATION OF EDUCATIONAL STATISTICS IN STATE :

The Department of Education has been implementing a central plan scheme of " Computerisation of Educational Statistics in the State".

Initially, the scheme was first introduced in 1998-90 in the nine educationally backward states. During 8th Five Year Plan, it has been decided to extend the coverage of the scheme to all states.

Objectives

- i) To reduce the time lag in the collection and processing of annual statistics for its timely collection publication/dissemination and monitoring of different educational programmes.
- ii) To develop a comprehensive data base both at Central and State level with a view to make planning process effective.

Scope and Coverage

In the first instance, it is proposed to computerise only the annual statistics of schools education programmes which are at present being collected from the States under ES-I-S and ES-IV-S.

Date of Reference

Under the above scheme the reference date for collection of numerical data on school education would be 30th Sept. of the academic year and will be collected and processed on computer for all states.

Organisation

The scheme will be operated by statistics unit of the central Department of Education in collaboration with State Statistical Unit, and the National Informatic Centre State Education Department will share the full responsibility of data collection and its scrutiny in computerised forms.

S₁- (For Primary Schools), S₂- (For Middle Schools), S₃-(For High/Hr. Secondary Schools/Intermediate Colleges) for S₄- (For collection of data in respect of professional institute etc.) The funds are being provided by the Ministry for the Printing of form. Accordingly Orissa State has printed S₁, S₂, S₃, S₄, & B₄ form for the year 1993-94 and 1994-95 distributed them to the fields for the collection of statistical data in the S series of computerise forms pertaining to annual education statistics from schools in the State.

Educational Development.

Orissa was one of the educationally backward states in the country till the advent of planning in 1950-51. In the year 1950-51 there were in all 9801 Primary schools with 16,525 teachers and an enrolment of 3.15 lakhs children including 64,000 girls. There were also in that year, 501 number of middle schools, 172 high schools, 14 Arts and Science Colleges and one affiliating University were in existence. The total enrolment in Middle and High Schools was 40,000 and 16,000 with 2569 and 2247 teachers respectively. The number of rolls in the middle schools were 2548 and in High Schools 642. The total enrolment in case of Primary Schools was 17% of the total number of children in the age group 6-11 and in case of middle & High schools the enrolment percentage were 4.0 and 1.8 respectively. So far as higher education is concerned there were only 6282 students in 1950-51 including 384 women and the total enrolment was 0.4% of the population in the age group 17-22.

During the last year i.e. in 1994-95 years there has been considerable expansion in the number of institutions and enrolment at all levels. In the year 1994-95 the number of primary schools has risen to 41,604, U.P. schools to 11,510, High Schools 5,808, the number of Colleges to 735. The State Revenue expenditure on Education has risen in the following manner.

