PART - I

CHAPTER - I

1.1 General Information

Location :- Forming the central-southern part of Punjab, Bathinda district lies between 29'-33' and 30'-36' north latitude and 74-38 and 75-46 east longitude, touching northern boundaries of Hissar and Sirsa districts of neighbouring Haryana state, and bounded by the Punjab districts of Faridkot in the north and west and Sangrur in the east.

Origin :-

The district derives its name from the present headquarters of the district-Bathinda. It is historically an ancient town with a long and chequered history. Its name is said to have been derived from the names of a Rajput ruler by the name of Binai Pal and his Vazir who bore the name of Thanda Ram. In recent times the town was conquered by Maharaja Ala Singh (near about 1754 AD) and since then it has followed the history of erstwhile princely state of Patiala. With the dawn of independence and merger of Patiala and East Punjab States into a Union styled as PEPSU, Bathinda became a full fledged district which status has continued even after the merger of PEPSU with erstwhile Punjab state in 1956. (The spelling have been recently revised from "Bhatinda" to "Bathinda" on the authority of the Survey of India, to conform to the phonetical & expression, as locally pronounced.

It consists of 527 villages, out of which 520 are inhabited and 7 uninhabited, and 11 towns distributed in the four tahsils, namely Rampura Phul, Bathinda, Talwandi Sabo and Mansa. Formerly the District economy displayed the features of backwardness but now it is in a state of transition and a new chapter of socio-economic transformation is opening. The Government have been benevolent in sanctioning big projects for the Districts which have accelerated the pace of development. During the last two decades the district has made spectacular progress in agriculture, industry, education, health services and other allied sectors. Still the district lags behind the other developed Districts of the State particularly in the field of education. So, this district requires

special attention of the Government to keep the pace of the development.

Population and Density :-

With the density of population still low (second lowest in the state) at 235 persons per sq.km, the increase in population during the decade 1971-81 was 27.24 per cent as against the state percentage of 23.89. As on 1st March, 1981 1,304,606 persons (699,815 males and 604,791 females) lived in the district.

In the matter of number of females per thousand males it has recorded a slight improvement of 9 females raising the number from 855 in 1971 to 864 in 1981 though it continues to be fairly below the state figure of 879 in this respect.

Rural and Urban percentages of increase in population tahsilwise are as below :-

Tahsil	Total	Rural	Urban
Rampura Phul	25.00	23.19	36.25
Bathinda	38.43	20.92	83.75
Talwandi Sabo	24.29	14.60	74.63
Mansa	21.14	19.30	33.82

In the matter of urban growth Bathinda city has increased its population from 65,318 to 127,363 in 1981 giving a percentage of 94.99 which is amongst the highest in the state and is an unmistakable pointer to industrial shift from the agricultural background of that town. Out of the total population 27% belongs to Scheduled Castes. In Bathinda District of every one thousand persons, the number of workers comes to 308. It consists 527 villages out of which 520 are inhabited and seven are uninhabited comprising 9 C.D. Blocks and 11 towns distributed in 4 Sub Divisions namely Bathinda, Mansa, Rampura Phul and Talwandi Sabo.

Literacy :-

Literacy is a single golden key to the development and universal education alone can release the dormant productive forces of illiterate population. The district still continues to be at the lowest rung in respect of literacy. A direct attack on illiteracy on a much more massive and determined scale is required so that universal literacy is assured. The literacy rate of the district is 27.72% as against 40.86 in state and 50.60, being the highest literacy rate in district Lakhiana which is advanced in their respect. The position in case of female literacy is much more depressing which is 20.29% against 30.09% in the state and 44.15% in district

of female literacy is much more depressing, which is 20.29% against 30.69% in the state and 44.15% in district Ludhiana. Though the improvement in literacy is commensurate with such a figure in some of the districts of the state but the overall picture of comparative educational backwardness of the district still continues. Bathinda sub division leads with literacy rate of 33.98% over the other sub-divisions Talwandi Sabo 23.82%, Rampura Phool 23.36% and Mansa 23.75%. ~~23.82%~~ Mansa sub division has been declared backward area of Bathinda district. It needs the special attention of Government for the eradication of illiteracy. The literacy rates for rural and urban areas of the district respectively are 22.2% and 47.22%. The literacy rate among Scheduled Caste in 15-35 age group is only 9.52%. The rate among Scheduled Caste male and female is 13.5% and 4.20% respectively which is most depressing.

