## P R E F A C E

The Department published District Statistical Hand Book for a number of Districts combined in one volume in 1984 for the first time. The District Statistical Hand Book became very handy as it contained detailed information for the Districts in one volume. Further a need was felt to Present information for each District seperately. The present publication viz. District Statistical Hand Book of Zunheboto for 1987 is, therefore, prepared to meet that requirement.

The information has been compiled from various sources at the District level. I am thankful to all the Departments and Agencies which supplied to us information and rendered valuable cooperation in preparing this Hand. Book.

It is hoped that this publication will serve as a book for ready reference to the planners, Administrators, Implementors of various schemes, Researchers and those seeking Micro level information at the District level. It is now intended to bring out such publication with regular periodicity every year.

Suggestion for further improvement of District Statistical Hand Book will be highly appreciated.

Dated, Kohima,  
the 10th June '88.