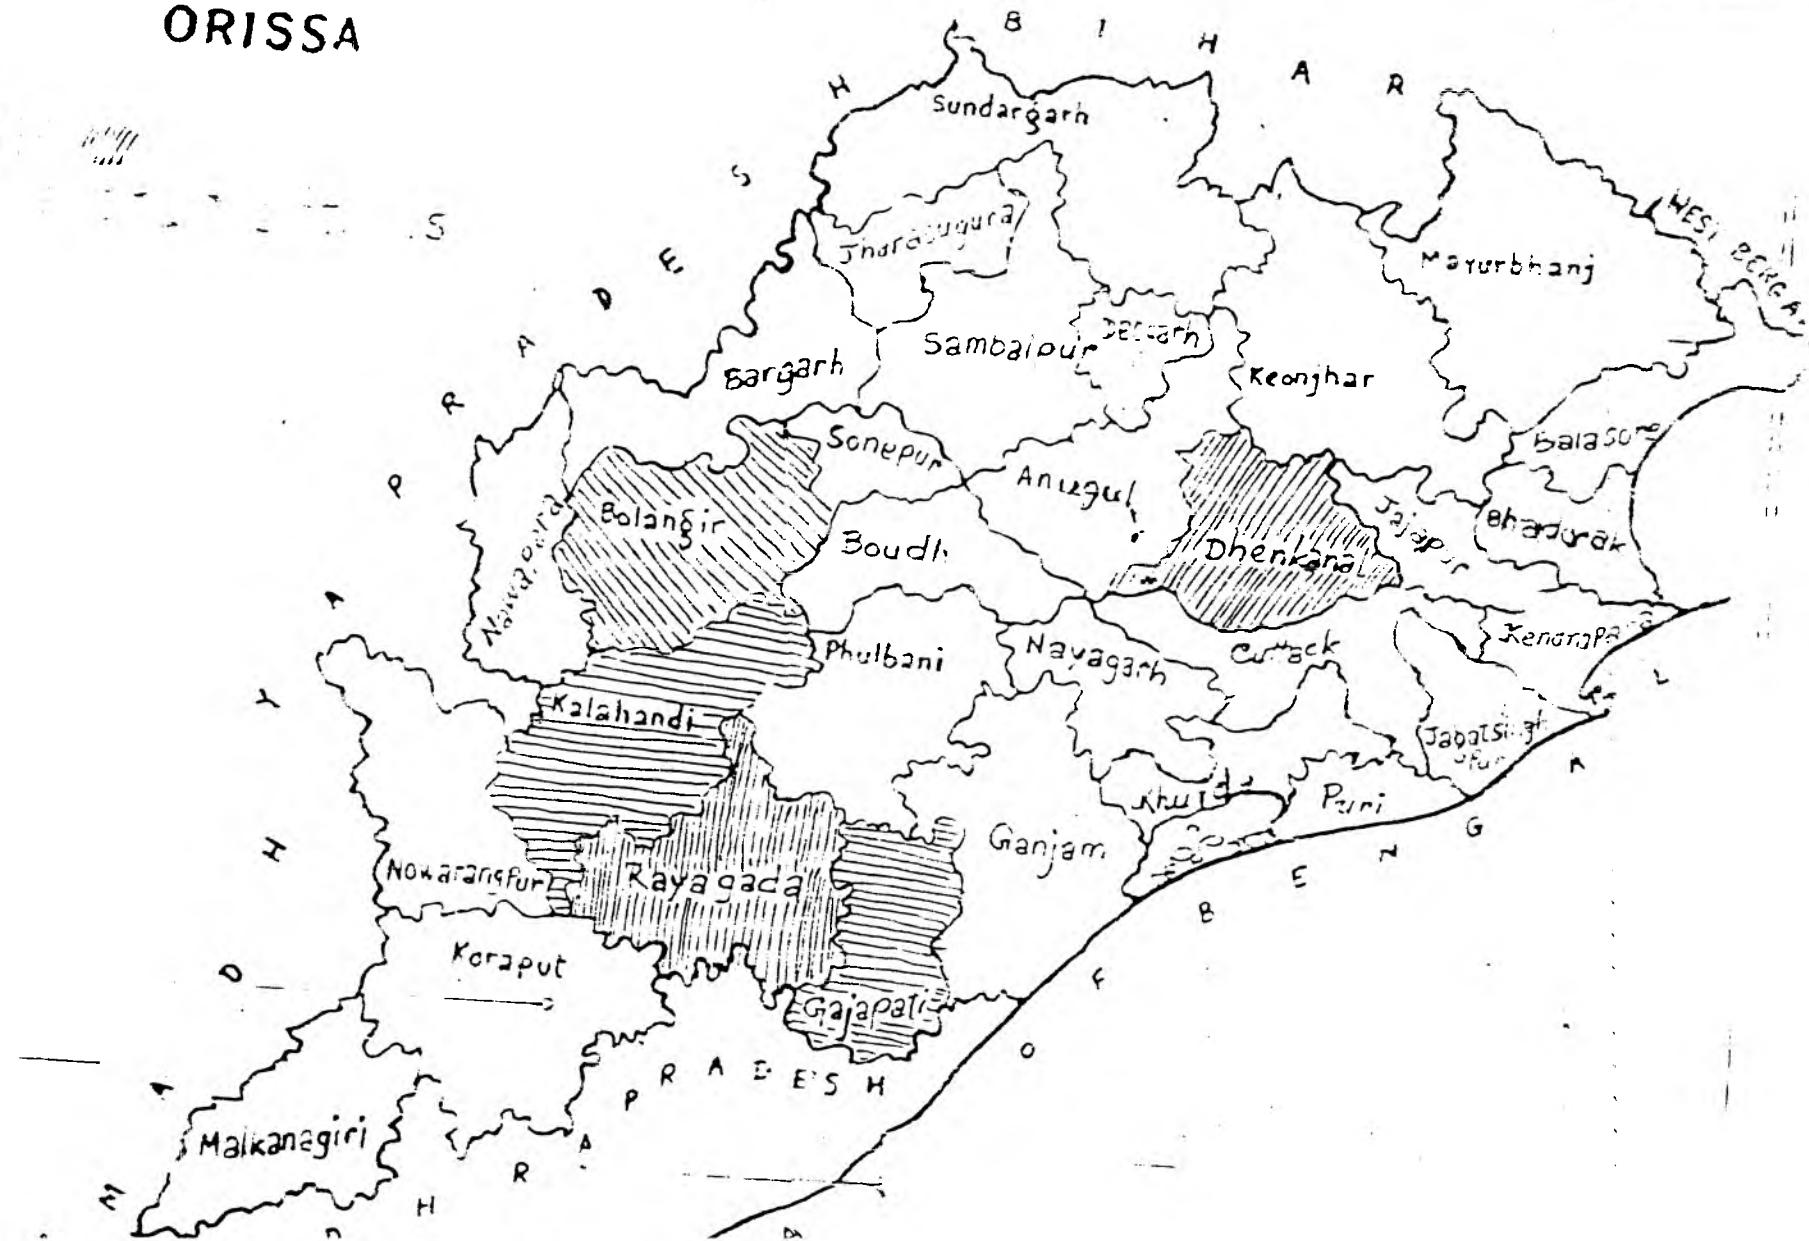

Revenue Expenditure on General Education

| <u>Sl.No.</u> | <u>Y e a r .</u> | <u>Expenditure (Rs. in Crors)</u> | <u>Per Capita Expenditure (in Rs.)</u> |
|---------------|------------------|---------------------------------------|--|
| 1. | 1987-88 | 274.5 | 93.23 |
| 2. | 1988-89 | 323.5 | 107.87 |
| 3. | 1989-90 | 398.1 | 130.35 |
| 4. | 1990-91 | 424.9 | 136.58 |
| 5. | 1991-92 | 518.8 | 161.19 |
| 6. | 1992-93 | 588.3 | 179.86 |
| 7. | 1993-94 (BF) | 745.8 | 224.45 |
| 8. | 1994-95 (BF) | 770.1 | 228.22 |

Source : a) Explanatory memorandum N.H.No. - 2202
 b) Population projected in CMIE - 1993.

