4TH ALL INDIA EDUCATIONAL SURVEY

I N T R O D U C T I O N

Educational Surveys have an important role to play in the planning of educational facilities. The Government of India have accorded high priority to the programme of universalisation of elementary education in the Sixth Plan with a view to provide free, compulsory, universal education to the children of the age group 6-14 within a period of 5 to 7 years.

The conference of Education Ministers of States and Union Territories held on 10th and 11th August, 1977 at New Delhi strongly recommended that " every effort should be made to realise the goal of Universal Elementary Education (age group 6-14) by the end of Sixth Plan. Each State and Union Territory, therefore, are required to prepare State Plan for implementing the programme of Universalisation of Elementary Education based on Block Level Plans with Special Programmes for girls, schedule castes, schedule tribes and other weaker sections."

NIEPA DC

D00377

(2)

For preparation of practicable and realistic plan leading to universalisation of elementary education for the age group(16-14) it was considered necessary to have upto-date base-line data of educational facilities available in the States and Union Territories. It was in this context that the 4th Educational Survey was conducted on a crash-basis confining it only to school education.

Prior to this, three Educational Survey had been conducted. The first one was conducted in the year 1957 with a view to plan location of schools on rational basis so that uneven distribution of schools might be corrected to some extent.

The 2nd Survey was conducted in the year 1965 for planning better provision of educational facilities during 4th plan.

The 3rd Survey was conducted in the year 1973 with much wider scope and coverage compared to 1st and 2nd Surveys which were confined to school education only. It covered educational system right from pre-primary to University Education and all types of educational institutions including technical and vocational ones.

(3)

The comprehensive data collected in the 3rd Educational Survey would, no doubt, be of great use in the formation of plan programme. However, the data needs to be updated, particularly for preparing realistic and operational plans for universalisation of elementary education. The up-dated data will be necessary for preparing habitation-wise and villagewise block plans.

Conduct of the 4th Educational Survey was, therefore, absolutely necessary to know the progress that has taken place during the intervening period, from 1973 to date. It was in this context that 4th Educational Survey was conducted in Manipur.

The main objectives of the Fourth Educational Survey are as follows:-

- i) To assess the present position of the provision of educational facilities at various stages of school education in respect of coverage of school-going population, the distance to be covered by a child to have access to the school, enrolment of children belonging to weaker section of the society and girls enrolment etc.;

(4)

- ii) To assess the availability of minimum basic facilities in the school such as building, furniture, library, equipment, health and sanitation and incentives;
- iii) To prepare block maps with existing schooling facilities and to identify clusters of habitations where institutions ought to be opened or existing schools ought to be upgraded; and
- iv) To prepare the ground for conducting quarterly monitoring of information relating to school attendance, and systematic updating of the data relating to enrolment and other educational facilities provided in institutions at block-level annually.

These objectives of the survey envisage the collection of information on the following main items:-

- a) Enumeration of every distinct habitation,
- b) Enumeration of every primary, middle, secondary and higher secondary school/intermediate/pre-university/junior college ,

(5)

- (c) Habitations with and without educational facilities at primary, middle, secondary and higher secondary stage,
- (d) In case of habitations without schooling facilities at these stages, the distance at which these facilities are available and also habitations under various population slabs,
- (e) Schooling facilities at various school stages in habitations predominantly populated by scheduled castes,
- (f) Schooling facilities at various school stages in habitations predominantly populated by scheduled tribes,

(6)

- (g) Proportion of Scheduled Caste population in villages and schooling facilities in them,
- (h) Proportion of Scheduled Tribe population in villages and schooling facilities in them,
- (i) Age-wise enrolment of pupils at various school stages(class-wise),
- (j) Age-wise enrolment of pupils belonging to Scheduled Castes and Scheduled Tribes,
- (k) Qualifications of teachers (stage-wise) working in schools, and
- (l) Proportion of girls in schools.

The decision to conduct 4th Educational Survey in Manipur was taken by the Govt. of Manipur in September, 1973 and a State Survey Officer was posted in the Directorate of Education From 22nd Sept., 1978. The State Survey Officer was provided only the following supporting staff at State Level, for conducting the Survey:--

1. One Assistant Survey Officer.
2. One District Survey Officer.
3. Two Statistical Assistants.
4. One Stenographer.
5. L.D.C. (One)

Director of Education, Govt. of Manipur placed the services of all Assistant Inspector of Schools posted in the office of the District Education Officers/Inspectors of Schools/Deputy Inspectors of Schools at the disposal of the State Survey Officer for collection of information on schools and villages from November, 1978 to Feb., 1979. THE DATE FOR REFERENCE OF THE 4TH EDUCATIONAL SURVEY WAS 30-9-1978.

The Survey being very large and comprehensive, the processing and presentation of the results took time. Academic and technical guidance for compilation of the results of the Survey were provided by the N.C.E.R.T., New Delhi.

It was due to hard work, put in by several individuals and excellent co-operation extended by all concerned that the Survey Work could be completed timely and successfully.

In order to make the basic data available to educational planners and users, the present report is brought out. It is hoped that this report will prove useful to educational planners and administrators who needs the latest educational statistics in connection with their day to day work.

I am grateful to the officers and others who helped me in bringing out this report.
