Statistical Hand Book of Nagaland 1984 is a publication presenting Statistical information on various aspects of Nagaland Economy. Data incorporated in this publication have been collected from various Departments of the Govt by the Economics & Statistics Department and from Official publications as also from sources not published so far.

It is hoped that the publication would be of some help to the public interested to have a bird's eye view of Nagaland, to students of Economics, to the Planners & others willing to participate in Nagaland's progress and Development.

I thank the various Departments and agencies which supplied the necessary information and rendered unstinted cooperation in preparing this book.

I thank Shri. H.G. GUPTA, Joint Director, Economics & Statistics, but for whose special efforts it would not have been possible to bring out this issue so expeditiously. I also thank other officers of the Deptt. and particularly Shri D R. Paul, Inspector of Statistics, who shouldered the responsibility of collection, compilation and proof reading of the Book.

Suggestions for further improvement of the Hand Book are welcome.

Dated, Kohima,

GENERAL
INTRODUCTION
(TABLES 1.1-1.15)

1.1. INTRODUCTION

Nagaland, the sixteenth State of Indian Union, was inaugurated on the 1st December, 1963.

PHYSICAL FEATURE

The State of Nagaland lies between 25°6' and 27°4' latitude north of equator and between the longitudinal lines 93°20' E and 95°15' E having an area of 16,579 Sq. K. M. The altitude of Kohima is 1,463 metres (4,800 ft) above the sea level. The State is bounded by Assam in the North and West, by Burma and Arunachal Pradesh in the East and Manipur in the South and runs more or less parallel to the left bank of the Brahmaputra. The topography is very severe—full of hill ranges which break into a wide chaos of spurs and ridges. The altitude varies between 194 metres (636 ft) and 3,048 metres (10,000 ft). Most of the thousand and odd Villages stand at 1 to 2 thousand metres high as it is very typical of the Nagas to build their houses on the hill-tops and at higher elevations. The highest peak in the State, Saramati in Tuensang District is 3,840 metres (12,598 ft) high.

POPULATION

The population of Nagaland, according to the 1981 Census is 7,74,930. Out of this 84.49 percent of the population is rural. The average density of population is 47 per square kilometre. Workers constitute 45.79 percent of the total population of the State, 41.99% of the population is literate.

LIVELIHOOD PATTERN

The most important activity is Agriculture which occupies 72.36 percent of the working force. Besides Agriculture, people engage themselves in weaving, blacksmithy and other handicrafts to meet their daily requirements during off-season but not much for commercial purposes. There is no appreciable manufacturing activity in the State.

THE PEOPLE

The population of Nagaland is almost entirely tribal. There are many separate tribes and sub-tribes amongst the Nagas with their own distinctive language and cultural features. Kohima District is the home of the Angamis, Zeliangs, Rengmas and a small group of the Kukis, Semas and some other minor groups. Phek District is the home of the Chakhesangs, the Pochuris and a group of the Sangtams and others. The Angamis and the Chakhesangs practise terraced cultivation and double-cropping on large scale.

Mokokchung District is the home of the Aos. Wokha District of the Lothas and Zunheboto District of the Semas. These people practise chiefly Jhum cultivation. However, they have started terraced cultivation in recent times and the State Govt. is encouraging them to start terraced cultivation by giving loans and subsidies towards the schemes.

Tuensang District is the home of the Changs, the Sangtams, the Khiemungams, the Yimchangers, the Phoms, the Semas and some other minor groups. Mon District is the home of the Konyaks. These people also chiefly practise Jhum cultivation. Adoption of terraced cultivation is now encouraged in these areas also by the State Government.

In Nagaland, Tribal or Village Councils regulate the social life. The regulation of 1945 gives powers to the Tribal councils to try criminal as well as civil cases and imposes fines. So long as the parties belong to the same tract, all civil suits are tried by the Council. The punishment inflicted by the Council is according to their customary law though a limit has been put to avoid heavy punishments.