Despite these achievements and institutional progress at different levels, gaps and challenges do remain in various sectors of education in the State, such gap between the needs and resources available, however, continued to troubles the Govt. Hence a need for fresh look and reorientation of our traditional strategy, approaches and priorities in some key sectors of Education so that the spread of education as well as improvement of quality and targets envisaged in 8th Plan for Education have to be fulfilled not only in numbers but also in quality so that education can play its role, meaningfully it task of creating a modern society.

Table No. 1

Projected Child Population

| Sl. No. | Year | Age-Group | |
|------------|------------------|----------------------|-----------------------|
| | | (6-10) (in lakhs) | (11-14) (in lakhs) |
| 1. | 1991 (census) | Rural Urban | 40.37 5.67 |
| | | | 20.84 3.03 |
| 2. | 1997 (projected) | Rural Urban | 41.28 9.41 |
| | | | 26.45 7.06 |
| 3. | 2001 (projected) | Rural Urban | 43.09 11.10 |
| | | | 29.00 8.80 |

The above table shows that the number of urban children will increase at a much higher rate in view of the trend in urbanisation.

Primary Education

C H A P T E R

Primary Education.

PRIMARY EDUCATION

Total enrolment on Primary School/Section 38.15 lakhs
the year 1994-95. Total number of teachers is 1,10,450. The teacher people ration is 1:35, 76.80% is the gross enrolment ratio of the primary schools.

For quite a long time compulsory primary education was a slogan for the political leader and in all the earlier plans the emphasis has been mostly on expansion of Primary Education from I - V for the age group 6 - 11. But the changes now envisaged during 8th Plan relate to emphasis on the programme of Universalisation of Elementary Education form I - VII for the age group of 6-14 with due regard to improvement of standard and making education more employment oriented and relevant to society. Therefore, the task faced in elementary sector in education in the 8th Plan in Orissa is tremendous and challenging. As percentage of enrolment for the 6-11 in Orissa is now 17% constant efforts are being made to provide educational facilities for all the children in the state. But in Orissa where 44.70% the area is covered by tribal sub-plan blocks and 67.72% of the population belongs to Schedule Castes and Scheduled Tribes, to achieve this prospect is a challenge.

Over riding priority has been given to the programme of Universalisation of Elementary Education in the National Policy of Education 1986. Universalisation of Elementary Education with special emphasis on access has been the directive of the Govt. 1990 being the target year for the Universalisation of primary Education. The technology has taken up responsibility of providing education for all children in age group of 6-11.

For qualitative improvement in the Primary Education, the operation Black Board Scheme has been introduced. 34,178 of the Primary schools have been covered under the 4th phase of operation

during the current year under the scheme. District wise distribution of Primary Education in different district shows imbalances which still exist at present.

DISTRICT PRIMARY EDUCATION PROGRAMME :

The National Policy on Education (1986 and revised 1992) and its programme of Action gave unqualified priority to universalisation of Elementary Education. The new thrust in Elementary Education will emphasise three aspects

- i) Universal access and enrolment
- ii.) Universal retention of children up to 14 years of age.
- iii) Substantial achievement in quality of education to enable all children to achieve essential level of learning and to take concerted steps to achieve these levels in institutions.

The overall goal of the project would be reconstruction of primary education as a whole in selected districts with more focussed targeting in that districts selected would be

- a) Educationally backward district with female literacy below the national average and
- b) District where T.P.C have been successful leading to enhanced demand for elementary education.

The Govt. of Orissa in the School and Mass Education Department have prepared project documents for the implementation of the D.P.E.P. Programme in five districts i.e. Balangir, Kalahandi, Dhenkanal, Gajapati and Raigada during the period under report and authority known as Orissa Primary Education Programme Authority entrusted with task of preparing district plans and implementation of all the 30 district in the State.

Secondary Education.

SECONDARY EDUCATION

The total number of High School in the State during the year under report is 5,808. A populations of 5,451 is covered by one High school. The development of Secondary Education in the state of Orissa records an increase of 72% over a period of ten years. The total number of enrolment and teachers in the secondary stage is 8.22 and 47.096 respectively during 1994-95. Percentage of S.C./S.T. enrolment in secondary state to total enrolment is found to be and respectively. There are 47, 096 teachers available for Secondary Education.

What is aimed at in respect of secondary education is consolidation and qualitative improvement rather than expansion in number. Science apparatus and science books are being supplied for qualitative improvement of secondary education in the state. The curriculum of secondary education is also modernise to incorporate modern development in Science and Technology.

Higher Education.

HIGHER EDUCATION.

The National Policy on Education, 1986 as modified envisaged that in the field of higher education the main emphasis will be on consolidation, expansion of facilities being, by the large, restricted to the existing educational institution. The National Policy also called for urgent steps to protect the system of higher education from degradation. The programme of action 1992 visualised adoption of certain specific strategies for imparting necessary dynamism to the system of higher education and recommended adoption of several programmes for development of autonomous colleges and departments, redesigning of courses, strengthening of research, improvement in efficiency. A review of the programmes implemented during the 1st three years of the 8th Five Year Plan, however, indicates that it has not been possible to undertake meaningful and effective measures to implement the strategies and programmes recommended in programme of action, 1992 largely on account of substantial increase in the ~~main~~ maintenance cost of plan schemes and in the committed liabilities which lift very little resource out of limited budgetary allocation for implementation of new developmental programmes and scheme for qualitative improvement.