In the National Education Policy, a great stress has been laid on the eradication of illiteracy. There are at present 110 million illiterates in the age group of 15-35 in the country and we are committed to educate all of them by the year 1995 which is our National goal. District Bathinda needs special attention of the Government in this respect. At present, one project with 300 centres is working in this district. The total number of illiterate persons in the age group of 15-35 in the district is 3,39,477. The enrolment in these centres is 12,000.

Level of industrialisation :-

The district had a little industrial activity at the time of its formation. Dating back to the princely days, the Phupindra Flour Mills was a solitary large scale industry in the District. Because of large production of Cotton in the District, some cotton ginning and Pressing Mills were located. A handful of small industrial Units manufacturing Cycle Parts, Agricultural implements were also there. With the setting up of Guru Nanak Dev Thermal Plant and National Fertilizer Limited Plant the District achieved a conspicuous position on the industrial map of India. Since 1972, the industrial authorities have achieved further fillin with the

declaration of the district as industrially backward and its eligibility to various subsidies and concessions. In the large and medium scale units, 2457 small scale industry units and 2529 village industry units with huge investment and employment potential of 27086 persons. The setting up of new Sugar Mills and spinning Mill will be another feather in the cap of large-scale industry. The Cement Corporation of India and Trigun Auto Plant Pvt. Ltd. with an investment of 22.30 Crore will also add to the industrial progress of the District.

The decade from 1971 onwards has seen industrial activity of substantial magnitude in Bathinda district consequent upon the material alteration of skyline in Bathinda town. The first on the ground was Guru Nanak Dev Thermal Plant (GNDTP) with 4 units of 110 MW each. This thermal plant has been augmenting the power supply position in the state and has opened up a vast source for employment (about 4,000 persons.)

The Indian National Fertilizer Limited (NFL) has established its plant in close proximity to the thermal plant at a capital cost of 240.47 crores. Besides offering direct employment to about 1,200 persons, it has generated employment for 5,000 people who are engaged in marketing, distribution activities and other allied activities.

A big milk plant under public sector (MILKFED) has also come into existence in the outskirts of the town which has given a great fillip to the development of animal husbandry in the district, well known for its well-fed cattle heads.

The fourth unit in the large scale comprises a weaving and spinning unit by the Punjab State Industrial Development Corporation (PSIDC) with a capacity of 50,000 spindles. It has been first of the series of such mills proposed in and around Bathinda as also in neighbouring districts to generate employment on one hand and ensure conversion of cotton into yarn before it is despatched outside the state, on the other.

With the coming up of these public sector projects, vast scope for development of ancillary units in small scale as well as in cottage industries has arisen. The ancillary units manufacture steel balls, transformers, S.W. pipes, welding rods, polythene coated bags, straw board, cattle feed, bone meal, ice

cream, sulphuric acid etc. New horizons are being explored for further establishment of ancillary units based on cotton, leather goods, gaskets, zinc sulphate, hydrochloric acid, tannery, detergents, poultry, gears, ball bearing, conduit pipe, spinning and pressing, pipe fitting, electric fans, ceramic, line, electric motors etc.

Not only has this meant increase in establishment of industrial units in and around Bathinda town but also these are spread over in the entire district where industrial focal points had been and are being developed.

The number of registered small scale units had recorded 73 per cent increase in the previous two years (from 817 in 1987-88 to 1,417 in 1981-82)

The industrial activities have received further fillip with the declaration of the district as industrially backward and consequential eligibility to various subsidies and concessions that go with such declaration both for setting up new units as also for the expansion of the old ones. The traditional occupations of shoe making, bag and rope making, carpentry, blacksmithy, handloom weaving have not only continued but have flourished.

