PREFACE

The current issue of the **STATISTICAL HANDBOOK OF MANIPUR** which is the Eighth in the series relates to the year 1982 and presents, in a concise form, statistical information on various aspects of the economy of the State. It is designed to serve as a handy source of reference to all users of statistics.

Most of the data presented herein are collected from various State/ Central Government Departments and also from published papers. In spite of our best efforts to incorporate the latest data, it has not been possible to do so in a few cases. The sources of data are indicated at the foot of each table.

The continued co-operation extended by various departments/offices/ statutory bodies in making available upto-date data with which they are concerned is gratefully acknowledged. I should also thank the officers and staff of this Directorate, particularly of the Printing Press Unit, who directly or indirectly are responsible for timely publication of this Handbook in spite of various limitations.

Suggestions for improvement of the quality and coverage of the future issues of the Handbook are most welcome.

*To convert degrees Fahrenheit to degrees celsius, subtract 32 from the °F and multiply by $\frac{5}{9}$.

For example :

$$C^{\circ} = \frac{5}{9}(\text{°F} - 32). \text{ When } 50^{\circ}\text{F} = \frac{5}{9}(50 - 32) = \frac{5}{9} \times 18 = 10^{\circ}\text{C}.$$

*To convert degrees celsius to degrees Fahrenheit, multiply the C by $\frac{9}{5}$ and add 32.

For example :

$$\text{°F} = \frac{9}{5} \times C + 32. \text{ When } 50^{\circ}\text{C} = \frac{9}{5} \times 50 + 32 = 90 + 32 = 122^{\circ}\text{F}.$$