Govt. College :-

The State has 58 Govt. Colleges including 3 Autonomous Colleges, 22 colleges which have been declared as lead colleges and one college of Accountancy and Management studies. Even though over the years, several new courses of studies and subjects have been introduced in different Govt. Colleges and the student strength has increased substantially, it has not been possible to sanction additional teachers and non teaching staff commensurate with the resultant increase in work load during the major part of this 7th plan and 1st 3 years of

Contd....

8th plan. It is therefore to remove deficiencies in teaching and non-teaching posts in phased manner spread over two years. During 1995-96 it is proposed to create 200 additional teachers post to meet the minimum essential needs.

Non- Govt. Colleges :-

The scheme for payment grants to non-Govt. Colleges is a continuing scheme 254 non-Govt. Colleges were receiving grant-in-aid from Govt. under this scheme. Although the scheme under which these colleges were receiving grant-in-aid to degree college which has been established during or after 1985-86 on account of paucity of resources. Similarly Higher Secondary Institution establish during on after 1983-84 were also were not receiving grant-in-aid. With a view to rationalising the criteria for payment of grant-in-aid policy was formulated by the State Government.

University Education :- Five Universities are now functioning in the State. a) Utkal University, Vanibihar, b) Berhampur - University, Bargarh, c) Sambalpur University, Jyoti Bihar, d) Orissa University of Agriculture and Technology, Bhubaneswar, Sri Bihar, Puri. The U.G.C. assisted projects for development of infrastructure of these Universities, require contribution by the State Govt. at varying rate which are met out of plan provision of the Department. The limited development grants are mostly being utilised for payment of salary and minor works. This has called for enhanced central assistance and resource allocation for strengthening Universities and for creation of New Universities as per the public demand.

During the year 1994-95, a provision of Rs. 40.00 lakhs was made for payment of development grant to three State Universities, Utkal University, Sambalpur University and Berhampur University. It is proposed to provide Rs. 76.09 lakhs for the year 1995-96 out of which the salary component is Rs. 26.09 lakhs and rest for developmental work.

It is proposed to provide Rs. 60 lakh for Sri Jagannath Sanskrit Mahavidyalay Puri for 1995-96.

The Department of Higher Education has been providing grant to Orissa University of Agriculture & Technology for conducting general courses in Science & Post Graduation course in Microbiology. It is proposed to provide Rs. 22.00 lakhs for this scheme in Annual plan for 1995-96

GROWTH OF S.G/S.Y. ENROLMENT IN GENERAL COLLEGES IN ORISSA

C H A P T E R I . 6

Support System on Education.

Micro Planning :

Improvement of the Primary School infrastructure provision of a non-formal stream of education and improving the quality of teachers will, by themselves, not be adequate for universalising Elementary Education. There is need for motivating the clientele at the grass root level to ever increasing participation in education. The strategy to be followed in this microplanning NIEPA has done considerable work in this area. The board features of the strategy of Micro Planning envisaged by NIEPA are :

- Involvement and empowerment of the community at the grass root level through construction of village education committee (VECs) with adequate representation for the staff of local primary schools, instructors of NFE Centres, Women & SC/ST.
- By an household approach, identification of individuals, eligible children who are not at present participating education and motivating them to get enrolled in schools and NFE centres and continue to participate in education and achieve at least minimum levels of learning by such participation.
- Mobilising community support for creation and strengthening of formal and non-formal education infrastructure, involvement of voluntary agencies and social activities.

Operation Black Board :

The scheme of operation Black Board aims at bringing about substantial improvement of facilities in Primary schools run by Government, local bodies, Panchayati Raj and recognised aided institutions. It has three inter-dependant components namely :

Contd.....

- Provision of a building/completing/at least two reasonable large all weather rooms with deep verandha and separate toilet facilities for boys and girls.
- At least two teachers in every school as far as possible one of them a woman and 3rd teacher be provided in a double teacher school having enrolment more than 100 under Extension and Expansion of Operation Black Board.
- Provision of essential teaching and learning materials, including black boards, maps, charts, toys and equipment for work experience.

Funds for construction of school building are to be provided by Education Department and construction work is being implemented by D.R.D.A. under Jawahar Rajgar Yojana. Funds for other component are provided by Education Department.

Operation Black Board Achievement

- a. Amount sanctioned by Govt. of India 24.85
(Rs. in crores)
- b. Number of school covered : 34,178.

Educational Technology (ET) Programme :

As a measure of widening access to education and towards bringing about qualitative improvement in education, an Educational Technology Programme was started as a Central Sector Scheme. NPE-1986 says that in order to avoid structural dualism, modern Educational Technology must reach out to most distant areas, most deprived section of the society, simultaneously with areas of comparative affluence and easy accessibility. This approach favours the use of broad-cast method. Keeping this in view, a revised scheme was formulated by the department of Education to consolidate efforts under INSAT utilisation programme. The objective was to achieve larger programme production capabilities within the education sector and to extend radio and T.V. coverage to secondary and elementary schools respectively by providing receiving sets.