In the large scale sector, another half a dozen units, with a total investment of Rs. 13 crores are in the pipeline and over 100 crores further investment is envisaged in various projects for which over a dozen letters of intent have since been issued by the Central Government in favour of the entrepreneurs both public and private, for establishment of large units.

The census 1981 returned a population of 127,363 of Bathinda town against population of 65,318 in 1971 thus showing an increase of 94.99 per cent. There is a material shift in its appearance; from an agricultural small Mandi town, it is transforming into an advanced industrial centre. There has been a phenomenal increase of 165.53 per cent in respect of neighbouring Bhuchio Mandi; its population increasing from 2,945 in 1971 to 7,820 in 1981. The other important towns in the district have also reported substantial increase due to the industrial wave.

Agriculture :-

Bathinda is predominantly an agricultural district as 69% of the working force directly derive their livelihood from agriculture. A major chunk of our National income comes from agriculture sector. The sturdy and industrious peasants have changed the sand dunes into green fields. The introduction of the package programme detailing the use of high yielding improved variety of seeds, chemical & fertilisers, pesticides, latest agricultural machinery and other inputs has helped in many fold increase of agricultural production in the district. The geographical area according to village papers is 5,54,000 hectares and 95.5% area is under cultivation. The total cropped area per season and cropped reports in 1986 was 8,14,000 hectares out of which an area of 3,13,000 hectares was under double cropping. Cropping intensity comes to 162.5%. The net irrigated area by different sources is 4,15,000 hectares which comes to 83% of net area sown. Canals are the main source of irrigation i.e. 85% and 17% irrigation is done by tubewells. The main crops of the district are cotton, paddy, wheat, gram, sarson. The area is quite potential for the cultivation of grapes and citrus fruit.

Development in cultural field :-

In this era of new culture, which is the gift of industrial development, the Rose Garden and the Boating Club at Bathinda have started drawing record visitors both from outside and from within the district. In fact in the desert and arid landscape of Bathinda these provide the oasis of invigorating relief and feast for the eyes.

Historical Towns :-

Strictly from the historical point of view, only other important place apart from Bathinda in the district is Talwandi Sabo - connected with the history of the Sikhs.

Sri Guru Gobind Singh, after his fiercest battles with the Mughals at Anandpur Sahib, Charkaur Sahib and Muktsar, came to Talwandi Sabo and rested there for 9 months. The place is alternatively called 'Dardana Sahib' (Dard means rest in Punjabi). He made it a centre for spreading his mission and hence another name 'Guru ki Kashi'. He dictated Adi Granth Sahib

here and inside the fort is a Gurdwara. It has a long fascinating history behind it.

After the independence of India, the Central Govt with a view to measure the development in the field of education ordered and conducted survey at various times. The 5th All India Educational Survey based on 30.9.1986 was conducted in 1986-88. Keeping in view the difficulties, omissions in the previous survey and with a view to set concrete results, elaborate training was given at various levels, so as to compile and tabulate correct information in the three basic information tables as detailed below:-

Table No. 1 School Information Table :-

This form contains detailed information regarding the school, its Building, its premises, ground facilities available in the school, teachers, and No. of students and other useful information. The table was filled up by the school Head Masters for which training was imparted.

Table No. 2 Village Information Table :-

This form contains detailed information about the villages their location, communication facilities, crops and industries, population of various age groups, clarification and other details. This Table was also filled up by the Head of the school where the school is situated in the other cases, where the primary school exists, proforma's were filled by the Head Teachers and the information was further consolidated by the Block Primary Education Officers.

Table No. 3 Town Information Form :-

This form which contains similar detailed information in respect of towns of the district was filled up by the Head Master or Principal of Higher Secondary schools situated in the town.

The population of the District which stood at 10,13,342 in the year 1981, estimated to have increased at the approximate rate of 2% and it stood at 11,43,605 at the time the survey was conducted. There were 527 villages out of which 520 were habitated and 7 were unhabitated. In addition to these villages, there were 538 habitations. The district comprises of 11 Towns and 6 C.D. Blocks and four Tehsils. Every village and most of the habitations also are served with a primary school and every habitation has at least primary school within a radius of 1 Km.

There are 577 schools in villages and 47 in the Towns. There are 92 upper pry schools in the Rural area and upper pry schools (Middle) in the urban area. There are 130 secondary schools in the rural area and 36 Sec.Schools in the Urban area. No. of Higher Secondary schools in the Distt is 12, out of which 8 are situated in the urban area & 4 are situated in the rural area. An other 36 secondary schools proposed to be up graded, to senior secondary level. It was revealed that there were 1068 Sections of school in the rural area which even did not have Black Boards and 72 Sections in Urban area are also without Black Boards. In 115 Schools there were no chairs for the teachers and other 97 schools did not have teachers table. The position of the seating was vary poor because 574 schools did not have even tats to seat the students in the rural area. Similarly, 125 sections of urban schools were without tats. Under the CARE scheme, 52 schools were being provided with mid-day meals which benifited 1552 children. There were 3034 Primary schools teachers and Upper pry school had 1131 teachers and those in the secondary schools were 2240. Higher Secondary Schools had 142 teachers. The position of the rural area was dismal because some 65 Secondary schools were without a regular Head Master and about 300 teachers were required to fillup the vacancies in the rural area.

In addition to the above facilities, 42 centres were running in the rural area providing adult Education and Six such centers in the Urban area.

1. District Pathinda consists of 514 villages having 538 habitations. Their total populations is 1143605. Every habitation has a primary School and no student has to go beyond one Km. to reach his School.
2. Since every habitation has been provided with a primary School, so there is no need for opening a new primary School.
3. Out of these habitations, 208 have 25% Scheduled caste Population. 306 habitations are such where 26% to 50% Scheduled caste people reside. This District has no Scheduled Tribe population.
4. There are 577 Govt. Primary Schools in rural Area and only 47 in Urban area.
5. Out of 577 Govt. Primary Schools, 548 Schools have Pucca Buildings, 14 Schools have partly Pucca Buildings, 15 Schools have no Building of their own at all. In the Urban Area, 43 Schools have Pucca buildings, 2 have partly Pucca buildings and 2 have no building of their own.
6. There are eight such schools in the Distt. where there are no rooms for the students. There are 20 such schools where there is only one room each for the students.
 125 schools have two rooms each for students.
 105 schools have three rooms each for students.
 145 schools have two rooms each for students.
 100 schools have five rooms each for students.
 97 schools have six to seven rooms each for students.
 21 schools have eight to nine rooms each for students.
 3 schools have 10+2 more than ten rooms each for students.
7. Out of 624 schools
 64 schools are such where the building is sufficient.
 47 schools are such where more than one room is required.
 180 schools are such where two rooms are required.
 177 schools are such where three rooms are required.
 64 schools are such where four rooms are required.
 41 schools are such where five rooms are required.
 32 schools are such where 6 to 7 rooms are required.
 10 schools are such where 8 to 9 rooms are required.
 8 schools are such where 10 to 12 rooms are required.
 1 school is such where more than 12 rooms are required.
8. There are 3456 sections in 577 Govt. Primary Schools out of which 2215 sections have workable Black boards. 178 sections are such where the Black boards are not workable and 1030 sections have no Black boards at all. In the Urban Area there are 338 sections in 47 Govt. Primary Schools out of which 293 sections have Black boards, 10 sections have unworkable Black boards, & 35 sections

have no Black board at all.

9. Out of 624 Govt. Primary Schools, drinking water facilities are available in 595 schools. Urinal facilities are available in 505 schools. Sepearate Urinals are available in girls in 271 schools. Lavatory facilities available in 188 schools. Seperate Lavatory facilities are there for Girls in 109 schools. The students have been medically checked in 505 schools and Vaccinated in 512 schools.

10. There are 13 Primary schools where there is no teacher.

There are 39 primary schools where there is one each.

There are 141 Primary schools where there are two each.

There are 141 Primary schools where there are three each.