The ETV programmes are telecasting daily in the morning for 3 hours 45 minutes in about 220 school days covering five languages i.e. Hindi, Gujarati, Marathi, Oriya and Telgu. Programmes are produced and being telecasted for the children in the age group of 6-8 and 9-11 years from Monday to Friday. Programme for primary level teachers are telecasted very every Saturday. The E.T.V. programme is transmitted by all HFTs and LFTs in the 6 INSAT States and other Hindi speaking States.

The SIET, Orissa has already been registered as an autonomous society, under E.T. scheme colour T.V. sets Radio-cum-Cassette players are being distributed in a large scale to elementary schools.

Contd...

Vocationalisation of Secondary Education :

The 7th Plan document has also indentified at different levels of education as one of the major thrust areas. DPE-1986 has accorded very high priority to the vocational education programme. The policy has laid down the target of 25% diversion to the vocational stream at higher secondary stage by 1995. State Government introduce vocational courses in schools at plus 2 stage. Efforts are also being made to start vocational courses specific to the needs of the users which will ensures ready employment to the vocational student provided they fulfil minimum standard laid down.

The primary aim of this programme is to provide diversification of educational opportunities so as to enhance individual employability and to reduce the mismatch between demand and supply of skill manpower and also to provide an alternative for those who do not wish to pursue higher general education. For proper implementation and monitoring of vocational education in the State the administrative set up at the State and district level has been strengthened. Govt. of India sanctioned 181 higher secondary schools upto 1992-93 and 50 more have been sanctioned during 1993-94. Thus 231 vocational higher secondary schools during 1995-96. Out of these, 181 vocational courses were opened in schools for which Rs. 1758.17 lakhs was provided in the 8th Plan. A provlsion of Rs. 165.00 lakhs is proposed for meeting the State share during 1995-96 under the scheme.

Adult Education :

The National Literacy Mission (NLM) launched in May 1988 has made an earnest and determined effort to identify and correct the environmental, infrastructural, pedagogic, management & training related deficiencies and short comings of the National Adult Education Programme. The mission envisages imparting functional literacy to 80 millions by 1990 and additional 50 millions by 1995. The thrust under the scheme has shifted from mere enrolment to making the adult functionally literate within a prescribed time span according to a set of pre-determined norms for reading, writing and arithmetic laid down in the mission document.

Considering the ~~magg~~ magnitude of illiteracy and large uncovered gap all state Government have been advised to identify areas (could be village, a cluster of villages, a Panchayat, a block of a district) which should be made fully literate in a time bound manner instead of perpetuating continuance of a project in a particular areas for years without tangible results. In the 7th Plan period 11,23,873 persons were made literate against the target 18,55,788. It has been assessed that 130 lakh of people in the age group of 9-45 have to be made literate during 8th Plan period. It is therefore, hoped that the activities under N.M. will be further strengthened during 8th Five Year Plans.

T.L.C. - Programme was implemented in the district and the after Orissa can expect to 21st century with literacy percentage of nearly 70, as detailed below :

1990-91 - Sundargarh

1991-92 - Rourkela, Keonjhar, Dhenkanal

1992-93 - Balasore, Bolangir, Nuapada, Sonepur and Jhngul.

1993-94 - Koraput, Gajapati, Malkangiri, Nayagarh, Sambalpur.

1994-95 - Jharsuguda.

Physical Education :

Physical education is compulsory at secondary and higher education level and physical education teachers are appointed in High Schools and Colleges to impart education in physical culture. Grants for the athletics in the Govt. and aided institutions are paid by State Govt. in regular basis. The State Government run a college of Physical Education with an intake capacity off 150 to train teachers for physical education for C.P.Ed. and B. P.P.Ed. course.

Oriental Studies

Sanskrit is not only taught as a subject in High Schools and Colleges but also in number of Special Sanskrit Schools. At secondary stage. Sanskrit is taught as a compulsory subject. At the college level it is one of the optional subjects and facilities also have been provided for teaching of sanskrit at B.A. Honours and Post Graduate levels. For special education in Sanskrit there are - 'Prathama Tuls which offers - years course. There are also Madhyama Course. There are

In order to diversify the employ-bulities of the young men and women passing out of these institutionsit was recently considered to change the syllabous by introducing general course with the traditional Sanskrit course. To impart higher education is Sanskrit Colleges including one at Puri.

Table 6 :- Science Education - Achievement during 1994-95

| Sl. No. | I t e m s | A c h i e v e m e n t |
|--------------------|---|---|
| 1. | Amount spent | Rs.1.74 crores. |
| 2. | Number of district covered | 4 (Kalahandi, Kherput, Phulbani, Mayurbhanj) |
| 3. | Number of school covered | |
| | i) Upper Primary School | 1540 |
| | ii) Secondary/Higher Secondary. | 387 (Science Equipment) |
| | iii) Secondary/Higher Secondary. | 369 (Laboratory Assistant) |
| 4. | Number of U.P School teachers being trained | 1540 |
| 5. | Number of High School teachers being trained | 387. |

137

In order to improve the quality of science education and to promote scientific temper as envisaged as NPE-1986 a centrally sponsored scheme of Improvement of Science Education in Schools was started in 1987. Under this scheme financial assistance is provided to State for provision of science kit to upper primary schools upgradation and strengthening of science laboratory in the secondary and higher secondary schools up to desired standards - setting up district resource centre for science education. The scheme is intended to cover all Govt. and Govt. upgraded upper Primary, Secondary & Higher Secondary schools in phased manner by the end of 8th Plan.