There are 93 Primary schools where there are four each.

There are 49 Primary schools where there are five each.

There are 54 Primary schools where there are six each.

There are 76 Primary schools where there are seven each.

There are 31 Primary schools where there are eight each.

There are 19 Primary schools where there are nine each.

There are 14 Primary schools where there are ~~ten~~ 10 each.

There are 34 Primary schools where there ~~more~~ more than 10 each.

11. ~~There~~ In the rural area 1519 had male teachers and 876 had female teachers 32 rural male and 10 untrand female teachers work.

In the Urban Area there are 139 trand male teachers and 106 untrand female teachers. There are only two untrand male teachers in the Urban Area.

12. 74577 boys and 57735 Girls studying in Govt. Primary Schools in the Distt. Out of which 2524 boys and 1295 girls belong to scheduled castes. No student belongs to scheduled tribe.

13. In the gross enrolment ratio, 97.96% boys and 82.84% girls are enrolled in the rural area where as 81.77% boys and 89.57% girls are enrolled in the Urban Area. In the age-group of 6-11, the percentage of boy is 88.14 & of girls is 76.09 in the rural area. In the Urban area this ratio comes to 62.16 ~~xxx~~ for boys and 74.18 for girls.

In the rural area, the teacher Pupil ratio is 1: 44.58.

In the Urban area, It is 1: 39.67.

The percentage of girl student in rural area is 42.44 and in urban area it comes to 49.11.

CHAPTER-III

UPPER PRIMARY EDUCATION

1. There are Upper Primary schools in 218 habitations having a population of 707093. 202 habitations having a population of 298086 are such where students have to walk from 1-3 Km. to reach the school. 118 habitations having a population of 138426 are such where students have to walk more than 3 Km. to reach their respective school.

2. Only 36 new upper Primary schools needed to be opened to save

2. 72 habitations with a population of 168619 are served by Higher Sec.School either locally or within 8Km, 466 Habitations having a population of 974986 are situated beyond 8Km. from the Higher Sec. Schools.
3. There are 130 Secondary Schools in the rural area and 36 in the Urban area. There are 134 sections in the rural secondary schools and 44 sections in the Urban Sec. Schools.
4. There are Four High Sec. Schools in the rural area and 8 in the Urban area.
5. Library Facilities are available in 123 sec.Schools in the rural area and 36 Sec.Schools in the Urban area. All the Hr.Sec. School both rural and Urban area have libraries.
6. In the rural area, 1146 trained male teachers and 512 trained female teachers teach secondary classes and 4 untrained teachers also teach secondary classes. In the Urban area 185 trained male and 334 trained female teachers alongwith 21 untrained male and 8 untrained female teachers teach in the secondary schools. 63 male and 27 female teachers work in rural Higher sec. schools where 28 male and 25 female teachers work in Urban Higher sec.schools.
8. 78 Sec.Schools in the rural area and 44 in the Urban area are equipped with science Laboratories,
9. In the rural area, only one Higher Sec.School has a science Laboratory where as in the Urban area , all the eight Higher Sec.Schools have Science Laboratories.
10. 216 Science masters and 57 science Mistress teach the subject of science in rural and Urban area respectively. No of Science Masters in Sec.Schools is:-

<u>B. BC.,</u>	<u>B.Ed.</u>	<u>M.Sc.</u>
*****	*****	*****
No. of Science Lecturers/masters in Hr.Sec.Schools is:-		
<u>B. Sc.,</u>	<u>B.Ed.</u>	<u>M.Sc.</u>
*****	*****	*****
11. Enrolment in rural sec. Hr. Sec. schools is 11585 boys and 7611 girls, out of which 1563 boys & 605 girls belong to S/C in secondary Schools where as 39 boys and 8 girls belonging to S/C study in Hr.Sec.Schools.
12. 156 Sec.Schools have drinking water facilities, 155 have Urinals, 134 have Lavatories, 112 have been medically checked and students of 145 schools have been vaccinated. Eleven Hr.Sec.Schools have Drinking water facilities and Urinals. Ten have lavatories and 11 schools have been medically checked
13. 169 Sec.& Hr.Sec.Schools have Physical education teacher
14. There has been no enrolment in vocational courses at +2 stage in Hr.Sec.Schools.