Computer Education in Schools :

A pilot project on computer literacy of students in schools was initiated in 1984-85 in selected secondary & higher secondary schools jointly by the Department of Education and Department of Science & Technology to acquaint students and teachers with range of computers application and its potential as a learning medium.

Minimum levels of learning : There are considerable variations in the standard of attainment of learners across states geographical region and social groups. Therefore, there is need for introduction of M.L.L. All learners in schools and NFE centres have to strive towards achievement of these levels. In the area of primary education MLL has to be fixed with reference to competence in languages and mathematics, apart from awareness of self environment. At the upper primary level, this could be based on a more comprehensive coverage including science and social studies. There could be extended up to intermediary levels of MLL also. An expert group has been constituted for laying

Contd.....

down the MLL to be achieved by children in Classes III, and Class - V in 80% of the School.

The History of Adult of Education date back to 1949. Over all these years the Adult Education sector is taking steps for improving the literacy position of the State. In 1961, the percentage of literacy in Orissa was 21.7 which rose to 26.12 in 1971 and 34.12 in 1981 and further rise to 49.09 in 1991.

Teacher's Education :

A centrally sponsored scheme of Restructuring and Reorganisation of teachers Education is being implemented since 1987-88. It aims at strengthening the teacher education system in the country to enable it to provide effective training and academic support to schools and adult and non-formal education. The scheme has the following five components :

- Mass orientation of school teachers (MOST) to familiarise them with the major thrust envisaged in the National Policy on Education 1986 and improve their professional competence.
- Setting of District Institute of Education and Training (DIET) either by upgrading suitable existing Elementary Teacher Education Institution or where necessary, by establishing new ones. So as to provide total academic and training support to the Elementary and Adult Education system at the district level.
- Strengthening Secondary Teacher Education Institution (STEIs) and Institution of Advanced Study in Education (IASEs).
- Strengthening State Council of Educational Research and

Training (SCERTs).

- Establishment and strengthening of Department of Education in University by the University Grand Commission

With a view to having one DIET in each district some Secondary Training Schools have been upgraded to the status of DIET during 8th Plan Period. At present, 1,10,000 Primary and Upper Primary teachers working in the State, and to orient them on the content and methodology 22,000; teachers are trained up every year in the DIET in addition to NFE facilitators, supervisors, adult education instructors and supervisors. Besides in service training, DIET are also taking pre-service training of primary school teachers as usual. A provision of Rs. 5.00 lakh in 1995-96 is being made for this purpose.

Teachers Education & S.C.E.R.T.

The capacity in all the training institutions existing at present in the State for secondary Education Programme is as follows :

| Type of Institution | Number | Intake capacity | | |
|---|--------|-----------------|-------|--------|
| | | B.Ed. | M.Ed. | M.Phil |
| 1 | 2 | 3 | 4 | 5 |
| Institute of Advance Studies in Education | 3 | 384 | 72 | 24 |
| College Teachers Education. | 6 | 712 | 24 | - |
| Training College | 4 | 288 | - | - |
| | 13 | 1384 | 96 | 24 |

A provision of Rs. 134.19 lakh has been made in the State plan for above component of teachers education.

Contd.....

in respect of the age group 6-11 and 1.70 lakhs children in respect of the age group 11-14. To achieve this it is proposed to open 2000 NFE centres for girls in 1995-96. A sum of Rs. 20.44 lakhs has been proposed for the purpose. There are 13 project co-ordinator and 1544 Supervisor to supervise the smooth function of the NFE Centres.

Indicators: Non-formal Education Achievement

| 6. | No. of district covered | 30 |

C H A P T E R : - 7

Education of Weaker Section.

■ Education of weaker section - Schedule Tribes & Scheduled Castes :

After attainment of independence and with constitution of India coming into force, promotion of the educational and economic standard of the weaker section of the people particularly of Schedule Caste and Schedule Tribe, become the primary responsibility of the State and since then keen attention has been paid to this aspect.

The NEE - 1986 envisages a number of steps for educational development of schedule castes, schedule tribes and other weaker sections. Special emphasis has been laid down for the removal of disparities and equalisation of educational opportunities by attending to specific needs of schedule caste and schedule tribes who have not been able to take full advantage of the present educational provisions and facilities. Like reservation of seats in educational institution (15% for SC and 7 1/2 for STs) relaxation in qualifying marks in entrance examination, reservation in Pre-matric scholarships free ship in kendriya vidyalayas, etc.. are continued.

According to 1991 census the total population of the state is 31,659,736 out of which schedule tribes and schedule castes population are 7,032,314 and 5,129,314 respectively constituting 22.21 and 16.20 per cent of the state population. The tribal dominated district of Koraput was divided into 4 districts, from 1st October, 1992, Which are Koraput, Rayagada, Malkangiri, Nayangpur. Similarly erstwhile Ganjam was divided into two districts i.e. Ganjam and Gajapati. The schedules are as of the State covers an area 69,613.8300 KM which is about 44.7 per cent of the total area of the State.