3. There are 101 Upper Primary schools in 208 Villages where S/c Population is upto 25% and 125 Upper Primary schools in 306 villages where 26-50% S/C people reside.
4. In the rural area, there are 92 upper Primary Govt. Schools and in the Urban area, there are four upper Primary Govt. Schools, One Private aided and four Private unaided schools.
5. In the rural area, 86 schools have Pucca buildings, 4 have Partly Pucca buildings and two schools working open space. In the Urban area, there are Pucca buildings in all the schools.
6. 85 Upper Primary schools, have library facilities.
20 Upper Primary schools have Dictionaries.
51 Upper Primary schools have news papers.
7 Upper Primary schools have Magazines.
7 Upper Primary schools have Text-books.
7. In the rural, 92 schools have Drinking water facilities.
92 schools have Urinals facilities.
79 Schools have separate Urinals for girls.
67 schools have Lavatory facilities.
46 schools have separate Lavatory for girls.
9 schools students have been medically examined.
83 schools students have been medically vaccinated.
In the Urban area, 9 schools have drinking water facilities.
9 schools have Urinals.
9 schools have Separate Urinal for girls.
7 schools have Lavatories.
7 schools have separate Lavatories for girls.
9 schools have been medically checked.
9 schools have been medically vaccinated.
8. In the rural area, 424 male teachers and 176 female teachers work in the Govt. upper Primary schools. In the Urban area, 195 male & 319 female ~~219~~ teachers, 9 Untrand female teachers work.
9. In the rural area 25077 boys and 16236 Girls studing in the upper Primary schools. Out of which 4535 boys and 1659 Girls belong to S/C.
10. The gross enrolment ratio in the upper primary in 11-14 age-group is 47.59% for boys and 29.21% for girls in the rural area. This percentage comes to 77.93 for boys & 81.28 for girls in the Urban area. In the age-group of 11-14, the percentage of boys is 40.25 and that of girls is 25.48 in the rural area where as in the urban area, it is 62.44% for boys and 64.04% for girls. The teacher pupil ratio in rural area is 1: 45.2 and in the Urban area it is 1: 26.72. The percentage of girls students in the rural area is 34.39 and in the urban area it is 48.67.

CHAPTER IV

SECONDARY AND HIGHER SECONDARY

EDUCATION (+2 STAGE)

1. Out of 538 habitations having a population of 1143605, 12 are served locally by secondary schools, 402 habitations having a population of 636852 are such where students have to walk 2-8 Km. to attend a secondary school, 12 habitations, having

Prepared by Sh. Jagdish Rai Singla.
J.B.T. Teacher,
B.P.E.O. Sangat.

District Survey Officer
Bathinda.

It is a matter of great pleasure that the S.C.E.R.L. has under taken the project of having an educational survey of all the Districts of Punjab. No planning is possible without proper survey of the present set up in the Distt. and the state deficiencies and short comings can be detected only after having a proper survey of the existing facilities. If we do not know about the needs and short comings, no policy can be framed and no implementation can take place. A sincere effort has been made by the team of the Distt. engaged in the survey work. Data has been collected and arranged properly. Sh. Jagdish Rai Singha Teacher cum clerk B.F.E.O. Office Sangat has worked very hard to complete the survey report. I am very thankful to Sh. Ranjit Singh Dhillon District Education Officer (P) for deputing him for this work. Sh. Ram Ji Dass Uppal Headmaster G.H.S. Kot Bhara and Sh. Sat Parkash Headmaster G.H.S. Naruana have contributed a bit by translating the Punjabi version into English. Sh. Sukhdev Singh the dealing clerk also worked very hard to complete this project. I fully hope that the report will serve a very useful purpose in the future planning and implementation of Educational Schemes.

(Baldev Krishan Sing^h)

District Education Officer,
Bathinda.