State Government in pursuance of Article 164 of the constitution of India have drawn up programme aiming at all round development of the tribals since 5th five years plan to bridge the gap existing between socio economic conditions of these communities with that of the others. In this regard Education has a very important part to play in the social as well as economic development of the country. It brings knowledge to community and equips it with new strength to face the challenge of the changing society.

Accordingly, the state Govt. in the post independence period, have laid stress on opening educational institutions of residential type in remote tribal areas from primary to secondary level.

With the special measures and concessions granted to them, education development has made rapid stride and the percentage of literacy which was 1.5 and 3.5 among the scheduled tribes and scheduled castes respectively before independence has gone up to 13.96 and 22.41 in 1981 and 22.31 and 36.78 in 1991 census.

By end of 1993-94, 138 high schools for boys and 42 for girls were opened in the State of which 97 high schools for boys and 37 high schools for girls were located in the scheduled areas of the State. 19282 schedule tribes, 4835 scheduled caste and 4370 other caste students were reading in these institution during 1993-94.

Ashram Schools & Kanyashrams :

In the State during 1993-94, 73 Ashram Schools and 31 Kanyashram schools were functioning in the State, out of which 47 Ashram schools and 21 Kanyashrams were located in the schedule areas. During the year under report 6934 schedule tribe, 1185 scheduled caste and 570 other caste students were prosecuting their studies in these institutions.

PUBLIC SCHOOLS.

47 Schedule Tribes and Schedule Caste students were reading in Central School, Chandwiri Public School, Sunabeda, and awarded Scholarship during 1993-94.

EDUCATIONAL PROGRAMS IMPLEMENTED BY THE EDUCATION DEPARTMENT.

As far as School and Mass Education Department is concerned there is an integrated approach for Schedule tribes and Schedule Caste population in the Educational Institutions under the Education Department which cater to the need of children belonging to the Schedule Tribe, and Schedule Caste and non Schedule (General) Communities. In view of the integrated approach the Administrative structure is one and the same for all communities. Educational Institution of Education Department functioning in the Schedule area and student enrolment during 1993-94 can be seen from the table provided in this chapter.

The Schedule tribes are educationally very backward, there are many hindrance in promoting education among them. To send children from tribal family to School entails, economic loss and dislocation economic activities of tribal families.

Other factor responsible for low level of literacy rate are inadequacy of Schools, non-availability of right type teacher, delay in payment of stipend and lack of communication facilities.

Keeping these difficulties in view efforts have been made during different plan period to provide various facilities for Educational development of ST and SC students in Orissa.

ALLIED EDUCATIONAL STATISTICS.

TEACHERS IN CRIBEA

The quality, competence and character of teachers are essential consideration for any qualitative improvement of Education. At the same time the number of teachers in position should be so adjusted to the requirement that educational system can effectively operate to yield the desired results.

The ~~max~~ total number of teachers serving at all stages of school education is 1,95,960 of whom 1,10,450 serve at Primary stage 38,414 U.P. stage 47,096 at Secondary stage.

Teacher-pupil Ratio at Primary, Middle and High school stages is found to be 1:35, 1:29 and 1:18 respectively during 1995 year.

Teacher belonging to Schedule caste constitute 7.38 percent and those belonging to schedule tribe constitutes 2.67 percent of total number of teachers at school stages.

Female teachers serving at Primary, U.P. and Secondary stage are 27,208, 5,559 and 9,901 respectively constituting 24.61%, 14.47% and 2.10% respectively of the total number of teachers at Primary, Middle and Secondary stage.

The National Policy on Education, 1986 envisages
as follows:-

- i) Teachers will have multiple role to perform teaching, research, development of sharing learning resource materials, extention and managing the institution.
- ii) Teachers education is a continuous process and its pre-service and in-service components are inseparable. As the first step, the system of teacher education will be over-hauled.
- iii) The new programme of teacher education will emphasise continuing education and the need for teachers to meet the thrusts envisaged in the policy.
- iv) District Institutes of Education & Training (DIET)
~~have~~
will be re-established with the capabilities to organise pre-service and in-service courses for elementary school teachers and for the personnel working in non-formal education.

In this context, the Government of Orissa have taken some very important decisions which have far reaching influence on the system of Teachers Education & School education at all levels. Previously the elementary teachers training institutes were functioning under one Directorate and the Secondary Teachers Training under another Directorate. Government have been pleased to bring them together and place them under Directorate of DE & SCERT, Orissa. As desired by Government of India all Teachers Training Institutions have been placed under the SCERT.

At present Orissa has 30 Districts and 13 DIETs.
Therefore there is need for establishing 17 DIETs.

EDUCATION OF GIRLS IN ORISSA.

In the context of Universalisation of Elementary Education, Education of Girls is considered to be one of the most important aspects of the Programme. Female constitutes 49.26 percent of Orissa population. According to 1991 Census there are 971 female for every 1000 males in the State.

Due to socio-Cultural and religious barriers girls' education received a set back in the past. According to 1991 census the percentage of female literacy in India is 39.3 against a male literacy percentage of 64%. As such female have been identified as constituting one of the weaker sections of the Society from the stand point of their literacy.

According to 1991 census 54.63 percent of the female of Orissa were literate against 53.09 percent male literacy. Literacy among rural female is 30.79 percent against 60.00 % percent men. It may be seen that literacy percentage among schedule caste female is 17.02 where as it is 43.03 for scheduled caste males. Literacy position is still worse in case of schedule tribe female which stands at 6.55 percent against 8.54 in case of schedule tribe men.

All out efforts were made during the year for improving girls/women participation in education. Details of specific steps are presented below.

- * Under Operation Black Board, Govt. of India has provided assistance since 1987-88 for creation of 78430 posts of Primary School teachers mainly to be filled up by women.
- * Hundred per cent assistance was given for N.F.E. centres meant for girls.
- * The Mahila Samokhya Project has been under implementation.
- * By conscious action, admission of girls to the extent of 26.67% in Naboda Bidyalays has been ensured.
- * In the open schools, attention was given for enrolment of girls.
- * Scheme for free ships for girls has been introduced.
- * The UGC provided financial support to universities for undertaking well defined research project on women studies. University and colleges are now being supported for establishing cells for women's studies.
- * Special attention are given for enrolment in Adult Education.

Educational Administrative Structure:-

At the apex level there is a Deptt. of School & Mass Education which has been formed with effect from December, 1992. The administrative structure in the field is headed by Directorate of Elementary Education which emerged as a full fledged Directorate in 1988. Subordinate to Directorate is the Circle Inspector of Schools who is the supervisor in respect of Secondary Education, but also controls the Elementary Education system in the Districts/Circles. At present the number of C.I. Centres stands at 19, It may be noted that the education circles are not coterminous with the revenue districts in many cases.

Educational circles is devided into number of Educational districts which are many cases coterminous with revenue sub-divisions. There are 64 educational districts and the Districts Inspector is practically the head of elementary supervisory system in his area. Below the D.I. off-schools.

Statistical Organisation in Orissa:-

At the state level, there is full fledged Bureau of Statistics. In Education Department of Govt. of Orissa, the Statistical unit has been functioning as state level unit so far as the Education Statistics is concerned. Now it is functioning as state level unit so far as the Educational Statistics is concerned. Now it is functioning under the direct control of Director, Elementary Education, Orissa. Technical Education :-

Technical Education is one of the most significant components of Human Resource Development Spectrum with great potential for adding value to products and services, for contributing to the national economy, and for improving the quality of the life of the people. In recognition of the importance of this sector, the successive Five Year Plans laid great emphasis on the development of technical education.

During the past four decades, there has been a phenomenal expansion of technical facilities in the state. But, a lot more remains to be accomplished in the field of technical education in respect of increasing its coverage and enhancing its accessibility to various categories of people, and in improving its productivity. Moreover, the changing scenario by the turn of the century in socio-economic, industrial and technological areas needs to be considered to enable the system to play its role with greater relevance and objectivity. Based on these considerations, several initiatives were taken to further revamp the technical education system. They include : modernisation and removal of obsolescence, promoting institution-industry interaction, restructuring of courses/programmes, linking technical education with development sectors and application of science and technology for rural development.

The State has five Engineering Colleges, 18 Engineering Schools/Polytechnics and 48 ITIs with intake capacity of 1037, 1865 and 5120 respectively.

The upgrading of the technical education is being implemented under the World Bank Assistant programme which commenced from 1990-91 for a period of five years. 17 Diploma courses and 13 Post Diploma courses will be introduced in different institution. It has also been proposed to upgrade the Institute of Textile Technology to degree level during 1994-95. Besides many programme relating to community polytechnic, curriculum and resource development and industry inter ~~and~~ action alongwith strengthening ~~the community polytechnic~~, of Directorate of technical education and Training will revive priority during the project period.

The state has 3 Medical Colleges, 6 Homeopathic Colleges, 5 Ayurvedic Colleges One Pharmacy College and One Nursing College. The Govt. have emphasised the need for enlarging the scope of medical care & treatment.

The education of physical handicapped and mentally retarded children has also assumed significance in the context of Universalisation. 41 special schools for blind, Deaf and mentally retarded students are managed by N.G.O.s and four such schools by the pvt. in the Education Deptt. Besides, Govt. are being implemented the programme on Integrated education by disabled with opening of 399 centres.

Expenditure on Education :-

Table given below shows the trend in expenditure on general education in the State from 1987-88 to 1993-94 (F.E.) and 1994-95 (E.). The increase in per capital expenditure during this period in the term of current prices and thus does not reveal the real changes, if any, which might have occurred in quantitative terms.

Contd.....

Besides, the major share of increase is diverted to the salary component of the teaching staff leaving aside a meagre amount for developmental purposes. In the context of achieving the goals of Education For All" by 2000 A.D. It has been imperative to depend substantially on the assistance from Govt. of India, external funding agencies and strive for internal resource mobilisation.

| Sl No. | Year | Expenditure Rs. (In crores) | Per capital Expenditure. |
|--------|----------------|--------------------------------|-----------------------------|
| 1. | 1987-88 | 274.5 | 93.23 |
| | 1988-89 | 323.5 | 107.87 |
| | 1989-90 | 398.1 | 130.35 |
| | 1990-91 | 424.9 | 136.58 |
| | 1991-92 | 518.8 | 161.19 |
| | 1992-93 | 588.3 | 179.86 |
| | 1993-94 (R.E.) | 745.8 | 224.45 |
| | 1994-95 (B.E.) | 770.1 | 228.22 |
